Abstract

This thesis illustrates that place-names are an essential resource for our understanding of Scottish medieval rural society, with a particular emphasis on Menteith. Place-names are an under-utilised resource in historical studies, and yet have much to inform the historian or archaeologist of how people used and viewed the medieval landscape. We know a great deal of the upper echelons of Scottish medieval society, especially the politics, battles, and lives of significant figures, such as various kings and great barons. However, we know next to nothing of the people from whom the nobility derived their power. The thesis is divided into two parts. Part 1 begins by defining the extent and geography of the medieval earldom of Menteith. The source material is analysed, highlighting the advantages and pitfalls of different sources that can be used for place-name studies. The different languages spoken in Menteith in the Middle Ages, ranging from P-Celtic to Scottish Gaelic to Scots, can be seen in the onomastic evidence. A crucial question that is explored, if not fully answered, is 'what P-Celtic language was spoken in Menteith: British or Pictish?'. This is followed by an exploration of what we know of the Gaelic language in Menteith. Documents and place-names allow us to pinpoint the beginnings of the change from Gaelic to Scots as the naming language in the area to the later 15th C. A brief survey of the historical background shows the influence the earls of Menteith and other nobles may have had on the languages of the earldom. The final two chapters of Part 1 look at the issue of using place-names as a historical resource; Chapter 5 explores secular activities, such as hunting and agriculture. Chapter 6 is a case study examining how place-names can inform us of the medieval church. Part 2 is a survey of the place-names of the six parishes that consisted of the medieval earldom of Mentieth, including early forms and analysis of the names.

Place-names in *italics* indicates an early form. However, note that a Gaelic reconstruction of an Anglicised place-name will also appear in italics within brackets after the place-name, e.g. Anie CLD (Àth an Fhèidh ‘ford of the deer’).

A place-name depicted in *bold* and often followed by a parish abbreviation in Part 1, e.g. **Callander** CLD or **Gartenjore** CLD, indicates a cross-reference to early-forms and the associated discussion that can be found in Part 2.
Acknowledgements

I would like to thank my supervisors, Professor Thomas Clancy and Dr Simon Taylor, in the first instance. Not only have they been patient and considerate in their dealings with a student who must have seemed he had at times reverted to being the coachbuilder he was, their own high standards of research have been an inspiration that I have tried to live up to. I can only hope I have gone some way to succeeding. Dr Taylor has been a great hill-walking companion as well as a teacher. I should like to record my thanks to others in the Celtic and Gaelic Department who assisted in my PhD education: Professor Roibeard Ó Maolalaigh, for his teaching of Old Irish and Gaelic Phonetics; Dr Sheila Kidd and Dr Aonghas MacCoinnich, for Gaelic 1B; Dr Katherine Forsyth, the departmental Post Graduate convener; Ms Carol Smith, the departmental secretary, without whom everything would have surely fallen apart. The other great thanks must go to Professor Dauvit Broun of Scottish History, who smoothed my path through university as an undergraduate by being my Advisor of Studies, and then successfully guided me through my MPhil in Medieval Scottish Studies. It was this course that kindled my interest in place-names, and Professor Broun was kind enough to steer me through my PhD application. It is fitting, therefore, that Professor Broun was the Internal Examiner for my PhD, along with my External Examiner, Dr Mícheál Ó Mainnín of Queens University Belfast; my grateful thanks to both for suggestions to improve the text of this thesis. Other Glasgow University staff include Gilbert MáRKUS, the research assistant on the AHRC Place-names project, for his help and suggestions, especially with the saints’ cults, and general good humour; Dr Amanda Beam-Frazier, Dr John Reuben Davies, and Dr Matthew Hammond of the PoMS project in the AHRC research ‘cabin’, who have always been ready to help with a request concerning documents relating to 11th-13th C Scotland; and of course my fellow PhD students in Celtic and Gaelic and Scottish History, especially Sarah Erskine, Iain
I would like to gratefully acknowledge funding from the AHRC, without which I could never have attempted this project. I have had the fortune to be able to discuss aspects of this thesis and other topics connected in some way to it with many other scholars from other universities and institutions in the course of this work and I have learned a great deal from them all. In particular Alex Woolf, Alasdair Ross, Michael Newton, Richard Cox, Rachel Butter, Paul Tempan, Mhairi-Claire Semple, Oliver O’Grady, Kimm Curran, Peadar Morgan, Chris Fleet, Dàibhidh Grannd, and many other people who I’ve met at conferences in Glasgow, Edinburgh, Leeds, and Belfast. Jake King of Ainmean Àite na h-Alba gave advice on modern forms of Gaelic place-names. Thanks must also go to John Harrison of Stirling who has been a great help regarding the area around Flanders Moss. The staff at the National Archives of Scotland, National Library of Scotland, Glasgow University Library and Stirling and Bridge of Allan libraries, were all very helpful and attentive to my requests for maps, documents and books. The pronunciations of the place-names were generously given by many farmers and property-owners throughout Menteith. Michael Ansell, a committee-member of the Scottish Place-name Society and native of the Glenkens in Galloway, but during the week resident on the slopes of Dumyat above my home village of Menstrie in the parish of Logie, has been a very useful source of information regarding earrann-names in Galloway and we have often discussed place-names by email and at times in one of Menstrie’s hostelries.

Finally, I would like to acknowledge a tremendous debt of love and gratitude to two people without whom this university life for an ex-coachbuilder would not have been possible. My partner Kirsti Tindall, herself a graduate of the Archaeology Department at Glasgow, has been a great source of encouragement and love for the past ten years and has recently given birth to my wee boy, Hamish. The other person is my mother, Moira. Having encouraged my interest in history since I was a boy, and knowing that I was fed up building buses, she
suggested I go to university at the age of thirty-four. Regretfully, she did not live to see me complete my undergraduate degree. It is to her memory that I dedicate this work.
Chapter 1

Introduction

This study will attempt to show that place-names are an essential tool for developing our understanding of rural society in medieval Scotland. The focus here will be mainly on Gaelic place-names in the medieval earldom of Menteith. Place-names are often mentioned by historians and archaeologists as having the potential to inform us of how humans used and viewed the landscape of Scotland in the past. However, many historical researchers have bemoaned the lack of systematic place-name surveys of Scottish counties, which has meant that the ability to use place-names in their work has been greatly hampered. Recent funding from the Arts and Humanities Research Council (AHRC) enabled the research project ‘The Expansion and Contraction of Gaelic in Medieval Scotland: the onomastic evidence’, the main output of which was The Place-Names of Fife series, by Simon Taylor and Gilbert Márkus; this is the first full place-name survey of a Scottish county for over forty years. This PhD thesis is a part of that project, and it was a privilege to be able to gain access to some of the results of the Fife material, which helped inform many issues regarding the Menteith place-names.

The history of a language’s use is intimately connected with social change. However, researching the history of Gaelic speakers when Gaelic was at its peak, and began to decline, before 1300 in eastern Scotland, is difficult using established methods of research. Unlike England, which has many manorial and estate records, and of course Domesday Book, there is a marked dearth of such detailed documentation for social history in Scotland as a whole before 1300, and indeed for many parts of Scotland, including Menteith, before the Protestant Reformation. The best source is charters, but their survival is uneven and information limited. New methods have to be employed to tease out Scottish social history, focussing

1 Alex Woolf is merely among the latest to complain of the lack of place-name surveys (Woolf 2007, 330). See also Chapter 5 for discussion of this topic.
particularly on place-names. The potential of common generic elements (such as *baile* in Balkerach KMA) as indicators of widespread social developments is not generally appreciated. There is often an assumption that place-names relate to population movement rather than social change among existing inhabitants. As a result, Gaelic generic elements with an almost exclusively regional concentration, such as *earrann* ‘portion’, have hardly been discussed. Also, a particular generic is often examined in isolation, in terms of its distribution, rather than in the context of neighbouring place-names, landscape and environment, and lordship. Place-name elements also have the potential to indicate areas of specific economic or agricultural activity. What is striking about Menteith is the remarkable prevalence of two place-name elements: one is *gart*, meaning ‘enclosed arable field surrounded by waste’; this element also extends to Clackmannanshire, northern Lanarkshire, as well as the area between Lake of Menteith and Loch Lomond. It is significant, though, that it is prevalent in areas of former forest or waste land, such as bog, perhaps suggesting settlements of foresters or peat-diggers. The other prevalent element is *earrann*, anglicised as *Arn-*, meaning ‘portion, share, division’, some of which can be shown to have been lands belonging to Inchmahome Priory.

In order to build up the social landscape of the area in the context of lordship and environment, this work will use place-names as well as documents, and where possible archaeological evidence, and thus increase our understanding of the dynamic of Gaelic society in Menteith prior to the language’s decline. The area includes secular landlords, such as the earl of Menteith, and ecclesiastical landlords, such as Inchmahome Priory. First of all, however, we need to define Menteith territorially, and say something about its geographical situation in order to understand something of its settlement patterns.
Menteith Physical

Topography, Geology and Soils

Covering an area which is 48 km east to west and 27 km north to south, Menteith has a dual character. The area is dominated by two distinct landforms. There is the flat low-lying Forth valley to the south and east, which contains the lowest point in Menteith, where the Rivers Teith and Forth meet; here the elevation of the land is just five metres. The mountains and hills to the north and west contain the highest point in the earldom, Stùc a’ Chroin at 975 m. The reason for this dichotomy is because the district is split in two by the Highland Boundary Fault (HBF). This fault line runs on mainland Scotland from the northeast near Stonehaven to around Helensburgh in the southwest. As far as Menteith is concerned the HBF runs just north of Aberfoyle and Kilmahog and on through Glen Artney. The effects that this major geological fault has had on the history of Scotland in general and Menteith in particular have been profound. It has not only determined the type of agricultural activity on either side of the fault, but it has also been a major cultural and linguistic boundary, and this will be explored more fully in Chapter 3.

Menteith is influenced by air masses from both the Atlantic and the Continent. These have combined with a ‘diverse interaction between geology, geomorphology, climate and soils’ to form the ‘basic infrastructure’ of the landscape (SNH 2005, 7). The geology2 is extraordinary and too complex for this thesis to go into in detail. The rocks on the northern side of the HBF are of the Dalradian Supergroup and contain harder metamorphic rocks, mainly schists, gneisses, and quartzite, laid down around 570 million years ago (Browne, Mendum, and Monro 1993, 1). Those rocks to the south are younger Devonian rocks (around 400 million years old), mainly of softer Old Red Sandstone. In the middle of all this is the Highland Border Complex, the remains of a small ocean containing grits, shales, limestones and pebbly

2 More on the geology can be found at Loch Lomond to Stirling: Landscape fashioned by Geology, an online SNH publication, at http://www.snh.org.uk/publications/on-line/geology/loch_lomond_stirling/default.asp.
conglomerates (SNH 2005, 7-9), the physical manifestation of which is the Menteith Hills that
overlook the Lake of Menteith. More recent geological and climatic events have also left their
mark on Menteith. A series of glaciations have shaped the area. The most recent was the Loch
Lomond Re-advance of around 10,000 years ago. Glaciers reached Callander and Lake of
Menteith (Browne and Mendum 1997, 18). Apart from the more obvious effects, such as the
U-shaped valleys of Loch Lubnaig and Loch Katrine, glaciation also produced a series of
terminal moraines that can be seen immediately to the east and south of Lake of Menteith and
north of Arnprior and Buchlyvie. These have created ridges of higher areas in the flat
carselands of the Forth (Evans and Rose 2003, 49). The Lake of Menteith was created out of a
depression caused by the glaciation process. The carselands were formed by the most recent
geological event: the retreat of the ice and the flooding of the lower parts of Britain by the sea.
This produced a deposit of estuarine clays in the Forth valley which are now above sea-level
due to the isostatic rebound of the land after the departure of the ice (Mithen 1999, 37). The
result is a very fertile valley, but one that until the late 18\textsuperscript{th} century was a peat bog in many
parts. This rebounding of the land after the removal of the ice has left some raised beaches
which can be seen in the area between Kippen and Buchlyvie.

The soils reflect the complexity of the underlying geology and past geomorphological
processes. Brown forest soils are the most widespread away from the areas containing the
carselands and the higher ground to the north and west. The carselands are made up mostly
of gleys.\textsuperscript{3} A more detailed survey can be seen in Grieve (1993). Grieve also produces a map
showing the agricultural uses of these soils (1993, 38; see Map 2), which demonstrates that
there is a marked difference between the Highlands and the Lowlands in terms of crop

\textsuperscript{3} Gleys are widespread throughout Scotland, being developed under conditions of intermittent or permanent
waterlogging. Gleys are often confined to depressed or receiving sites where anaerobic conditions result from the
periodic or long-term waterlogging, either a direct result of surface water collection or groundwater conditions.
They also occur where the soil is dense and water is prevented from moving through the soil
(http://www.macaulay.ac.uk/explorescotland/gleys.htm).
growing ability, with the Lowlands having the best of such land. The Highlands, on the other hand, are more useful for pastoral activity.

**Water courses**

Menteith is dominated by two water courses, the River Teith and the River Forth. Until the two rivers meet about three kilometres north-west of Stirling Castle, the Teith can be said to be the greater of the two rivers, and it could be argued that the Forth is a tributary of the Teith rather than the other way round. The Teith is fed from the north by a number of lochs and burns to the north and west of Callander. The waters of Loch Doine and Loch Voil BQR, flow into the River Balvag through Strathyre and into Loch Lubnaig. Below this loch the river is named the Garbh Uisge ‘rough water’. From the west the Teith is supplied by Lochs Katrine, Achray, and Venachar. This system meets the Garbh Uisge via the Eas Gobhain ‘smith waterfall’ at Callander. As their names suggest, both these rivers are noted for their swiftness, but when they meet at Callander the change is remarkable: the river (now the Teith) becomes slow moving and quiet and forms a floodplain, which the river often reclaims in times of heavy rainfall. The Teith has a number of tributaries from this point, especially from the north via Stùc a’ Chroin and the Braes of Doune. Among the more notable of these tributaries are the Kelty Water, Annat Burn, and Ardoch Burn. The Teith flows fairly steadily from Callander through an undulating Lowland valley with no great deal of meandering until it reaches the River Forth at Drip, just 3km NW of Stirling Castle.

The River Forth has a different character altogether. Flowing down the slopes of Ben Lomond via Lochs Chon and Ard, it runs at first through a Highland landscape not unlike that of the upper reaches of the Teith drainage system. Once the Forth and its tributaries reach the area around Gartmore, however, the landscape could scarcely be more different. The ground from Gartmore to Stirling, a distance of 25 km, is among the flattest to be found in the British Isles. It rises from five meters at the confluence of the Teith and Forth near Stirling to only
seventeen metres at Baad Spring, just south-east of Gartmore. The result is that the Forth takes a slow, meandering journey along the flat carse lands. These carse lands are hemmed in by the steep-sided Gargunnock Hills and the more gently sloping Kippen and Ballindalloch Muirs to the south. To the north is a ridge of higher ground between Thornhill and Callander which separates the Forth valley from the Teith.

**Defining Menteith**

The earldom of Menteith occupied that area of central Scotland basically to the east of Stirling and to the west of Loch Lomond (see Map 3). The earldom of Menteith was centred on the islands in the Lake of Menteith. The island of Inch Talla was one of the principal residences of the earls of Menteith. The neighbouring island of Inchmahome was home to a group of Augustinian canons based in the priory there founded in 1238 by Walter Comyn. Menteith sat between two other earldoms: Lennox lay to the south and west and Strathearn to the north and north-east. To the east were the shires and later sheriffdoms of Stirling and Clackmannan. Menteith was one of the ancient provinces of *Scotia*, i.e. Scotland north of the Forth and Clyde isthmus (Broun 1998, 6), and yet it is not always clear what constituted the area said to be Menteith. The difficulty in defining the area is not helped by the fact that the documentary evidence for Menteith is often sparse and erratic. Some parts of the earldom can be well documented throughout the medieval period, while others areas only have more plentiful documentation from the 16th C. This inconsistency is exemplified by the priory of Inchmahome: in the most accessible volume of printed material there is a foundation charter dating to 1238 and then next to nothing until 1526 (see Fraser, *Menteith*). Menteith does not come on record until about 1164 when a Gilbert, earl of Menteith is listed as a witness to a charter of Scone Abbey (*RRS* i, no. 243). The area itself is mentioned in a subordinate role to Strathearn (*stradeern cum meneted*) in *De Situ Albanie*, a source that has been dated to the reign of William I, perhaps between 1165 and 1184 (Skene 1867, 136; Skene 1880, 42-3;
According to this source Menteith was a *subregio* of Strathearn. While the area of this *subregio* is never at any time precisely marked out, we can say that it included at least the valley of the River Teith. The question is how much of the area on either side of this river can we say was in the district of Menteith?

Part of the problem with trying to define the territorial extent of Menteith is that the sources are not always in complete agreement. Indeed, our most convenient sources for determining the extent of the earldom are extremely late. *The Gazetteer of Scotland* of 1848, and Francis Groome’s version of 1880, tells us that Menteith ‘comprised all the lands west of the Ochil Hills in Perthshire, whose waters discharge themselves into the Forth’ with the exception of Balquhidder parish which was historically part of the earldom of Strathearn (Gazetteer 1848; Groome 1882, under *Monteith*). According to the 1848 gazetteer the district of Menteith included the parishes of Callander, Aberfoyle, Port-of-Menteith, Kilmadock, Kincardine, and Lecropt, and parts of the parishes of Kippen, Dunblane, and Logie. In the *Red Book of Menteith*, Sir William Fraser largely concurs with this assessment; he states the parishes of Port-of-Menteith, Aberfoyle, Callander and Leny, Kincardine, Kilmadock, Lecropt, Dunblane, Logie, and parts of Kippen ‘are included in the district known as Menteith’ (Fraser *Menteith*, xvii). Fraser adds Leny to Callander, but we may still question whether the *whole* of the parishes of Dunblane and Logie were in Menteith. Another author, meanwhile, states that the territorial extent of the earldom of Menteith ‘comprises the modern parishes of Callander, Kilmadock, and Lecropt, with portions of Logie and Dunblane, all lying north of the central ridge; and Aberfoyle, Port of Menteith, Kincardine, and part of Kippen, on its southern slopes’ (Hutchison 1899, 2).

---

4 An alternative date between 1202 and 1214 was proposed by Daevit Broun (2000). However, Prof. Broun has since gone back to believing the date to be between 1165 x 84 for reasons that are complicated, but which depend on how the evidence of Cambridge, Corpus Christi College MS 139 and the MSS copied from it are interpreted (Broun pers. comm.).
The uncertainty of the boundary of the district of Menteith is then compounded yet again by our fourth and most modern source, J.H. Cockburn’s *The Medieval Bishops of Dunblane and Their Church* published in 1959. Here Cockburn states that medieval Menteith ‘comprised the parishes of Aberfoyle, Leny, Port-of-Menteith, Callander, Kilmahog, Kincardine, Kippen, Dunblane, and part of Logie’ (Cockburn 1959, 7). In this list it appears that Leny was a separate parish from Callander, as was Kilmahog, and only part of Logie is included, but Lecropt is absent. This is probably because Lecropt was a detached part of the diocese of Dunkeld (McNeil and MacQueen 1996, 353). Cockburn has included Leny and Kilmahog as separate parishes because, although they had been long subsumed into Callander, they were discrete parishes in the Middle Ages. He does not mention Kilbryde in this list, which was also a separate parish in the Middle Ages, as shall be seen. He includes presumably the whole of the parishes of Dunblane and Kippen. Although he does not mention the division of Kippen between Stirlingshire and Perthshire prior to 1891, it seems unlikely that Cockburn would have been unaware of it, but it is surprising that he has not commented on the fact.

The situation regarding the parish of Kippen is odd. Kippen lies south of the River Forth. It is also notable that Kippen is in a sort of no-man’s land with the parishes of Drymen and Balfron to the west and south, which were in the Lennox, the successor to the kingdom of Dumbarton or Strathclyde north of the River Clyde, and was in the diocese of Glasgow. To the east was the parish of Gargunnock, originally a part of the parish St Ninians or Eccles. St Ninians formed the core of the *castrensis provincia*, or the province of the castle of Stirling (Duncan 1975, 161), which was probably the soke or shire of Stirling, extant by the reign of Alexander I (1107-24) (*RRS* i, 40), and it formed part of the diocese of St Andrews and was probably earlier part of the region of Manaw. There is a tradition, the dating of which is uncertain, that the parish church of Kippen was the burial place of the indigenous Gaelic earls of Menteith (*Camb. Reg.* cxxix; Hutchison 1899, 123). Kippen was also split internally, between STL and PER, which may be a result of later tenurial holdings. The largest PER
portion almost certainly consisted of lands belonging to the priory of Inchmahome; while parts of the largest STL portion belonged to the Livingstones of Callendar, near Falkirk, STL. Duncan is of the opinion that it was not until the later medieval period that some of the eastern parishes of Lennox were attached to Stirlingshire (Duncan 1975, 161).\(^5\) Kippen, however, was in the earldom of Menteith in 1238 when the church was granted as a prebend to Dunblane Cathedral (Cowan 1967, 116).

Two of our modern sources – Fraser and Cockburn – seem to include the whole of Dunblane parish in the earldom of Menteith, when in fact the situation may be more complicated than that. The 1848 Gazetteer has only part of the parish of Dunblane in Menteith. The obvious question is: which part? The most likely candidate not to be included in the earldom of Menteith is the medieval parish of Kilbryde centred on the church at NN77560277, three km north-west of Dunblane Cathedral. Kilbryde was a separate parish at the Reformation (Kirk 1995, 343). It was united with Dunblane in the sixteenth century\(^6\) but was still a barony in the following century.\(^7\) The reason why it was probably not in Menteith is that it was given to the abbey of Inchaffray by Gilbert, earl of Strathearn in 1203 x 1219 (Cowan 1967, 95), although the barony of Kilbryde was part of the holdings of the post-1427 earls of Menteith. It seems probable that Kilbryde was a detached portion of the deanery of Strathearn within the deanery of Menteith. This is not so unusual a situation for Strathearn parishes; Culross and Tulliallan were detached portions of Dunblane diocese (Strathearn deanery?)\(^8\) surrounded by St Andrews diocese (Fothrif deanery) and detached parishes of Dunkeld. A further complication arose in 1855 when the parish of Ardoch was created out of the parishes of Muthil, Blackford and Dunblane (Corbett and Dix 1993, 174).

\(^5\) These parishes were Drymen, Balfron, Fintry, Killearn, and Buchanan or Inchcailloch.
\(^6\) RCAHMS Canmore, NMRS No. NN70SE 36.
\(^7\) NAS GD49/232 dated 1632; NAS GD22/3/637 dated 1644.
\(^8\) There are no sources to say which parishes were in which deanery, and so we cannot be sure which deanery the parishes of Tillicoultry and Tullibody were in. Culross and Tulliallan may have been in the deanery of Strathearn, as they are usually mentioned as being in the ‘senescallatum de Strathearn’ for much of the Middle Ages and beyond (Taylor 2006, 223).
Menteith was part of the diocese of Dunblane until the Protestant Reformation of 1560. The cross-slabs inside Dunblane cathedral seem to suggest that there was a church at Dunblane from an early date (Rogers 1997, 85). Stephen Driscoll argues that the sculpture on the cross-slabs ‘hint at [Dunblane’s] early importance’ (Driscoll 2002, 47). It is unclear when Dunblane became the chief seat of the bishopric because there was a community of Céli Dé at Muthil, and it is possible that it was this institution that was the main ecclesiastical focus of the area in early medieval times (Cowan and Easson 1976, 204; MacQuarrie 1992, 128-9; Semple 2009, Chapter 5).

By 1155 the diocese had been reconstituted and by the 13th C, bishops used the title of Dunblane or Strathearn, suggesting that Dunblane was originally part of Strathearn (Inchaffray Chrs nos. 3 and 13; Neville 2005, 150). Indeed, Rogers (1992, 345) asserts that Dunblane was not in Menteith, but, along with Kilbryde, ‘formed the most southwesterly part of the earldom [of Strathearn].’ He argues that this was because the earls of Strathearn were prominent in the reconstitution of the see of Dunblane in the mid 12th C, and were recognised by the papacy to have held the patronage of the episcopal church.

By the thirteenth century the diocese was split into two sections headed by the deans of Muthil or Strathearn, and Menteith (later Dunblane). It would seem that the territory of the deanery of Menteith/Dunblane was coterminous with the earldom of Menteith (Cowan and Easson 1976, 204; Fasti (Watt and Murray), 120). However, that does not necessarily mean the parish of Dunblane was in any secular lordship of Menteith; unlike the other parishes of this study it is never mentioned as being in the earldom or stewartry of Menteith. Indeed, in 1535 the lands of Cambushinnie and Glassingall, both in DLE, are referred to as being ‘in senesc[allatum] de Stratherene’ (RMS iii, nos. 1559, 1560). While a study of the parish of

---

9 After the Reformation the diocese of Dunblane was subject to a complicated reorganisation, and parts of Menteith appear in the Presbytery of Dunblane, while others were in the Presbytery of Stirling (see maps in McNeill and MacQueen [1996, 382-91]).

10 Inchaffray Chrs no. 3, dated to 1198 has Jonatha Episcopo de Strathern, while no 13, dated to 1200 has Ionantha episcopo de Dunblanensi.
Dunblane and Lecropt is of course desirable, it will not be included in this thesis for the simple reason it was not in Menteith, at least in the secular sense. The reason the parish of Dunblane was in the deanery of Menteith may simply have been an administrative ploy, and possibly has much to do with Bishop Clement asserting the independence of his episcopal authority and his cathedral from the pernicious influence, as he saw it, of the earl of Strathearn (Neville 2005, 153). There is a notable conjunction of the establishing of Dunblane as the see and the first appearance of the deanery of Menteith. Clement was elected bishop in 1233 (Chron. Melrose 82; Fasti (Watt and Murray), 100); he moved the seat of his diocese permanently to Dunblane the following year (Macquarrie 1992, 129), and the first mention of the deanery of Menteith is 1235 (Fasti (Watt and Murray), 120). The parish of Dunblane may have been a parish which was in reality independent of both Strathearn and Menteith, and was a territory which was under the direct jurisdiction of the bishop.

The parish of Lecropt, still independent of Dunblane after the 1891 reorganisation of Scottish counties and parish boundaries, was granted to Cambuskenneth Abbey in 1260 (Camb. Reg. no. 184). Lecropt was in the diocese of Dunkeld, and is part of a small group of Dunkeld parishes on the southern fringe of the territory of the diocese of Dunblane, including Alva and Dollar (Cowan 1967, 129; McNeil and MacQueen 1996, 353). It was not, so far as I am aware, ever mentioned as being in any secular lordship of Menteith in the medieval period. This small parish was united with Dunblane parish in 1898 (Corbett and Dix 1993, 174).

A document dating to 1261, but reproducing material from a charter dating to 1213, shows that the lands of the earls of Menteith were spread over a wide area (see comment RRS ii, no. 519; CDS, i, no.2276; SP vi, 126). The document formed part of an agreement between two brothers, both confusingly named Maurice. The brothers were distinguished by the

11 The document is an inspeximus of Henry III of England drawn up during a dispute over the inheritance of the earldom after the murder of Earl Walter Comyn in the late 1250s (Duncan 1975, 583).
appellations elder and younger. Both brothers had claims to the earldom, and after arbitration by Alexander, future king of Scots (as Alexander II), Gilbert of Strathearn and Malcolm of Fife, the younger Maurice became earl of Menteith, perhaps due to more appropriate inheritance rights. The Maurices came to an agreement whereby the elder would hold the lands of Muylin (Malling PMH) and Radenoche (Rednock PMH), as well as Tum (Thom? PMH), Cacelyn (Cashley DRY STL), Brathuli (Bracklinn CLD), and Cambuswethe (Cambuswallace? KMA). The younger Maurice also gave his brother the lands of Saveline (Saline SLN FIF), Mestryn (Menstrie AVA CLA),kenelton (Kinneil? Bo’ness and Carriden parish WLO NS9875), and Stradlochline (Strathlachlan? KMD ARG NS026965) to be used for the marriage of his daughters (see Map 4). The majority of these lands are in Menteith, but Cashley was in the Lennox, albeit only just – it is just one km west of Buchlyvie KPN, Strathlachlan is on the western side of the Cowal peninsula, Saline is in west Fife, and Kinneil is in West Lothian. It will be useful to clear up two names, Saveline and Mestryn. Boardman (2006, 15) displays some hesitation in thinking that these names are Saline SLN FIF and Menstrie AVA CLA. In fact, there can be little doubt that they are. As Boardman states, Menstrie (Mestreth in Watson 1926, 264, quoting ER i, 24) remained in the hands of the Campbells into the sixteenth century (Boardman 2006, 13). But so, too, did Saline, and both places are sometimes mentioned in the same charter. For example, in 1541, Archibald, earl of

12 Details of this dispute and its consequences can be found in Chapter 4.
13 Spellings taken from RRS ii no. 519, which are same as CDS i no. 2276. Fraser (Menteith ii, 214) has ‘Muyline et Radenoche et Tum et Cattlyne et Brathuli et Cambuswethe’ and ‘Saveline...Mestryn et Kenelton et Stradlochlen’.
14 Now lost, but see Retours Perthshire no. 934, dated 1684, ‘...terras de Thom vocata Barnsdaill alias Watsone...’ Watston is at NGR NN715008. For an earlier mention, dated 1317 x 1332, see NAS GD198/38. See also survey of KMA.
15 It is not clear where Kenelton was, but Kinneil WLO may be a possibility as it was called Penneltun by Bede (HE, 59). MacDonald does not have Kenelton in his survey of the place-names of West Lothian (1941, 30-1).
16 Strathlachlan is in western Cowal. While the identification of Stradlochline with Strathlachlan seems reasonable, difficulties arise when it is taken into account that the eponym of Strathlachlan is usually taken to be Lachlan Mòr, whose father and uncle were alive in 1240 (Sellar 1971, 29, 33). Gillespic MacLachlan held Strathlachlan in 1293 (Boardman 2006, 12). In the reign of William I the earls of Menteith had responsibility for the finding of warrantors for disputed goods ‘de Kentire uel de Co mhgal (from Kintyre or from Cowal)’ (A. Taylor 2009, 254, 280).
17 See Taylor (PNF i, 531-2) for discussion of this name.

All the modern sources mention that the parish of Logie, or parts of it, was in Menteith. The lands of Mestryn (Brit. *maes + *trev ‘plain settlement’), mentioned above, are generally held to be Menstrie in Clackmannanshire (Watson 1926, 364; Nicolaisen 1976, 216; Boardman 2006, 15). Menstrie was in Logie parish until 1891 when it was transferred to Alva parish. Around 1178 Bishop Symon of Dunblane confirmed a grant of Logie-Airthrey\textsuperscript{18} by an unknown donor to the nuns of North Berwick and this was witnessed by, among others, John, rector of Kilbryde, and three Culdees from Muthil (N.B. Chr's, no. 5; Cockburn 1959, 29). The church of Logie was further confirmed to the nuns in 1228 by Malcolm, earl of Fife (N.B. Chr's, no. 7; Fergusson 1905, 11-12). What this confirms, however, is that Logie was in the diocese of Dunblane. If the lands of Menstrie, lying in the eastern part of Logie, were part of the earldom of Menteith, it may be that the whole of Logie was in Menteith in the early Middle Ages. However, there is no mention of Logie being in the medieval earldom of Menteith.

So which parishes were in Menteith in the Middle Ages? Perhaps the clearest answer is to be found in the primary sources. The six parishes of the study area are all described as being in the medieval earldom, stewartry, or lordship of Menteith. Aberfoyle (AFE) is said to be ‘in comitatu de Menteith’ in 1489 (RMS ii no. 1862); Callander (CLD) is ‘in comitatu de Mentheth’ in 1451 (RMS ii, no. 465). Of the two parishes subsumed into CLD, Leny is mentioned as being in ‘senescallatum de Menteith in 1599 (Retours PER no. 57), while Garrindewar, in the parish of Kilmahog, is said to be in ‘dominio de Strogartnay, senes[callatu] de Menteith’ in 1572 (RMS iv, no. 2092). Kincardine (KRD) is in the ‘senesc[allatu] Menteith’ in 1503 (RMS ii

\textsuperscript{18} According to Cockburn (1959, 42 n. 13), this parish was also called ‘Logie Woloch’. Unfortunately, Cockburn fails to reveal where he received his information. He has been followed in this by Cowan (1967, 136), who calls it ‘Logie Wallach’. I have found no other mention of Woloch in connection with Logie. Significantly, no mention of Woloch/Wallach is found in OSA, NSA, or in the fullest history of the parish (Fergusson 1905). Logie Wallach is in fact Logie Ruthven or Logie-in-Mar, now Logie Coldstone. Logie Ruthven was dedicated to ‘St Wolock’ (Davidson 1878, 55); for some further details of this saint’s cult in Scotland, see MacKinlay (1914, 142-3). It is not known how the erroneous association between Woloch/Wallach came about.
no. 2707); Kippen (KPN) is ‘in dominio de Menteith’ in 1459 (*RMS* ii no. 672); and Port-of-Menteith (PMH) is *Porte in Menteth* in 1467. Kilmadock (KMA) is not actually mentioned as being in Menteith until 1662 when Coilechat is stated to be ‘in parochia de Kilmadock et senescallatu[m] de Monteith’ (*Retours* PER no. 693). However, other lands in the parish are shown as being in the earldom in the Middle Ages: Doune is shown as *Dwne* in *Meneteth* in 1381 (Fraser 1879, 237), Lanrick is ‘omnibus [et] singulis terris de tribus Lanarkynys in *Menetheth*’ in 1317 x 1332 (NAS GD198/38), and Annet is ‘in dominio de Menteith’ in 1526 (*RMS* iii no. 397).

**Conclusion**

Menteith lies at the boundary between the Highlands and the Lowlands. The geology has determined that there are two distinct parts: the mountainous region to the north and west, and a relatively flat area to the south and east. Both parts have different soils and are suited to different kinds of agriculture: pastoral in the north; arable in the south. Menteith sits on the southern edge of the diocese of Dunblane, at the border of two other medieval dioceses; Glasgow and St Andrews, and is surrounded by two larger earldoms – Lennox and Strathearn – to the north, west, and south, with the royal land of Stirling to the east. As we shall see, it also lay at the cross-roads of three languages, British, Gaelic, and Scots. All of this – geology, geography, and language – has had a major impact on the nomenclature of Menteith. However, before we can study the place-names and social history of Menteith, we need to know something of the strengths and weaknesses of the source material.
Chapter 2

The Source Materials

The sources that can be used in the study of Scottish place-names and social history are wide ranging and varied. They extend from royal charters and administration records to maps and modern local histories. The dates of these documents range from the earliest available records, such as early Irish and English chronicles in the 7th and 8th centuries, to the very latest maps. There is a wide variation in both quantity and quality of sources. Generally, the earlier the period, the less material we have to work with, but as we reach the century or so before the Protestant Reformation the amount of material available begins to increase exponentially. There are several reasons for the lack of documentation before the 16th C, including war with England; the take-over of religious institutions by noble families through the commnedator system, who have misplaced or destroyed documents, such as cartularies; and perhaps there was a disproportionate amount of earlier material lost when the ship carrying Scottish records back to Scotland after the Restoration of 1660, floundered in a storm off eastern England (Webster 1975, 128). The increase in documentation is largely due to the fact that large parts of Menteith came into the hands of the Crown after the execution of Murdach, duke of Albany, in 1425. However, this increase in documentation does not mean that as we move forward to the modern era the quality of the source material necessarily becomes better for place-name research. Rather, a place-name can often become transformed by the linguistic and orthographical conventions of other languages. In the Lowlands, for example, a Pictish or British name may have been first Gaelicised and then Scotticised rendering its meaning obscure or difficult to interpret precisely. The place-name scholar deals with a huge variety of documents and he or she may never become an expert in a particular type of document in the way that a historian whose main research interest is
charters, for example, would, or the way a historical geographer might be familiar with maps and estate plans. Nevertheless, the toponymist has to have more than a passing acquaintance with the documents consulted in the course of research. There is a need to be aware above all of the potential pitfalls in these documents and how those flaws came about, both in original manuscripts and in printed sources. This section will look at the different types of sources available for place-name and social historical research in Menteith and comment on the advantages and pitfalls of each source. Understanding the nature of the sources is vital for interpreting the documents and unlocking their potential for use in research.

**Maps**

Maps are probably among the first tools that toponymists and historians will reach for when studying a particular area. Maps help researchers not just to discover what place-names there are and the spellings of those names, but to get a spatial and topographical representation as to where the place-names are and how they relate to the landscape in which they are situated, and other place-names around them. However, beyond these first impressions, maps are much more sophisticated than just the representation of a landscape on paper or screen. They have a ‘grammar and vocabulary’ all of their own, which has to be learned for maps to become intelligible. Difficulties can arise when a researcher is not aware of the ‘conventions and inaccuracies’ contained in a map (Hindle 1998, vii), and why a map was produced in the first place. There are a small number of earlier maps that can profitably be used for the place-name research of Menteith, the best and most complete being James Stobie’s survey of *The Counties of Perth and Clackmannan* published in 1783. This was the largest and most detailed map of any part Scotland up to that date (*Quarto* 2005). Other maps include those by Blaeu, Gordon, Adair, Roy, and the 1st edition of the Ordnance Survey, whose surveyors surveyed Menteith in 1862.
Not all of these maps are of equal value as a historical resource for a toponymic survey of Menteith. Blaeu covers only the southern portion of PMH in what is otherwise a map of Lennox (Blaeu 27). This map is based on Timothy Pont’s or Robert Gordon’s work in the late 16th and early 17th centuries. The place-names on the map are often anomalous. For example, *Achincler* instead of *Arnclerich* or *Ardinclerich* as is often found in documents. This may be a simple misreading of Pont’s MS by the Dutch type-setters. But other strange instances of naming occur, such as dividing *Shannochill* PMH into two distinct places, *Schenna* and *Chaill*, each having its own settlement symbol. What is most frustrating about Blaeu, however, is what he does not show; namely any other part of Menteith. This is presumably because Pont’s or Gordon’s maps were lost before they could be sent over to Amsterdam for Blaeu to engrave, since it seems that either Pont or Gordon actually surveyed Menteith, as can be seen from Robert Sibbald’s ‘Topographical Notices of Scotland’ (hereafter TNS (NLS Adv.MS.34.2.8)).

John Adair was active in the last two decades of the 17th century. He began his career with a survey of Clackmannanshire c.1681. He also surveyed ‘the counties around Stirling’, probably not long after. While this is a worthwhile resource for studying place-names in Menteith, it is largely restricted to KRD and parts of KMA. It also concentrates on the major tounships, such as *Coldoch* KRD or *Spittalton* KMA, and omits any mention of minor settlements. However, the map is, for instance, confirmation that the name Blair Drummond was not in use before this map was made, for there is no mention of the mansion of George Drummond who bought the lands in 1683 (see *Blairdrummond* KRD in Part 2).

James Stobie was commissioned by the Duke of Atholl to survey his estates in Perthshire. Stobie was the Duke’s factor and the map was to become a powerful tool in the

---

19 This type of error can be seen elsewhere in Scotland, e.g. Kilwinning AYR, which has been misread as *Hill* and *Winnin*. My thanks to Prof Clancy for this example.

20 For relevant material relating to Menteith see http://maps.nls.uk/pont/texts/transcripts/ponttext131v-132r.html and http://maps.nls.uk/pont/texts/transcripts/ponttext156v-157r.html. Also printed, albeit imperfectly, in *Geog. Coll.* ii. The relevant sections for Menteith are to be found at 566-7 and 609-13.
transformation of the Perth and Clackmannanshire landscapes during the Improvement period (Fleet 2005, 40). The map was also sponsored by some of the Duke's friends, such as Thomas Graham of Balgowan in Perthshire and Lord Cathcart at Schawpark, near Alloa in Clackmannanshire (Fleet 2005, 42). The map is incredibly detailed compared with many other maps of the 17th and 18th centuries, and shows small details such as mills and enclosures. The map is also a valuable source for some of those place-names that have not survived, e.g. *Coischambie* CLD, and indeed preserves place-names that do not appear in any other source, such as *Balvorist* PMH. Many of the Gaelic place-names themselves are written down using Scots or Scottish Standard English orthography rather than following more conventional Gaelic orthography. Any obvious errors that do creep into the map appear to be the result of the engraver, Thomas Conder (Fleet 2005, 44). Two examples are *Garteehairn* instead of *Gartechairn* KMA and *Balloohriaggan* instead of *Ballochriaggan* [Ballachraggan] KMA.

Twenty or so years before Stobie surveyed Perthshire, General William Roy produced his Great Map (see Roy 2007).21 This map was produced as a result of the Jacobite Rebellion of 1745, when it was realised by the British Army that there were no reliable detailed maps of Scotland. William Roy and his team surveyed the country between 1747 and 1755. The outcome was one of the most remarkable maps of Scotland ever made, and shows the country at a time just before the great changes of the agricultural 'Improvements' which began in earnest later that century. The map's use as a tool for place-name research, however, can be erratic at times, but it is useful in many ways as the source of many places for which this map is their only occurrence in the historical record, e.g. *Balrioch* in north-western PMH. The map produced by William Roy and his team was executed at a scale of one inch to 1000 yards, or 1 ¾ inches to a mile. While the map does contain some distortion and errors, these are remarkably few for a map of the whole of Scotland, excepting the Western and Northern Isles,

21 Also available on the National Library of Scotland website at <http://www.nls.uk/maps/roy/index.html>
completed in a little over eight years (Moir 1973, 111). Roy's main concern was to produce a map that could be used as a tool for the military and as such it contains more information about relief, route-ways, and main settlements than it does about the smaller places. In asking 'how reliable are the place-names?' Skelton states simply that 'most of the surveyors were certainly Scots – but not Gaelic speakers' (Skelton 1967, 13). This includes Roy, who was from near Carluke, Lanarkshire (Owen and Pilbeam 1992, 3). Nearly all the Gaelic names have been written down using Scots or SSE orthography, probably as the surveyor heard them or thought he heard them. There has been some attempt at showing lenition, especially a lenited 'c' which they would presumably have been familiar with in any case through words such as 'loch'. An example is *Shennachal* for *Shannochill* PMH. At other times it is clear that the surveyor has indeed simply written down what he thought he heard – *Carse of Fuer* for *Cassafuir* PMH. It has also been said that the 'place names often indicate the local pronunciation rather than correct spelling' (Moir 1973, 112). Therefore, by being based on what the surveyors heard rather than the documentary record, the early forms from Roy's map are still valuable in their own right, as it may preserve aspects of pronunciation that maps and other documents based on earlier forms might conceal.

Roy's work helped set the stage for the Ordnance Survey who did most of their work in first surveying Menteith in 1862-3. The 1st edition of the OS was concerned from the outset accurately and systematically to represent as far as possible the place-names that would appear on the maps. A place-names committee, under the auspices of the Royal Scottish Geographical Society, was set up for Scotland to advise on the Gaelic place-names. The committee examined the surveyor's finding and made recommendations to the OS. However, there was a 'longstated principle' that OS names should 'follow those in common use by the resisdents of an area, even if these were etymologically incorrect or suspect' (Owen and Pilbeam 1992, 75). A glance at the Object Name Books in NAS for Menteith seems to confirm the aspiration to accuracy, and many people were consulted regarding the names, although in
Menteith it tended to be those in authority, such as ministers, factors, and landowners (Withers 2000, 535). However, more work would need to be done on the subject of ‘naming authority’ in the OS Name Books, for this reliance on those in ‘authority’ does not seem to be universal, and in Fife the majority of informants had no status labels attached, with only the occasional minister, teacher and factor involved, although almost all were men.\(^\text{22}\) The survey by the OS forms the basis of the names that appear on maps today. However, we should not regard them as infallible, and indeed W.J. Watson stated that the OS was guilty of an ‘outrageous mangling of our Gaelic names’, and that ‘as far as Gaelic form of names go, the present maps are most defective’ (Watson 2002 [1904], 47). An example of a minor name in Menteith which has been given different spellings since the 1860s is *Allt a’ Mhangam* in PMH for *Allt a’ Mhangain* ‘burn of the fawn’, a small burn flowing through Aberfoyle from the north. This is shown as *Allt Vingen* on the 1862 map, but is *Altmhengan* in the OS Original Object Name Book, dated to 1859-64 according to NAS (RH4/23).\(^\text{23}\)

**Documents**

Documents, of course, are where toponymists and historians obtain most of their information regarding place-names. However, there is a great variety of documents, and not all of them are of equal use, and others can have traps for the unwary researcher. Since the 13\(^\text{th}\) C documents relating to Menteith were generally written by speakers of Scots rather than of Gaelic. As such, Gaelic orthography is usually not followed, but rather the application of a Scots and SSE orthography is often the norm.

The earliest documents useful for place-name research are those found in the Irish annals or Anglo-Saxon chronicles. Some information can be found in such texts as the lives of Irish saints, especially if there is a Scottish connection, however tenuous. A difficulty with these

---

\(^{22}\) My thanks to Simon Taylor for this information.

\(^{23}\) For more on the subject of the OS naming policy in the 19\(^\text{th}\) C see C. Fleet and C.W.J. Withers (no date) *A Scottish Paper Landscape* at <http://www.nls.uk/maps/os/6inch/os_info1.html>
sources is that they are often much later copies, sometimes many times over, of earlier documents, with all the inherent issues regarding mistakes or orthography likely to have been made during the copying process. One example of a name in Menteith recorded in an early Irish saint’s Life, is that of Eperpuill [Aberfoyle]. The Life of the Irish Saint Berach states that a fortress at Aberfoyle was given to the saint by Áedán mac Gabráin in which to found a monastery (Plummer 1922 vol i, 34; vol ii, 35) and which was perhaps sited near the old parish church which sits on the south side of the River Forth, a few hundred metres from where the Pow Burn meets the river. The main problem here is that the manuscript containing the Life of St Berach from which this information comes is taken from a copy made by the ‘poor friar’ Michael O’Clery, who copied it from a ‘bad old vellum book’ in 1629 (Plummer 1922, vol ii, 43). We are not told how old the vellum book was, and indeed its age was perhaps something which O’Clery himself was not aware of. However, the form of Irish in which the Life is written suggests it is indeed old, perhaps dating from 1000 – 1200, and that we have the earliest form of Aberfoyle contained in it.24

The value of collecting early forms is evident in those names which are most obscure. For names where the meaning is reasonably straightforward collecting vast amounts of early forms need not be required: Doune KMA is invariably written in one of two main ways – Doun(e) or Down(e), sometimes with the final ‘e’, sometimes without. Its origin is undoubtedly ScG dùn ‘fort’. However, also in KMA lies an *eccles, an early British name meaning ‘church’. It is first written as Eglysdissentyn in 1267 (Fraser, Menteith ii, 217) and its final appearance in the historical record is in Roy c.1750 as Aiglesteinston PMH. It is Eglisdesyndane in 1451 (ER v, 475), by 1480 it is written as Eglisdisdane (ER ix, 564), and is still recognisable as such in 1508 (ER xiii, 631). Once we reach the second quarter of the 16th C, however, a drastic change has taken place to render the place-name almost

24 See ‘background details and bibliographical information’ to Bethada Náem nÉrenn at http://www.ucc.ie/celt/online/G201000/ This site also adds that ‘[o]ver 99% [of the document is] in Middle Irish and Early Modern Irish’. 
unrecognisable: in 1528 it is *Aggischechynauche* (*RMS* iii no. 607) and by 1670 it is *Eglischaynauche* (*Retours* PER no. 809). The change of form was enough to make Geoffrey Barrow think he was dealing with two distinct places when he first wrote his book *The Kingdom of the Scots* in 1973 (see Barrow 2003, 52 for map). He had realised his mistake ten years later (Barrow 1983, 12). The only reason we know it is the same place is because in most sources it is nearly always associated with the nearby settlement of Ballachraggan KMA. There has so far been no satisfactory explanation for the change from *Eglysdissentyn* to *Aggischechynauche* to *Aiglesteinston*, but any explanation is unlikely to be arrived at without recourse to the early forms.

While looking at original documents is of course the ideal, the sheer number of early forms to be collected means that place-name scholars will normally resort to using the various published volumes of documents such as the cartularies of monastic establishments, or the printed collections of many types of royal or government records, such as *Register of the Great Seal* (*RMS*), *Exchequer Rolls*, or *Register of the Privy Seal* (*RSS*). These editions of records are very convenient and lend themselves very well to the laborious nature of toponymic research, where the analysis of a place-name depends upon a number of early forms. However, there is a tendency to treat these *collections* of primary sources as primary sources in their own right (Ross 2006, 202). This can lead to problems if the researcher is not aware of the limitations of the sources. An example is the early *Exchequer Rolls* which are printed in the first volume of that name. Two set of sheriffs accounts are printed for the years 1264-6 and 1288-90, and within them is a spelling of Menstrie in Clackmannanshire, written as *Mestreth* (*ER* i, 24). The drawback with using this particular source is that it is based on an early 17th C transcript of a now lost account (Webster 1975, 123), and the original may have been in a highly cursive script making it difficult to read accurately. Generally, however, periodic checks on the sources can help in confirming the trustworthiness or otherwise of these materials. To date, at least as far as the royal and government records for Menteith are
concerned, no major issues regarding the spellings of names have come to light that cannot be overcome by the quantity of early forms for those names that are mentioned often. It is also the case that those names that are noted repeatedly can often be found in other records and so can be cross-checked. However, there are place-names that are mentioned infrequently or indeed only once. Here we sometimes can infer from places elsewhere in Scotland that have a similar name. An example is Coille-don PMH, perhaps originally *comhdhail-dhùn ‘court hill’. A similar place-name dating to 1253 is Coleduns in Kingoldrum ANG (see p.97 for fuller discussion).

The main concerns regarding documents for Menteith are not necessarily the quantity of documents, but rather their haphazard survival from earlier periods and the uneven coverage of records in a particular area. Those lands which belonged to the crown, such as the Stewartry of Menteith, will often be found earlier in the historical record than those that were in the hands of some other major landholder, such as the post-1427 earldom of Menteith. We may also count land use as a factor in determining whether a place-name comes down to us from an earlier time. The Stewartry of Menteith, consisting of much of CLD and KMA, was used as a hunting area for the kings of Scotland from at least the time of James I to the Reformation. As a result there are a large number of early forms in the Exchequer Rolls from the mid 15th C through to the mid 16th C. The records of the post-1427 earldom of Menteith, consisting of AFE and the eastern part of PMH, are rather more sparsely populated with early forms. However, even within parishes landholding patterns have an effect on when a place-name appears in the record. The Stewart earls of Moray held large parts of KMA and CLD as part of the Stewartry of Menteith, having been granted the lands there in the mid 16th C. Other landowners also held lands in these two parishes which do not come within the direct influence of the Stewartry, and so are not on record quite so early. For example, the Muschets held Annet and Coillechat in KMA, the earliest forms of which only date from 1508 (RMS iii no. 3225). These lands split the Moray holdings in two, since the earls of Moray held most of
the lands to the east and west of Annet and Coillechat. These Stewart lands are on record at least half a century earlier in the case of Calziebohalzie KMA to the east of Annet (Kilyebouchalye 1451 ER v 474), and by over two centuries in the case of Eglisdisentyne (Eglysdissentyn 1267 Fraser 1880 ii, 217) which lies to the west of Annet. The Stewart earls of Moray also held lands in CLD, but here they were not the majority landholder. The Drummond earls of Perth held much of the lands in the barony of Strathgartney CLD, and here, too, many of the lands of the old hunting forest of Menteith are on record relatively early. Lying next to Strathgartney are the lands (and former parish) of Leny CLD and the former parish of Kilmahog CLD. Both these territories are notably lacking in early forms, not so much for the two names themselves – they come on record in the 12th and 13th centuries – but rather for lands elsewhere in these areas. Anie CLD (Àth an Fhèidh ‘ford of the deer’), at the southern end of Loch Lubnaig, for example, can be found no earlier than on Stobie’s map of 1783, and yet at that point in time was already divided into Upper and Lower Anie. Gartenjore CLD (gart an deòraidh ‘enclosed settlement or field of the relic keeper’) only appears on record four times between 1539 and 1775, but presumably the deòradh had been an important figure in the local community.

Before the Grahams were given the earldom of Menteith in return for having Strathearn taken from them by James I, the earldom was in the hands of the descendants of Walter Stewart, earl of Menteith from at least 1258 to the late 1280s, and who was earl in right of his wife, a daughter or niece of the last of the earliest line of earls that we are aware of. Prior to Walter Stewart the earldom was held by Walter Comyn, husband of Walter Stewart’s wife’s sister or cousin. Given the propensity of barons from the reign of David I for keeping charters detailing the extent of their properties, especially those barons close to the king or those acting for monastic institutions, it seems unlikely that there were no land-holding records kept before the Grahams attained the earldom. But for Menteith, at any rate, it is as Geoffrey Barrow once put it when writing about another, earlier, context, ‘in Scotland it is hard to
avoid the impression that the slate was wiped clean c.1100 and a fresh start made’ (1992, 109). The same might be said of Menteith in 1427. It would appear the Grahams had no need to be concerned with the charters of the previous earls because the earldom reverted to the king and he granted out Menteith anew, giving AFE and the SE portion of PMH to Malise Graham as the new earldom of Menteith, while keeping the rest, or at least most of it, for himself, but now renamed the Stewartry of Menteith.

If we had a cartulary or some similar group of documents for Inchmahome we might have a greater amount of early forms of place-names for much of the earldom. But if any such cartulary ever existed, it has not survived. Despite the lack of a surviving cartulary for Inchmahome, we know something of the lands that were held at the Reformation because these lands were then transferred to the Erskines who kept some charters and other records, such as rentals, of their properties, after the demise of Inchmahome PMH as a monastic institution. A group of fifteen documents has been printed by Fraser (Menteith ii, nos 74-89), one of which is a copy of the 1238 foundation charter from Inchaffrey Liber, published in 1847. All the other documents, however, date from 1526 to 1587, and seem to have survived because they related to the Erskine barony of Cardross PMH, created in 1606 from the demesne lands of Inchmahome, and the Erskines only kept what was important to them. The lands of Inchmahome/Cardross had been in the hands of the Erskines since that family held the commendatorship of Inchmahome from 1529 (Stirling Recs ii, 265-6; Hutchison 1899, 160-1; Dilworth 1986, 60). Other charters detailing the barony of Cardross, survive in the Register of the Great Seal (see RMS iv no. 1027; NAS PA2/16, f86v-89r.; Fraser, Menteith ii, 368).

There is nonetheless a significant amount of documents from before the creation of the new earldom in 1427, and many were printed by Sir William Fraser in his The Red Book of Menteith, published in two volumes in 1880, but they are not in the quantities of later periods, something that Menteith has in common with much of the rest of Scotland. While the
*Red Book of Menteith* is a tremendous resource for place-names in the earldom, many of the documents printed by Fraser are not always concerned with property and even those that are often do not go into detail. Like any historical source it too has to be handled with care, as it can be prone to errors which can mislead even the most careful toponymist. The most glaring example as far as Menteith is concerned relates to *Ruskie* PMH in a charter of Murdach, earl of Menteith to Gilbert of Drummond of the western half of *Boquhapple* KRD dated to 1330, where it states ‘...totam occidentalem dimidietatem ville de Buchchoppill, propinquius terre de Busby adiacentem, infra comitatum nostrum de Meneteth...(‘the whole of the western half of the *toun* of Buchchoppill, lying near the land of Busby, in our earldom of Meneteth’) (Fraser, *Menteith* ii, 227). Busby in this case should be Rusky, and this is confirmed by a later charter in *RMS* [ii no. 187], which, along with virtually the same wording, has Rusky in place of Busby.

The significance of this mistake is to change what may be a loan word into Gaelic from British, rúsc/rúscach ‘fleece, skin, bark, barky’ (MacBain 1911, 298; DIL s.v. rúsc) or possibly rùsgach ‘a marshy place’ into a Scandinavian by(r) ‘farm’ name.

Another source produced by Fraser that mentions some of the churches in Menteith is *Registrum Monasterii S. Marie de Cambuskenneth* or the register of Cambuskenneth Abbey (*Camb. Reg.*), an Augustinian abbey near Stirling, founded in c.1140. The cartulary is a copy of earlier documents and was created in 1535, and validated by the Clerk Register in that year and confirmed by the great seal of James V (Duncan 1975, 642). However, this legalisation process is not necessarily a guarantor of accuracy. Many of the early charters in *Camb. Reg.* seem to reflect forms in the original, although there are exceptions (see David I Chrs. no. 213, where the spelling for Tullibody CLA [Tullibody] looks remarkably modern, and Barrow’s note to this charter where he states that some place-name spellings seem to have been updated by

25 There is a facsimilie of the charter in Fraser, *Menteith* ii (between pp 226 and 227), and it seems to show ‘Rusby’. C.f. Regis on line 5 for the initial ‘R’, which is a misreading of ‘B’ for ‘R’, and heredibus on line 3 for an example of the letter ‘b’ in this copy of the charter; Fraser was notorious for misreading proper nouns. I have so far been unable to locate the original.

26 From MacBain (1911); Watson has Ruskich in Glenlyon as dative-locative of rúsgach (Watson 2002, 203).
the cartulary). While the cartulary has various documents that have many of the earliest forms of place-names such as Tullibody CLA and Cowie STL, it is limited in its usefulness for place-name research in Menteith, as it is rare for the majority of these charters to go into detail about the places named within it. However, there is one charter for the parish of Kincardine which does contain details of lands granted to Cambuskenneth supposedly in 1193 x 1195. These lands include ‘thirteen acres of arable, a brewer’s toft with a garden, a toft for St Lolan’s Bell, a toft for St Lolan’s Staff with a garden, and the whole land between the well of Faylayat on the east side of the burn falling from Garthow on the west, with meadow on each side as far as the muir of Lanpurry and grazing for 13 cows in the Borland’ (Camb. Reg. no. 127; RRS ii no. 372). The problem with this charter is that it looks later than it professes to be. The form of Garthow seems late, when it would have probably been *Garthoch (see Gartoch KRD) or similar in the late 12th C (Ó Maolalaigh 1998, 38-44). The fact that Borland (Boreland KRD) appears this early in a charter for Menteith ought to make one a bit suspicious; the earliest attestation for Bordland in Scotland I have found so far is 1324 for Suthbordeland in Inverkeithing parish, Fife (Taylor, PNF i, 374). DOST has ‘le Bordland in villa de Langforgund’ dating to 1377. Winchester has no earlier forms than 1376, for a Bordland in Peeblesshire, and his earliest attestation for the term in England is 1315 for one in Wakefield, Yorkshire, while in Wales he has one in Glamorgan dated to 1272 (Winchester 1986, 138-9). While we need not necessarily doubt that these lands (but perhaps not with those names) were indeed given to Cambuskenneth in 1193 x 1195, what we might have in this document is a later insertion into the 1535 cartulary, rather than early Scots penetration into this particular Gaelic speaking milieu in the late 12th C.

A group of documents dating to the period immediately after the Reformation of 1560 come under the name of The Books of Assumption of the Thirds of Benefices. These have recently been printed in 1995 (Kirk 1995). It was decided in 1562 by the crown and parliament that those who held benefices at the Reformation should retain their livings for
their lifetimes, except for ‘one third of the fruits’ of those benefices (Donaldson 1978, 31; Kirk 1995, xiv). These thirds are detailed in *Books of Assumption*, the record of the rentals and revenues of the benefices of most of the pre-Reformation Church in Scotland, including parishes, chapels, cathedrals, and monasteries. This third went to the crown and to help support the reformed Kirk financially. While a very useful record in many respects – every church in Menteith is mentioned – they are frustrating to the toponymist. We are told that a certain church is due an amount of money and victuals from the lands of its parish, but we are rarely told what those lands are. The one exception is **Callander CLD**, and even then the lands detailed are for the eastern part of the parish only (Kirk 1995, 349; see also CLD survey introduction for details). We know that the producers of these accounts must have gone to a large number of farms, or perhaps seen the records of those farms, to enquire how much was paid to the local church, as the account for Airth parish shows (Kirk 1995, 157-8). But nothing like this has come down to us for Menteith, except the Callander account just mentioned.

*Retours* (*Inquisitionum ad Capellam Domini Regis Retornatarum*) begins for PER in the mid 16th C. and carries on until 1700. Like *RMS* and *RSS* it is mostly in Latin and follows a set formula. *Retours* is a wonderful source for place-names and is a mainstay of Scottish toponymics, but like all other sources it is not without its problems. In the mid 17th C as Scotland came under the control of Oliver Cromwell and his Commonwealth, the entries for this period occur in Scots or are perhaps written by Englishmen of the Cromwell government, and so the spellings of place-names have the potential to be distorted by people who did not understand the local languages, i.e. both Scots and Gaelic. Another problem, and it is one that it shares with *RMS*, is that the editor of the printed volumes was sometimes not sure of the spelling of the name in front of him, and so offered another possibility. This is usually signalled by the Latin word *vel* ‘or’. Without having checked the originals, it is not always clear why he picked the form he did. Examples of this can be found in an entry for **Alltan nam Breac AFE**, where the form *Alanaprick* is followed in brackets ‘vel *Alcraneprick*’ (*RMS* ix no. 40).
1502, dated 1643), while the entry for Balkerach KMA has Bellikeireuch followed by 'vel Belliekeroch' (Retours PER no. 1165, dated 1668).

Other documents include the Rentall of the County of Perth set up by an Act of Parliament in 1649, and printed in 1835 with a contemporary rental for comparison. While a useful document, it has to be used with some care as there seem to be a number of transcription errors in it, although it is not clear if these errors are in the original document or whether the errors are part of the editor's transcriptions in the 1835 book. The whereabouts of the original is as yet unknown. Sometimes the spellings of early forms of place-names are consistent with other documents, e.g. Coldoch and Bowhapple [Coldoch and Boquhapple both KRD], but on other occasions the spellings can be markedly different, e.g. Darre instead of Dalgrey or Dargraw and Castrie instead of Cowstry or Custrie [Coustry and Daira both KRD]. This might not be such a major problem for some names, but for those that might be British or Pictish, such as Coustry (with a Brit. *trev ending 'settlement, farm'?), the difference in the vowel could potentially mislead were it not for the availability of other forms. Another problem is that the document is concerned chiefly with the total rental value owed by a landowner, but not necessarily his individual lands. So the Earl of Airth [and Menteith] has a value of £1333 placed on his 'haill lands in this parish [i.e. PMH]', but we are not told what his lands are. However, sometimes the Rentall has the earliest forms for some places, such as Cuthell for Cuthil Brae KRD, and so despite its drawbacks is nevertheless useful in many respects.

**Websites**

Mention must be made of that modern source of place-name material, the internet. Here it is useful to distinguish between a resource created for the internet and one which makes available an older resource online. An example of the latter category includes the National Library of Scotland website where it is possible to view images of the original maps on a
computer screen. Here, of course, we need to know about the limitations of the original sources. Material created for the internet is not strictly the original material, but rather modern editorial transcriptions of medieval and early modern documents, a digital equivalent of the printed volumes of RMS and other collections of documents. They too have their pitfalls. There are two main websites that have been used for Menteith material. One is, on the whole, very reliable for early spellings of place-names, if not always their location. This is the Records of the Parliaments of Scotland to 1707 website <http://www.rps.ac.uk>, in its own words a ‘fully searchable database containing the proceedings of the Scottish parliament from the first surviving act of 1235 to the union of 1707’. This is the result of a project run by a team at the University of St Andrews, and was subject to the serious intellectual rigours we can expect of a group of historians from a highly reputable organisation. As intimated the main problem with this website, so far as place-names are concerned, is not so much the spellings of early forms, but their location. One example is contained in a document called ‘Ratification in favour of the earle of Marr’: a place called Leckie is marked by a small red cross, which accesses a pop-up window wherein is the information ‘possibly Leith’; it is in fact Old Leckie in Gargunnock Parish, Stirlingshire at NS689946. There is also Wester Leckie and Inch of Leckie nearby (Ref no 1685/4/93 [NAS PA2/32, f.187 -188v]). Sometimes the spelling of the modern name is wrong: the lands of Manor in Logie parish STL have been rendered as ‘Manner’ in the translation (NAS, PA2/16, f.13v-15r.); this is perhaps not as serious a mistake, at least in this case, as wrongly transcribing an early form of a place-name, but it could have implications in wrongly identifying a place. However, one potential advantage of websites is that errors can be relatively easily corrected.

The other readily available website useful for toponymists of Scotland is that of the National Archives of Scotland <http://www.nas.gov.uk>. Here the reliability of spellings of

27 Although a note of caution should be sounded here, since what no one has so far done with RPS is check their spellings of place-names against the original. My thanks to Dr Simon Taylor for this information.
early forms falls short of the standards seen in the *RPS* website. The main problem, though, is not so much the mis-spelling of early forms, but a lack of consistency. In some documents the NAS staff have tried, not always successfully, to transcribe what is written on the document, and it is this transcription that appears on the website. In charter NAS GD220/1/C/3/1, dating to 1427, which has been published by Fraser (*Menteith*, ii, 293-5), and whose place-names have been printed in *Scots Peerage (SP)* (vi, 142-3), and in neither perfectly, the NAS also made errors in their transcription of it. The deserted settlement of Crantullich AFE, in the charter is rendered *Cravenculy* by both Fraser and *SP*; however, the ‘c’ is commonly mistaken for a ‘t’ in medieval documents, and is transcribed as *Crabancouly* by the NAS. The correct reading of the original MSS should be *Cravanetuly* (*Craobh an Tulaich*). At other times it seems the NAS prefer to use the modern form of the place-name instead of the early form. A case in point here is Stronachlachar in Buchanan parish STL, where charter GD220/1/D/5/5/8 (1586) has ‘...the lands of Blairquhanis, Cassill [Cashell], Arduill, Correrklet [Corrie Arklet] with the loch and islands thereof, the lands of Stronachlachar, the lands of Dow [Dhu]...’. The problem here is the form of Stronachlachar looks very modern when compared to other sources such as Stobie, who has *Stronclachaig*, and Roy, who has *Stronclachan*. There is also the problem on this website of inconsistency of presentation even within one document. This means that we cannot trust this website for early forms and there is no alternative to a trip to NAS to see the original document for oneself.

The comparative paucity of early medieval sources for Menteith means that we are unable to go into the kind of detail that researchers of other areas can. In England, for example, it is possible to undertake surveys of certain areas using such documents as Anglo-Saxon charters and Domesday Book. This makes it is possible to look at the place-names and social history of parts of England up to half a millennium before we can attempt a similar exercise for Menteith. In parts of Scotland we can look at areas in detail up to 300 years earlier, and this has been done for Fife (See Taylor, *Place-Names of Fife series*). The main advantage Fife has
over Menteith is that a greater number of cartularies survive for many of the monastic institutions based there. This allows toponymists and historians to examine the society of parts of Fife in more detail much earlier than is the case for Menteith. This is particularly true in the areas around Dunfermline and St Andrews where charter material exists from the 12th C (Taylor *PNF* i; Taylor *PNF* iii). Another aspect an area like Fife has that Menteith does not is a collection of boundary charters, where a territory can be traced in minute detail in some cases, as can be seen in Márkus’ study of Caiplie, Kilrenny parish in east Fife (Márkus 2007), where he shows the language changing from Gaelic to Scots through the place-names in a charter dating to 1235. It is not clear why there are no boundary charters for Menteith, but it is notable that many such charters relate to monastic institutions and burghs, and the lack of a cartulary for Inchmahome and a burgh comparable to Crail FIF may be among the reasons for the absence of such documents.
Chapter 3

Language in Menteith

The study of language in Menteith is often problematic. During the medieval period there were three languages which were spoken in the area, all of which have left their mark on the toponymic landscape. There were probably considerable periods of concurrence between these languages, although the exact chronological outlines have still to be determined. The oldest language was p-Celtic, possibly Pictish, but perhaps more likely to have been British. The second language that became dominant was Gaelic, which was followed by Scots. As an approximation we might see British dying out and replaced by Gaelic c.900. Scots probably started making inroads shortly after Richard de Montfiquet was granted the lands of Kincardine KRD by William I 1189 x 1195 (RRS ii no. 334). The process of scotticisation was more or less complete by the 20th C, although small groups of Gaelic speakers could still be found in the Callander area (Watson 1926, 113).

P-Celtic in Menteith

It is generally held that p-Celtic Pictish was spoken north of the River Forth and another p-Celtic language, called British for the purposes of this thesis, was spoken south of the Forth. However, the River Forth was not always the great early medieval linguistic barrier it is often presented as. The longest lasting British speaking kingdom, Strathclyde, earlier the kingdom of Dumbarton or Alclut, extended north of the River Clyde, but its territorial extent did not stop at the line of the River Forth. Strathclyde not only incorporated the modern county of Dunbartonshire, but also included what became western Stirlingshire including the area

---

28 The p-Celtic language spoken south of the River Forth has also been called Cumbric or Brythonic by historians and linguists (see Jackson 1955; Forsyth 2001, 378; and map in Talyor 2002).
surrounding Loch Lomond, which reaches some distance north of the Forth.\textsuperscript{29} Indeed, the northern extent of this kingdom is held to be marked by a rock called \textit{Clach nam Breatann} ‘rock of the Britons’\textsuperscript{30} at the northern end of Loch Lomond, although there is no contemporary record of this stone as a boundary marker. Menteith is situated to the east of that kingdom covering much of central Scotland between Loch Lomond and Stirling. To the north was the earldom of Strathearn, which was certainly a Pictish territory with major centres at Dundurn, Forteviot, and Moncreiff Hill, among others. To the east was Clackmannanshire and Fife. Clackmannanshire will be dealt with shortly, but that Fife was Pictish is evidenced by a number of Pictish symbols stones found in the county, and that place-name element usually held to be an indicator of Pictish, but borrowed into ScG, the \textit{pett}-name, such as Pittenweem and Pitliver (Taylor 1995, 2006, 2009). English came to be spoken in Lothian in the early Middle Ages, and while that will not concern us here, we should nevertheless note that the area has a large number of British place-names, including, for example, Linlithgow and Pencaitland. The area between the Forth and Clyde was also British-speaking as shown by examples such as Glasgow and Larbert, the latter containing \textit{pert} ‘bush, copse’.

To the south-east of Menteith are the parishes of Gargunnock and St Ninians, both originally part of the soke or shire of Stirling, extant by the reign of Alexander I between 1107-24 (\textit{Dunf. Reg. no. 4}; Barrow 2003, 3), and along with Clackmannanshire was probably part of the early medieval British region of Manaw. This area has been described as a buffer zone between Picts and Northumbrians (Clancy 2004, 139), while it has been stated that

\textsuperscript{29} The southern portion of Strathclyde seems to have included much of SW Scotland, including Lanarkshire, Ayrshire, and Renfrewshire, among others (see maps in MacNeill and McQueen 1996, 75-6). Further details on Strathclyde in the Middle Ages can be found in Broun (2004) and Macquarrie (1993).

\textsuperscript{30} Shown as \textit{Clach na Briton} on the OS maps from 1\textsuperscript{st} edn to the present, at NN337216; the stone is c.4 km N of the boundary between PER and DNB. See also comments made by E.B. Rennie (RCAHMS Canmore NMRS No. NN32SW 2, where it is stated that it marked the boundary between ‘the ancient kingdoms of Dalriada, Pictland and Strathclyde’. Another stone, \textit{Clach nam Breatunnaich}, ‘stone of the Britons’ marked the boundary between ‘the Scotti and the British’, near Lochgoilhead.
Clackmannanshire, and presumably by extension Manaw, was a recurrent ‘theatre of war’; there were major battles in the area in 582/3, 711, and in 875 (Taylor forthcoming). The political geography was against Manaw’s long term survival, lying as it did on the boundaries of three more powerful kingdoms – Pictland, Lothian, and Strathclyde (Taylor forthcoming). But given that the language north of the Forth was generally held to be Pictish, and Clackmannanshire, which is also north of the Forth, was part of Manaw, a British kingdom, Taylor asks ‘how should we classify [Clackmannanshire’s] non-Gaelic Celtic place-names such as Aberdona and Dollar?’, for when it comes to Clackmannanshire ‘definitions of British or Pictish become less straightforward’, than for the rest of Scotland (Taylor forthcoming).

It is possible that a similar situation exists for Menteith. It is usually assumed that because Menteith was north of the Forth, it must have been Pictish (Skene 1886, 340; map 1b in Wainwright 1955; Taylor 2002, 13). Menteith and Clackmannanshire are separated only by the parish of Logie STL, which includes the ridge of land that the Wallace Monument and the University of Stirling now sit upon. Logie is now part of STL, but in the Middle Ages it was the subject of a very complicated split between the counties of CLA, PER and STL. It includes Dumyat ‘fort of the Maeatae’, a British tribe who inhabited the area when the Romans were active in this vicinity (Watson 1926, 59, 100; Smyth 1984, 42). In one of the Clackmannanshire portions of Logie was the village of Menstrie. This place first comes down to us as Mestrin in 1178 x 1179 (Camb. Reg. no. 36); this is probably British *maes + *trev ‘hamlet on the plain’ (Watson 1926, 264) or ‘farm or settlement on a plain or open field’ (Taylor 2004, 15). What may be significant is that Menstrie was part of the lands of the earl of Menteith in 1213 (CDS i, no. 2276; RRS ii no. 519). There seems to be nothing inherently Pictish about Menteith: there is no connection archaeologically and toponymically; there are no Pictish symbol stones, nor even any pett-names, a Pictish element borrowed into Gaelic, meaning ‘land-holding’, but most frequently found in place-names on former Pictish territory. What Menteith does have that could make it Pictish is its connection with Strathearn in the
later Middle Ages, where Menteith is mentioned as a *subregio* of Strathearn in the *De Situ Albanie*, which dates to 1165 x 1184. Perhaps just as important is that Menteith, like Strathearn, was part of the diocese of Dunblane in the Middle Ages, and indeed was called the deanery of Menteith from 1235. Indeed, there was an attack on Dunblane by the Britons in the second quarter of the 9th C (Britanni autem concremauerunt Dulblaun ‘also the Britons burned Dunblane’) (Anderson 1980, 250; ES i, 288; Woolf 2007a, 194), which may mean the city was occupied by Picts or possibly by this date Gaels. One of the reasons for thinking Menteith used to be Pictish is that it was thought that Strathearn and Menteith made up a major part of the kingdom of Fortriu (Skene 1886, 340; Watson 1926, 113; map 1b in Wainwright 1955; Smyth 1984, 43; Lynch 1992, 20; Driscoll 2002, 28). However, this has now been convincingly shown by Alex Woolf to have been in the region of Moray and Inverness (Woolf 2006).

As far as the p-Celtic place-names are concerned, the earldom of Menteith sends out something of a mixed message. In Menteith there are two place-names containing *lanerc* ‘clearing, pasture’: Lanrick KMA, and Lendrick CLD, with another just over the border in DLE, Landrick. Another *lanerc* north of the Forth, Lendrick Hill (NO019036), can be found in Fossaway parish KNR, but all the other *lanerc* place-names in Scotland are south of the Forth, the most famous of course being Lanark LAN, but it is also found in Barlanark in Glasgow, Carlenrig ROX, and probably Drumlanrig DMF (Nicholaisen 2001, 211; Taylor forthcoming). Lendrick in ANG is probably a transferred name from Lendrick CLD (Taylor forthcoming).

If *lanerc* place-names have a rough south of Ochils distribution, another place-name element has a markedly north of Forth distribution, and this is *carden*, long thought to have meant ‘woodland, thicket’ (Nicholaisen 1996, 24), but now thought to mean ‘encampment, enclosure’ (Breeze 1999). Nicholaisen shows this element occurring twenty-three times in Scotland. This is found most famously in Kincardine, a place-name found seven times in
Scotland, including **Kincardine** KRD in Menteith where it was an important baronial and parish centre until supplanted by **Blair Drummond** in the late 17th C. It is also most likely found in **Cardross** PMH, another important medieval barony. Cardross in DBN in the heart of the old kingdom of Strathclyde is *Cardinros* in the early 13th C (Glas. Reg. no 108; Taylor 2006, 28), and is the only *carden*-name in Scotland outside of what we would normally think of as historical Pictland. Another *carden-*name might be present in **Garden** KPN, which has ‘c’ for ‘g’ in a number of early-forms. It is also near the site of a possible fort (RCAHMS Canmore NS59SE 5) and is only 1 km east of a broch (Main 1998). However, Garden may be a *gart-*name, of which there are a large number in this area and we should sound a word of warning on that element. Cynthia Neville has written of *gart* being Brittonic (Neville 2005, 81), possibly following Watson, who commented that the large number of *gart*-names to the east of Glasgow ‘may be due to the British influence’, but adds ‘though of course *gort*, *gart* of Gaelic and *garth* of Welsh both mean ‘field, enclosure’” (Watson 1926 198). I have previously argued that we should see *gart* rather as a post 10th or 11th century Gaelic coining for an assart (McNiven 2007).31

Another place-name element that has a seemingly dual identity is *eccles* ‘church’. This element is discussed more fully in the context of KMA (see p.148-151). In a British context *eccles* probably derives from P-Celtic *eglēs*, with some in England dating to the Romano-British period (Hough 2009, 119). It had been suggested that *eglēs* in England originally denoted landholding belonging to the British Church of the 6th C (James 2009, 141). Simplex *eccles*-names in Scotland south of the Forth may date to before c.650 (Taylor 1998, 3). However, in Pictland there are no simplex *eccles*-names; the majority have saints’ names as specifics, meaning that many of these place-names may have been coined in the 8th C (Taylor 1998, 6-7). A study by Geoffrey Barrow produced a map showing at least twenty-six *eccles*-names recorded in Scotland, including **Aiglesteinston** KMA in the Menteith parish of KMA

31 See Chapter 5 for a fuller discussion on this element as it relates to Menteith.
(Barrow 1983, 4). This has such a complicated naming history that Geoffrey Barrow initially thought there were two in KMA, which first appears as *Eglysdissentyn* in 1267 (Barrow 2003, 52; Fraser, *Menteith* ii, 217). Fifteen of these *eccles*-names are north of the Forth including the one in KMA. The others are south of the Forth, but have an easterly distribution, i.e. they are mainly in eastern Stirlingshire or Lothian. There are only two in the old kingdom of Strathclyde, but neither of these is in the earldom of Lennox. *Eglysdissentyn* had ceased to be a church certainly by the time it appeared on record, having been replaced by *Kilmadock* KMA. It may be no coincidence that the *cill*-name seems to celebrate a British saint, known as Cadoc, Docus or Docgwin (Watson 1926, 327; Watson 1927; Brook 1964, 298). Watson prefers the former, and the saint may date to the early 6th C. We need not necessarily believe that Cadoc or whoever the saint was actually travelled to the junction of the Annet Burn and the River Teith to set up a church, but at the very least it may indicate the transmission of the cult of a British saint by British speaking people.

Another place-name with a mainly Pictish distribution in Scotland is *aber* ‘river- or burn-mouth’ and this is represented in Menteith by *Aberfoyle* AFE, where it was *Eperpuill* in the 11th-13th C *Life of Berach* (Plummer 1922, vol. i, 35). Here it is simply ‘confluence of the poll’, now the Pow Burn. Pow is a Scots pronunciation of British *pol*, meaning ‘a sluggish stream or burn’ (*DOST* under ‘poll, pow’; Barrow 1988, 212), or simply ‘burn’ in southern Scotland (Barrow 1998, 59-61). Aberfoyle is one of around sixty places containing the element *aber* in Scotland, with the vast majority occurring north of the River Forth, again in what we would think of as historic Pictland. *Aberfoyle* is among the most southerly of those found north of the Forth, and is the most westerly of those found south of the River Tay. Remarkably, it is the generic in twenty-six Scottish parishes (Taylor forthcoming). However, the element’s ‘British-ness’ is shown by the fact that *aber* also occurs south of the Forth and in Wales. However,

---

32 See Chapter 6 on the Church and Menteith for more discussion on this topic.
given that *aber* is not found in Lennox or Strathclyde (with the exception of *Abercarf*, now Wiston in South Lanarkshire), we may indeed be seeing a Pictish influence in Scotland.

The other place-name that is probably of a p-Celtic origin is **Menteith** itself. The earliest forms are *Meneteth* and *Meneted* or similar from the mid-1160s to the early 15th C. This perhaps derives from Norther British *móinid* (James 2009b, 152), a word related to W *mynydd* or Cornish *menedh*, older *menit*, ‘mountain or rough grazing’ (Watson, Index under *mynydd*), and which was loaned into ScG as *monadh*. *Monadh* has a limited distribution, occurring, like *aber*, mainly within historic Pictland, although it does occur south of the Forth (Barrow 1998, 62-6). Watson thinks Menteith derives from *minit-ted* ‘Teith Moor’, but the meaning of Teith was obscure to him (Watson 1926, 113).

There are other place-names that are p-Celtic in origin in Menteith, but they all, much like **Kincardine**, contain elements which seem to have been borrowed into Sc Gaelic. Without going into great detail,33 they include *preas* ‘bush’ in *Bofrishlie* AFE, and *pòr* ‘seed, grain’, but in place-names meaning ‘crop-land’ in *Cassafuir* KMA (Jackson 1972, 68-9; Taylor 2008, 293). Another element that may have been borrowed into Gaelic from p-Celtic is *blàr* ‘muir, grazing’. This element, discussed in more detail below (p.110-113), very rarely exists as a place-name element in Ireland, where it has the different meaning of battlefield (Taylor 2006, 31).34 The fact that the element is very common in Scotland, and it certainly occurs in Pictland, as can be seen in Blair Atholl and Blairgowrie, the grazing lands of the districts of Atholl and Gowrie, may mean that its use in Scotland was influenced by a related British or Pictish word (Taylor 2006, 31). In Menteith, it occurs nineteen times, and is used as small units of grazing or even arable. However, the fact that it is not exclusively Pictish is shown by the fact that *blàr* occurs elsewhere in Scotland, including Galloway, where there are at least

---

33 See the place-name surveys for more details of British or British-derived place-name elements.
34 *Blàr* can also mean battlefield in Scotland.
eighteen place-names beginning with *blàr*, and a cluster of nine in Lennox at the southern end of Loch Lomond (Taylor 2006, 31-2; Taylor forthcoming).

The close study of the p-Celtic place-names of Menteith has given us some questions that remain to be more fully explored. But as has been found with neighbouring Clackmannanshire, there is a great deal of difficulty in distinguishing between the Pictish and British languages on place-name evidence alone. However, it seems that if there is a boundary to be drawn in relation to Pictish and British, even if it is only for convenience, and even if in the end we are only distinguishing between dialects of Northern British, then we might be justified on the basis of *lanerc*, the saint's name Docus, and the political geography, in placing that boundary not at the River Forth, but rather at the Ochil Hills and the uplands to the north of Doune and Callander, in other words, on the northern boundaries of present day Clackmannanshire and Menteith (see Map 5). Equally, however, on the basis of *aber, eccles, *carden, monadh, and *blàr*, we might also be justified in removing that boundary altogether and simply call the p-Celtic languages of Northern Britain ‘British’.35

_Gaelic in Menteith_36

The study of the Gaelic language in Scotland as a whole, and Menteith in particular, can be rather frustrating: we know more about the language’s decline than we do about its rise and when it prospered. This is entirely due to the lack of documentation, particularly in the Gaelic language; most of the documents of the area were written in Latin or Scots and it is difficult to obtain information on the extent of Gaelic in Menteith until the late 17th century. Just as problematical is the question of when Gaelic first came to be spoken and when it became the predominant language of Menteith. Place-names provide one of the best routes into the Gaelic language in Menteith, but these have to be used with care. Place-names generally give no

35 See also Alan James’ (2009b, 142) discussion of the relationship between British and Pictish. He also discusses many of the p-Celtic elements mentioned above.

36 Discussion of Gaelic in the place-names of Menteith can be found in Chapters 5 and 6; this section will review the evidence for Gaelic in primary and secondary source material.
terminus post quem, and so any dates can only be relative. An additional problem in Menteith is that Menteith is bisected by the Highland Boundary Fault (HBF). Although this is obviously a geographical fault-line, the perception that it was also an approximate cultural boundary has generally meant that those place-names to the south and east of this fault are mainly recorded in Scottish English orthography, while many Gaelic place-names to the north and west are recorded in modern Gaelic orthography. However, the linguistic situation is more complex than this statement implies, and probably has much to do with decisions taken by the Ordnance Survey. What is perhaps surprising is that Gaelic should have survived so long in Menteith. It is ironic that at least from the reign of James VI much effort was spent on trying to eradicate Gaelic from the remoter parts of the Highlands, and especially the islands off the west coast, and yet the language hung on stubbornly just twenty kilometres away from Stirling, one of the main royal centres of medieval and early modern Scotland.

It is improbable that we will know exactly when Gaelic was first spoken in Menteith on a regular basis, but if Menteith was a major route-way on the journey from Iona to Lindisfarne (Taylor 2000, 114; Taylor 1999, 49), then Gaelic may have been introduced by Gaels travelling between these important Christian centres. However, it is also likely that the district was a crossroads between Picts, Gaels, Britons, Angles, and Vikings in their battles for supremacy of northern Britain. The rich agricultural lands of the ancient region of Manaw were highly coveted in this period and many battles were fought for control of it. While it is probable that the area on both sides of the head of the Firth of Forth, i.e. Clackmannanshire and East Stirlingshire, including the fortress of Stirling, were core parts of this kingdom, it is unclear whether Menteith, or part of it, was ever included in Manaw. According to the Annals of Ulster, Aedán mac Gabráin, king of Dál Riata, won a battle in Manaw in 582-3. This may be the battle against the Miathi mentioned by Adomnán his Life of St Columba (Sharpe

37 see Chapter 2 for more discussion on this topic.
38 However, see map in Driscoll [2002, 14], which seems to show Menteith in Manaw.
39 At CELT, sub anno U582-3, 'The battle of Manu, in which Aedán son of Gabrán sun (sic) of Domangart was victor'; 'The battle of Manu won by Aedán'.
A fort near Aberfoyle is traditionally said to have been given to St Berchán or Berach by Aedán to be the site of a monastery (Watson 1926, 194, 225; Anderson 1980, 146; Duncan 1975, 43; Butter 2007, 102). There was a cult of Saint Berach or Berchan at Aberfoyle, where a fair, Féill Bearchàn, was also held (Watson 1926, 194). Aedán was styled in a pre-1100 poem as prince or king of Foirthe (Watson 1926, 53; Clancy 1998, 182), which could 'connect him to the Forth region' (Anderson 1980, 146).

In 642, according to the Annals of Ulster, the Gaels, under the leadership of Domnall Brecc, a successor to Aedán, were defeated by the Britons at the Battle of Strathcarron in STL (Smyth 1984, 118; Clancy 1998, 114). This battle, the earliest recorded instance of hostility between Gael and Briton, was commemorated in a stanza found in one of the extant versions of Y Gododdin. Strathcarron, which now lies under the Carron Valley Reservoir, west of Falkirk, is only twenty km SW from the island of Inchmahome. Of course there are a number of ways from Dál Riata to the Carron Valley and the plain of Manaw, and many of them do not involve striking through Menteith. However, the point here is that at some time during these struggles it is likely that Menteith was among those areas that were 'crucial mediator[s] of communication and conflict' (Clancy and Crawford 2001, 29).

By the ninth century the depredations of the Vikings, and in particular the defeat of the 'men of Fortriu' at the hands of the 'heathens' in 839 (Annals of Ulster), may have caused, whether forcefully or opportunistically, the Gaels to move into Pictish territory (Clancy and Crawford 2001, 61; Woolf 2007a, 66-7, Chapter 3). The Gaels later supplanted the Pictish dynasty, although by what means is not clear. Gaelic became the dominant language of Scotland north of the Forth, replacing whatever form of p-Celtic that existed there, it seems, within a very short period of time, although it must have taken a couple of generations or more. Why this should have been is not clear, but it may be because of the type of lordship the

---

40 Sharpe has doubts as to whether these sources are describing the same battle (Sharpe 1995, 268-9), as does A.O. Anderson (ESI, 89-90, 96-7).

41 A.A.M. Duncan states that Aedán carved 'out for himself a principality on the Forth which included Aberfoyle' (Duncan 1975, 43).
Gaels brought with them. It is possible there was a wholesale ethnic cleansing of Pictland, but this seems unlikely given the potential manpower any ‘conquerors’, if that is what they were, had to call upon (Campbell 1998, 56). Religion, or more specifically Christianity, must also have been a factor in the spread of the Gaelic language. By the seventh and eighth centuries Iona had become the pre-eminent Christian centre in the north of Britain (Driscoll 2002, 21). The prestige and influence of Iona may have had a great impact on the spread of Gaelic in Scotland north of the Forth-Clyde line. Another view might suggest that the eastwards migration of the Gaels fleeing the Viking onslaught of the western seaboard, coupled with the takeover, peaceful or otherwise, of the British and Pictish regions by the kings of Dál Riata, meant that the Gaelic language spread at an impressive rate (Forsyth 2001, 378). In many areas north of the Forth Gaelic replaced Pictish due to the ‘social, political, and cultural upheavals’ that happened in Scotland from the seventh century (Forsyth 2001, 378). However, this whole subject of Gelic replacing p-Celtic is a highly complex matter and for the latest attempt at trying to resolve it see Woolf (2007a, 322-342). In any case, the result was that Scotia experienced a change in cultural identity, one that was persuasive enough to eventually bring an end to the Picts and Britons as distinct peoples (Driscoll 2002, 21; McNeill and MacQueen 1996, 62). How precisely this change from p-Celtic to Gaelic affected Menteith is not known, but the transfer of Cowal saints, such as Bláán and Kessog, into this general area may indicate the movement of Gaels westwards, taking over the lands of the Picts and Britons north of the Firth of Forth and Campsie Fells/Gargunnock Hills massif. Alternatively, and perhaps more likely, it may be that this transfers of Cowal saints is evidence of connections via routeways and family ties. Whatever the means, by 1100 Gaelic was established as the most common spoken language in most of Scotland (Forsyth 2001, 378).

42 Campbell states that the *Senchus Fer nAlban* ‘allows for a maximum of about 2000 [fighting] men’ in the seventh century.
Watson argued that the difference between Gaelic and British was not as great as it is today or even during the medieval period (Watson 1934-6, 117, 126). Gaelic did not instantly become the language of everybody at once (Withers 1984, 17). In spite of differences in the languages of the Gaels and Picts and Britons, it may have been easier for the Gaels to impose their language on the Picts and Britons of Strathclyde than it was for Scots-speakers to do the same to Gaelic-speakers from the fourteenth century onwards. That Gaelic prospered in Menteith is evident from the place-names. For example, of the seventy-three place-names in PMH on the current (2002) 1:50,000 OS ‘Landranger’ map, fifty-one are Gaelic in origin.

In Scotland as a whole Gaelic reached its peak in the eleventh and twelfth centuries and Fife ‘lay at the heart of a Gaelic-speaking kingdom with a Gaelic-speaking king’ (Taylor 1994, 102). Gaelic had also ventured into Lothian, although it did not take root there so readily. By the twelfth century, it had retreated north and westwards across the Forth and the (Stirlingshire/West Lothian) Avon. In the thirteenth century Gaelic had begun its retreat from Fife and had disappeared from there ‘probably [by] the first half of the fourteenth century’ (Taylor 1994, 100).

There are many reasons for this decline. Chief among them are: the rise of burghs, where many of the merchants were of non-Gaelic origin, and spoke English or perhaps Flemish; the imposition of a non-Gaelic system of lordship, traditionally called feudalism, where the aristocrat himself was not, or was not often a Gaelic speaker; a Church which had a preference for Scotto-Norman clergy, and in which Latin was the lingua franca of that organization; and a royal court which was or became Anglophone (and also francophone for a time in the late 12th and early 13th centuries), in speech and in influence.

Gaelic was the language of the earls of Menteith prior to c.1231. Like their neighbouring earls in Strathearn and Lennox, it is possible that these Menteith earls had interpreters to

43 Withers (1984, 18) states that Gaelic had begun to retreat in the late eleventh century, Murison favours the twelfth century (1974, 76), while Barrow contends that it may have hung on in parts of Fife, Kinross and Clackmannan-shires until the early fourteenth century (2003, 332-3).

44 See Walter of Coventry’s comments in the early 13th C ‘more recent kings of Scots profess themselves to be Frenchmen, both in race and in manners, language and culture; and after reducing the Scots to utter servitude, they admit only Frenchmen to their friendship and service’ (Anderson 1908, 330, n. 6).
assist them with the governing of the earldom in the new multi-lingual environment (Neville 2005, 216). The earls of Menteith who gained the earldom after the demise of the earliest line of earls are often thought to have spoken mainly Scots or even French, presumably since they were descended from Anglo-Norman stock who came to Scotland in the course of the 12th C. Walter Comyn married the daughter of the last indigenous earl, Muirethach c.1231. Comyn had been lord of Badenoch prior to this (Brown 2004, 28-9; Young 2005, 63). His father, William, had been Justiciar of Scotia and earl of Buchan (Brown 2004, 13, 28). It is unlikely that Comyn did not understand Gaelic, for without it his job as leader of the people of Badenoch and Menteith would have been difficult. His successor, Walter Stewart, must also have been well acquainted with Gaelic, coming from a family whose major power base was Kyle and Cunningham in Ayrshire (Barrow 2003, chapter 15). Indeed, from the mid 13th C Arran and Knapdale were in the hands of Walter Stewart and remained in the hands of the Menteith Stewarts until the Campbells acquired them in the 1360s (Boardman 2006, 15, 64). It seems unlikely the Stewarts, like the Comyns in Badenoch, could have been effective lords over these territories unless they understood Gaelic (see p.72-5). There is evidence for the later medieval and early modern periods of Scottish nobles whose estates had significant populations of Gaelic-speakers being able to speak ‘the language of the tenantry of their estates, even if they habitually spoke Scots themselves’ (MacCoinnich 2008, 314, see also n.15).

Despite all the pressures associated with what may be called ‘Europeanisation’ (Bartlett 1993, chapter 11), Gaelic hung on stubbornly in Menteith even though its caput was only twenty-two km from Stirling, one of the main centres of medieval Scotland. The reasons why are not entirely clear. There seems no obvious explanation why many parts of lowland Menteith remained Gaelic speaking until the late eighteenth century when most other areas of the Scottish Lowlands from Edinburgh to Inverness had spoken Scots since the thirteenth century or earlier. However, the reasons must include close contact with the Gaelic west and
the lack of a sizeable burgh within Menteith itself. Our evidence for the Gaelic language as a live entity in Menteith in the medieval period is frankly pretty scant, and indeed, our best evidence for the prevalence of the use of Gaelic as an everyday language in Menteith comes from the late seventeenth to early nineteenth centuries, particularly from material such as the *Old Statistical Account*. Prior to this place-names and personal names are about all we have to go on. The problem is that many of the place-names may have already been extant for a great number of years by the time they come on record from the twelfth century onwards.

Difference in language only seems to have become a cultural issue between the Lowlands and Highlands in the fourteenth century. John of Fordun is the earliest commentator of the cultural dichotomy of those who inhabited Scotland: Lowlanders spoke ‘Teutonic’ (*lingua Theutonica*) Highlanders were ‘Scottish’ (*lingua Scotica*) in speech (MacGregor 2009, 7). Lowlanders came to see a Gaelic speaker as someone who was inferior, and the language was thought of as ‘barbarous’ (Withers 1984, 23-4). Issues of national identity in which Lowland Scots wished to be seen as distinct from the English ensured that by the late fifteenth century the language of the Lowlands came to be known as ‘Scottis’, rather than ‘Inglis’ as it had been before (Murison 1974, 75, 81; Lynch 1992, 68); Gaelic was called ‘Irish’ or ‘Erse’, an allusion to its origins (Murison 1974, 81; Withers 1984, 23). This sense of cultural difference was reinforced by a physical distance as Gaelic retreated behind the Highland/Lowland boundary (Withers 1982a, 143). The Highlands was *terra incognita* to many Lowlanders, and the frequent skirmishes between those on either side of the mountains underpinned the view among Lowlanders that Highlanders were wild ruffians, although they cannot have been solely responsible for all the trouble. Nevertheless, they were blamed and the *Register of the Privy Council* brims with tales of marauding Highlanders attacking their neighbours. One example is that brought to the Council on 14th December 1592: John Elphinstone complained

---

45 The hamlet of Port-of-Menteith was erected into a burgh of barony in 1467 (*RMS* ii no. 902), but it can hardly have attracted the amount of trade or numbers of Scots speakers as, for example, the burgh of Crail in Fife did in the 13th C.
that ‘Patrik Steuart of Balquidder’ and others along with convocatioun of a grite nowmer of hieland men and sornaris of clannis’ had come to Elphinstone’s lands in Drumquhasil and other places on 31st July 1592 and took 36 ‘ky’, ten ‘oxin’ and ‘divers and sindrie guidis’. Further, on 31st October, ‘with twa bagpipes blawand befoir thame’ the highlanders ‘maist barbarouslie reft and awaytuke’ 196 cows, 66 horses, and 300 sheep (RPC v 1592, 28). As well as their thieving ways, the Gaelic language was seen as a barrier to the civility of the Highlander. James VI inherited the English throne in 1603 conscious of the fact that he reigned over a country in the north that was divided by language, while most Englishmen (parts of Cornwall excepted) spoke English. He also inherited a mainly Welsh-speaking Wales and Irish-speaking Ireland too. James had been concerned about the lack of unity in Scotland for some time. Other kings had attempted to increase their power in the north by bringing the magnates, notably the Lord of the Isles, to heel. It had been thought that James VI began the systematic assault on the Gaelic language mainly through legislative action, the most famous being the Statutes of Icolmkill or Iona of 1609, strengthened in 1616 (Withers 1984, 28; Goodare 1998; MacGregor 2006). The Statutes of Iona were part of James’ desire for the Highlanders to recognise his authority, pay their rents and taxes, and conform to the rest of Scottish, and British, society, although their effectiveness, at least to begin with, was probably not great. However, it has recently been argued that the provision in the sixth Statute requiring the clan chiefs to send their ‘eldest sone...or dochter, to the scuills in the Lowland...to speik, reid, and wryte Inglishe’ (RPC ix 1609, 28-9), was to help ‘equip the elite with a skill essential in fulfilling the remit envisioned for them in the Statutes, as local agents of central government’ (MacGregor 2006, 147). Indeed, it has been recently argued that Scots was by this stage prevalent, especially as a literary and official language, amongst Gaelic

---

46 Balquhidder PER.
47 ‘A person who exacts free quarters and provisions by threats or force, as a means of livelihood’ (DOST under sornar).
48 There is a Park of Drumquassle (NS483869), Easter Drumquassle Farm (NS486871) and Wester Drumquassle (NS 481874), all in DRY STL. The Steuarts would probably have gone through Menteith at some point in this expedition.
speakers, especially amongst the elite where it was the ‘normal language of business’ (MacCoinnich 2008, 320). Nevertheless, it may be that the Statutes of Iona helped set the tone of the offensive against Gaelic that was to come.

Paradoxically, the great project of the late 16th and the 17th Centuries, the bringing of the Protestant religion to the people, was hampered in the Highlands because the language of that project in Britain, English, could not be understood by a great many Highlanders. A lack of Gaelic-speaking ministers and the large size of the parishes in the Highlands meant that the Word of God, as the Protestants believed it, made little headway. It is through the efforts to remedy this situation that in the late 17th Century we have the first systematic surveys of the extent of the Gaelic language in the Highlands. Part of the solution to the lack of religious instruction was to send a Gaelic Bible to every Highland parish. It was a Menteith man who took on the responsibility of producing the Bible in Scottish Gaelic: the Rev. Robert Kirk of Aberfoyle (Withers 1984, 43). The Bible had been translated into Irish Gaelic, but in Irish type, in the early 1600s, but it was not published until 1685. It was this which Robert Kirk translated into Scottish Gaelic. He died in 1692 apparently exhausted by this work (Withers 1984, 44). The Scottish Kirk needed to know how many Bibles they required and where to send them. Someone, perhaps James Kirkwood, an English minister (Withers 1980, 83), prepared two lists in 1698. From An Account of the Parishes in the Highlands, 1698, we learn that there are six Gaelic parishes in ‘Monteith’ (Withers 1984, 46). The second list entitled A More Particular List of the Highland Parishes, 1698, gives us the names of the parishes that are Gaelic speaking, or mainly so. In ‘Monteith in Dumblane Presbyterie’ are Aberfoill, Callender, Kilmadock, and Port. Also listed amongst the Menteith parishes are Balquhidder and Buchanan, although these were actually in Strathearn and Lennox respectively (Withers 1984, 52). This list informs us that Balquhidder, Aberfoyle and Callander have no minister, while for Buchannan, Kilmadock, and Port (i.e. Port-of-Menteith) the list states that ‘these 3 last need ane Irish preacher tho they have none’ (Withers 1980, 73; Withers 1984, 52).
Unfortunately, this is all the information the 'lists' provide us with. But already we know more about Gaelic as a living language at this time in Menteith than we do for any previous period.

In 1724-5 two pieces of evidence come to light about the state of Gaelic in Menteith. One is general, the other more detailed, but it only concerns the parish of Port-of-Menteith. In 1724 Alexander Graham of Duchray, probably a Gaelic speaker (Withers 1984, 59), wrote what may be termed as a proto-Statistical Account of a number of parishes in Menteith, Lennox and Western Stirlingshire. The Menteith parishes are Callander, Kilmadock, Kincardine, Port [of Menteith], Aberfoyle, and Kippen (Geo. Coll., 334-52). In Callander, ‘all the inhabitants of this paroch use the Irish language’ (ibid, 337). While in Aberfoyle, ‘all the inhabitants use the Irish language’ (ibid, 344). In Port [of Menteith], ‘the inhabitants of the most part of this paroch use the Irish language’ (ibid, 342). We are left to assume that the inhabitants of the parishes of Kilmadock, Kippen, and Kincardine spoke only Scots.

Port-of-Menteith parish was subject to a more detailed survey in 1725. The reason for the survey was a dispute over the presentation of which of two men should be minister of the parish, one of whom was a Gaelic speaker. The population of Port-of-Menteith was not totally Gaelic-speaking, but it was felt that a Gaelic-speaking minister would ‘be useful to both Highlanders and Lalanders therein’ (Withers 1982b, 18). One hundred and fifty people could not speak English, and ‘as many besides, that can do little more than buy and sell in that language’ (ibid). This was disputed by the proposers of the other candidate who declared that many of the people on the list of those who wanted the Gaelic-speaking candidate could understand English. However, there were parts of Port-of-Menteith parish that were more Gaelic than others, and lists of ‘Irish Families’ were produced for the parish at this time. The barony of Drunkie PMH, in the north-west, had 43 people who were classed as ‘Irish’, and who presumably spoke Gaelic or mainly so. Dullater barony, in the north, had 49 ‘Irish’; Port barony had 40, while there were 26 ‘Irish’ persons in Rednock and Ruskie to the east and
which is mostly Lowland in character (Withers 1982, 21-2). In 1755, there were 1865 people in the parish (Kyd 1952, 45). If we can assume that there had been no great explosion in population in the thirty-one years from 1724, these Gaelic speakers represent a small percentage – 8% – of the population of Port-of-Menteith parish.

After the ’45 Rebellion some of the estates of the supporters of Bonnie Prince Charlie were confiscated by the government. A document on the Forfeited Estates dating from 1755-6 includes the baronies of Callander and Strathgartney in CLD. This shows that there were 388 ‘English’ speakers out of a population of 532, or 73%, in Callander barony, and 235 ‘English’ speakers out of 414 people, or 57%, in Strathgartney.

The Statistical Accounts in the 1790s and 1840s are perhaps the last major pieces of testimony regarding the state of Gaelic in Menteith. It is worthwhile quoting what the ministers of the Gaelic-speaking parishes say.

**Aberfoyle** – ‘In antient times, the Gaelic language alone was spoken in this parish; and, even in the memory of man, it extended many miles farther down the country than it now does. The limits of this antient toung, however, are daily narrowed here as every where else, by increasing intercourse with the low country. At present, everybody understands English, though Gaelic is chiefly in use. The service in church is performed in English in the forenoon, and in Gaelic in the afternoon’ (OSA x, 129).

**Callander** – ‘The language spoken by persons of rank and of liberal education, is English; but the language of the lower classes is Gaelic’ (OSA xi, 611-2).

**Kilmadock or Doune** – ‘In the quarter towards Callander, the generality of the inhabitants speak Gaelic; and this is perhaps still more corrupt than even the Scotch, in the other quarters of the parish. It is impossible to conceive any thing more offensive to the ear, as the conversation of these people. The true Gaelic is a noble language, worthy of the fire of Ossian, and wonderfully adapted to the genius of a warlike nation; but the contemptible language of

---

49 Statistics of the Annexed Estates 1755-1756 (SRO [now NAS], 1973), 63-7.
the people about Callander, and to the east, is quite incapable of communicating a noble idea' (OSA xx, 53). This Account was written by Mr Alexander MacGibbon, who was not the minister of KMA at the time. It is unclear who MacGibbon was, but he may have been a local writer. The parishioners of Logierait PER also seem to have spoken ‘a corrupted dialect of the Gaelic’, according to the minister, Thomas Bisset, a native of neighbouring Moulin (OSA v, 82; Fasti iv, 189). What these men mean by ‘corrupt’ is not clear, but it may be a reference to the Gaelic dialects in Kilmadock and Logierait at this time.

In Kincardine parish Gaelic was spoken only by migrants from the Highlands who worked on the draining of the Moss and in agriculture. There is no mention of Port-of-Menteith or Kippen as regards Gaelic in the OSA.

Writing in the NSA In the 1840s, the Aberfoyle minister states that ‘at present, the inhabitants all understand and speak English’ (NSA x, 1156). In Callander, ‘both English and Gaelic languages are spoken in the parish, and divine worship on the Sabbath is performed in both’ (NSA x, 356), and Gaelic was taught in both the parochial school at Callander and at a school in Brig o’ Turk CLD (NSA x, 358). Kilmadock only had a ‘few families’ who spoke Gaelic. In Kincardine, even the use of Gaelic amongst the migrants working on the Moss had fallen so much that ‘few or none can profit by a sermon from the pulpit in that language’ (NSA x, 1266).

Exactly when Gaelic finally died out in Menteith can only be conjectured, but perhaps the last piece of evidence should belong, appropriately enough to W.J. Watson. In trying to determine a meaning for ‘Teith’, he spoke to ‘four Gaelic-speaking men born near Callander, two of whom were over 80 and had excellent knowledge of the place-names...’ (Watson 1926, 113). He gives no date, but it was possibly in the years on either side of 1900. Watson gave

---

50 The only Alexander MacGibbon I have so far been able to come across with any kind of local connection is one who wrote Answer to the satirical poem on Stirling (NLS Hall.195.e.1(2)).
the Rhind Lectures, the basis of his *History of the Celtic Place-names of Scotland*, in 1916, two years after his appointment as Professor of Celtic at Edinburgh University.

Gaelic declined in Menteith due to a number of factors, most of them in common with other parts of the Highlands. There had been an assault on Gaelic by the government and the Kirk since the Reformation. The language was ‘obnoxious to the lowland, presbyterian intellect’ and it was felt to ‘underlie the barbarity, jacobitism and Catholicism of the Highlands’ (Durkacz 1983, 52). Other, more mundane causes included the spread of the British State in the shape of roads, the military, institutions, such as the postal service, and the railways; the Highland Clearances had their effects in Menteith, too; and, more pertinently for Menteith, the rise of literary tourism, especially after Walter Scott wrote his Highland novels and poems, particularly *Lady of the Lake*, published in 1810, which was based in the area, brought closer contacts with English-speakers and indeed English people. These factors ensured not only the death of Gaelic in Menteith, and indeed much of the Highlands, but also led to a name change for its (modern) defining feature from the Loch to **Lake of Menteith**.

**Scots in Menteith**

A survey comparable to that of Gaelic has not been done for the Scots language in Menteith. What will be attempted here is a preliminary survey of Scots place-names. Below (p. 122-28) there is a discussion looking at the elements *baile* and *toun* together in some detail, as they can be valuable indicators of language and social change. Other Scots place-names will be looked at below to try and arrive at a rough sense of chronology as to when Scots became the language of place-name generation in each parish.

Given the lateness of the source material, it is unlikely that we will be able to tell precisely when Scots began to take root in Menteith. As far as we can sure, the earliest lord whose first language was not Gaelic in this area is Richard de Montfiquet who gained the lands of Kincardine in 1189 x 95 (*RRS* ii no. 334). It may be no coincidence that **Drip** occurs in KRD. It
is thought to be derived from Sc threip ‘argument, dispute’. While the earliest use of the word in *DOST* is c1200 (for *Threpland* ABO FIF), Barrow thinks this element dates to ‘an active period of boundary definition at a period (twelfth to thirteenth century?) when the use of Older Scots was becoming fairly general throughout Scotland’ (Barrow 1998, 68).

Strengthening Barrow’s case is reference to *le Drep*, now Meikle Dripps LAN, on the border of Lanarkshire and Renfrewshire granted to Walter son of Alan by Malcolm IV in 1161 (*RRS* i, no. 184), and granted by Walter to Paisley Abbey in 1165x1173 (*Reg. Passelet*, 5).

Also in KRD is *Boreland*, which appears from its inclusion in a document of 1189 x 95 in *Camb. Reg.* to be an early Scots place-name, but see discussion on p. 39 for the view that this is actually a later name. Certainly the earliest use of Scots in a place-name is by one of the earl of Menteith’s clerks in 1317 x 1322 where there is a Scots plural ending added to *Larakynys* (i.e. *Lanrick* KMA), which itself is a British place-name with a probable Gaelic plural –ean ending.

It is not until the 15th C that the documentary record begins to bring more Scots place-names into view. This has much to do with the surviving documentation and who it was produced for. In other words, they are more likely to appear because they are in royal documents, especially charters, *RMS* and *ER*. The earliest Scots place-name to appear in the 15th C is *Brigend* AFE in a charter of James I granting Malise Graham the earldom of Menteith in 1427. We must not discount the possibility that to the Gaelic-speaking locals of AFE it was *Ceann Drochaid*, but to the royal clerks it was known by the Scots name, although, since Graham was from Strathearn and his father had been earl of Atholl, he may have had some knowledge of Gaelic. Also in AFE, two *toun*-names come on record in 1489, Milton and Kirkton.

---

51 This is found in *Dunf. Reg.* no. 168, and has been dated to 1214 x c.1226 (Taylor 2006, 57).
52 My thanks to Dr Amanda Beam-Frazier for informing me of the date of this charter. A confirmation charter by Pope Alexander III, where *Threp* is mentioned, is dated to 1172 (*Reg. Passelet*, 409).
53 See Lanrick KMA for a short discussion of ScG –ean ending.
From the 1450s a number of Scots place-names appear in ER, particularly in KMA. Here we have the notable situation where there are two groups of place-names containing the element *camas*, one near Callander; the other near Doune. The Callander group contains the Gaelic suffixes *mòr* and *beag* in Cambusmore and Cambusbeg; the Doune group, with the exception of Cambuswallace and Cambusedward, all contain the Sc formula 'X of Cambus', i.e. Burn of Cambus, Milton of Cambus, Carse of Cambus, and Brae of Cambus. The Doune group of Cambus-names is an example of a ScG-named estate with its divisions designated in Scots, while the Callander group show ScG designations. Also near Doune are the places Newton of Doune, Cobbyland de Doune (ER v, 675), and Parkland of Doune, all first appearing on record in the Exchequer Rolls between 1451 and 1461.

Elsewhere in KMA, Scots place-names appear in the late 15th and early 16th C. The Spitale, later Spittalton, appears from 1491 (NAS, PA2/6, 1st part, f.28v), while Lochfield dates from 1517. One documented renaming of a Gaelic place-name to Scots is *Tom, which is Tum in 1261 (RRS ii no. 519 note), but is Thom, tunc vocat. Barnisdale in 1509 (RMS ii no. 3347), and finally appears as Watston in 1684 (terras de Thom vocata Barnsdaill alias Watstone (Retours PER no. 934)). Barnsdaill must have been a subdivision of the estate of Watston KMA, since the latter place existed in 1491, where it was the toun of either Wat Smytht (sic) or Wat Dogg or perhaps both (NAS PA2/6, 1st part, f.28v).

KPN is particularly poorly documented as a parish. Aside for the church of Kippen, which comes on record in 1238 (*Inchaffray Liber*, xxxi) and in 1275 (Bagimond (Dunlop edition), 54), no other place-name in KPN appears until the 1440s. This makes any statement regarding the emergence of Scots necessarily tentative. What we can say is that aside from some of the places whose names begin with Arn-, such as Arnprior, Arnmore, etc., being part of the lands of Inchmahome Priory (see p.116, 160), by the mid 15th C some other parts of the parish were in the hands of the king, including Arnbeg, Arnfinlay, Drum, Shirgarton, and Treinterone (ER v, 475). There may have been a Gaelic presence in the 1440s as
Arnprior first comes on record then as Erenefrear (Bower Scotichron. Bk. 2, ch. 10 (vol. 2, p. 190)). This shows signs of Gaelic lenition, but that may have been due to Bower’s informant, possibly a Gaelic-speaking monk at Inchmahome. It may be that the parish was bi-lingual in the second quarter of the 15th C, since we also know that Garden KPN had the surname Sinclair as a suffix, i.e. Carten-Sinclare in 1465 (RMS ii no. 844). The Sinclair in question was William Sinclare, master of Orkney and Caithness (Magistri Orchadien’ et Catanen’), connected to the Scots-speaking Sinclairs of Rosslyn MLO (Barrow 2003, 281), who had been earls of Orkney since 1379 (Nicholson 1974, 192). In 1465 Garden was in the hands of Malcolm MakClery, an attorney at Stirling (Stirling Protocol Bk, 116). One name which may show that the ScG element earrann was borrowed into Scots as arn- in the 16th C is Arnmanuel. The nunnery of Manuel STL came into the possession of the Livingstons of Calendar, Falkirk in 1545, but the Livingstons had held lands in KPN since at least 1454 (ER v, 675). Arnmanuel does not appear on record until 1581 (RSS vii no. 210).

However, most place-names in KPN do not appear until the 16th C or later; the clearly ScG Ballamenoch KPN, near Buchlyvie, first appears on Blaeu in 1654 as Balemeanach, at a time when Scots had been spoken in the parish for at least two centuries. In 1426 part of the lands of Torrie KMA is named Torrie-Spens after ‘Johanni de Spensa, burgensi de Perht’ (RMS ii no. 45), who may have been one of the conduits by which the Scots language gained a hold in Menteith. We need not necessarily think that Spens himself settled in Menteith, but his representative, perhaps a factor or similar, may have.

Conclusion

Three main languages have left their mark on the nomenclature of Menteith. The earliest of these, the place-names strongly suggest, was a p-Celtic language, although whether it could be further refined as Pictish or British type is for further research. Gaelic is the language of the vast majority of the place-names in Menteith, and this was probably the language of a
large percentage of the population for most of the Middle Ages. Gaelic continued to be spoken in many of the Highland parts of the area until at least the 19th C. Scots probably started making inroads into Menteith from the 12th C as part of the transfer of lands to Anglo-Norman magnates, such as the Muschets of Kincardine. An early example may be Drip KRD, but most Scots place-names in Menteith are only rooted from the 15th C when a cluster of Sc toun-names emerge in the barony of Cessintully KMA. There is no evidence for the two languages living cheek by jowl as there is in Fife, probably because the main evidence for this in Fife is perambulation charters, a feature absent from Menteith. However, the formation of ScG baile-names north of the River Teith at the same time as the toun-names are being coined suggests Gaelic was still a vibrant language in 15th C Menteith.

Having examined the source material for place-name research and the languages of Menteith we are nearly ready to reveal what the place-name evidence can tell us of medieval rural society in Menteith. First, however, we will now have a brief look at a historical framework and see how language how Gaelic the group we know most about in Menteith were: the earls and other major landlords.
Chapter 4

Menteith: Historical Framework

This is not intended to be a comprehensive account of the history of the earldom of Menteith, but rather an outline showing, as far as possible, how Gaelic the earls of Menteith and other nobles were throughout the Middle Ages. This brief chapter will also look at issues such as cultural exchange between Menteith and other parts of the Gàidhealtachd, landholding, and marriage. The careers of the post-Reformation earls need not concern us here, and are covered in great detail in Hutchison (1899, 284-317).

Earls of Menteith to Dukes of Albany, 1164 – 1425

The first known earl of Menteith is Gillecrist who flourished in the second half of the 12th C. (Fraser, Menteith i, 4; SP vi, 125). We know nothing about him beyond the fact that he was a witness to several charters. He first comes on record in 1164 as a witness to a confirmation charter of Scone Abbey; he is designated here 'Gillecrist comite de Meneteth' (RRS i, no. 243). Fraser (Menteith, i, 6) and Hutchison (1899, 217) state that Gillecrist was succeeded by Muretach or Murdach c.1180, which must be a mistake since Gillecrist witnessed a charter of William I to William de Monfort in 1189 x 1199 (RRS ii, no. 335). A charter of William I confirming a grant of the church of Moulin to Dunfermline Abbey by Malcolm earl of Atholl, is witnessed by 'Comite Mauricio de Meneteth' in 1187 x 1195 (RRS ii, no. 337). This Maurice is referred to as Murethach earl of Menteith ('comite de menetheth')\(^54\) when he is witness to an agreement between Gilbert, prior of St Andrews and his canons and the Céli Dé of St Andrews in 1198 (SP vi, 125; St A. Lib. 319). It had been thought that Muirethach and Maurice were either two different people (Hutchison 1899, 217), or that Maurice/Muirethach was the elder

\(^{54}\) No capital ‘M’ in menetheth.
of the two brothers of the same name who were sons and successors of Gillecrist (SP vi, 125). The Scots Peerage writer seems to be correct, for what seems to be happening is that this is part of a phenomenon where Gaelic names were being assimilated to continental ones around this time. As Matthew Hammond has written 'scribes often rendered Gaelic names in their Latin 'equivalents’” (Hammond 2007, 85): for example Gilbertus was equivalent to GilleBrigte, while Muirethach, a Gaelic name meaning 'lord’ (Jackson 1972, 45), became assimilated, at least in Latin texts, to Mauricius (Hammond 2007, 91).55

Muirethach had been earl for a number of years before his right to the earldom was challenged by his younger, probably half-brother, confusingly also named Muirethach. It may be that the elder Muirethach was an illegitimate son of Gillecrist and the younger Muirethach had a more suitable claim to the earldom, at least in the eyes of the new Anglo-Norman establishment. The only reason we know about the circumstances surrounding the younger Muirethach’s succession is due to a dispute between two female heirs, Isabella and Mary, regarding the inheritance of the earldom in 1261. The documents that enlighten us of the dispute form part of an inspeximus charter, or an official copy of a document made under a seal, by Henry III of England in 1261 of an agreement made in 1213 by the two Muirethachs before Prince Alexander, later Alexander II of Scotland (RRS ii, no. 519). The documents were brought before Henry by Isabella, daughter of Muirethach the younger and former wife of Walter Comyn who had died in 1258. The agreement states that Muirethach the elder will resign the earldom of Menteith in favour of his younger brother, ‘juniorem fratrem ejus’. The elder Muirethach was to have certain lands within Menteith for his lifetime.56 These were to return to the earldom after his death. Muirethach the younger was also to give his brother certain lands outwith Menteith for the elder Muirethach to give his daughters in marriage,

55 Other possible ScG names that could have been Latinised as Maurice include Muirchertach or Murchad. My thanks to Thomas Clancy, Dauvit Broun, and Simon Taylor for discussions on this topic. In depth research on the ‘Europeanisation’ of native names is overdue.
56 See Chapter 1 for the location of these lands.
‘Idem vero Mauricius junior eadem die tradidit fratri suo Mauricio seniori ad maritandas filias suas’ (Fraser, Menteith ii, 214).

However, while the agreement appears to be amicable, it is hard to imagine the elder Muirethach giving up his earldom lightly, even if he was of ‘doubtful legitimacy’ (Duncan 1975, 200). If Gillecrist had still been alive in 1195 – realistically, according the available evidence, the last possible date he could have been earl – then Muirethach the elder would nevertheless have been earl for eighteen years before resigning in favour of his younger brother in 1213.57 There, quite simply, have to be other reasons for the elder Muirethach giving up the earldom. Duncan suspected that the elder Muirethach resigned the earldom of Menteith in favour of his younger brother, his male heir, who then pledged to provide for his daughters (Duncan 1975, 200). Another possibility is that the elder Muirethach was coming to the end of his life – we hear no more of him after this – and he wanted to secure an orderly succession to the earldom while ensuring his daughters were cared for. While this is what happened in the short term, within half a century of the agreement between the Muirethachs bitter disputes had arisen over who would succeed to the earldom. It is a recurring theme that for much of the time the inheritance of the earldom failed in the male line and consequently passed to heiresses, meaning the title of earl was held in right of the holder’s wife. If the holder predeceased his wife, the title reverted back to the woman, who remarried. This led to competition for the prize not just of the woman but also of the earldom that came with her. The younger Muirethach was earl until c.1231, leaving two women as heirs: Isabella and Mary. Duncan (1975, 584, n.34) and Brown (2004, 55) assert that they were cousins not sisters. Isabella was the daughter of the younger Muirethach; Mary the daughter of the elder (see also Genealogical Tree 5 in Duncan 1975, 634). Boardman, however, stresses that the relationship between the two women cannot be ‘proven either way’ (Boardman 2006, 30, n.40).

57 This of course rises to twenty-three years if he succeeded in 1190.
Around 1232 Isabella married Walter Comyn, Lord of Badenoch. Comyn did not become earl of Menteith immediately, however; it was not until 9th January 1234 that he was designated as such (Duncan 1975, 543; SP vi, 127-8). The Comyns in Scotland could trace their origins to a prominent Anglo-Norman family who followed David I north and had been active at the Scottish court since 1136 (Young 1997, 15). The dichotomy of Gaelic v. Anglo-Norman or celtic v. feudalism in Scottish historiography has meant there is a tendency to see these Anglo-Norman knights who arrived with David I in the 12th C as still being Anglo-Norman in the 13th C. It has been written recently that William Comyn, Walter’s father, was ‘the first ‘Norman’ earl in Scotland’ when he gained Buchan by right of his wife c.1212 (Young 2005, 63). In following such a view, it is tempting to see Walter Comyn, too, as being an Anglo-Norman baron. However, by the time Walter Comyn became earl of Menteith, he had been Lord of Badenoch, which included Lochaber in the west, since c.1229 (Young 1993, 178; Young 2005, 63; Barrow 2003, 345). The presumption must be, then, that Comyn could speak Gaelic. Already one of the pre-eminent members of the Scottish nobility – he was Alexander II’s agent in subduing Galloway, a Gaelic area, in 1235 – Comyn’s power rose with the dignity afforded the holder of an earldom. His acquisition of the earldom of Menteith, a ‘marcher earldom that controlled important passes from central Scotland into Argyll’, meant that Comyn gained certain rights over the jurisdiction of parts of Cowall and Kintyre (Murray 2005, 301). Indeed, by the time of the Scottish Wars of Independence in the late 13th C and early 14th C, the Comyns had developed deep roots in the Highlands (Nicholson 1974, 74). It is doubtful, therefore, if Walter Comyn could have governed his new territories, Menteith included, if he could not understand Gaelic. Comyn’s career is told in more detail by Young (1985 and 1997), Brown (2004) and Duncan (1975).

In 1258 Walter Comyn died in circumstances that are unclear: the English chroniclers, including Matthew Paris, say he fell from his horse (Anderson 1908, 376); many Scots nobles believed he was poisoned (Chron. Fordun, 293; Young 1997, 59; Hutchison 1899, 222).
Countess Isabella did not allay suspicion by marrying Sir John Russell, an English knight, probably from Ely in Cambridgeshire, almost immediately after Comyn's death. It was not proved that they had poisoned the earl, but they were put in prison anyway and deprived of their estates. Once free they fled to England where they appealed to Henry III. Other than inspect Isabella's writs, discussed above, there was nothing much Henry could do. The Countess and her husband were dead by 1273. They were succeeded by a daughter, also Isabella (CDS ii no. 466; SP vi, 129;).

After Walter Comyn's death in 1258 the earldom passed eventually to Walter Stewart, husband of Mary, perhaps daughter of Muirethach the elder. Walter Stewart's tenure was not without problems: the Comyns were anxious to keep the earldom in their family and Sir John Comyn, Earl Walter Comyn's younger brother, forced his sister-in-law, Isabella, to renounce the earldom in his favour. Sir John lost out in preference to Walter Stewart, who was using the title of earl of Menteith by April 1261 (SP vi, 130; Duncan 1975, 584; Young 1997, 73). The Comyns then advanced the claim of William Comyn by right of his wife, Isabella, daughter of Isabella and Sir John Russell. It was partially successful: in 1285 Walter was left with half of the lands of the earldom, and the title of Earl; the other half of the lands went to William and Isabella (Hutchison 1899, 224-5). The lands of Menteith had been partitioned between co-heirs (Brown 2004, 92). It was perhaps the first time an earldom rather than a barony had been divided in this way (Duncan 1975, 584). We are not told which portion went to whom, but Hutchison believed the western half went to Stewart, while the Eastern half went to the Comyn interest (Hutchison 1899, 225). How this division translated itself on the ground is not clear; but it is possible that Stewart retained the parishes of AFE, western CLD, and the western-part of PMH (the eastern part, or a portion of it, may have belonged to the priory of Inchmahome), while the Comyns gained (or re-gained) eastern CLD, KMA, KRD, and KPN.58 It

58 There is no evidence for the partition being made along these parochial lines as such, I am merely surmising based on Hutchison (1899, 225). He quotes Wyntoun: 'The Kyng than of his counsale/ Made this delieverans thare
may be that the later major divisions of Menteith, including the post-1427 earldom (i.e. AFE and the western half of PMH), the Stewartry of Menteith (KRD, parts of KMA, and parts of KPN), the barony of Strathgartney (western CLD), the barony of Doune (parts of KMA and north-east PMH), and barony of Cardross (i.e. the lands of Inchmahome in south-east PMH), all had their origins in this split in 1285. Isabella, however, was not content with the situation. She and William Comyn had no children, and when William died in 1291, Edward I, by now in de facto command of Scotland, married Isabella off to Sir Edmund Hastings, an English knight and brother of Sir John Hastings, one of the rival Competitors to the Scottish throne during the Great Cause. The Comyn portion of Menteith went to Hastings. In a letter to Pope Boniface in 1301, Edmund’s seal designates him as ‘S[ir] Edm undi Hasting Comitatu Menetei’ and ‘Dominus de Enchimchelmok’ (Hutchison 1899, 226).

Meanwhile, Walter Stewart, ‘habitually known’ by his Gaelic nickname of Ballach ‘spotted’, and a name with which he styled himself in his supplication to the pope in order to marry the heiress of the earldom of Menteith (Boardman 2007, 92; Theiner 1864, no. 237), found favour at the Scottish court. By 1263 he was Sheriff of Ayr and was responsible for watching the eastern shore of the Clyde estuary where his family had major landholdings (Cowan 1990, 121-2). Walter Stewart must also have been a Gaelic speaker. His family came from the Gaelic speaking area around the Firth of Clyde and had extensive lands in Strathgryfe, North Kyle, Cowal and Bute (Barrow 2003, Chapter 15; Boardman 2007, 84). Indeed, as we have seen, from the mid 13th C Arran and Knapdale were in the hands of Walter Stewart and remained in the hands of the Menteith Stewarts until the Campbells acquired them in the 1360s (Boardman 2006, 15, 64). Like Comyn in Cowal and Kintyre, the Stewarts could not have been effective lords over these territories unless they had an intimate knowledge of Gaelic. The

finale:/ That erldume to be delt in twa/ Partis, and the tane of tha/ Wyth the chemys [mansion] assigned he/ Til Walter Stwart the lave to be/ Made als gud in all profit;/ Schyre Willame Comyn till have that quyt/ Till hald it in fre barony/ Besyde the erldume all quilty’.

59 Note that Edmund Hastings is not being called ‘earl of Menteith’ here, but ‘from the earldom of Menteith’; comitatu is ablative sg. of Latin comitatus ‘earldom, county’.
60 Theiner has Bulloc for Ballach.
Stewart connection in the build-up to the battle of Largs was troublesome for Menteith, however. Much of the military activity directed against the Stewarts by the MacSweens, allies of King Hakon of Norway, was targeted at the Stewart’s new acquisition of Menteith, presumably striking via Loch Long, Tarbet, and Loch Lomond (Cowan 1990, 121-2; Boardman 2006, 15, 30, n. 35). This activity was such a threat to Stirling that Alexander III was required to pay expenses to ‘vigilant men in the castle of Stirling when the king of Norway was in these parts’\(^{61}\) (Cowan 1990, 121 quoting ER i, 24). By 1271 Stewart was Sheriff of Dumbarton and prominent in the witness lists of royal charters (Young 1997, 73), and was part of the Turnberry Band, signed in September 1286, which supported the Bruce claim to the throne. He died between 1293 and 1295 (Hutchison 1899, 230; SP vi, 132); Mary, his wife, died around 1290. In 1286 Stewart gave the church at Kippen to Cambuskenneth Abbey in order to obtain a burial place at the abbey for his daughter-in-law, Matilda (Camb. Reg., no. 129). Walter and Mary were buried near the high altar at Inchmahome Priory, where their effigies can still be seen.

Walter’s heirs, Alexander and Alan were unfortunate to succeed as Scotland was in the turmoil of the Wars of Independence. Alexander died before 1306, when Alan, his son, is mentioned as earl (Hutchison 1899, 233). Alan was at Robert I’s coronation at Scone in March 1306, but was captured a short time later, possibly at the battle of Methven, and died in captivity around 1308-9. However, Scottish royal control of Menteith after Edward’s death is indicated by Robert I issuing of a charter at Inchmahome in September 1308, and another in April 1310 (RRS v, nos. 2 and 13).

Also prominent in the history of these times was Sir John Menteith, second son of earl Walter Stewart.\(^{62}\) After a career of switching sides, he had submitted to Edward in 1304, and perhaps in recognition of his previous service to Edward in France in 1297, Menteith was

\(^{61}\) ‘in expensis hominum vigilancium in castro tempore quo rex Norvegie fuit in partibus istis xxxv s. vi d.’.

\(^{62}\) See Fraser, Menteith, i, 460-70 for genealogical tables of the various branches of the earls of Menteiths.
rewarded with the position of Sheriff and constable of Dumbarton, and was in charge of the castle there (Boardman 2006, 38). John Menteith’s role in the betrayal of William Wallace in 1305 is well known, but Menteith’s misfortune, at least as far as his reputation is concerned, is for Wallace to have been in his jurisdiction at the time of capture; many other nobles would have done exactly the same (Watson 2007, 41). Edward made Menteith earl of Lennox in 1306, possibly to offset the fact that the Hastings brothers held the lands of the earldom of Menteith. After the death of Edward I in 1307, Sir John changed sides for the last time. His service to King Robert ensured that his seal was appended to the Declaration of Arbroath in 1320. Here he is styled Johannes de Menetethe Custos Comitatus de Menetethe,63 ‘John of Menteith guardian of the earldom of Menteith’ (Duncan 1997, 779). He held this position on behalf of Mary, his great-neice, daughter of his nephew Earl Alan. John Menteith was a significant landholder with the lands of Rusky in Menteith and probably lands in Knapdale and Arran (Boardman 2006, 39). He died around 1323. He had at least three children, including John, who also had a son called John,64 and Joanna, who managed to marry four earls65 (SP vi, 132-3).

The Menteiths had a ‘maritime lordship’ in the Firth of Clyde, which was centred on lands including Knapdale, Cowal and Arran and had authority over castles in Argyll and Bute, namely Sween, Skipness, Lochranza, and perhaps Brodick (Boardman 2006, 39, 63-4). They effectively shared policing duties in the Firth of Clyde along with the Steward and the Campbells (Boardman 2006, 47). These lordships provided a link with their neighbours, the Campbells, until that family took over Knapdale and Arran before 1357 (Boardman 2006, 64). Indeed, it may have been due to the relationships of one of those remarkable Menteith women that Sir John Menteith I regained his reputation, at least among the nobility. For Colin

64 All of these Johns were designated ‘Sir’ and it is unclear sometimes which of the latter two is which (see Boardman 2006, 63 and 88, note 52). They will be designated from here as John Menteith I, II, or III.
65 She married Malise, seventh earl of Strathearn, John Campbell, earl of Atholl, another earl of Strathearn (a Sir Maurice of Moray, created earl in 1344), and William, fifth earl of Sutherland. Her daughter to Sir Maurice, also Joanna, married Archibald, third earl of Douglas.
Campbell married Helena a daughter or granddaughter of Sir John (Boardman 2006, 50, note 19). The links with the Gaelic heartlands, then, were deep, and it was surely impossible for the Menteiths to carry out these duties unless they had a command of the Gaelic language.

Under Robert I the two halves of the earldom was reunited. But the second phase of the Wars of Independence impacted on Menteith as two other earls were killed including Murdach and John Graham; the latter had married Mary, daughter of Earl Alan, in 1333-4. Mary and John had a daughter, Margaret, who, quite simply, is noted for her marital alliances. In short, she was married four times and had five papal dispensations in order to unite with these husbands.

The rapid turnover of members of the nobility due to the Wars of Independence and a lack of royal leadership after the battle of Neville's Cross in 1346 when David II was in English captivity meant lesser nobles had to take charge. This led to competition among 'junior kinsmen of the old comital lines' (Brown 2004, 328). Margaret of Menteith was married to John Drummond of Concraig, her third husband, in order to settle the feud between the Menteiths and Drummonds before 1360, which seems to have been instigated by the killing of Brice Drummond of Boquhapple in 1330 and culminated in the battle of Tarr at Rusky, in which three Menteith brothers were killed (Hutchison 1899, 323-5). The feud simmered on until 1360 when both families were summoned to halt the feud. As part of the marriage agreement John Drummond was given the lands of Aberfoyle in 1361 (RRS vi no. 264; Penman 2004, 248, 260).

The Drummonds had gained the barony of Kincardine, effectively at least the eastern portion of KRD, around 1367, when John Drummond of Concraig, near Creiff PER, married Mary Muschet (RRS ii, no.334, note; Mackay 2003, 23). The Mushets had been in Menteith

---

66 I have been unable to find a date for this battle. It is not clear if it occurred soon after the death of Brice in 1330 or was the occasion for the agreement of 1360. The battlefield itself must have been near the 'fort' at Tannafalloch PMH at NN628007 in the middle of three farms containing the element Tarr; Upper Tarr, Lower Tarr, and Easter Tarr, all lying to the west of Thornhill KRD.

67 Not the one who married Margaret of Menteith, but presumably his son.
since Richard Montfiquet (de Montefixo) was granted the lands of 'Kincardin iuxta Strievelin' in 1189 x 95 by William I (RRS ii no. 334). Richard was the first lord to come on record in Menteith whose first language was not Gaelic. The Montfiquets came from Calvados in Normandy before c.1165 (Black 1946, 622; Barrow 2003, 292). Lack of male heirs meant that Mary was heiress. She resigned the lands to the king, who then granted to John Drummond of Con Craig all the lands in the sheriffdoms of Perth and Stirling that had been Mary’s father’s (RRS vi, no. 500). The Muschets retained the lands of Burnbank KRD (Geog. Coll., 339), and Tolgarth KRD.68 but seem to have become ‘extinct’ before 1724 (Geog. Coll., 339). The present Blair Drummond has only been so named since around 1684 when George Drummond of Blair, near Blairgowrie PER bought the lands of Kincardine from James, Fourth Earl of Perth (Mackay 2003, 23).

Like the Comyns and the Stewarts, the likelyhood that the Drummonds spoke Gaelic must be high. Originally from Drymen STL, where a ‘considerable number’ of the local population spoke Gaelic in the late 18th C69 (OSA viii, 549), the Drummonds, were lords of Drummond Castle in Muthill parish, just 4 km SW of Crieff PER. Large Parts of Muthill and Crieff were still Gaelic speaking in the early 18th C (Withers 1983, 130), and almost half the population of both parishes spoke Gaelic in the mid 18th C (Withers 1983, 131). In Menteith, the Drummonds left their mark in the shape of a tombstone at Inchmahome Priory. According to Steer and Bannerman the tombstone dates to before 1372 (1977, 25), and the John Drummond represented here was involved in a mid fourteenth century feud with the Menteiths of Rusky. It is notable in that it has similarities to grave-slabs more commonly found in the Gaelic west (compare, for example, Drummond’s monument (Fraser, Menteith i, plate between xl and xli) with that of Bricius MacKinnon on Iona (Steer and Bannerman 1977, 24). It is probable that the tombstone for Drummond, complete with bascinet helmet, spear in

68 Now lost but at approx. NS710995, based on NAS RHP 24481.
69 Although only ‘3 or 4’ did not understand English (OSA viii, 549).
the right hand, shield on the left arm, and a sword suspended from the belt at the waist, was
carved by a 'West Highland craftsman' (Steer and Bannerman 1977, 25), showing that there
were still very strong cultural links between Menteith and the Gaelic west in the fourteenth
century. The two figures at the head of the figure of Sir John are St Michael on the left, and on
the right, in his bishop’s robes, probably Colmán, at that time believed to be the saint of
Inchmahome70 (Hutchison 1899, 126-7). Steer and Bannerman (1977, 160-1) reject on
stylistic grounds an early 14th C date (SP vii, 29).

The last man Margaret of Menteith married was the most significant, at least in terms of
prestige: Robert Stewart, third son of Robert II. He became earl of Fife and Menteith, and
duke of Albany (for his career see Nicholson (1974), Penman (2004), and Boardman (1996)).
He and his father had wide ranging political and territorial interests in the Gàidhealtachd,
including Atholl, Badenoch, and Strathearn (Boardman 2007, 101). Albany grew up in a
Gaelic speaking household; Dubhghall de Ergadia or ‘of Lorn’ was his ‘chaplain and secretary’
while he was earl of Fife and Menteith (Boardman 2007, 107, n.71; Watt 1977, 359), and
Robert II was the natural leader of the large Gaelic population of his lands surrounding the
Firth of Clyde, and was a very influential figure in the Gàidhealtachd even before he became
king in 1371 (Boardman 2007, 84). Albany’s lasting contribution to the history of Menteith is
that he was the builder of the castle at Doune, which seems to have been partially built by
1381 (Fawcett 1994, 8). The castle became a favourite residence of Albany and later kings
used the castle as a base when hunting in the forests of Menteith, in particular Glenfinglas
(Pringle 1995, 6-7). After Albany’s death in 1420, his son Murdoch was duke for five years
before James I was released from captivity in 1424. James had Murdoch executed at Stirling
Castle the following year, in revenge for the tardiness of Robert and Murdoch in trying to
secure the king’s release from eighteen years of English captivity. The earldom of Menteith
went to the crown.

70 See Chapter 6 for discussion of this saint.
The Graham earls

The attack on the Albany Stewarts by James I, which culminated in the execution of Murdoch, Duke of Albany in 1425, brought a ‘rich windfall’ to the king (Nicholson 1974, 318). The earldom of Menteith along with those of Fife and Lennox were forfeited to the Crown. Two years later, in one of his ‘acquisitive’ moments, James wrested the earldom of Strathearn from Malise Graham possibly because Malise’s father, Patrick, was a close ally of the Albany Stewarts (Brown 1994, 85-6; Nicholson 1974, 318). By way of compensation James gave ‘dilecto consanguineo nostro Malizeo’ (Fraser, Menteith ii, 293) only part of the lands of Menteith, which were then elevated to the newly constituted earldom of Menteith. Malise was given the poorer part of the former earldom, amounting to the parish of Aberfoyle and the western part of Port-of-Menteith parish (see Map 6). A charter given to Malise by James details what lands he received. They are:

Craynis, Craig Guthy, The Glassert, Drumlean, Ledard, Blareboyane, Gartnerichnich,
Blareruskin, Forest of ‘baith sidis’ of Loch Chon, Blarehullichan, Marduffy, Couligarten,
Frisefleware, Craigmuck, Inchrie, Gartinhagil, Bofrishlie, Boninty, Douans and
Balleich, all AFE. Tereochane, Druim-buidhe, Crahavie, Achray, Glasahoile and
Crantullich, Rubha Saonach, Brigend, Gartloaning Drummanuster [Arndrum?],
Schannochill, Arnachly and Monievreckie, Gartmoulin, Ernomul, Arntamie,
Auchmore, Port and Inchtalla, all PMH (NAS GD220/1/C/3/1).

The other lands of the former earldom went to the crown, which was erected into the Stewartry of Menteith, centred on Doune Castle, and the barony of Strathgartney, effectively the greater part of western CLD. Malise did not enjoy his new earldom for long. Two months

71 ‘Our beloved cousin Malise’.
72 Original charter in Latin. Names in *italics* are lost. Names in **bold** can be found in the surveys in Part 2. See Appendix 1 in Part 2 of this thesis for an updated transcription of this charter. It is also printed imperfectly in *SP* vi, 142-3, and Fraser, *Menteith*, ii, 293-4.
later he was sent to England as a hostage as part of the deal that had released James from custody three years earlier. The issue of why James went to the effort of conferring the title of earl on Malise was perhaps bound up with the need for someone with the necessary prestige to replace the earl of Crawford as a captive in England (Brown 1994, 86). The earldom of Strathearn had been alienated to the crown after the death of David II, and was given by the regent Albany for life to his half brother Walter Stewart, earl of Atholl. By giving Strathearn to the earl of Atholl, James was merely confirming the status quo, and in the process kept a valuable ally on his side (Duncan 1984, 11-12). Duncan states that James had in fact been generous to Malise by granting him the title of Menteith along with part of the earldom. While it is true that Malise’s lengthy incarceration as a hostage could not have been predicted, when coupled with the deprivation of Strathearn, Malise may not have thought James was being especially charitable.

Malise was to remain as a hostage for twenty-five years, not being released until 1453. Given that Malise came from Strathearn, and that he was a great-grandson of Robert II and his mother, Euphemia, was the daughter of David, Earl Palatine of Strathearn, eldest son of Robert’s second marriage (Hutchison 1899, 270; Scots Peerage vi, 142), then it is probable that Malise’s ability to understand Gaelic was high. Malise was still alive in 1490 and had at least five surviving children, including Patrick, who was father to Malise’s heir, Alexander, as well as John and Walter, who were given many of their father’s lands in 1489.73

Alexander, Patrick’s son, succeeded to the earldom in 1493, and the reason for the delay in making him earl may have been due to Malise’s support for James III, of whom he was a favourite. Alexander was invested as earl between the lake (of Menteith) and the ‘Coldone’ (Fraser, Mentieth ii, 301-3), the latter marked today as ‘Coille-don’ (see p.97 for this place-

---

73 Details of Malise’s children can be found in Scots Peerage vi, 145-51. In terms of lands (those in italics now lost), John, by Malise’s second wife, was given Port, Arntamie, Monievreckie, Gartmoulin, Malling, Cranys-more, and the Lake of Menteith and its islands (RMS ii n.10.1861); Walter was given Loch Chon, Glasahoile, Culligart, Rubha Saonach, Inchrie #, Milton of Aberfoyle, Kirktown of Aberfoyle, Bofrishlie, Boninty, Doumans, Balleich, Gartloaning, Gartcarrn, Garhat, and Cranisbeig (RMS ii no. 1862)
name). Alexander had, in the main, an undistinguished career, but it was during his tenure that the first perpetual commendator appeared at **Inchmahome**, in 1529 (Watt and Shead 2001, 110), allowing the Scots-speaking Erskine earls of Mar, based at Alloa CLA, to gain many of the lands of **Inchmahome**, later the barony of **Cardross**.

In terms of place-names it is notable that Alexander gave the lands of **Craughtly** and ‘de duabus **Crannce**’ to Sir John Colquhoun of Luss in 1512 (Fraser, *Colquhoun*, ii, 321).\(^{74}\) **Craughtly** is on the slopes above the modern village of Aberfoyle at approx NN523011. The location of ‘de duabus **Crannce**’ is problematic. They are obviously **Craynes** [E]stir and **Craynes** [W]estir (see under **Cranys** # AFE) as shown in the charter to Malise Graham by James I in 1427. They later come on record in 1489 and 1495 as **Cranyssmore** and **Cranyssbeg** (also **Cranisbeg**) (*RMS* ii, nos. 1861, 1862, and 2230). Exactly where they were is unknown, but judging by their position in the charter and by the sequence of the other lands from **Craughtly** to Loch Chon, it may be that **Craynes** or **Cranis**, like **Craughtly**, is in the vicinity of the present day village of **Aberfoyle**. In the charter of 1427 to Malise Graham, both places are first on the list, suggesting they were of some importance.

Alexander died in 1537, succeeded by William. Unfortunately, the most interesting event of William’s tenure, at least for this thesis, was the manner of his death, probably in September 1543. There are a number of versions of the tale, but one given by Sir Walter Scott has gained acceptance by Hutchison (1899, 280-4) and Michael Newton (1999, 158-61). This poem can be found in the introduction to Captain Edmund Burt’s *Letters from the North of Scotland* (*Burt’s Letters*, xlix-l). The couplets in Burt’s book apparently came from a now lost source called the ‘Invernahyle Papers’, and was related by Sir Walter Scott, who had a deep interest in Gaelic culture (Sellar 2001, 5). Scott had many Highland contacts – ‘especially Alexander Campbell and John Ramsay’, and it may have been these men who were

\(^{74}\) Sir William Fraser misinterprets the place-names in Colquhoun’s charter as ‘the two Carucates’ and ‘Craughtweite’, which is a misreading ([Fraser, *Colquhoun*, i, 74]).
intermediaries of the text. It is not known at this point whether the tale was recorded in Appin or Menteith Gaelic (Newton pers. comm.). The couplets relate that the earl was at a wedding when a group of Stewarts of Appin, led by Donald of Ord, arrived uninvited to the event and ate the food laid on for the guests. Earl William was apoplectic at the audacity of the Appin Stewarts and pursued them as they fled. As they caught up with them a Menteith man shouted out ‘A Stiubhartach dhuibh na h-Apainn/A cheardaich ghlaic air a chàl!’\textsuperscript{75} To which a Stewart, as he drew his arrow, replied, ‘Ma tha an Apainn againn mar dhùthaich/Is dùth dhuinn gun tarraing sinn feàrsaid’\textsuperscript{76} (Newton 1999, 160). The Menteith man was shot and in the ensuing melee the earl was killed. If the story is true (although the incident is supposed to have taken place the day after the Battle of Pinkie in September 1547, not 1543, the year of the earl’s death), then it shows that in the mid-sixteenth century Gaelic must have been as natural a language to use in Menteith as Scots, although we should be wary of drawing too much on the very literary nature of the exchange of couplets.

Having revealed something of the history and language of the nobility of Menteith, it remain for us to discover what place-names can tell us about medieval rural society and the medieval church in Menteith and how the landscape was used and viewed by Gaelic-speakers in the Middle Ages.

Having set the scene in Chapter 1, discussed the strengths and weaknesses of the source material in Chapter 2, looked at the languages of Menteith in the Middle Ages in Chapter 3, and seen that Gaelic was spoken by many of the earls and barons of medieval Menteith in Chapter 4, we will now examine what place-names can tell us of medieval secular society in Chapter 5, and what we can learn about the medieval Church from place-names in Chapter 6.

\textsuperscript{75} ‘You dark Stewart of Appin/You pale, cabbage-eating tinker!’
\textsuperscript{76} ‘Just as Appin is our homeland/So it is in our nature to launch a missile’.
Chapter 5

*Place-names as a historical resource*

This chapter will attempt to show the strengths and limitations of using place-names in relation to rural settlement studies. The main focus of this chapter are the Gaelic place-names of Menteith, and as such this chapter will concern itself largely with that language, although there are a number of British and Scots names that deserve consideration and some of those will be mentioned here. Investigations into the place-name element *gart* showed that place-names have great potential to shed light on the history of an area where the archaeology and documentary evidence is lacking (McNiven 2007), and that they can offer historians and archaeologists a way of studying aspects of Scottish medieval society that are not often seen in the sources, especially for the period before the Wars of Independence. Attempts to study the medieval rural settlement and society in Scotland before c.1130 are often frustrated due to the paucity of documentary evidence. Given that the earliest charters for Scotland date only to the first half of the 1090s (Duncan 1958; Duncan 1999), this is a problem that affects the whole country and not just the more well documented Lowlands. The study of archaeological remains is often similarly limited due to their obliteration during the agricultural ‘improvements’ begun in the second half of the 18th century, and before in some cases, and the industrialisation of much of the Lowlands since the 19th century, leaving only the more substantial remains such as later medieval tower-houses, monasteries, even later churches, as well as objects such as cross-slabs and hog-back stones, some of which may date from the middle to the end of the first millennium AD.

Historians, archaeologists and historical geographers have long complained that ‘it is often difficult to match visible landscape features with documentary references’ (Whyte 1998, 77).
There have been many articles and books published over the past four decades since Horace Fairhurst published his seminal surveys of Highland rural settlement archaeology such as those of Rosal in Sutherland and Lix in Glendochart PER (Fairhurst 1968 and Fairhurst 1969). These publications have detailed the often problematic search for the remains of rural settlement and endeavoured to provide solutions by trying to hammer the square documentary evidence into the round archaeological hole. The problem is that although there is often documentary evidence of settlement dating back to the medieval period, the archaeological evidence is typically only for the final stage of settlement prior to the land being cleared in the 18th or 19th centuries. Archaeologists and geographical historians in particular have often been at the forefront of this research regarding 'our understanding of man's endeavours in the countryside during the twelfth to seventeenth centuries' (Yeoman 1991, 112), particularly when it comes to the material remains and forms of rural settlement (see also Parry and Slater 1980; Dodgshon 1981; Hingley 1993; and Govan 2003). But we must remember, too, the enormous contributions that historians such as Margaret Sanderson (1982) and Geoffrey Barrow (1973; 1988; 1989) have made to that understanding. Barrow has added another dimension that the other researchers in this complex field often only allude to, and that dimension is place-names.

Some researchers in Scottish medieval rural settlement studies have mentioned the potential that place-names have in this field of inquiry, but that potential is often reduced to a paragraph in an eight or more page article, probably because they are under the impression that the subject is too difficult, although admittedly it can be very laborious. At the end of an otherwise unashamedly archaeological review of rural settlement studies, Peter Yeoman does admit that place-names have a very important part to play, but does not elaborate (Yeoman 1991, 125). Piers Dixon, reviewing rural settlement in the Lowlands, states that place-names are 'another approach to the development of village settlement' (Dixon 2003, 57). Part of the problem may be that many researchers who would like to use place-names are also
frustrated by the fact that the discipline of place-name study is often element or subject based, i.e. there is a tendency to look at particular generics, such as pett or baile or to look at subjects like saints' cults, when what they may require is an area-based study looking at all generics within that area. By looking at an area, the potential for using place-names as a source for studying social history and land-use becomes more compelling. One historian who has used place-names in such a way in order to look at the people below the ranks of lords and senior clerics is Richard Oram in his study of Galloway (Oram 2000, chapter 9). It is worthwhile, nevertheless, quoting Ian Whyte who points out that 'where landscape and archaeological evidence is lacking, place names provide an underutilised source of evidence on settlement...The potential for using place names to analyse changes in post-medieval settlement is particularly under-exploited' (1998, 77). It can be strongly suggested that potential is under-exploited for all periods before the Improvements of the 18th century. As Dauvit Broun quite rightly states: 'if we want to know more about social developments before there is a sufficient density of documentary record to shed light on the lives of most of Scotland's inhabitants, then we must look to place-names as our chief resource. This is true for the entire middle ages, not just the period before 1100' (Broun 2006, 14). He also points out that the lack of funding of place-name research in Scotland compared to England and Scandinavia means that there is 'little chance that place-names will reveal their treasures'.

The financial support from the AHRC for the research project 'The Expansion and Contraction of Gaelic in Medieval Scotland: the onomastic evidence', of which this PhD thesis is a part, will hopefully have gone some way to rectifying this situation. What this chapter, and indeed this PhD as a whole, aims to show is that place-names, and also personal names, need no longer be a subject which merits a cursory glance or to which only lip-service is paid, but which can make a significant contribution to both the debate and substance of Scottish medieval rural settlement studies. For rural settlement studies should be more than just looking for archaeological evidence of buildings and the like, and although place-names will not be able
to tell us about issues such as types and dimensions of housing, we are nevertheless able to
glimpse the medieval landscape in a way that would be extremely difficult, if not impossible,
without them. (Note: only those place-names in **bold**, and are mostly settlement-names, are
detailed in the parish surveys in Part 2).

*Place-names in Menteith*

Many settlement names in Menteith are simply explanatory, for example, **Cambus** KMA,
 deriving from ScG *camas* ‘bend, bay’ and which indicates that the two places bearing this
name lie in one case on or near a bend in the River Teith and on the other on or near a bend
in the Annet Burn. **Aberfoyle** is Brit. *aberphuill* the place at ‘the mouth of the *poll* or
sluggish stream, [i.e the Pow Burn]’, and **Kincardine** is probably ScG *ceann* with a borrowing
of Brit. *carden* ‘the head or end of the enclosure or encampment’. There are three place-
names with the element *lanerc, Lendrick* CLD, **Lanrick** KMA, and Landrick DLE, from a Brit.
word meaning ‘clearing in a wood’. These names are useful for studying language, language
change, and historical linguistics, but they need not necessarily tells us anything about how
the land was used in medieval times other than that the land had been cleared for settlement
by the time Gaelic arrived as a place-naming language in Menteith. Similarly, many hill names
are also descriptive, Beinn Dearg ‘red mountain’ or Creag Bheithe ‘birch crag’ (although the
latter can tells us something of the vegetation). Due to the limited historical information these
descriptive types of names can yield, they will not be discussed here, although many of those
that are settlement-names will of course be discussed in the parish surveys. Place-names that
have or could have ecclesiastical connotations, except for one or two elements, will be
investigated in Chapter 6 of this thesis. This chapter will consider names that shed light on
such subjects as land use, routeways, administration, judicial and activities such as hunting
and transhumance. Many of the minor names, an example of which is Creag na Caorach CLD

---

77 See discussion of Aberofyle in AFE parish survey for evidence that this may be evidence of Gaelicisation.
‘crag of the sheep’, that appear on the OS maps tend not only to be in Gaelic, but are mainly to
be found in the Highland portion of the study area, and so there will no doubt be a bias
towards that area for minor names such as these. It may be that a survey of the field names of
Menteith could shed light on minor names in the Lowland portion of the earldom.

Routeways

The modern road network can sometimes deceive the historian into thinking that these
are the routes that have been followed from time immemorial. Some roads are indeed old, but
others were not built until after the Jacobite Rebellions of the 18th C (Page 2008). It is not
often appreciated that hills and valleys were not always the impediment to someone on foot
or horseback that they are to the modern motor-car. Probably the earliest indication of
transport in Menteith is an Iron Age ‘semi-solid disc wheel of tripartite construction’, which
may have been attached to a cart of some kind, found in Blair Drummond Moss c.1830
(Piggot 1957; Armit 1997, 82). People had to move through the landscape not only to arrive
at a destination, but also to achieve or participate in a task of one sort or another. To this end
the upland areas of the parishes of Aberfoyle, Callander, and Port-of-Menteith are
congested with route names, in particular the ScG element bealach ‘pass’. There are at least
thirty bealach-names in these areas, along with another four that possibly or probably have
an anglicised version of the element, making it the most numerous place-name element in
Menteith. Three of the four anglicised names, all of which have become permanent
settlements, are to be found on the lowland parts of KMA and PMH, namely Ballochallan
KMA (Bealach Àilein) ‘meadow pass’, Ballochraggan PMH and possibly KMA78 (Bealach
Chreagain or Chreagan) ‘pass of crags’ or ‘little crag pass’, and Ballochneck KMA (Bealach
Chnuic) ‘small hill pass’. All the other bealach names are upland passes indicating movement

78 Ballochraggan KMA might be Baile nan Creagan ‘township of the crags’ or Baile a’ Chreagain ‘township of the
little crag’.
from one corner of a parish to another or between parishes. While many of the passes are spectacular in terms of their location and views, most of their names are simply descriptive: e.g. Bealach nan Sgliat CLD (NN599121) is ‘pass of the slates’, indicating the geology through which the pass travels. Best avoided in inclement weather is Bealach Choire Mholaich CLD (NN621117) ‘stormy corrie pass’, while good footwear is advisable while negotiating Bealach Garbh CLD (NN490036) ‘rough pass’.

Other bealach-names, however, show a more direct human involvement. Bealach nan Corp CLD (NN558109) ‘pass of the corpses’, is apparently a reference to an incident when a group of people on the way from Glen Finglas to a funeral at St Bride’s Chapel fell through the ice of the frozen Lochan nan Corp just north of Ben Ledi (OSA xi, 583), although the corp-element might simply indicate that it was a route to the burial ground at St Bride’s Chapel, and the dramatic incident may simply be mythical. There are three passes called Bealach na h-Imriche ‘pass of the flitting’, one in AFE (NN466056) and two in CLD (NN484111 and NN599117). These may indicate the movement of people, possibly women as they relocated due to marriage, or perhaps more likely, the movement of milk-cows and women at ‘the big flitting’ to the sheiling grounds once the men had prepared them for use and habitation (Fenton 1980, 101; Fenton 1999, 135). Alternatively, they may relate to the period of the Highland Clearances in this area towards the end of the 18th C, in which case they are then obviously late place-name formations. This brings us to a problem with many of these bealach-names. Other than the ‘balloch’ type names already mentioned above, many bealach-names only come on record with the 1st edn OS 6-inch maps, the surveys for which were done in the early 1860s for Menteith. Slightly earlier on record is Bealach nam Bò (NN480074) ‘pass of the cows’ on Ben Venue. While this, too, seems a modern name – it is Bealoch-nam-Bo c.1848 (Gazetteer vol. i 1848, 117) – it surely relates at the very least to the droving trade of the 18th C as Highlanders moved their cattle to the trysts at Crieff and Falkirk. Francis Groome.

79 There is no indication from the OSA as to when the supposed incident occurred.
thought it dated back to the days of the Highland caterans, who would drive cattle stolen from
the Lowlands up this route (Groome 1882-5). The problem is that although these *bealach*-
names are numerous, and many of the routes are presumably old, we cannot be sure all these
names date to the medieval period.

*Bealach* is not the only routeway name in Menteith. Barrow writes that *làirig* 'pass' is
another common routeway element in Scotland (Barrow 1992, 216). It is not common in
Menteith, although it is present. *Lairig* CLD (NN488093) near *Brenachoile* on the northern
shores of Loch Katrine is mentioned in *ER* from at least 1461 as *Larg* (*ER* vii, 51) and in the
*Rentalia Domini Regis* from 1480 (*ER* ix, 561). It is last shown as *Lairig* in the plans of the
Annexed Estates drawn up in 1775 (it is shown as an unmarked ruin on the 1st edn OS). * Làirig*
is combined with *bealach* in Bealach na Seann Lairige (NN550122), possibly to produce the
alternative meaning of 'pass of the old burying-place'\(^80\) at the head of Gleann Casaig CLD,
which like Bealach nan Corp, might be a way to *St Bride's Chapel*.

*Àth* 'ford' is perhaps not so numerous as one might expect in an area teeming with rivers
and burns. Those that there are tend to be concentrated at the southern end of Loch Lubnaig;
*Àth a' Choire* 'ford of the corrie', *Àth a' Chaibeil* 'ford of the chapel' and *Anie* CLD. The latter is
ScG *Àth an Fhèidh* 'ford of the deer'. Again, none of these are on record early, although Anie is
on record from at least 1783, but this may be more of a problem to do with available
documentation rather than late coining. Where we do have a relatively early record of an *àth*-name
is on the River Forth. Walter Bower, abbot of Inchcolm Abbey in the Firth of Forth,
wrote in the 1440s of an ‘Auchmore’ (presumably for *àth mhòr* ‘great ford’) in his
*Scotichronichon* (Book II, chapter 10), which Barrow thought was *Cardross* (Barrow 1992,
212-3), while in Harrison and Tipping’s opinion it signified *Frew* KRD (2007, 464). However,
the ford at *Frew* would have been famous in Menteith, and it is likely that Bower’s informant,
probably a monk from Inchmahome, would have mentioned *Frew* had it been that ford he

\(^80\) Dwelly gives ScG *làirig* as ‘burying place’, taken from Armstrong’s Dictionary.
meant. The ford at **Frew** was one of the main routes across the upper Forth in the middle ages. It appears to be this ford that is mentioned in the *Chronicle of the Kings of Alba* as the ‘fords of Forthin’ before 995 (*ES* i, 512; Watson 1926, 52-3). The name, according to Watson is ScG Gaelic *na Frìùthachan* and derives from Brit. *frwd* ‘current’ (Watson 1926, 349-50), indicating a shallow spot in a fairly deep river. Another possible *àth* is **Alinan Ford** PMH(*àth linne* plus locational or diminutive suffix?) nearly 1 km SE of **Aberfoyle**, although more early forms would be needed to be sure.

Other routeways which now have SSE names, but which must surely have had Gaelic or even British names include Pass of Achray AFE, Pass of Leny CLD, possibly Duke’s Pass AFE, and Pass of Trossachs CLD/AFE, in ScG *na Tròsaichean* ‘cross places’, from Brit. *traws* ‘cross, athwart’ (Watson 1926, 350). Scots route-names include **Brigend** CLD, now **Brig o Turk** or **Ceann Drochaid**, and mentioned since 1451 as **Westirbrigend** and **Estirbrigend** (*Hidderbrigend* from 1461) in *ER*. Two ferry points across the River Teith and River Forth are indicated by the place-name **Cobleland**, one of which still exists in AFE (NS531987), while the other is Cobleland of Doune, mentioned as **Cobbyland de Doune** in 1461 (*ER* vii, 53). According to **DOST** a *cobill* was a ‘short flat-bottomed rowing-boat, chiefly used in salmon-fishing or as a ferry-boat’ (see also Taylor, *PNF* iv, forthcoming, where he discusses Coble House, Leuchars parish, Fife).

A name suggestive of one of the earliest roads in Menteith is **Straid** CLD (NN655059). This cottage sits at the side of the A84 main road between **Doune** and **Callander**, or rather between the two Roman forts of **Bochastle** and **Doune**. The name derives from ScG *sràid* meaning ‘street’, and was possibly a paved road that served the two forts. The *sràid* element may also be present in Callander, which is in modern ScG Calasràid *caladh-stràid* ‘ferry street’ (Watson 1926, 515). However, some of the early forms contain –*drate*, which might be for *drochaid* ‘bridge’ (c.f. Ballindrate, Co. Donegal (Flanagan and Flanagan 1994, 74) and Poldrait

---

81 See now discussion of Frew in survey of KRD for alternatives to *W. frwd*. 
Poll (na) Drochaid, Glasgow (Taylor 2007a, 3)). Many early forms of Callander show Calyn et Calendrate (1451 RMS ii, 465) or Calen et Calendrath (1510 RMS ii, 3339): for discussion of the Calyn/Calen-element, see Callander CLD.

Another name that might suggest a routeway is Spittal, deriving from Latin hospitalaria, ‘the hostelry or guest house of a monastery’, or hospitale, hospitalitas, ‘an inn, guest house, hospital’. There are or were four Spittal names in Menteith, with a further six just over the ‘border’ in Lennox. The Menteith ‘Spittals’ are Spittalton KMA (NS685991), Gartmore Spittal, actually in DRY (NS506972), and two now lost at Arnbeg KPN (NS629949), Arngibbon KPN(NS607941). A ‘Spittal’ may indicate in this area a place of rest or refuge, especially perhaps for those on pilgrimage. The fact that there are a number of place-names with the element ‘Spittal’ either in Menteith or in the neighbouring Lennox parishes may indicate that Menteith was a thoroughfare on the way to other localities, whether they be pilgrimage or market centres.

In 1491, there is mention of ‘the Spittle’ at Spittalton KMA. What is not quite so clear is whether there was indeed a spittal here, either as a property, perhaps an inn of Inchmahome; or if ‘the Spittle’ is derived from the inhabitants who had the surname ‘Spittale’ in 1480 (Gilcrist and John Spittale are mentioned in ER ix, 566), or whether it was they who took their name from the place. In c.1750 Roy shows Spittel near the cross-roads of the road from Aberfoyle to Stirling via Thornhill and from the ford at Frew to Doune, but it had been Spittalton since at least 1528 (RMS iii no. 621). There is a Spittal just north of Buchlyvie, and there were other spittals in KPN at Arnbeg in 1686 (Retours PER no. 943 [particata terrae vocata Spittell of Arnbeg]) and at Arngibbon in 1550 (RMS iv no. 517 [Spittal de Arnegibbun]), but nothing more is known of them (Hall 2006, 215-7).

82 NAS, PA2/6, 1st part, f.28v
83 The Spitale was leased to John Haldane of Gleneagles by David, prior of Inchmahome (NAS, PA2/6, 1st part, f.28v).
It has been held that the element *spittal* may refer to lands ‘attached’ to a hospital ‘at a distance from which they belonged [but] in a number of instances, its occurrence admits of no explanation.’ (Cowan and Easson 1976, 162). Indeed, Cowan and Easson state that in the case of Balfron STL, ‘the occurrence of the name Spittal in this parish permits no explanation’, and regarding Drymen STL, they state ‘no explanation of these [Spittal-names] can be given’ (Cowan and Easson 1976, 195-6). However, this may be too pessimistic, for while some *spittals* are indeed hospitals, lands belonging to a hospital, or perhaps an inn, we must surely consider some *spittal*-names to have been lands belonging to the Knights Hospitaller, or even the Knights Templar, the military religious orders founded to guard the Crusade routes in the 11th C. The Knights Hospitaller took over many lands of the Templars after the latter order’s suppression in 1312 (Cowan et al 1983, xxvi). Any evidence for either of these orders in Menteith is lacking; indeed, there are apparently only three certain associations concerning the Hospitallers in Scotland – at Temple and Torphicen WLO, and Maryculter ABN (Hall 2006, 60). However, the distribution map of ‘unknown hospital types’ in Hall (2006, 46) shows a wide distribution in eastern and southern Scotland, and while it is certainly the case that more research is needed into the connection between the place-name element *spittal* and the Hospitallers and Templars, it may be significant that in Drymen Parish STL there is a Spittal Ballat at NS525903; the settlement immediately to the west is now called Templelea, but on the 1st edn OS 6 inch map of 1862, it was called Temple Ballat, indicating a property belonging to the Templars. Further confirmation of the connection between spittal and Hospitallers/Templars in the area is found in a charter dated to 1557 regarding ‘James Lord of St John’s preceptor of Torphechin [and] the saids templar lands of Spittell of Easter Catter’ in Kilmarnock parish DNB (NAS GD119/30).

*Hunting and deer management*
While passes and routeways could presumably be used by just about everybody, hunting was a more restricted past-time, limited essentially to the king and his aristocratic colleagues. It is an activity that has nevertheless left its mark on the landscape of Menteith, at least toponymically speaking. There are at least 12 place-names in Menteith that seem to relate to hunting or animals that were hunted, mainly deer. Large areas of upland Menteith were major hunting reserves in the Middle Ages. The existence of these hunting forests is confirmed by the place-name evidence. There were royal hunting forests at Strathgartney and Glenfinglas, with a deer park near Doune (Gilbert 1979, 39). There was also a baronial hunting forest in AFE which must have been the post-1427 earls of Menteith’s hunting grounds: ‘In this paroch was a forest of red deer called the forest of Monteath. But after the death of the late Earl of Monteath [i.e. the eighth earl who died in 1684] and that (sic) it fell into the family of Montrose the forest was neglected and there are no deer in it now’ (Geog. Coll, i, 343). This hunting forest in AFE seems to have been centred on Ben Venue (Mills, Quelch & Stewart 2009, 48). Although not explicitly hunting terms in themselves, some place-names can give us an idea of the prey that was pursued: just to the north of Ben Venue is Creag Dhamh ‘stag rock’, while to the north of Ben Ledi CLD is Creag Chath-bhoc ‘rock of fighting bucks’. Red deer were not the only quarry; Bad na h-Earbaige ‘thicket of the young roe deer’ indicates that other species of cervidae were also sought. Other deer places can be found at Anie CLD, ScG Àth an Fhèidh ‘ford of the deer’, and at the nearby Tom Àth an Fhèidh ‘small hill of Anie’. In Glen Finglas is Mainnir Fèidh ‘fold or pen of the deer’ (see also DIL under mainder ‘enclosure for cattle’), suggesting a holding area or perhaps a place, such as a deer-trap, where the deer could be shot at ease (see illustration in Dixon 2002, 43). Brig o’ Turk CLD may be a reminder that deer was not the only prey, the turk element is ScG tuirc pl. tuirc ‘boar’. However, it may have originally meant not the animal, but the river, called the River Turk. The element may relate to the narrowness of the gorge here, much like the ends of a Celtic torc neck ornament (R. Cox, pers. comm.), or, perhaps more likely, to the perceived
‘burrowing’ nature of the river as it flows through the gorge (King 2008, 154); Welsh twrch ‘boar’ is a reasonably common river element in Wales (Owen and Morgan 2007, 479). There are a number of ScG muc ‘pig’ names and these may in some cases refer to boar or wild pigs, but some of these places may also have been areas where domesticated pigs were reared, and so will be discussed under the heading ‘livestock and animal husbandry’ below. After travelling through Bealach Coire nan Saighead CLD, deer could also be shot at the Coire nan Saighead ‘corrie of the arrows’, a reference to the weapon of the hunter. Places where hunts were staged included Creag na Comh-sheilg ‘rock of the joint hunting’ on the parochial border between CLD and BQR, and which is near where stags were hunted on the nearby Ardnadave Hill, probably ScG àird an daimh ‘height of the stag’; at Glac nan Sealg AFE ‘defile of the hunts’; and at Ellrick AFE from OG elerc, later ScG eileirig ‘deer trap’. The absence of this word in Irish Gaelic suggest that there may be a Pictish or British provenience for the word (Taylor 2008, 296), although it may derive from OI erelc, deriving from air- ‘before, in front’ + selc ‘hunting’ (Kelly 1997, 277). There are two Elrigs just over the border from AFE; one in BUC at NS443991 and the other in DRY at NS475984. Organised hunting in AFE is shown in place-names just south of Balleich AFE, including Deer Craig, and shown on the OS 6 inch 1st edn is Easter Park and Wester Park, as well as Park Burn. Sc park in place-names (apart from modern field-names) refers to land enclosed or emparked for hunting (see DOST under park).

**Authority and Justice**

Hunting was one expression of aristocratic power; the ability to administer justice was another. Authority and justice were defined by boundaries, both abstract and physical. Abstract in that there were limits at to what crimes a local lord could try at his courts, although the earl of Menteith and other major landlords, such as the Erskines of Cardross and probably the prior of Inchmahome, had the power of regality within their territories, including the right to put criminals to death. Three Scots names that show some lords in
Menteith had this power of life and death are Gallow Hill KRD and KRX and Gallows Knowe PMH. Physical boundaries usually defined a territory, and often these were burns or other topographical features. ScG crioch ‘boundary’ is found in two burn names, both Allt na Criche ‘burn of the boundary’ between KMA and DLE and in CLD. The latter is certainly the boundary between the estate of Leny and the barony of Callander, as is shown on an estate plan of 1843 (NAS RHP1442/1-2), and was very probably the boundary between the medieval parishes of Leny and Callander. In the uplands of PMH is Meall na Crìche ‘lump of the boundary’. Around 1615, Leny was divided between the three parishes of Callander, Kincardine, and Port-of-Menteith (RMS vii, no 1222), and it may be that Meall na Crìche is a remnant of the old parochial boundary. At the very least it was an estate boundary, probably between Dullater and Drunkie.

While places of execution are in Scots or SSE, places of justice are in Gaelic: one of the most notable is Severie KMA Suidhe a’ Bhrïtheimh (Watson 1926, 261) ‘seat of the judge’. Another is Cuthil Brae KRD, which probably contains Sc couthal, itself a borrowing from ScG comhdhail meaning ‘(place of) assembly, meeting’. As Barrow points out, the word itself need not mean a court of law (Barrow 1992, 220), but the location of the Cuthil, a large mound marked as a cairn on the OS map, surely points to it being one: it is only 400m south of Gallow Hill and 400m north of the site of a motte and the site of the castle of Kincardine KRD, as well as being 600m NE of the church of Kincardine. Another possible comhdhail, according to Barrow, may be Cockhill CLD to the south of Callander, where a fair, called the Cockhill Fair, was held on May 16 (Barrow 1992, 228; Black 1999, 18). Black states that this was a ‘major event in the Highland drover’s year’, and the privileges enjoyed by the drovers, including free grazing for a week, ‘suggests a meeting ground of great antiquity’ (Black 1999, 18).

See O’Grady (2008) who has recently completed a PhD on the setting and practice of open-air judicial assemblies in Medieval Scotland. He has a large chapter (no. 4) reviewing the place-names and place-name literature of such sites, but note that his ‘McNiven 2004’ references relate not to my work, but work on Clackmannanshire by Simon Taylor, some of which has been printed in Taylor (2004).
Investitures were held near the **Coille-don** PMH, said by Hutchison to be ScG *coille dùn* 'wood fort' (1899, 43), a 23m hill on the northern shore of Lake of Menteith. The derivation 'wood fort' is extremely doubtful; RCAHMS Canmore expresses reservations as to whether it was a fort or ceremonial site as Hutchison suggests. However, ceremonial site it was, for this was the site where Alexander, heir of his grandfather Malise, the first post-1427 Earl of Menteith, was given sasine of the earldom in 1493 ‘at the shore of the lake of Inchmahome near the Coldone (ad ripam lacus de Inchmahomok prope le Coldone)’ (Fraser, *Menteith* ii, 302). It is likely that this, too, is a *comhdhail*. The *col*-element being *comhdhail* has parallels elsewhere in Scotland; Coldrain, Fossoway parish, KNR, is *Cothildurane* in 1363-(RMS i, 825; Barrow 1992, 234), while in Kingoldrum ANG was *Caleduns*, a place where a decision was reached in the presence of the Justiciar of Scotland and others in 1253 during a perambulation (*Arb. Lib*. i no. 294; McNeill and MacQueen 1996, 416). The second element may be ScG *dùn* 'fort, hill', with ‘hill’ the meaning in this case, making *comhdhail-dhùn*, with a Sc plural, although such a word order is untypical (although it could be treated as a compound), and in the 13th C we would expect the dental fricative *dh* in *comhdhail* to show in the early forms, perhaps as *Cotheldunes* or similar. However, in Menteith, presumably the dental fricative would have disappeared by the 15th C leaving *col*. It is shown as *K. of Cowden* on Blaeu in 1654, and while the designation of K[irk] is a mistake, it shows that the *Coldone* of Menteith was an important place.

**Tomavoid** PMH and **Tom a’ Mhòid** CLD contain ScG *mòd* ‘court of justice, trial, assembly, meeting’ (O’Grady 2008, 139). Tomavoid was noted to be ‘2 acres of land commonly called Courthill or Tomnavoit, part of Muir of Borland’ in 1747 (NAS GD15/87) and was almost certainly the court of the barony of Cardross, and before that may have been the court of the priory of Inchmahome. **Tom a’ Mhòid**, on the eastern shore of Loch Lubnaig, and only found on record from the 1st edn 6 inch OS map in 1862, may have been the local court of the

---

*I would like to record my grateful thanks to Dr Taylor and Gilbert Márikus for their help with Coldone.*

---

85
Stirlings of Keir for their holdings in this part of the barony of Strathgartney. According to one local historian of AFE there was another ‘Tom-a-mhoid...in Glen Dubh,\textsuperscript{86} about 250 yards west of the Ballimore or Glen Dubh cottage’ (Joynson 1996, 39). This is the Tom a’ Mhòid at NN414029, just over 1km W of Stronmacnair BUC, and is shown on the 6-inch OS map of 1861-3 (Stirlingshire sheet IV), but it is not actually in AFE; it is just over the border in Buchannan parish. Much of this area seems to have come under the Menteith hunting forest area in the Middle Ages. Duchray, Blairvaich, and other places in that area are mentioned in \textit{Rentalia Domini Regis} (see for example, \textit{ER} ix, 623). The previous name for Loch Dhu House AFE (NN429037) was \textit{Croit-an-shluic}\textsuperscript{87} ‘croft of the pit’, on the 1\textsuperscript{st} edn OS 6 inch map. Dwelly has the alternative meaning for ScG sloc, gen. sluic, as dungeon. Tom a Mhòid and \textit{Croit an Shluic} are only 2km apart, separated by the hill \textit{Mulan an t-Sagairt}, but how or if these two places were connected is not at all clear, but if ‘pit’ is the meaning, it may have been a primitive prison. However, some of these \textit{Tom a’ mhòid} place-names might not be courts at all, but may simply be assembly places for medieval hunts.

Another court or assembly place, shown on the 1\textsuperscript{st} edn OS 6 inch map, is implied in \textit{Tom na Boide} CLD ‘hill of the swearing, oath’ (it now sits at the bottom of the Glen Finglas Reservoir). However, it may have been a Tom a’ Mhòid that has been reinterpreted. Next to \textit{Tom na Boide} was \textit{Tom na Caillich} ‘hill of the (old) woman’ and \textit{Tom na Feileidh} which looks like ‘hill of the kilt’ but this may be a spelling mistake on the part of the OS and should perhaps instead be \textit{Tom na Fèille} ‘hill of the fair (or feast or banquet)’. The division between the sexes can also be seen on the northern shore at the eastern end of Loch Katrine; just to the south of Bealach an Duine ‘pass of the man’ is Fèith na Cailliche and Allt na Cailliche ‘bog’ and ‘burn of the woman’ respectively. These may have been near the meeting places of these groups or they may simply be routes to the sheiling grounds.

\textsuperscript{86} Note that this Glen has a Loch Dhu and it is not be confused with the Loch Dhu 2km to the NE.
\textsuperscript{87} Although we would expect \textit{croit an t-sluic}. 
Assemblies of some kind, probably courts, were held at Tullock Knowe KMA, just across the River Teith from Doune. This contains ScG *tulach* ‘mound, place of assembly’, and is most likely the ‘Tullochan alias Courthill in Watston’ mentioned in 1557. It was here that Alexander Seton had to appear ‘to produce his titles to the 50 shillinglands of Torr of Ruskie’ (NAS GD430/129). This is a ‘flat-topped and turf covered cairn...[it] reiterates the possible association between ‘*tulach* monuments’ and the settings of judicial assemblies in Scotland...’ (O’Grady 2008, 162). There may have been a *tulach* ‘small hill, assembly mound’ in Cessintully KMA possibly ScG *Seisgeann Tulaich*? ‘bog of (the) hillock?’, but whether the *tulach* does indeed relate to an assembly mound is not known. This was an estate and later barony in the middle ages, which contains a cluster of Sc –toun names, and is preserved in Brae of Cessintully KMA, but where any *tulach* was situated is not known.

Authority did not just come in the shape of the earls. The representative of the king is present in Glentirranmuir KPN. The *tirran* element seems to derive from ScG *siorram* ‘sheriff’. In 1451 the following appears: ‘terras de Treenterene ac terras de Inherne vocatas vulgariter le Third Parte, de Shereffis lande de Kippane’ (RMS ii, no.508), *Inherne* may be a distorted form of An Errann ‘the Portion’. The early forms – *Treinterane* (1451 ER v, 475), *Terinteran* (1453 ER v, 596) – suggest either ScG *trian an t-siorraim* ‘third part of the sheriff’ or *tir an t-siorraim* ‘land of the sheriff’. Another third part can be found near Leny CLD: *Trian* Farm, *Trien* on Stobie in 1783. Watson says that *Trian* was rare (1926, 236) and yet we seem to have it twice in Menteith. There are also at least two other Thirds in the area, this time in Scots or SSE, *Third* KPN and *Wester Third* PMH. Stobie shows another *Third*, split into *E.* and *W. Third*, in KPN near Garden. *Third* may have been a relatively common unit of land assessment in Menteith, and has left traces is in other parts of Scotland, including Thirdparts in different areas of AYR and one in FIF (Taylor 2009, 353). Another unit of assessment can be seen in Merkland, next to Arnprior KPN. The post of sheriff has already been mentioned,
but there are no place-names, so far as I am aware, that commemorate the earl or the mair, a subordinate officer of a sheriffdom, who appears in the records in the 15th C.\textsuperscript{88}

There would be no point in a lord having an estate unless it provided for him, and one place-name that indicates 'the demesne lands, or lands which directly supplies the household of the feudal superior' (Taylor \textit{PNF} i, 374) is Sc \textit{bordland} 'mensal land, table land'. There were at least four in Menteith; one in KMA, one in KRD, and two in PMH. In KRD, the bordland is now the name of a hill, \textbf{Boreland} Hill, but is on record from at least 1535 (\textit{Camb. Reg.} no. 127), although the original document dates from 1189 x 1198 (\textit{RRS} ii no. 372). This seems unlikely since the name only dates elsewhere in Scotland from the first quarter of the 14th C (see p.39 for details). \textit{Bordland de Cammys} KMA only appears on record in 1471 and 1478 (\textit{ER} viii, 67, 531), but it is not clear whether it is among the \textbf{Burn of Cambus} group or \textbf{Cambusmore}, although given that the \textbf{Burn of Cambus} group was part of the estate of \textbf{Doune} Castle, we should perhaps look to \textit{Bordland of Cammys} as being that estate's mensal lands. One of the \textbf{Bordlands} of PMH only dates from after the Reformation, but this is probably rather a problem with the lack of earlier sources than late place-name formation. This is 'the lands of \textit{Boirdland} called Demesne lands of \textit{Cardross}' in 1563 (NAS GD124/1/977), probably earlier the mensal lands of Inchmahome. The other PMH bordland is the \textit{Borland of Rusky}, now shown as Mid and Easter \textbf{Borland} in eastern PMH, and mentioned in an Act of the Lords of Council in 1485 (Napier 1835, 124).

\textit{People and professions}

The variety of people represented in the place-names of Menteith ranges from the king to the shepherd. Tom an Rìgh and Tom na Banrig’nné (sic, presumably for \textit{banrighinn}; Tom-na-ban-rie 1630-50 Sibbald TNS 157v) ‘hill of the king’ and ‘hill of the queen’ respectively, might more properly be discussed under hunting, as they are found in Glen Finglas CLD, one of the

\textsuperscript{88} The definition of mair here is from \textit{DOST}. Malcolm MacNoyare was mair of Menteith in 1454 (\textit{ER} v, 676).
medieval royal hunting forests. Who the king and queen were is not known exactly, but one candidate for *banrighinn* might be Mary, Queen of Scots. She was introduced to hunting in France as a child and enjoyed hunting in Scotland as queen with her husband, Darnley (Fraser 1969, 81; Wormald 1988, 118). Another possibility is Margaret Tudor, wife of James IV, who was given the Stewartry of Menteith as part of her marriage contract in 1503 (*RMS* ii no. 2721). Another possible royal name is Loch Macanree, 700 m SW OF Lake of Mentieth, perhaps being *Loch Mac an Rìgh* 'lake of the son of the king', but who the son of the king was is not known. Many of these minor place-names are late to appear in the historical record, and some only date from the 1st edn OS of the 1860s, which presumably means we cannot exclude nostalgia, antiquarianism, or romanticism. However, if genuine, Tom an Righ and Tom na Banrig’nne probably date from at least the mid 15th C to the mid 16th C, when Glen Finglas was used as a royal hunting forest. From the second quarter of the 16th C the forest passed into the hands of the Stewarts, lords of Doune, later earls of Moray.

At least five, possibly six, places have names that show these were either places where metal-working took place or else belonged to people who carried out such activities. There are four places containing ScG *ceàrdach* 'smithy, forge': Creagan na Ceàrdaich AFE, Creag na Ceàrdaich CLD, *Arivurichardich* CLD, probably from ScG *àirigh mhòr a’ cheàrdaich* 'big sheiling of the smithy' and Coire na Ceàrdaich CLD, with possibly another near *Renagour* AFE; here Stobie shows *Craig nacardroch* (for Creag na Ceàrdaich?), but it is not marked on any OS map for the area. ScG *gobhann*, pl. *goibhnean* 'smith' is found in Tom a’ Ghobhainn CLD, Eas Gobhain CLD, and Creag Gownan AFE. One name that is probably post-medieval and indicates the production of alcoholic liquors, is Tom a’ Bhranndaidh 'hill of the brandy' which may point to illicit spirits distillation, although brandy is made from grapes, so we may be looking at *branndaìdh* being used as another word for whisky here. The raw material for the 'brandy', or rather whisky, may have come from the neighbouring field housing Tom an Eòrna 'knoll of the barley'.
Personal names can be found in a number of places and many date to the later middle ages. Most obvious are those places in KMA that end in Sc toun, such as Norrieston, McOrriston, and Murdieston. These will be discussed in more detail below. More recent seems to be Jennywoodston KPN, first on record in 1756. However, it is not only Sc place-names that have personal names attached. Two ScG baile-names have surnames as the specific, Balvalachlan CLD, Balclaichling 1662 (Retours PER no. 708), ‘farmstead of a person called McLauchlan’ and Balmacansh KMA, Ballicavis 1670 (Retours PER no. 809) ‘farmstead of a person called McCawis’. The latter is now a field-name but there was a settlement named Ballecauich on Stobie in 1783. A Donald McCawis was a tenant in the lands of Eglisdisdane and Balnegregane in the barony of Doune in 1480 (ER ix, 564), lying close to Balmacansh.

Other features, whether settlements or hills and burns and the like, with personal names are very rare, but on the northern side of Loch Katrine is Allt Tormaid ‘Tormod’s Burn’; Tormod is the ScG equivalent of English/Scots Norman. This name only appears on the 1st edn OS in 1862, and we can only speculate whether or not it dates back to the medieval period. However, it may not have originated as a personal name; Tormaid may in fact be a re-interpretation of ScG torman ‘rumbling’. Strathgartney, a prominent barony in Menteith from the 14th C, seems to contain the personal name Gartnait. OSA for Callander in the 1790s states that the -gartney element ‘borrowed its names from Gratnach or Gretney, the 2nd Earl of Mar, who possessed this tract of land in the year 1114’ (OSA xi, 583). However, Gartnait was a name that was perhaps more common in the North-East of Scotland, i.e. Aberdeen and Buchan (see Clancy 2008, 378 for the saint’s cult Gartnait, and Forbes, Kalendars, 355 for the suggestion that Gartnat or Garnard was the original name for Gervadius or Gernadius, i.e. Gerardine (Dransart 2003, 247, n.67)). Gartnait is a name mentioned in the Pictish king lists in the 6th and 7th Cs (ES i, cxxiv), including the sons of Aedán mac Gabráin and Domnall Brecc (Smyth 1984, 70). Gartnait is also mentioned as the name of a mormaer in the Gaelic Notes in

---

99 My thanks to Dr Aonghas MacCoinnich for this suggestion.
the Book of Deer, along with the place-name Pett mc garnait (Jackson 1972, 19; Taylor 2008, 282). There is a Gartnach ‘comes’, with no territorial title, who witnessed the charter of the foundation of Scone Abbey in 1115 (Scon Liber. no. 1). A Gartnach was styled earl of Buchan in c.1150 (Handbook Brit. Chron., 502), and Christina Bruce, sister of Robert I, married Gartnait, who became 7th earl of Mar, in the 1290s (Barrow 1988, 44, 86, 141). But, overall, while there seems to be nothing in the record which may prove or disprove the minister for Callander’s theory, there is no direct evidence linking the earls of Mar to Strathgartney.

Livestock and animal husbandry

For an area that is ideally suited for livestock rearing and transhumance, Menteith is notably lacking in place-names that recall those who watched over their flocks or herds. Indeed, only Calziebohalzie KMA ScG coille buachaille ‘cowherd or shepherd’s wood’ contains any herdsman type name.

There are a large number of place-names in Menteith that show where and what types of animals were reared. Again many of these names only come on record from the 1st edn OS in the 1860s, but most will be much older than that, although how many are medieval is a moot point. Most of the names with animals as an element are landscape features like hills and parts of hills or burns, but some are or were settlement names. While most of the names in this section are concerned with animals, they had to eat somewhere and one place where they did so was at Lòn Mòr AFE ‘Big Meadow’ just to the south of Loch Achray. Other meadow/grazing names will be discussed under the elements blàr and dail below. ScG pòr gen. pùir, is found in Cassafuir PMH. This word is discussed in Watson (1926, 376-7), Jackson (1972, 68-9), and Taylor (2008, 292-3). Watson suggests pòr means ‘meadow’, while Jackson thinks ‘crop-land’ is more likely. Taylor on the whole follows Jackson, stating: ‘A cursory study of the positions of these place-names, often at or near the centre of lowland parishes,

90 For the date of the founding of Scone Abbey see Duncan (2002, 85).
on good, well-drained soil, suggests Jackson’s interpretation as ‘crop-land’ is more likely’ (Taylor 2008, 293). However, the position of Cassafuir, ScG cas a’ phùir (modern ScG genitive is pòir), makes its meaning ambiguous. It sits at 90m on the south-facing slope rising out of Flanders Moss, south of Loch Rusky, where there was a medieval castle, and centre of a medieval barony. It lies at almost the same height and latitude as Brae of Boquhapple, which was part of the medieval estate of Boquhapple, probably ScG both chapaill ‘horse sheiling’. It may be that Watson’s ‘pasture’ derivation is appropriate here, and so ‘foot of the pasture or meadow’. Equally, however, the area between Loch Rusky and Cassafuir may have been the arable of Rusky Castle, perhaps making it ‘foot of the crop-land’.

Boquhapple KRD, as seen above, is probably not ‘bothy of the chapel’ despite the assertions of previous authors (Hutchison 1899, 141; MacKay 2003, 24), but is more likely to be ScG both chapaill ‘horse bothy or sheiling’ indicating that the area may have been an important horse rearing area at some point in the medieval period, which became an important estate in the later medieval period. It is notable that the nearby Wards of Goodie were used as waste for the king’s horses when the monarch was hunting in the area in 1471 (ER viii, 70). Other horse place-names can be found in Balleich AFE (ScG baile eich), and the now lost Blarachapuill (ScG Blàr a’ Chapaill) AFE ‘grazing field of the mare, horse’, above it is Meall a’ Chapuill (sic) ‘lump or round hill of the mare, horse’. In CLD are Beinn Each ‘horse mountain’ and Mòine nan Each ‘peat bog of the horses’, which may be an area, such as there were in Atholl, where semi-feral horses were kept (Bil 1990, 165-7). There are three foal names in CLD; Lagnan nan Searrach ‘hollow of the foals’ and two Bealach nan Searrach ‘pass of the foals’ on the ridges of hills mid way up either side of Loch Lubnaig. Cattle are represented in Bealach nam Bò, mentioned above, and also in Meall nan Gamhainn PMH ‘round hill of the stirks’, Coire a’ Ghamhainn CLD ‘corrie of the stirks’, and Allt Tairbh CLD ‘bull burn’, although in the latter the specific tarbh might equally refer to the ‘roaring’ nature
of the stream (Watson 1926, 453). Cattle were held at *Buail an t-Sagairt 'cattle-fold of the priest' presumably somewhere next to Creag Bhual an t-Sagairt AFE.

Sheep create something of a dating problem. That there were sheep in the area is confirmed by the *Rentalia Domini Regis in ER*; part of the rent for many of the tenants in Strathgartney was sheep as can be seen for example in 1461 at Stank CLD where one sheep (i muton) was to be paid; at nearby Coilentogle CLD, perhaps containing ScG seagal 'rye' as the specific (*Cùil an t-Seagail 'nook of the rye')*, and indicating an area of arable land, it was two sheep (ii mutons) (*ER* vii, 51). As shall be seen, the place-name evidence also confirms the existence of sheep. However, the sheep in question were a smaller species than those we are used to seeing today, perhaps not so unlike the Soay sheep of St Kilda (Grant 1961, 78-9; Richards 2000, 72). These sheep tended to be kept near the settlements (Grant 1961, 79). The familiar blackface sheep we are used to seeing around the Highlands are a fairly recent introduction having arrived with the Highland Clearances dating in this area to around the middle of the 18th C. There are only three place-names with *caora* 'sheep' as an element (and which show signs of morphological variation) – Meall na Caora CLD and Creag na Caorach CLD, and Tom Dubh nan Caorach AFE 'small black hill of the sheep', while there are two places where it would appear wool was sheared or perhaps sold or stored (also with morphological variation) – Tom na h-Olainn AFE 'hill of the wool' and Creag na h-Olla CLD 'rock of the wool'. The latter two place-names may be modern as the yield of wool from pre-Clearance Highland sheep was apparently 'derisory' (Richards 2000, 72), although see the place-name *le Wplays*, dating to 1295, which may be 'the wool place' in Renfrewshire (*Reg Passelet*, 95).*91* The other small ruminant glimpsed in place-names is the goat. Meall nan Gobhar PMH and Meall nan Gabhar CLD are both 'round hill of the goats' while Gleann nam Meann is probably 'glen of the kids [i.e. young goats]'.

---

91 Thanks to Prof. Clancy for alerting me to this source.
In the area of Gleann nam Meann and Glen Finglas CLD there are three transhumance names, all with the ScG element àirigh 'sheiling'. Creag na h-Àirigh sits above the southern entrance to Gleann nam Meann, where there are the remains of at least 22 sheiling huts (RCAHMS Canmore NMRS no. NN51SW 37), while over the hill in Gleann Casaig is Airigh Dhubh Airde 'sheiling of the black or dark height'. Across the Glen Finglas Reservoir from these two àirigh-names is another Creag na h-Àirigh 'crag of the sheiling'. Yet another Creag na h-Àirigh can be found on the western side of Loch Lubnaig, just above Creag na h-Olla 'crag of the wool' previously mentioned. Also in CLD, but in the hills above Leny and Kilmahog is Àirigh Coire a’ Mholaich ‘sheiling of the coire of the rough place’. Further east is the only sheiling name in Menteith that has become a permanent settlement, Arivuiricardich, probably from ScG àirigh mhòr a’ cheàrdaich ‘big sheiling of the smithy’. Bil (1992, 393-5) discusses the ScG term bothan as a possibly sheiling name, but does not show any in Menteith. However, it may be that Boquhapple (*both chapaill) ‘horse sheiling’ and Buchlyvie KPN (*both shliabh-in?) ‘hut or sheiling of the moorland’ were originally sheielings, but if so they had become permanent settlements by the early 14th C in the case of Boquhapple, and by 1490 regarding Buchlyvie. Other possible both-names include two settlements shown on Stobie which are now burn names: Bofrishlie AFE (containing Brit. loan into ScG preas ‘bush’) and Boninty AFE. Both-names can be quite high-status, perhaps sometimes ecclesiastical, for example Balquhidder (Bu[t]hfyder c.1268) and Balfron (Buthbren 1233) (Taylor 1996, 95-8, 104).

Pigs were kept or hunted at Sgiath nam Mucan Dubh CLD ‘wing shaped hill of the black pigs’ and Dùn nam Muc AFE ‘hill-fort of the pigs’. Calziemuck PMH is Cailzemuche in 1507 (RMS ii no. 3142) and is in ScG coille muc ‘pig wood’. This became a settlement in the middle ages and nearby was Hogwood, evidently either the same wood or part of the settlement of Calziemuck but translated into Scots, although in older place-names Sc hog means sheep
Another possible muc place-name is Mill of Muck KRD on record in an estate plan of 1754, and was probably the mill on the Muck Burn, which seems to be the burn that flows out of Loch Watston (NAS RHP24481). High above Stank Glen CLD on the western side of Loch Lubnaig is Bioran na Circe ‘point of the grouse’. Fish, and salmon in particular, were at times a substantial source of rent for a few places in Menteith and there are references to the fishings of Loch Lubnaig, the stank of Goodie, and other lochs in Menteith, and there were cruives or fishing traps on the River Teith at Doune from at least the mid 15th C, and the rent from the fishings of Doune being worth 260 (ij lx) salmon (ER vii, 53). Fishing has not left its mark on many place-names in Menteith, but Stank CLD, from a Sc word that can mean fishpond (DSL), may have been one of the places where fishing took place on Loch Lubnaig; in 1528 there is a reference to ‘piscaria lacuum et stagnorum de Lugnok...’ (RMS iii no. 612), and we know that the loch ‘abound[ed] with trout’ in 1724 (Geog. Coll. i, 336), while it seems probable that trout were also caught at Alltan nam Breac AFE ‘small burn of the trout’, on record as a settlement from 1643 (RMS ix no. 1502).

Common Elements

There are a number of elements that are common in Menteith and can help us to understand medieval rural society in the area. Many of these elements have been treated by other toponymists largely as evidence for linguistic change or population movement, but here we will treat them primarily as indicators of changes within rural settlement. All these elements have their own distribution maps (see Part 2).

Achadh (see Map 7)

92 Marked on the 1st edn OS 6 inch map c.250m to the E of Calziemuck.
93 See comments regarding hydronyms made in discussion of turk-element in Brig o’ Turk above.
According to Dwelly, *achadh* means ‘field, plain, meadow’. In Ireland, it is ‘the most widespread and least specific term for a field’ (Flanagan and Flanagan 1994, 12). *Achadh* later became an element in settlement names, but there is a semantic difference between it and *baile*. *Baile*, meaning ‘farm, settlement’, and discussed below, implies a permanent settlement, while *achadh* may have originally been an area where ‘agricultural activities ancilliary’ to *baile* took place (Nicolaisen 2001, 164). *Achadh* eventually became a place of permanent settlement in many cases as the population grew and people colonised areas that were only used for agriculture. In the Ochils, it has been suggested that *achadh* seems to have the sense of ‘piece of ground cleared for grazing or cultivation’ (Watson 1995, 155). *Achadh* appears in the Ochils at heights of between 50 and 500 m, and is found mainly on gentle hill slopes and flattish areas. They are found reasonably close to important early settlements, and it is possible that they were the cultivation and grazing sites of these places (Watson 1995, 155).

In the Gaelic notes in the Book of Deer, there seems to have been a distinct difference between *achadh* and *sliabh* ‘upland, moorland, open, unenclosed land’ (Taylor 2008, 284). In the Book of Deer there is a phrase *etar sliab acus achad* ‘both upland and *achad*’, implying *achadh* was land which was enclosed for both arable and pastoral purposes (Taylor 2008, 284).

*Achadh* is a reasonably common place-name element in Menteith, occurring at least fifteen times. The distribution of the element in Menteith is peculiar; there are seven in CLD, five in PMH, and two in KMA. There are none in AFE, KPN, or KRD. *Achadh* appears at heights of between c.20 m (*Achmore* PMH) to c.400 m (Sron Achaídh na h-Airde CLD), but most occur between c.80m and 220m. There are three in the vicinity of Lake of Menteith PMH, two called *Achyle*, although one, to the the north of the lake, seems to be a re-naming (see below), leaving two, *Achmone* and *Auchyle* on the west side of the lake. Both are now lost, but may have been the grazing or cultivation of the important place of Malling, mentioned as *Muyline*, probably for ScG *muileann*, in 1261, perhaps the main mill of the earls of Menteith. *Achrig*
and **Auchinsalt** PMH may be connected to **Rednock** and **Ruskie** respectively. There is one outlier in KMA as far as Menteith is concerned at **Achnabana**, but it does not look so isolated once nearby Auchenteck and Auchenlay DLE are taken into consideration. The others are grouped into clusters of three, only four *achadh*-names in these three clusters are or were settlements, the rest are fields. **Auchleshie** KMA, Achnagarn and **Auchenlaich** CLD are settlements that straddle the Keltie Water to the W of **Callander**; to the north of **Leny** CLD are Tom an Achaiddh Mhòir ‘knoll of the big field’, Tom an Achaiddh Bhig ‘knoll of the small field’, and **Achadh an Easbuig** CLD ‘field of the bishop’, all being perhaps some of the arable of the medieval parish of **Leny**. In Glen Finglas CLD are Sron Achaiddh na h-Airde ‘projecting height of Achaiddh na h-Airde’, possibly a field connected to the shielings in this area, while Ard Achadh ‘high field’ and **Achnahard** *achadh na h-àirde* ‘field of the height’, may have originally been the enclosed land, or in-field, of the settlement of **Duart** (*dubh-àird*). It is notable that Ard Achadh was still just a field when the OS surveyed the area in 1863, but **Achnahard** has been a settlement since at least 1451 (*Auchnaharde* 1451 ER v, 476).

In five places *achadh* is what it purports to be, i.e. a field-name. These are Sron Achaiddh na h-Airde CLD, Ard Achadh ‘high field’ CLD, Tom an Achaiddh Mhòr and Tom an Achaiddh Bhig, both CLD, and **Achadh an Easbuig** CLD.94 The last is discussed below (p.158). Like many of these types of names, their first occurrence is on the 1st edn OS of 1862. The other ten *achadh*-names are or were settlements, all Scotticised as *auch/ach*, and, apart from Achnahard CLD, all are in the lowland portion of Menteith. **Auchyle** PMH, possibly *achadh coille or caol* ‘wood field or narrow field’ is on the western side of Lake of Menteith. Another Auchyle in PMH lies on the eastern side of the lake, but this is marked as *Unchenoch* on Stobie. Also in PMH was **Achmore** ‘big field’, just to the north of Loch Macanree on the west of Lake of Menteith, this name only appearing on Stobie. Much earlier on record is **Auchrig** PMH

---

94 Tom an Achaiddh Mhòr, Tom an Achaiddh Bhig, and Achadh an Easbuig are in what was formerly the parish of Leny.
possibly ‘crag field’, it sits below crags on the S side of Beinn Dearg, and dates from at least 1489 as Auchryg (RMS ii no. 2465). The second element seems to have been reinterpreted as Sc rig ‘long extent of land’. Further east in the same parish is Auchinsalt, the specific of which is obscure, but c.f. OI salt ‘leap’. In CLD is Auchenlaich, again the specific is obscure, but ScG laogh ‘call’ is a possibility. On Stobie near Bracklands was Achnagarn possibly achadh na gartan ‘field of the small enclosed settlement’ or achadh nan càirn ‘field of the cairns’ the latter with nasalisation in gen. plural. Two achadh-names are or were in KMA Achnabana, on record in 1491 as Auchounbannow (RMS ii no. 2059) and is possibly ‘field of the blessing’, the specific being ScG beannachd ‘blessing’. At that date the lands were in the hands of sir Alexander Doig, canon of Inchmahome. The final achadh-name is Auchleshie on the border between KMA and CLD, the specific possibly being ScG lios, gen. sg. liosa, and so the name could mean ‘field of the enclosure’. The enclosure in question may be the oval-shaped fort at NN649078 (RCAHMS Canmore NMRS No. NW60NW 10).

Blàr (see Map 8)

Another common element is blàr, occurring at least 17, possibly 18, times in Menteith. The word in place-names is usually taken to mean ‘field, plain’ (Dwelly s.v.), but can also mean ‘peat-bog, battlefield, or cleared space’. Taylor has the meanings ‘open, level land, muir’ for Blair, Ballingry FIF (Taylor, PNF i, 141), and ‘field, muir’ for Blair in both Carnock and Culross FIF (Taylor PNF i, 207, 232). In Fife blàr seems to represent quite extensive lands; those in Culross appear to encircle the burgh (Taylor, PNF i, 232). This is not quite how the element seems to work in Menteith, where it appears to be associated with more compact grazing lands, as it is in parts of Lennox (Neville 2005, 102). With the exception of Blairhoyle PMH, Blaircessnock PMH, Blairfechans KPN, and Blairgorts KPN, all the blàr-names are in the

95 Dwelly gives other meanings for lios, including ‘enclosure or stall for cattle, garden, court, dispute’, all of which are possible here.
Highland part of Menteith, and the distribution is entirely west of KMA (Blair Drummond is a transferred name dating to after 1683). There is a continuation of these blàr-names into neighbouring Lennox, with Blairfad, Blairmore, and Blarnavaid lying between Balfron and Drymen, and a cluster of nine lying in the SW corner of Kilmaronock parish DNB. This cluster seems to be divisions of an area that was known as Blair or Am Blàr (Taylor 2007b, 31-2).

There is a striking cluster of blàr-names in AFE running up the valley containing Loch Chon and Loch Ard, and these must represent grazing lands in what is or was a steep-sided, wooded-valley. One place-name tells us what animal grazed there; Blarachapuill, on the banks of Loch Chon, is ‘grazing of the horse(s)’. Blaregal AFE may be ‘grazing of the foreigner’ and is presumably associated in some way to the Leac a’ Ghoill, perhaps ‘stone of the foreigner’ on the hill above. ScG Gall in this case could relate to watching out for strangers or foreigners, or possibly Lowlanders (Peadar Morgan pers. comm.). It is notable that there is a hill near Leac a’ Ghoill called Tom nan Saighdearan 'knoll of the soldiers', probably to do with the barracks at Inversnaid built after the 1715 Jacobite Rising, but it shows that here, too, there was a look-out watching – probably by the soldiers – for movement in and out of the glen. Blairhullichan AFE may well be the grazing lands of a settlement associated with a nearby tulach ‘small hill, assembly place’. Blaranross AFE was the grazing lands of the peninsula (An Ross?) projecting into the SE corner of Loch Ard; the lands of Rose cum le Cragmuk are mentioned in the 1427 charter of James I to Malise Graham of the earldom of Menteith (NAS GD220/1/C/3/1). In c. 1567 the lands of Blairinros were 'bowgank' or bowganged, in other words were 'set in pasture for cows' (NAS RH9/3/84; Sanderson 1982, 23, 249; DSL s.v. bowgang). Blairuskin may have been a piece of grazing beside the meeting place of burns flowing into the Water of Chon. The specific uskin could be ScG uisgean 'waters' and it would seem that the eponymous blàr extended on both sides of the Water of Chon, i.e. Blairuskinmore and Blairuskinbeg with a number of small burns running through the land on the Blairuskinmore side, one of which is called Allt Tairbh 'bull burn', so we may be
looking at a grazing spot for cattle, but it could be that, as we have noted above, the specific tarbh refers simply to the ‘roaring’ nature of the stream (Watson 1926, 453). Just south of Blairuskinbeg is Stob a’ Bhlàir Bhàin ‘point of the white plain or field’, which is presumably a grazing area and is only 800 m north of Tom Dubh nan Caorach ‘Black hill of the sheep’. Elsewhere in AFE is Blairvouach on the northern shore of Loch Ard, this is perhaps ScG *blàrbhòach ‘field or plain of the cattle place’, but the early forms are too few, anglicised, and a bit erratic to be able make any clear sense of them. In the north of AFE, on the southern shore of Loch Achray, is Blàr Loisgte ‘burnt plain’, meaning, perhaps, an area deliberately cleared of bracken or other undergrowth to make a grazing field.

Over the border in CLD, on the northern shore of Loch Achray, is Blair House, a name that is marked as ‘Manse’ on the 1st edn. 6 inch OS map, and does not appear as ‘Blair Ho.’ on an OS map until the One Inch 7th Series in 1957. Just 600 m to the east is Feadan a’ Bhlaire Chois ‘channel of Blair Chois’, in which Blair Chois can be translated as ‘the plain foot or, field or plain at the foot (of a burn)’. This might mean that the area towards the eastern end of Loch Achray was called blàr or possibly Am Blàr and was an area of grazing. Blairgarry lies 5km east of Blair House on the northern shore of Loch Venachar. On record from 1451 as Blaregeragh (ER v, 476), Blairgarry sits on what looks like an alluvial fan created by sediment from the Milton Glen Burn. The -element is a little problematic, but it could be related to ScG garbh ‘rough’. To the north of Callander, on the slopes of the Keltie Water is Còinneach Bhlàr ‘moss or foggage [grass left in the field during winter, see DOST under fog] plain’, next to it is Creagan a’ Choinnich Bhlàir. Also in CLD, on the eastern side of Glen Finglas, is Creag a’ Bhlàir ‘crag of the field or plain’, and this is possibly the grazing of the settlements of Achnahard and Duart a short distance to the north. Across the Finglas Water from Creag a’ Bhlàir is what is now called Tom Erraich, but on the 1st edn OS 6 inch map is Tom na h-Airidh ‘hill of the sheiling’. Three other upland blàr-names could be found in PMH, just to the south
of Loch Venachar: Blairholich\(^{96}\) (Fraser, Stirling, 321), Blarnacaorach and Blareidh, probably for Blàrfhèidh. These three are now all lost, but the latter two are ‘field or plain of the sheep’ and ‘field or plain of the deer’ respectively, and date from at least Stobie’s map of 1783, where they are Blarnachuiroch and Blarae. They are most likely of an older date, although need not, of course, necessarily be medieval.

Of the four lowland blàr-names, two are in PMH and two in KPN. Blairhoyle PMH is blàr choille ‘wood field or plain’ and is indicative of grazing within or beside what was previously a wooded area beside Flanders Moss. Blaircessnock PMH is presumably the grazing grounds of either Cardross or Inchmahome and is mentioned as Blarecesnoche in a rental of Inchmahome of 1646 (Fraser, Menteith ii, 368). The specific must be the same as that of Cessnock on the south-side of Glasgow and of Cessnock Castle and Cessnock Water in Ayrshire. It may be OG seisenn ‘unproductive ground, marsh, swamp, bog’, with an adjectival ending –ach,\(^{97}\) which would suit the location of Blaircessnock, sitting at the edge of Flanders Moss. In KPN, across the River Forth from Blaircessnock, are Wester Blairgorts and Blairfechans. Both these places only come on record from the 17\(^{th}\) C, 1609 in the case of Blairfechans (Blairfichane RMS vii, no. 58), while Blairgorts dates from 1610 (Blairgrotis RMS vii no. 354). The early forms for Blairgorts suggest it is not a gart-name, but rather the specific may be ScG grod ‘putrid, stinking’, perhaps relating to marshy grazing land that is frequently flooded by the nearby un-named burn. The specific in Blairfechans is unclear, but ScG faiche (or rather pl. faichean) ‘green, field, meadow’ may be possible.

More research needs to be done on this element in Scotland as a whole, but it can be seen from the foregoing that, depending on locality, blàr in Menteith is generally found to contain relatively level land, which has been cleared for both pastoral and arable purposes in

\(^{96}\) See Gartnasale in survey PMH for discussion of the location of this place.

\(^{97}\) My Thanks to Prof Thomas Clancy for this suggestion.
predominantly upland areas where the soil is generally of poor quality. In some cases these *blàran* may have been enriched by the sediment of the burns flowing down from the hills.

**Dail** (see Map 9)

This name means a natural water-meadow or haughland. Water meadows are low lying land at the side of a river, creating a flood plain. During the summer when the land around the river was dry, the grass was cut to produce hay. The act of the river flooding also fertilised the land with silt from the river, and, due to the enhanced productive nature of the soil from the nutrients many of these *dailean* gave their names to permanent settlements. The element is a loan word borrowed into ScG from Pictish or British (Watson 1926, 414; Taylor forthcoming; James BLITON under /*dʒəl/). Fraser states the word is ‘pre-Celtic’, although he may have confused pre-Celtic with pre-Gaelic. An equivalent to ScG *dail* is found in Wales, Cornwall and Brittany, usually as *dol*; it is typically anglicised as *dal* in Scottish place-names, although it was also *dol* in earlier periods (Fraser 1999, 204; see also).

There are or were eleven *dail*-names in Menteith, with five in AFE, three in KMA, and three in CLD. Watson wrote that there are about 46 place-names beginning with *dal* in the index of *Retours* (Watson 1926, 414); of the eleven for Menteith only *Daldorn* can be found in that publication. Most *dail*-names are, as we would expect, beside a river, while two, *Daldorn* KMA and Dail Malio AFE, are at the side of a loch. Only two did not become settlements: one is Dail Malio, with Malio being pronounced as /maˈlu/ on the northern shore of Loch Ard, which may be dedicated to a saint. There is a reference to an island in Loch Ard named after ‘St Mallo’ (*Geog. Coll.* i, 343). Quite who this obscure saint was, is a mystery, but Machutus could

---

98 My thanks to Dr Taylor for this reference.

99 *Dalgreym* is shown in the index, but this is Daira KRD, which is probably not a *dail*-name; the overwhelming majority of the early forms start with *Dar*.
be a candidate (see p.144 below). Another place named after him, if the specific is indeed a saint's name, near the old church of Aberfoyle is Bad Malio 'thicket of Malio'. The other place-name with the element dail that did not become a settlement is Creag Dail-thuim-ghairbh AFE 'crag of the haughland of a place called *Tom-garbh (rough knoll)', which lies on the Duchray Water some 2.5km W of Couligartan. It is one of three place-names containing dail that were on this river. Further east were Dalavie AFE (Dallevy 1643 RMS ix no. 1502), just across the water from Duchray Castle DRY, and Daldanet AFE a km along the river. Both are obscure, the early forms being confusing and erratic. Also in AFE was Dalchon 'Water-meadow of or beside the Water of Chon' on record from 1643 (Dalthone 1643 RMS ix no. 1502). It is now called Lochard Cottages. Due to forestry planting in the 20th C, the settlements in AFE containing dail-names have now disappeared. However, three dail-names that are still settlements today can be found in KMA, Daldorn Dal Dòbran 'haugh of otters' at the side of the Easter and Wester Lochs of Daldorn, and two are located on the banks of the Keltie Water, Dalvey (dail bheith) 'birch haugh' and Dalvorich, the specific of which is unclear, but could be Morich, from Muireadhach, either a saint of that name, who is culted in Argyll at Kilmorich (Watson 1926, 293), or perhaps even one of the earls of Menteith.

In Glenfinglas CLD, before it was flooded to make a reservoir, was, apparently, a Dal Noambh [sic] (RCAHMS Canmore NMRS No. NN51SW 2), evidently for dail naomh 'holy meadow'. This is clearly the Dalnaif mentioned in Sibbald (TNS 157v) in 1630-50. Next to it was 'Tam Noambh [sic] or the Holy Knoll' (Hutchison 1879, 60-1). RCAHMS Canmore (NMRS No. NN51SW 2) thinks '[t]he description of Tom Naomhb [sic] fits the hill called Tom an Fhaile (NN521103)'. A 'myl' upstream from Dalnaif, according to Sibbald, was Dalcharry. None of these places are marked on any map of the area. Hutchison also records that there

100 Another possible candidate may be MoLuóc or MoLua (Watson 1926, 292), but there are no references to this saint in Menteith.
was a Dal Noambh [sic] at the western end of Loch Katrine, presumably near Glengyle (1879, 61).

**Earrann** (see Map 10)

In Menteith there are at least 22 names containing the element *Arn-*; an Anglicisation of ScG *earrann* ‘portion, share, division.’ These are also discussed briefly below (p. 160) since there are grounds for believing it is an element that, at least in Menteith, is closely connected to the priory of Inchmahome (Watson 1926, 256; Fraser 1999, 206). The ecclesiastical nature of the element is shown by the place-names *Arnprior* KPN, *Arnclerich* PMH, and *Arnvicar* PMH, and by the fact that *Arnbeg* was in the hands of the chapel of *Dundaffmure*, near Denny STL in 1480 (*ER* ix, 564). However, we should at least try to put them into some agricultural context here, which might give us a clue as to their coining. The first thing to note is that the cluster of *earrann*-names in Menteith is most remarkable. The element is absent from Fife, and the only other comparable cluster is found in Galloway.

Like Menteith, Galloway has a large number of *earrann*-names; an unpublished map made by Michael Ansell of the Scottish Place-name Society (see Map 11), shows 23 *earrann*-names in this region with a further three in southern Carrick in Ayrshire. There are two particular concentrations of this element with fourteen in the area around Castle Douglas and seven around New Galloway in the Glenkens. Richard Oram states that these *earrann*-names found in Galloway represent assarts and ‘point to ecclesiastical involvement’ and ‘may represent areas taken out of waste by monastic estate managers or their tenants’ (Oram 2000, 258, following Brooke 1984, 49). There are five elements in the Castle Douglas cluster that seem to support this view; Ernespie (the Bishop’s Portion), Ernfillan (St Fillan’s Portion), *Ernanity* (*earrann na h-annaide* Watson 1926, 170), Armnannoch (the monk’ or monks’ vassals portion), Chapelerne, and Ernambrie (possibly almoner’s portion, from ‘Sc *almry*, almoner,

---

101 See *Arnbeg* PMH for details of the location of the chapel of *Dundaffmair*.
one of the monastic officers' (Taylor, PNF iv, 630)). These last three are just across the Urr Water from Grange Farm, Kings Grange, and Grange Burn, all containing Sc grange ‘monastic farm’. It is also notable that there is a Cultam Hill nearby. This might commemorate Holm Cultram Abbey in Cumbria founded by Prince Henry, son of David I of Scotland, c.1150 (Duncan 1975, 148), and which had lands in Galloway in the Middle Ages, including the church of Kirkgunzeon (Holm Cultram Cart., no. 120). Kirkgunzeon lies 9km NE of the Castle Douglas cluster of earrann-names. In the parish of Kirkgunzeon, 9.5 km E of Castle Douglas, there is another Armannoch, with ScG manach ‘monk or monastic tenant’. The element earrann survives in Galloway as arn-, ern-, and iron-, with the earliest documented instance dating to 1408 (Oram 2000, 258.). This is a bit earlier than those found in Menteith, where the earliest case is Arnrior in the 1440s found in Walter Bower’s Scotichronicon as ‘Ernefrear ubi capella Sancti Beani [Arnprior where there is a chapel of St Bean]’ (Bower Scotichron. Bk. 2, ch. 10 (vol. 2, p. 190). However, it is worth noting in the case of Menteith and Galloway that the relative lateness of the evidence is not necessarily an indication of lateness of names, as both are document sparse-districts.

Earrann may not be assarted land in many cases in Menteith, but may instead be an element associated with a new tenurial situation. It seems unlikely that those earrann-names in Kippen parish are assarts, for it would be surprising if agricultural activity had not been going on in Kippen centuries before large parts of the parish became the arable land of the priory of Inchmahome. Viewed from the Menteith Hills to the north, Kippen presents a gently sloping, arable contrast to the moss of the carselands of the River Forth. Kippen, or at least the PER parts, had seemingly been part of Menteith since the time of the Gaelic earls. It seems strange that they would have what is an anomalous piece of territory south of the Forth, surrounded as it is on one side by the earldom of Lennox and on the other by the shire or soke of Stirling, when all the other Menteith territory is to the north of the river. They may have been given or had taken the territory that is now the parish of Kippen to supplement
what would have been a distinct lack of arable land in the rest of Menteith. It is very likely, then, that arable farming had indeed taken place in Kippen for many years before the monks of the priory of Inchmahome were given their portions centred on that of the prior, perhaps by Walter Comyn not long after he founded the priory in 1238. Oram states that Arnvicar and Arnclerich in PMH are also assarts which 'lie in the former marshland on the valley floor' (Oram 2000, 258). This is only partly correct; on the modern map these places look as if they are on the flat carseland, but they do in fact sit on a ridge of terminal moraine some distance off the floor of the case. Arnvicar sits at a height 36m OD, while Arnclerich is at 47m OD. The surrounding carseland sits at a height of 14m OD. This area of moraine seems to constitute a ridge of arable and grazing land rising out of the surrounding moss. Supporting this view is that there were other settlements on this ridge including Cardross. Originally belonging to Inchmahome, this settlement became the seat of a branch of the Erskine family who became earls of Mar, and had a bordland, or land whose main purpose was to provide for the laird, and so was the main arable area of the estate nearby.

This is not to say that there were no assarts among the earrann-names, for there are indeed some earrann-names that are on the carseland – Arnmach 'portion of the cultivable land?', Arnochoile 'portion of the narrow', and Arnachly now lost but on record as Ernetly in 1427 (NAS GD220/1/C/3/1), all in PMH – and it is possible that these may represent later expansion by the monks of Inchmahome on to the wastes of Flanders and Gartrenich Mosses.

While the distribution of earrann-names in Menteith certainly suggest some kind of connection with Inchmahome, it should be noted that other than Arnprior, Arnvicar, Arnclerich, and Arnmach, which were properties of Inchmahome in 1606 (NAS, PA2/16, f.86v-89r), and possibly Arnachly, which has traditionally been said to have been a chapel of Inchmahome (NSA x, 1105), this association of earrann-names and the priory is largely circumstantial, based on the distribution of the earrann-names themselves. Nevertheless, it
may be significant that in CLA all the earrann-names there are in parishes (Arns in AVA, Arns in CLK, and Arnsbrae in TBK, now ALL) where the local churches belonged to Cambuskenneth. Also Arns DRY, is next to Chapellaroch ‘ruined chapel’, another chapel traditionally said to have belonged to Inchmahome, and Dalmary ‘haughlands dedicated to the Virgin Mary’, patron saint of Inchmahome (see p. 135 below).

Gart (see Map 12)

Another element not found in Fife is gart meaning ‘enclosed field or settlement’. These gart-names are part of a large group that extend in a rough triangular area from Clackmannanshire to Loch Lomond to Glasgow. There are at least 157 in that area (McNiven 2007, 62), of which at least 26 are or were in Menteith. Quite why they stop at the medieval Fife border is not clear. I have previously argued that gart in Clackmannanshire are the settlements of the foresters of the medieval forest of Clackmannan (McNiven 2007). The material to support this view comes from charter evidence from monasteries such as St Andrews and Holyrood which received rights to take timber from the forest for building material from the 1140s. There is none of this kind of evidence for Menteith, but that is probably due to lack of documentation which, as we have seen, is a major problem for Menteith. A close look at documentation for neighbouring Lennox may give a clue as to the coining of these names, but other gart-names in Menteith are undoubtedly assarted land taken from the moss that covered large parts of lowland Menteith. The 1st edn OS 6 inch map shows a remarkable clearance in the moss at Gartrenich PMH, which could confirm the suggestion that many gart-names are an expansion of settlements into wasteland such as forests or bogs (McNiven 2007, 62). Although this need not always be the case: John Bannerman remarked ‘many of the existing gart-farms [of Lennox and Menteith] are on the best low-lying ground, while achadh and baile farms are generally higher up and/or on
poorer ground. I occupy one of the achadh farms and would gladly swap it for one of the neighbouring gart-farms' (Bannerman pers. comm., 2007).

While not mutually exclusive, it is noticeable that the distribution of the two of the main habitative elements found in Menteith, baile and gart, are somewhat distinct from each other. Baile-names predominate in the east of Menteith, while gart-names are predominantly in the west of the earldom. Baile-names tend to sit on the higher ground away from the areas of carseland which formed part of the large mosses, such as Flanders Moss PMH. Indeed, only in the area around Callander is there any convergence between the two elements, although it is not clear why. It is especially instructive to compare the distribution of baile-name and gart-names in PMH (see maps 12 and 13). All the baile-names are to the east of Lake of Menteith, while the gart-names are all largely to the west of the lake. Bannerman's association with achadh and baile being situated on poorer ground than gart-names may not reflect the situation in the Middle Ages. The baile-names in Menteith are either on ridges of higher land up from the floor of the carse, or on the south-facing slopes to the NE of Lake of Menteith, suggesting good drainage, while the gart-names are either on the carse floor or on the edge of the carse, signifying some connection with the bogs that have been reclaimed or are still extant. It may be that some of the gart-names are on the best land today because they were on land that was subject to intense ‘improvement’ in the 18th and 19th Cs.

That there seems to be some kind of distinct difference between earrann and gart is suggested by an entry in the charter of 1427 granting the earldom of Menteith to Malise Graham by James I: terras de Gartmulne et de Ernemul (NAS GD220/1/C/3/1). In 1489 there is reference to Gartmulze and Myllyn (RMS ii no 1861). Myllyn is now Malling PMH from ScG muileann ‘mill’, which is on record in 1261 as Muyline (TNA C.66/76) and on Stobie’s map of Perthshire with Clackmannan of 1783 Gartmoulin is shown near Malling. Ernemul must

---

102 This document is held in the English National Archives: (Patent Roll, 45 Henry III), m.4, inspeximus of 20 Sept 1261. This document is also published in RRS ii, no. 519 (comment), Fraser Menteith ii, 214-15, and CDS i, nos. 2275-6
have been the ‘portion of the mill’ while *Gartmoulin* was the ‘enclosed field or settlement of the mill’. It may be that *Gartmoulin* was the mill-land belonging to the secular lord, i.e. earl of Menteith, while *Ernemul* was the mill-land belonging to *Inchmahome*. Why *Gartmoulin* survived into the 18th C and *Ernemul* did not is not clear, but it may be to do with the area around Malling becoming wholly secular land, and perhaps *Ernemul* was given to the earl of Menteith, perhaps in exchange for other lands elsewhere in Menteith or PMH.

Cynthia Neville states that *gart* is Brittonic, and that along with the ‘elements such as *ach* [and] *baile*...testify to the antiquity of crop farming’ in the valleys of the Leven, Endrick and Blane in the earldom of Lennox (Neville 2005, 81). While it is certainly true that *gart* is related to Welsh *garth* ‘field, enclosure’ (Watson 1926, 198), it seems unlikely that it is the Brittonic version of the word which is being used here. It is probable that Neville was influenced by W.J. Watson in this regard. In trying to make sense of the large cluster of *gart*-names mainly in the area to the east of Glasgow, including places such as Gartcosh and Gartsherrrie, Watson thought the prevalence of the element there ‘may be due to British influence’ probably in view of the fact that this area was in the old kingdom of Strathclyde, but adds the caveat ‘though of course *gort*, *gart* of Gaelic and *garth* of Welsh both mean ‘field, enclosure’ (Watson 1926, 198).

The *gart*-names of Menteith do not form a contiguous block like those in Clackmannanshire. Instead there are several clusters of *gart*-names within Menteith: a group of ten spreads out south-westwards from Lake of Menteith straddling the border of PMH and AFE, and includes *Gartmoulin*, *Gartlebruck*, *Gartrenich*, *Gartur*, *Garkechan* and *Gartledenye*, now *Hilton*, in PMH, and *Gartartan*, *Gartmore*, *Gartloaning*, and *Crinigart* in AFE. There is another cluster of five around Callander; *Gart*, *Gartocosh*, *Achnagarn*,¹⁰³ *Gartchonzie*, and *Gartenjore*, with a group of three in the east near Kincardine kirk; *Gartincaber*, *Gartoch*, and *Tollgart*. A further group of three lies in the west at the western side of Loch Ard,

¹⁰³ *Achnagarn* may not be a *gart*-name, but may be ScG *càrn* with nasalisation in gen. plural ‘of the cairns’.
Couligarten, Gartnerichnich, and Barr a' Ghartain. Kippen may also have three *gart*-names, Shirgarton, and possibly Wester Blairgorts\textsuperscript{104} and Garden. There are three isolated *gart*-names, one at Culligart AFE and one at Gartnasail in the uplands of PMH, with Greingart, possibly with ScG *grian* 'sun' as the specific, near Row KMA, mentioned in 1639 (*Retours* PER no. 486). Another possible now lost example is named Garnimpy and shown on Stobie in the barony of Cessintully KMA.

These are not the only *gart*-names in the vicinity: immediately over the border in Drymen STL and in the earldom of Lennox between the River Forth and the watershed with the Endrick Water are at least another thirteen. On the southern side of the Forth-Endrick watershed, stretching from Killearn in the east to near Balloch on Loch Lomond-side in the west, there is another group of at least sixteen.

*Keir*

In Menteith there are a number of small mounds often containing the remains of a fortification of some kind. Many of these mounds have the element *keir* in their name. In Menteith they are found mainly in KPN, where there are five such places: Keir Brae of Garden, Keir Hill of Dasher, Keir Knowe of Drum, Keir Hill of Glentirran, and Keir Knowe of Arnmore. On the southern boundary of KPN, in Balfron parish, is Keir Knowe of Glinns. In PMH, near Easter Tarr, is Keirhead with the remains of a fort called Keir, while the remains of a possible motte called Keir can be found at nearby Mid Borland PMH. There is also a Keir Hill near Cardross PMH. The element *keir* is problematic; it had been thought that names containing *keir* were derived from Brit., Pictish or ScG *cair* ‘fort’. That may indeed be the case for simplex names that can be dated reasonably early, such as Keir near Dunblane PER, on record as *Kere* from at least 1477 (*RMS* ii no. 888); however, many of the *keir*-names in Menteith

\textsuperscript{104} Although see above under *blàr* where it is suggested that the *gart* element may actually be ScG *grod* 'putrid, stinking'.
contain the Scots generics *hill or knowe*, making it likely that *keir* had been borrowed into Scots, perhaps as late as the 19th C, and that we are not dealing with Brit., Pictish, or ScG *cair* in this area (see also Taylor, forthcoming; Taylor, *PNF* v, Elements Glossary, forthcoming).

The earliest occurrence of the forts of KPN and PMH being called *keirs* is in *OSA* for KPN in 1795 (*OSA* vxiii, 329). An earlier word for these remains, at least in Kippen KPN, may have been ScG *ceapan*, diminutive of *ceap* 'block, small, conspicuous hill'.

**Baile and toun and language change** (see Maps 13 and 14)

A major development in the history of the earldom was the change in language from Gaelic to Scots. There is often an assumption that changes in place-name generics relate to population movement rather than language shift among existing inhabitants, but this does not seem to be borne out by the evidence in Mentieth. What was happening in Mentieth in the medieval period, and presumably over much of Scotland, especially in the Lowland/Highland boundary area, is not a movement of population, but a change in the language of that population from Gaelic to Scots, and this can be shown in the place-names. However, that change took a long time to take effect over the whole earldom.

The reason for commenting on both these place-name elements together will become clearer as we proceed, but, simply put, while it is generally held that ScG *baile* will often be earlier than Sc *toun*, the chronology of these two elements in Mentieth is not quite so clear cut over the whole of the earldom as it would be in other parts of Scotland, such as the Highlands. As we shall see, both elements could be used to coin place-names in Mentieth at the same time. However, there are undoubtedly cases where it is highly likely that a *baile*-name in Lowland Mentieth is of an earlier date than a *toun*-name, particularly if they are in the same area. Examples include Balmeanoch KPN being earlier than Jennywoodston in the same parish, and similarly Ballanucater PMH would be considered an earlier formation than nearby Norrieston KRD simply because Scots had replaced Gaelic in the lowland portion of
Menteith probably by the Protestant Reformation of 1560 if not before, and therefore we would expect a *baile*-name in this area to be of earlier date than a *toun*-name.

To deal with *baile*-names first, there are or were 23 names with this generic in Menteith, the earliest on record is *Balleich* AFE. Most *baile*-names conform to those found in other parts of Scotland including Fife, for example, in that they are the *baile* of something, whether that something is a topographical feature, e.g. crags in *Ballachraggan* CLD, a personal name, Gilbert in *Balgibbon* CLD or MacLaughlan in *Balvalachlan* CLD (by far the largest number of *baile*-names in Fife contain personal names), or an occupation, *fùcadair* ‘waulker, fuller’ in *Ballanucater* PMH. However, there are four *Balbegs* in PMH and three *Balmeanochs* in the earldom, one each in PMH, CLD, and KPN. This situation is not paralleled in Fife. The *Balbegs* are not tounships in their own right, in contrast, for example, to *Ballachraggan* CLD on record from 1450 or *Ballynmolyn* (*Baile Mhuilinn*) (ER v, 476, dated 1451), now *Milton of Callander*, but rather the *Balbegs* are or seem to be the equivalent of something like *little-toun* in Scots. In other words, they are divisions of existing places, i.e. *Cardross, Ruskie, Rednoch*, and what is now *Invertrossachs*, all of which would presumably have been the *baile mòr*. We may be looking at something similar to the situation in CLA where Dollarbeg was a division of Dollar, and perhaps alternative names for these Balbeg places were *Ruskybeg, *Rednockbeg, or some such. Similarly, *Balmeanoch*, the equivalent of Scots Middleton, is the *middle-toun* of an existing place, namely *Leny, Buchlyvie* and *Rednock*. These seem to be late formations of *baile* names despite them all being in the lowland parts of Menteith, and are perhaps indications of a vibrant Gaelic language still being spoken in the later Middle Ages at a time when we might have expected Scots to have taken over.

From the 15th C we begin to get Scots *–toun* names, this generic having much the same meaning as ScG *baile*, ‘farm, settlement’. There is a reluctance among some of those who

---

105 Roy shows a *Balrioch* as the prominent place in the NW corner of PMH. NSA asserts that the estate name was Drunkie (NSA x, 1108).
study rural settlement to use the term *toun* when referring to such settlements. The reason given is that there is confusion with the modern concept of a town as an urban settlement and that, as a result, 'township' is the preferred term for a farming unit (Dixon 2003, 55). But *toun* is a term that was used by medieval people themselves and as long as it is properly and clearly explained when writing about this type of settlement, the term should not provide too much of a barrier to understanding its use in rural settlement studies.

*Toun*-names in Menteith are concentrated within a 5km circle of *Thornhill* KRD, with a particular cluster in the barony of *Cessintully* just to the east of *Thornhill*. Some of the generics of *toun*-names clearly contain Gaelic surnames, but they may have been Scots speakers, although we must remember that Gaelic was still spoken in PMH just 5 miles to the west in 1724. Others contain Scots-surnames such as Young and Baxter. The earliest of the *toun*-names is the ephemeral *Donald-youngistoun* which is on record in 1488-9, and which then disappears when Donald Young's portion of *Cessintully* is sold to someone else. This exchange of lands is one reason for the appearance of new names in new languages. Also ephemeral, at least in name, is *Baxertzoune* KMA, on record from 1541 as *Baxtartoun* (*ER* xvii, 716). It was also known as *Boghall*, which it still is today. The other *toun*-names shown on the current OS map in the barony of *Cessintully* do not come on record until the 1520s but some of the surnames attached to them as specifics are found in the *Rentalia Domini Regis* in the *ER* dating from the 1480s and many continue to appear in these records until the mid 16th C. As regards *Mackeanston* KMA Donald McCane is on record from 1480 as a tenant in the lands of *Sessintuly*. *Mackreiston* KMA dates from 1527 (*RMS* iii no. 450), although there are no MacRaes, or variants of that name, on record in *Rentalia Domini Regis* for the barony of *Cessintully*, but Donald MacRath was a tenant in *Eister Cammis* KMA in 1480 (*ER* ix, 564). Regarding *McOrriston* KMA, Thomas and Forsith McCorane are tenants in the lands of *Cessintully* in 1480 (*ER* ix, 566), but the place itself dates only to 1528 (*Makcorrestoun RMS*

106 Black has Macrae as a variant of Macrath (1946, 560).
iii no. 626). **Munnieston** KMA also dates from 1528 (*Munnowstoun RMS iii no. 626*), although there is no-one with that name in *Rentalia Domini Regis* or elsewhere. It may be that this is a surname based on the Gaelic word for monk, *manach*, and so this may have been land originally belonging to Inchmahome, but there is no record of it being such. **Murdieston** KMA dates from 1527 (*Murdestoun RMS iii no. 450*); there are a number of people from whom the settlement is perhaps named; Murdach Smyth was a tenant of **Cessintully** from at least 1480 to 1488 (*ER ix, 566, ER x, 635*). In 1484 Johannes Murthoson becomes a tenant (*ER ix, 599*), while in 1486 Murthoch Kessokissone and Kessok Murthauson are both mentioned as tenants in **Cessintully** (*ER ix, 627*). The possibility is that all these people mentioned above are 1st or 2nd generation descendants of Gaelic speakers, but, based on the Scots patronymics, probably all spoke Scots by this time. As Simon Taylor has noted for Fife in the 13th C ‘for place-names to become Scots in this...period, it clearly needed not just a Scots-speaking laird, but also the proximity of a Scots-speaking community’ (Taylor 1994, 104). Quite how Scots ended up the dominant language in this part of Menteith by the late 15th C is not clear, but changes in tenure and in tenants, perhaps due to the lands changing hands as they were feued to followers of the kings or other dominant landlords, such as the earl of Moray, must be a possibility.

Other *toun*-names outside the barony of **Cessintully** include nearby **Norrieston** KRD, named after the Norries, one of whose number, Robert Norry, was a servant (*servitori*) to James II in 1450 (*RMS ii no. 321*) and who was a witness to the collection of rents in Menteith in 1453 (*ER v, 596*). The place comes on record rather late, **Norrieston** (1649 *Perth Rentall, 78*), but like many of the place-names of Menteith, this may be more to do with those imperfect source materials rather than late settlement formation. Norry’s descendants became major landholders in Menteith, and nearby **Boquhapple** KRD was in the hands of James Nory in 1471 (*ER viii, 70*). In PMH is **Lennieston**, on record from 1637 (*Lenistoun RMS ix no. 681*), but who the eponymous Lennie was is unknown. There are at least three
possibilities: the settlement may somehow relate to the medieval parish of **Leny**, which was a fragmented parish before its incorporation into CLD and PMH, or it may have borne some kind of proprietorial relationship to the Buchanans of **Leny**, or it could simply be the name of a tenant who has not made it into the historical record. **Watston** KMA is another early *toun*-name, on record from at least 1491 as *Wat Doggistoun* and *Wat Smy[th]toun* (NAS, PA2/6, 1st part, f.28v). Walter Dog\textsuperscript{107} was ‘camerarii de Menteith’ in 1471 and it was probably he who had been husband to Elizabeth Nory of **Boquhapple** in 1480 (ER ix, 563). Walter Smyth was a tenant in **Collach**, probably **Coldoch**, or part of it, in 1480 (ER ix, 563). It is not clear which ‘Wat’ was the tenant at **Watston**, and indeed it is not clear if the specific, i.e. ‘Wats’, is a genitive singular or plural; it may be that **Watston** was farmed by both men. **Deanston** only comes on record in 1585 (*Denstoun RMS* v no. 842), but if it was the settlement of the dean of Dunblane Cathedral, then it must date to before the Reformation of 1560. **Murdieston** CLD, a farm on what are now the grounds of the Roman Camp Hotel in Callander, is late on record, 1775 so far as I can gather (NAS E777/313/105); it is now commemorated in a street-name in the town. The late appearance need not necessarily equal a late foundation; after all nearby **Balgibbon** CLD first appears in the same source. It is notable that **Arngibbon** KPN first appears in 1503 (*RMS* ii no. 2753), and it is possible that **Balgibbon** also dates from at least this time or perhaps earlier.

The earliest recorded *toun*-name in Menteith is **Milton of Callander** CLD, and it is with this name we see the direct translation of *baile* to *toun*. In 1451 the original name of the settlement was *Ballynmolyn* (ER v, 476). Ten years later the settlement became *Myltoune* (ER vii, 51), at least in administrative terms for the rent collectors of the Exchequer, but it almost certainly remained *Baile Mhuilinn* to the local Gaelic speakers, since what is now Milton Glen Burn, where the mill received its power, was until 1895 called *Allt Gleann Baile Mhuilinn*. Other early *toun*-names can be found in AFE. In 1489 there is *Kirktown de Abirfull* (Kirkton

\textsuperscript{107} See Chapter 6 for a short discussion of this surname.
AFE) and le Myltoun de Abirfull (Milton AFE) (RMS ii no. 1862). Next to Kirkton, shown on the 1st edn OS 6-inch map in 1863, was a stone circle called the ‘Clachan’. However, clachan can also be a ScG term for kirkton (MacBain 1911, 85; MacDonald 1987). Rather later on record are Hardiston KPN (Hardistoun c.1750 Roy 26) and Jennywoodston KPN (Janniewoodstown 1756 NAS RHP 3479). In 1693 there is mention of ‘parte terrarum de Arnefinlay occupata per Robertum Hardie’ (Retours PER no. 993). This ‘part of the lands of Arnefinlay’ seems to have later become Hardiston. Other toun-names tend to be sub-divisions of existing places, e.g. Netherton KRD is the ‘lower toun’ of either Norrieston or Boquhapple.

While Scots was becoming the dominant language of Menteith, particularly the Lowland part, Gaelic was still spoken in much of the earldom; one baile-name provides a hint that Gaelic place-names did not suddenly stop being coined in the later Middle Ages in Menteith. In KMA there is what is now a field name called Balmacansh. This is shown as a settlement called Ballacauich on Stobie’s map of 1783, but is on record from at least 1670 (Ballicavis, Retours PER no. 809). What is notable here is that Donald McCawis appears in the Rentalia Domini Regis as a tenant in the lands of Aiglesteinston and Ballachraggan KMA from 1480, c. 1.5 km NW of Balmacansh. This is exactly the same time as Forsith McCorran et al are being named as tenants in the barony of Cessintully, and who are giving their names to toun-names in that area. It is, therefore, reasonable to conclude that at around the time when Scots toun-names were being formed south of the River Teith, baile-names were still being coined north of the river. It is not known whether the Gaelic surnames south of the Teith, such as McCane or McCorran, are of Gaelic speakers or speakers of Scots with Gaelic surnames. Nevertheless, the likelihood that Donald McCawis, probably the eponym behind Balmacansh, was Gaelic-speaking is high, and certainly higher than for someone residing in the barony of Cessintully, such as Donald McCane. However, south of the river Teith, we may have another late baile formation, this time in CLD. Balvalachlan only comes on record in 1662, but much like the
MacRaes of Mackrieston, mentioned above, MacLaughlans are attested elsewhere in Menteith in the Middle Ages; Gillespy McLachlan was a tenant of Auchinhard CLD in 1484 (ER ix, 595), while Walter Maklauchlane held Letter in Strathgartney CLD in 1546 (ER xviii, 401).

**Conclusion**

Rural settlement studies are often hampered from giving a full picture of how people used the land in the Middle Ages. Researchers in this multi-disciplinary field are, like most historical disciplines, restricted as to what they can achieve due to the limitations of their sources, whether it is archaeological evidence, which has often disappeared because of constant development, or documentary evidence, which is often fragmentary or just plain vague. Many researchers cite the potential of place-names as a way of helping them understand the medieval countryside, but, due to lack of specialists, this potential is, as stated above, very rarely taken further. Also, it is a feature of place-name studies themselves to focus on a particular generic and this is often examined in isolation, in terms of its distribution, rather than in the context of neighbouring place-names, landscape and environment, and lordship. While this is often very necessary to understand the nature of the generic, hopefully it can be seen from the above by discussing a number of different types of place-names in a regional context, that place-names have a great deal to offer researchers in rural settlement studies. But it is important to realise that to be effective in this regard, there is a need not only to properly evaluate the meanings of the place-names themselves, but also to get down not just to regional level, but also to parochial or late medieval baronial level to find out what is happening on the ground, so to speak, and until we do that we are potentially missing a large and important part of the history of Scotland’s people.
Chapter 6

Case Study: Place-names and the Medieval Church in Menteith

Like many areas of Scotland, and indeed Europe, Menteith had a multi-layered religious experience. The most significant institution in medieval Europe was undoubtedly the Roman Catholic Church. The multifaceted evidence of the medieval Church in Menteith includes early Christian establishments, saints’ cults, diocesan organisation, parishes, monasticism, lands given to the Church, and church officials from bishops to relic-keepers. The most visible aspect remaining today is medieval monasticism as represented by Inchmahome Priory, which occupies the largest island in the Lake of Menteith. Along with Dunblane Cathedral it was the religious focus of the district, but, as shall be seen, the institution whose remains are to be seen today is not the first establishment to be based on the island. The importance of organised religion can be appreciated by the number of place-names in Menteith that have, or potentially have, a religious element to them. There are at least sixty-six place-names in the earldom of Menteith that have elements with ecclesiastical connotations, including two elements that may denote lands belonging to the priory of Inchmahome; *arn*-, deriving from ScG *earrann* ‘portion, share’, of which there are eighteen, and thirteen names containing Sc *offers/offercance*-names or ScG *aifroinn* ‘offering; mass’. The remnants of religious life contained within these place-names deal primarily with churches, chapels, and places that provided food, fuel, shelter, and livings for priests and other churchmen, as well as places of those who provided services for the Church, the parishioners, and others, such as pilgrims.

Menteith’s position in the diocese of Dunblane has been outlined above (p.22-3) of this thesis. Within the diocese of Dunblane there were at least thirty-seven parishes before the Protestant Reformation of 1560. Of these, perhaps only between nine and twelve were in the
deanery of Menteith, reflecting the greater wealth and pre-eminence of Strathearn. The Menteith parishes were: **Aberfoyle, Callander, Dunblane, Kilmadock, Kilmahog, Kincardine, Kippen, Leny, and Port-of-Menteith**. It is possible that Logie STL, Tillicoultry CLA, and Tullibody CLA may also have been in the deanery, but there is no information regarding the composition of the Dunblane deaneries.\(^{108}\)

The existence of an early church at Dunblane is indicated by three factors. First, and most visible, is the square tower incorporated into the south aisle of the cathedral. This was originally a free standing tower built in the 12\(^{\text{th}}\) century (Fawcett 2002, 70),\(^{109}\) although there seems to have been a building attached to the north side (Hughes 1933, 16), where there is a raggle for a roof etched into the tower.\(^{110}\) The cathedral itself was mostly built after 1237 (Fawcett 2002, 35), but the tower was incorporated into it, despite sitting at an angle which is out of harmony with the rest of the building. It seems probable that if there was any significant group of clergy at Dunblane they may have been members of the Céli Dé, or at least influenced by them (Donaldson 1985, 5), although ‘their presence cannot be authenticated’ (Cowan and Easson 1976, 204). We know there was a group of these monks at Muthill (MacQuarrie 1992, 128). Muthill also had a square tower which has been dated to the 12\(^{\text{th}}\) century (Fawcett 2002, 72), indicating that, like Dunblane, it was also an important church. The second factor in determining an early church at Dunblane is the existence within the cathedral of an early medieval cross carved in relief on one side of a stone slab with a ‘confused’ scene on the reverse, with a figure on a horse and a ‘free standing cross of the Irish Type’ (Ritchie and Breeze 1991, 27). The cross has Pictish features, but its peculiar pattern

\(^{108}\) Neither Cowan (1967) nor McNeill and MacQueen (1996) give the deaneries of Dunblane diocese, unlike, for example, the diocese of St Andrews, and it is not possible to be sure at this point whether Logie, Tullibody and Tillicoultry actually were in the deanery of Menteith.

\(^{109}\) But see also MacQuarrie (1992, 128) where he says the tower may be of an 11\(^{\text{th}}\) century date, and Driscoll (2002, 47) who suggests a date of ‘around 1100’. Fawcett based his dating on the Romanesque features of the arches in the windows in the belfry and the door on the north-side of the tower (Fawcett 1997, 20). He dates the tower at Muthill to a similar date based also on the romanesque features of the windows in the belfry.

\(^{110}\) My thanks to Mhairi-Claire Semple for information regarding the tower at Dunblane. For greater discussion on the early medieval tower at Dunblane, see Semple (2009, especially Chapter 5)
may indicate a Gaelic influence (Driscoll 2002, 47). The third factor is the place-name Dunblane itself. It is in the *Chronicles of the Kings of Alba as Dulblaan*,111 and the context is an attack on Dunblane by the Britons in the second quarter of the 9th C (Britanni autem concremauerunt Dulblaan ‘also the Britons burned Dunblane’) (Anderson 1980, 250; ES i, 288; Woolf 2007a, 194), showing that Dunblane was already a significant place (Maquarrie 2001, 112). Dunblane is also found in the later notes added to *Félire Óengusso Céli Dé as ‘Dul Blaan a primhchathair’*112 composed in the 12th C (Stokes 1905, 184-5). These early forms contain Pictish or British *dul* or *dol* ‘haugh, ‘water-meadow’, which often combine with saints’ names, perhaps meaning that the produce of a water-meadow containing a saint’s dedication may have gone to the upkeep of a church devoted to that saint. The *dul/*dol in this case may be the flat land immediately west across the Allan Water from the cathedral, or perhaps on the eastern side of the river, just to the south of the cathedral. There is no record of the generic dùn ‘fort’ until 1161 when it is Dunblain (RRS i, no. 182), although in a 14th C copy of an English manuscript113 dating to 1155 it is Dubblan (Cockburn 1938, 15). The specific element is the saint’s name Bláán. This obscure saint is supposed to have founded a bishopric at Kingarth on Bute (Yorke 2006, 115). Nothing is known of him beyond the legends described in Forbes (*Kalendars*, 280), MacKinlay (1914, 111-13), and Macquarrie (2001), and taken mainly or wholly from the *Aberdeen Breviary*, but these need not concern us here. Clancy has put forward the idea that the Bláán dedication at Dunblane is part of a movement eastwards of the cults of Cowal saints in the 8th C as Gaelic speakers moved out of their Dál Riata heartlands and into Pictish and British territories (Clancy 2004, 140; Woolf 2007a, 102, 116). Macquarrie, however, adds that the importance of Bláán’s cult may not have been prominent in Strathearn and Menteith until the 12th C (Macquarrie 2001, 113).

111 ‘perhaps altered to Dulblain’ (Anderson 1980, 250 footnote 128).
112 *Primhchathair* is translated by Stokes as ‘chief monastery’.
113 British Museum Cottonian Manuscripts, Cleopatra C IV. The document is a Papal Bull by Adrian IV to the bishops of Scotland in 1155. It is also printed in Hadden and Stubbs, *Councils*, vol. ii, pt 1, 231-2, but they have the bishop of Dunblane as La (for Laurence), not M. as Cockburn (1938), Somerville (1982, 40-1), and Fasti (Watt and Murray) have.
The ecclesiastical focus of Menteith was undoubtedly the priory at Inchmahome. The priory was founded around 1238 by Walter Comyn, earl of Menteith, possibly due to the settlement between Comyn and Bishop Clement of Dunblane over rights in a number of Menteith churches (Inchaffray Liber xxix-xxxii; Young 2005, 75). However, a reason more sympathetic to Comyn might emphasise the fact that in the 13th C founding a monastic house was an indication of his piety. There are other examples in Scotland of magnates founding religious houses, including Inchaffray by Gilbert, earl of Strathearn in 1200. Another reason why Comyn might want to found a monastery in his new earldom might be because he ‘wanted that symbol of territorial stability – a religious house where [he] would be honoured as founder and patron’ (Southern 1970, 244). Tied into this territoriality, and pertinent in the case of someone from an immigrant family taking over a ‘native’ earldom, was the belief that God might be able to help defend ‘a weak title to land’ (Davis 1998, 253). The architectural history of Inchmahome Priory has been surveyed by MacGibbon and Ross (1896), Gifford and Walker (2002, 537-40), and Fawcett (1994 and 2002). For the Augustinians the island of Inchmahome made an ideal retreat from the secular world while remaining near centres of population which enabled the priory to be in close proximity to those to whom it offered pastoral care, and to its source of wealth, i.e. the land and the people who worked upon it. There was a religious structure of some kind, perhaps a parish church (Cowan and Easson 1976, 91), on Inchmahome before the foundation of the priory in 1238. In 1189 x 1198, Malcolm, parson of Inchmahome (Malcolmo persona de Insula Macholem) witnessed a charter of Cambuskenneth (Camb. Reg. no. 122). Hutchison (1899, 133) states that there was a ‘Culdee settlement’ on the island before the Augustinians built their priory, but there is no medieval evidence for this. Hutchison, however, was writing in an age when any group of clerics not of the reformed orders tended to be labelled ‘Celtic’ or ‘Culdee’. What is not clear is

114 MacGibbon and Ross state that the church at Inchmahome bears a ‘striking resemblance to Dunblane Cathedral’, but on a smaller scale (1896 vol. ii, 115).
115 In Camb. Reg. the date of this charter is 1210, but Gilbert Márkus has recently dated it to 1189 x 1198.
whether Malcolm the parson was the only cleric on Inchmahome at this time or whether he
was part of a group of clerics like the personae mentioned in the Augustinian's Account of the
St Andrews Foundation Legend (Taylor, PNF iii, 602, 608).

The combination of island and religious house has parallels elsewhere in Scotland, for example, Iona, Inchcolm, Isle of May, Isle of Loch Tay priory, and most notably at St Serf’s Island in Loch Leven where a Céli Dé establishment was taken over by Augustinians from St Andrews (Veitch 1999). Nevertheless, while there are certain similarities between places such as Lochleven Priory and St Andrews regarding the combination of Céli Dé, personae, and Augustinians, the evidence for this combination at Inchmahome is at best only circumstantial as well as being analogical.

The name Inchmahome commemorates an early medieval saint. It had been thought by modern writers that the island and the church on it were named after St Colmán of Druim Mór (Drumore) in County Down (Forbes, Kalendars, 304-5; MacKinlay 1904, 298-9; MacKinlay 1914, 93; Watson 1926, 279). These writers may have based their knowledge on the Aberdeen Breviary and the Martyrology of Aberdeen, liturgical books dating from the 16th C. In the Aberdeen Breviary it is written:

‘...in cuius eciam honore monasterium quod Inchemaholoch dicitur Dunblenensis dioceses solenniter est (...in his [Colmán's] honour the monastery of Inchmahome, in the diocese of Dunblane was solemnly dedicated)’ (Aberdeen Breviarium fol.cii).

The Martyrology of Aberdeen states:

‘vij. Idus Junij.—In Scotia Sancti Colmoci episcopi et confessoris apud Inchmahomo – sepultus de quo in insula monasterium canonicerum regulare vita patrocinante Colmoco Deo famulium vbi tanto iocundius celebrantur sua natalicia quanto salubrius claruerunt eius miracula (In Scotland (the feast) of St Colman bishop and confessor buried at Inchmahome; in the island there is regular monastery of canons

116 Rogers (1997, 77-9) discusses this problem of the definition of persona, and states that ‘it seems that persona or parson was adopted into Scottish legal terminology [in the 12th C] only with the precise meaning of parish priest...’. Taylor (2009, 608, n. 336) discusses more recent thinking.
serving God under the patronage of this Colmocus, where the more agreeably his birthday is celebrated, the more beneficially his miracles will shine’ (Aberdeen Martyrology in Laing 1854-7, 264).

As well as being dedicated to saints (and objects) culted locally, e.g. Inchcolm and Columba, St Andrews and Andrew, and the Holy Rood or Cross at Holyrood, an Augustinian establishment was usually dedicated to either Christ, Mary or the Apostles, and Inchmahome, like Cambuskenneth is dedicated to Mary. I have found no written evidence for a Mary dedication for Inchmahome, but a drawing of the seal of the priory shows Mary with the infant Jesus on her knee (MacGregor Stirling 1815, 111; Hutchison 1899, 131; MacKinlay 1910, 161). It was not unusual for Mary to be associated with another saint at Scottish monastic houses; she was, for example, paired with Cuthbert at Coldingham and Machutus at Lesmahagow (Hammond 2010). In the later Middle Ages at least the Augustinian priory was also dedicated to Colmán, which indicates that the Augustinians wished to commemorate the saint they saw as the founder of the original religious establishment on the island. The seal mentioned above also shows the figure of a bishop, which is probably meant to represent St Colmán. In reality, however, the allegiance to Colmán is actually evidence of a late dedication, as it post-dates the foundation of the priory in c.1238. Indeed, the Bollandist scholar, Paul Grosjean, called it ‘une inventione médiévale’ (Grosjean 1961, 345), and Ronald Black believes that it was ‘unlikely that popular tradition distinguished Colmán from St Columba’ (Black 2000, 19), although Herbert believes Colmán is the ‘likeliest candidate for patron of Inchmahome’ (Herbert 2008, 263).

St Colmán was founder and bishop of the see of Druim Mór possibly in the fifth C (Muhr 1996, 104), although according to a Life of Colmán composed in the 12th-13th C, he was a contemporary of St Patrick, Colum Cille, and a teacher of St David of Wales (Herbert 2008, 255). There is no link with Scotland in the Life (Grosjean 1961, 344; Herbert 2008).

My grateful thanks to Dr Simon Taylor for his help with this translation.
Colmán connection seems to come through the influence of St Malachy, the 12th C Irish reformer (Barrow 2001, 163-5; Duncan 1975, 150). Malachy, bishop of Down, the diocese where Druim Mór is located, and a papal legate (Herbert 2008, 258), had visited the Augustinian abbey of Arrouaise, and then David I at Carlisle on his journey back to Ireland from Rome in 1140. It is surely significant that shortly afterwards David founded an Augustinian house based on the Arrouaise model at Cambuskenneth. It is possible that Cambuskenneth, the nearest Augustinian house to Inchmahome, was the source of clergy to populate Inchmahome, and from the monastery near Stirling came the idea that Colmán of Druim Mór was the saint behind Inchmahome (Herbert 2008, 261).

If the original dedication is not Colmán of Druim Mór, then who is the saint behind Inchmahome? Simon Taylor has argued cogently that the saint in question is probably St Columba (Taylor 2000, 114). There are several Columba dedications on the route from Iona to Lindisfarne, and one of these, Taylor suggests, is Inchmahome, the ‘island of Mo-Cholmóc’ (Taylor 2000, 114-5). What seems to have happened is that the Augustinians had arrived at a place with a saint embedded in its name, and perhaps not being entirely sure who it was, consulted with their Irish counterparts who suggested Colmán of Druim Mór based on evidence from their calendars of saints (Herbert 2008, 262-3).

This is a good opportunity to debunk a myth which still has currency today. In 1815 William MacGregor Stirling, minister of Port-of-Menteith, wrote he had been ‘informed by good authorities’ that Inchmahome ‘signifies Isle of Rest’ (MacGregor Stirling 1815, 32). He added ‘this etymology,118 harmonising so well with monastic retirement, the writer has, by

---

118 In a footnote he states ‘the Gaelic, in which the t is quiescent, is Inschemathamhe’. It is worth writing fully his comments from later in his book regarding the name Inchmahome. ‘Insche-ma-chame, or Innis-mo-thamh, ‘Isle of my Rest’ was probably the name in pagan times. We may account for the subsequent change to Inchmahome, or Inchmahomo, by supposing it a Latinised and monkish corruption of the original Gaelic. Or say, it is a corruption of Saint Colmock, which might have been translated, ma, ‘good’ and chamhe, ‘Colmocus’; we may admit the possibility of a corruptive coalition of the pagan and Christian, the Gaelic and the Latin names. It seems impossible to say which of them might, or might not, by the negligence of a Saxon scribe, have been transformed into Inchmaquomock [sic]. [The writer] not being a Gaelic scholar, he submits to the foregoing conjectures with due diffidence. They may be so far useful, should they lead to discussion among competent judges’ (MacGregor Stirling 1815, 119-20).
poetic licence, availed himself’ (ibid.). What is most interesting regarding the meaning ‘Isle of Rest’ is that while toponymists such as MacKinlay, Watson, and Taylor do not mention or consider this derivation, and thereby implicitly reject it, the current official guide to the priory produced by Historic Scotland mentions it three times within its 32 pages (Carver 2003, 3, 17, 19). The irony is that MacGregor Stirling retracted this dubious derivation himself in the early 19th C. Hutcheson (1899, 76-7) states that:

Mr. M’Gregor Stirling himself eventually gave up his cherished derivation from *Innis-mo-thamb*, and with it, of course, the poetical interpretation *Isle of my Rest*. In a manuscript addition to his *Notes on Inchmahome* he says, ‘This etymology [*Innis-mo-thamb*] must give way to Isle of St. Columba, or St. Cholmoc.’

MacGregor Stirling confirms this in a report which became the basis for NSA for PMH, writing ‘[t]he island of St Columba, as *Inch-ma-home* is supposed to signify…’ (NSA x, 1097). Only once in the current Historic Scotland guide is there a reference that the island priory may be dedicated to a saint, St Colmán (Carver 2003, 17). If place-names are to be taken seriously by members of the public and others interested in history, then toponymists need to try and ensure the guardians of Scotland’s heritage do not mislead the public with what is nothing more than spurious romanticism.

There were apparently four chapels attached to the priory (NSA x, 1105; Hutchison 1899, 141; Carver 2003, 19): at *Inchie* PMH (NS592999), where there is a chapel marked on the 1st edn OS map; *Arnchly* PMH (now lost, but was at NS554998), might have as its specific ScG *caibeal làraich* ‘ruined chapel’. It is 300 m N of

p.17 ‘THE STORY OF INCHMAHOME: The Isle of Rest’.  
p.19 ‘Known also as the ‘Isle of Rest...’

120 MacGregor Stirling was not convinced about the Columba dedication being Columba of Iona, but rather he thought it was ‘A saint of the name of Columba, and whose birth was English and noble, is mentioned by Fordun as having been buried at Dunblane about the year 1000 A.D. (Scotichronicon, sub anno 1295)’ (Hutchison 1899, 77).  
121 MacGregor Stirling died in 1833 (Fasti iv, 360).
Dalmary DRY, *dail Màiri* 'haughland of (St) Mary', and 400m W of Arns DRY, derived from ScG *earrann* 'portion, share, division', which, as we have seen above (p.160), may have been lands belonging to **Inchmahome**. The other chapel was Chapel of **Boquhapple** KRD, KMA (NN655005). **Boquhapple** is said to be 'house [or *toun*] of the chapel' (*NSA* x, 1105; Hutchison 1899, 141; MacKay 2003, 24), but as we have already noted above (p. 104), ScG *both chapaill* (earlier *both chapuill*) 'hut, sheiling of the horse/mare' is to be preferred. This is not to say that there was no chapel of **Inchmahome** at **Boquhapple**, or indeed at the other three places mentioned above, but I have been unable to find references to them as chapels in medieval texts. The lands that owed rental to **Inchmahome** can be seen from a feu-rental dating from 1646 (Fraser, *Menteith* ii, 368). This rental shows twenty-nine places, most of which are situated to the SE of the priory in what became the barony of **Cardross**. After the monastery was built the parish church was then moved to the hamlet of **Port-of-Menteith**, where its successor still stands.

The parish churches were the bedrock of the Church in Menteith, as they were throughout Christendom. There are six parishes in Menteith today – AFE, CLD, KMA, KRD, KPN, and PMH, while in the Middle Ages there were also the parishes of **Leny** and **Kilmahog**, both of which were united with CLD in the first quarter of the 17th C. It is not intended here to give a full history of all these churches, for we are more concerned with the place-names of an ecclesiastical nature in each parish. However, as a brief outline we should note when each parish church comes on record.

**Aberfoyle** is said to have been a monastery of Berach (of whom see p.156-7 below) in a 11th/13th C *Life of Berach* (Plummer 1922, vol. i, 35). The church, which sits next to the Pow Burn, 500 m S of the present day village of **Aberfoyle**, is first noted in 1260 (Fraser, *Menteith* ii, 213). The parsonage was a prebend of Dunblane Cathedral by 1500 (*RSS* i no. 595; Cowan 1967, 3), and may have been appropriated to **Inchmahome** at a date unknown (*Fasti* iv, 334).
The church of Callander was given to Bishop Clement of Dunblane as a mensal church for the cathedral by Walter Comyn, earl of Menteith, in 1238 (McGregor Stirling 1815, 113-6; Inchaffray Liber, xxxii; Fraser, Menteith ii, no. 74; Cockburn 1959, 52). The medieval church of Callander stood near the mound marked on the current OS Explorer map as Tom ma Chisaig ‘mound of my Kessog’ at the northern end of the bridge of Callander. In 1771, despite wishing to 'have the stance of the Kirk continued in the present Kirkyard', the parishioners saw their church moved to the centre of modern day Callander (Thompson 1985, 18). Callander came to include the much smaller parishes of Kilmahog and Leny, both of which are discussed below. It is notable that Callander is not mentioned in Bagimond, while Kilmahog is (Bagimond' Roll (Dunlop), 54, 71), which might suggest that Kilmahog was the principal church in this area. CLD is the largest parish in Menteith stretching from the watershed between Loch Lomond and Loch Katrine in the west to Uamh Bheag in the east, a distance of 35 km. It is also 13.5 km wide at its widest. Yet the three medieval parish churches of CLD, LXY, and KXM were within 2 km of each other at the eastern end of CLD near the modern town of Callander. This may have much to do with density of population, itself influenced by geography.122

First on record in Bagimond in 1274 as Kylmadoc (Bagimond' Roll (Dunlop), 53, 72), the remains of the old church of Kilmadow are situated on a bluff above the confluence of the Annat Burn with the River Teith (NN706025). The church remained at the junction of the River Teith and Annat Burn until 1756, when a new church was built in Doune. The church was appropriated to Inchmahome before 1429 when the vicar's teinds were appropriated to the chancellorship of Dunblane Cathedral (CSSR iii, 16; Cowan 1967, 102-3; Cockburn 1959, 52). The parish boundary of Kilmadow underwent a dramatic change in the south in 1891 in

122 For a similar situation, see parish maps of Kilmorack and Kiltarlity INV in Crawford and Taylor (2003).
order to make a unified parish of **Kincardine** which had previously been split into two parts (Shennan 1892).

**Kincardine** first comes on record in 1189 x 1195 when it was appropriated to Cambuskenneth Abbey as gift of the king (*RRS* ii, no. 371). The modern church, built in 1814-16 (Gifford and Walker 2002, 238), is situated 200 m NW of a graveyard at NS721987. This graveyard is the resting place of the Muschets who first came to the area in reign of William I (*RRS* ii, no. 334), and is probably the site of the original church. It has been speculated recently that the burial enclosures in the churchyard today may contain the remains of the medieval nave and chancel (Oram and Fawcett 2008, KRD). The parish of **Kincardine** consisted of two parts prior to 1891. KMA reached the River Forth leaving the main, or eastern, part of **Kincardine**, centred on the parish church and **Blair Drummond**, separate from the western part, centred on **Boquhapple**, and later, **Thornhill**. At **Boquhapple** there was seemingly a chapel of **Inchmahome** (Hutchison 1899, 141). In 1891, KRD was joined together by transferring a portion of KMA to KRD. At the Reformation the manse and glebe extended to ‘aucht accres in toft and croft’, while the roof ‘in the midis betuix the body of the kirk and the queir has ane faltie cuple and the thaking unclosit above the samin’ (Kirk 1984, 36).

The church of **Kippen** was thought to have been the ancient burial grounds of the indigenous earls of Menteith (*Camb. Reg. cxxix*; Hutchison 1899, 123). This may go some way to explaining why the parish was in Menteith, although as we have seen above (p.117), it may be that **Kippen** was assigned to the earldom to supplement the arable land, which, given the upland and boggy nature of much of the earldom, must have been in short supply. When it came into the possession of the earls of Menteith remains unknown. The location of the original church is puzzling. It may have been, as local tradition states, on the Keir Hill of **Dasher** at NS653951 (Begg 2000, 29), or it may have been where the ruins of the pre-
Reformation church stand c.300 m SE (Oram and Facwcett 2008, KPN). This keir may have been the *ceapan* ‘small lump or hill’ from which the church, parish, and village took their name (see Kippen KPN for details). The church of *Kippen* was granted to the bishop of Dunblane by Walter Comyn, earl of Menteith as a prebend of Dunblane Cathedral in 1238 (Cowan 1967, 116; *Inchaffray Liber*, xxix – xxxii), although the earl retained the rights to patronage (*RMS* ii no. 2306). However, the church became the cause of a dispute between the cathedral and Cambuskenneth Abbey when in c.1286 Walter Stewart, successor to Comyn as earl of Menteith, granted the patronage and church to the abbey (Oram and Fawcett 2008, KPN). That there was a dispute is perhaps not too surprising, since while not a rich benefice, the church of *Kippen* was worth 3 merks when Bagimond visited in 1275, which compares with 2 merks for *Kilmadock*, 20 shillings for *Kilmahog*, and 2 pennies for Tulliallan, all in the same diocese of Dunblane (Bagimond’ Roll (Dunlop), 53-4). By the Reformation the church was ‘ruinus in wallis, ruff and thak’, and a ‘masoun, a wrycht and a sklattar’ were to be brought in to repair it (Kirk 1984, 10). Further repairs were done in the 17th and 18th C, before a new church was built in 1823-7.

After the priory of *Inchmahome* was built the location of the parish church of the area which appears to have stood on the island was moved to the hamlet of *Port-of-Menteith*, where its successor still stands. The parish church had been moved to Port by the mid-15th C, when there is a reference to the church of ‘Port’ (*CSSR* v no. 1158). The kirk was still annexed to the priory at the Reformation (Kirk 1995, 544, 548). By then the fabric of the kirk had ‘altogether decayit’, and the elders had to promise to ‘appoint craftismen for repairing off the kirk in ruff and thakk’ (Kirk 1984, 11-12).

In Menteith there are three notable early church elements: *cill*, *annat*, and *eccles*. Indeed, KMA has all three within 4km of each other, which surely demands an attempt at an explanation. Many early church- or parish-names contain the names of saints as their

---

123 See also RCAHMS Canmore NMRS No. NS69NE 1 and 2 for details.
specifics, while other parish churches which do not contain ecclesiastical-elements as part of
to saints. Where an early church-name
attached that saint will be discussed here. All other saints will be
discussed under saints cults below. We will deal here with the element *cill* first. There are two
places in Menteith containing this element: *Kilmadock* (KMA) and *Kilmahog* (KXM), with
another, Kilbryde (KRX), just over the border from KMA in DLE. All three were parish centres
in the medieval period. Only one – KMA – has survived as a parish into the modern era.
Nearby, in Lennox, are two other *cill*-names, Killearn STL and Kilmaronock DNB, both
parishes. It is thought that these belong to a group of early Gaelic church-names found in
many parts of Scotland, although more often in the west. *Cill* is the dative-locative of OG *cell*,
Deriving from the Latin *cella*, meaning ‘cell, church’. The exact dating of their
foundation is
not clear, but Simon Taylor has said that there is evidence for *cill*-names in eastern Scotland
‘by the mid-eighth century’ (Taylor 1998, 3), although we should be clear that the date of a
church’s foundation and the acquisition of its name need not always be the same.

Kilbryde (KRX) was not in Menteith in the Middle Ages, but was part of the lands of the
Graham earls (1427-1694) through their ancestral Strathearn connection and so will be
considered briefly here.124 KRX was included in the deanery of Strathearn of Dunblane
diocese. KRX commemorates St Bridget. Watson states that the original saint, Bridget of
Kildare, who died in Ireland in the first half of the sixth century, was so popular that at least
fifteen other saints took her name (Watson 1926, 161). The ancient church of Abernethy, also
in Dunblane diocese, was apparently dedicated to St Brigid of Kildare (*ES* i, cxx-cxxi),
although she developed the profile of St Brigid of Abernethy. What we are probably seeing in
Kilbryde is a local manifestation of the cult of Brigid of Kildare. KRX comes on record c.1211,
when Malise, parson of Kilbryde witnessed a charter by Bishop Abraham of Dunblane

---

124 James I took the earldom of Strathearn from Malise Graham and gave him part of Menteith in 1427. See Chapter
4 for details.
(Inchaffray Chrs, no. 31), but the church was granted to Inchaffray Abbey, before 1219 when the grant was confirmed by Gilbert, Earl of Strathearn (Inchaffray Chrs, no. 39; Rogers 1992, 348-9). The remains of the church are located at NN756028, on the east bank of the Ardoch Burn. The parish was united with DXE before it could be mapped by the surveyors of the Improvement period of the late 18th C, and consequently it is now difficult to reconstruct with any accuracy. The parish was a barony until at least the seventeenth century,\footnote{NAS GD49/232 dated 1632; NAS GD22/3/637 dated 1644.} and the lands of the barony may give us a clue as to the extent of the parish. When purchased by John Stirling in 1662, the barony included the modern farms of Nether Glastry (NN748044), Dalbrack (NN743051), Grainston (Grayngetoun in 1662 NN758033), and chapel-lands of Bowtoun\footnote{See Retours, Perthshire no. 905, dated 1680, ‘terris ecclesiastics vocatis Boutoune de Kilbryde, infra diocesin de Dumblane’. Bowtoun is shown on Stobie at approx. NN758027.} (Barty 1994, 134).\footnote{See also Rogers (1992, 349) where he has some of these lands from Barty’s 1944 version of the History of Dunblane.} This estate straddles the Ardoch Burn, and lies to the west of a slight watershed which separates the burn, which drains into the Teith, from Strathallan and the parish of Dunblane (Rogers 1992, 349). The western border of the parish with KMA was formed by Alt na Criche ‘burn of the boundary’. It may be that the Ardoch Burn is a dabhach name, i.e. \textit{ard-dabhach}, ‘high dabhach’, and this unit of land with its old church of St Brigid was ‘a significantly distinct unit to be established as a parish’ (Rogers 1992, 349). However, this would make Ardoch the only dabhach-name in Menteith, and perhaps \textit{àrdach} ‘high place’, might provide a more satisfactory explanation. Whereas many parishes in Scotland were formed from a number of baronies, Kilbryde is an example of a single barony parish.\footnote{Alexander Grant (1984, 65 and 124) wrote that many baronies corresponded to, or were roughly equivalent to, parishes, and while that may be true of some parts of Scotland, this was not the norm in Menteith, where most parishes are made up of multiple baronies.} Kilbryde was incorporated into DXE in 1618 because the teinds were insufficient to support a minister (Barty 1994, 82).

One of the two \textit{cill}-names in Menteith proper is \textbf{Kilmahog}. Earlier place-name scholars have said this is \textit{Cill Mo-Chug}; a church dedicated to St Cug (MacKinlay 1904, 111; MacKinlay 125 NAS GD49/232 dated 1632; NAS GD22/3/637 dated 1644.

\footnote{NAS GD49/232 dated 1632; NAS GD22/3/637 dated 1644.}

\footnote{See Retours, Perthshire no. 905, dated 1680, ‘terris ecclesiastics vocatis Boutoune de Kilbryde, infra diocesin de Dumblane’. Bowtoun is shown on Stobie at approx. NN758027.}

\footnote{See also Rogers (1992, 349) where he has some of these lands from Barty’s 1944 version of the History of Dunblane.}

\footnote{Alexander Grant (1984, 65 and 124) wrote that many baronies corresponded to, or were roughly equivalent to, parishes, and while that may be true of some parts of Scotland, this was not the norm in Menteith, where most parishes are made up of multiple baronies.}
1914, 502; Watson 1926, 315). Their belief was that Cug is possibly Cuaca from Meath in Ireland. Her name is found in Kilcock, County Kildare, and in Kilquhochadale, Kirkcowan parish, WIG [Kyrcekok (Holyrood Liber no. 69) in the reign of Alexander II (1214-49); Watson 1926, 167]. The fair day of Kilmahog was 15th November (NAS. PA2/29, f.115v-116), which is problematic for Watson and MacKinlay’s identification of the saint: Cuaca’s day is apparently 8th January (Watson 1926, 167); 15th November is Machutus’ day. In a document dating to 1669, we are told that ‘upon the fifteenth day of November called St Mahans day, which was of old keeppt at the kirk of Kilmahong’ (NAS. PA2/29, f.115v-116). Basing his information on the date, the modern editor of this text on the Records of the Parliaments of Scotland website identifies St Mahan with Machutus. If Machutus was the patron saint of Kilmahog, then we may be seeing the dedication of a British saint, who was identified as the saint in Lesmahago LAN, by the monks of Kelso Abbey (Taylor 2009a, 71-2; Watson 1926, 197). There is a possibility he could also be the saint in Loch Mahaick KMA, although what connections, if any, there were between Loch Mahaick and Kilmahog are unknown. The Machutus connection in this area might be strengthened by the fact that an island in Loch Ard AFE is apparently named after St Mallo; Machutus is the Latin form of the name, most famously found in Brittany as St Mâlo. (Geog. Coll. i, 343).

Kilmahog first comes on record in 1259 (CPL i, 367; Fasti iv, 339) as a mensal church of the bishop of Dunblane (Cockburn 1959, 20, 70). The church does not appear on record again until 1494. Note that the identification with ecclesia De Sancto Maghot and ecclesia De Sancti Mathoco in Bagimond (Bagimond’ Roll (Dunlop), 54, 71) for Kilmahog is a mistake by Dunlop; these forms belong to St Madoes, east of Perth (Taylor 2005, 15). Like Kilbryde, the territory of Kilmahog is difficult to define with any accuracy (see Map 15). However, there are at least two documents that give some indication as to the extent of the parish. In a charter of 1572, Donald Dewar held the lands of Garrindewar in dominio de Stogartnay (RMS

129 Also RPS ref. 1669/10/151
iv, no. 2092; Márkus 2009, 125, 139-40). The same charter tells us that the Dewars of Kilmahog performed a ceremonial function in ringing a bell before the dead within the parish of Kilmahog in the time before the Reformation.\textsuperscript{130} The whereabouts of Garrindewar are seen on a plan made by John Leslie, a surveyor for the Annexed Estates in 1775, who shows Gartenjore in the lands of Portnellan on the northern shores of Loch Venachar at approx. NN585065.\textsuperscript{131} Both Garrindewar and Gartenjore are forms of ScG *Gart an Dèoraidh ‘enclosed field or settlement of the relic-keeper’. Another charter dating to 1620 shows that other lands in KXM included Landrick (NN549064), Offrance # (NN542060), and Choischambie # (NN546062), all given as being ‘in parochia de Kilmahwag’ (RMS viii, no. 172).\textsuperscript{132} These townships are shown as being at the western end of Loch Venachar, but since Kilmahog and Gartenjore were at the eastern end of the loch, it may be that the parish of Kilmahog consisted of the lands on the northern shore of Loch Venachar. There is an ambiguity here, however, since an Annexed Estate plan of 1775 shows that some of the lands, including Milton of Callander CLD and Blairgarry CLD along the northern shore belonged at that time to the Earl of Moray, whose lands were not forfeited after the rebellion of 1745. It seems these lands had been divided in the later medieval period, since they were all grouped together within the barony of Strathgartney in the Rentalia Domini Regis. But it may be that Kilmahog was a fragmented parish, and included those lands, ranging from Bochastle CLD in the east to Duncraggan CLD in the west, along the northern shore of Loch Venachar that later belonged to the earl of Perth and which were forfeited after 1745. It is not known exactly when Kilmahog was subsumed into CLD, but it may have been as late as the first quarter of the 17\textsuperscript{th} century. One source (Fasti iv, 339) states Kilmahog was united with Callander in the

\textsuperscript{130} The text of which reads: ‘que olim pro pulsatione unius campane coram mortuis personis infra parochiam de Kilmahug tempore papismatis fundate erant, ([the lands of Garrindewar were] founded for the ringing of a bell before dead people in the parish of Kilmahog in the time of papistry...’ Márkus 2009a, 139-40). This document is also in NAS as GD112/76/30.

\textsuperscript{131} NAS E777/313 pp.176-177.

\textsuperscript{132} The relevant part of the text of the charter reads ‘annuum redditum 300 merc. de terris de Lanerk (per Pat. Fergusson alias Murdochesone occupatis), Offrance (per Arch. M’Claren occupat.), et Choischambie (per Jo. M’Kerres et Jo. Buchannane alias Leany occupatis), in parochia de Kilmahwag, senesc. de Menteith, vic. de Perth’.
16th century, and it was certainly still an independent parish in 1572, and possibly in 1593 (RPC v, 41). However, it may also be the case that the parish was still in existence in 1620 as ‘parochia de Kilmahw’ (RMS viii, no. 172).

The parish of Kilmadock has, as has been noted, the distinction of having three early church place-name elements – cill, annaid, and *eccles. Kilmadock may be named after St Cadoc or Docus of Llancaervan or Dogwin of Llandough. The saint being commemorated here is probably a British saint from the sixth or seventh century (Brooke 1963, 298; Watson 1926, 327; Watson 1927). The name Kilmadock means ‘church of my Doc’, the ma, from mo, being an honorific prefix. MacKinlay thought the church could have been dedicated to St Aedh, who was ‘better known perhaps under his honorific disguise as St Madoc or St Modoc’ (MacKinlay 1914, 147). The old church is marked St Aedh’s Church on the current 1:25,000 OS Explorer map. Watson disputes this dedication, saying that in this case it would have been M’Aedoc, which is stressed on the first syllable rather than on the second like Madoc (Watson 1926, 327). It is notable that the church is simply marked as ‘Kilmadock Church (ruins of)’ on the 1st edn OS map of 1863. MacKinlay does seem to accept that Docus is the saint in his earlier book (1904, 114). The confusion may have arisen due to the fair day of Kilmadock. An Act of Parliament in 1669 allowed the earl of Moray, the main landholder in the parish, to change the fair days of Kilmadock and Kilmahog. In Kilmadock, the fair had been held on the feast day of St Mittans, which was 31st January (NAS. PA2/29, f.115v-116). Cadoc’s feast day was 24th January (Watson 1927, 12). 31st January was the feast day of Aed of Ferns, an Irish saint, and it is possible that St Mittans could be a ‘garbled hypocorism’ for Mo-Aedoc (Márkus pers. comm.). What may have happened is that Kilmadock was originally dedicated to Docus the Briton, but as with Columba at Inchmahome, people had lost sight of the original commemoration by the later middle ages. It may be that as they cast around for an

133 ‘The Port, Callenteich, Kilmahuig, Lany, Abirfull’ are all mentioned as parishes on 1st Feb 1593 in a commission to Earl of Argyle to command the ‘McGregours and Stewartis of Baquhidder and divers utheris brokin men of the Hielands’ to appear before him to answer various charges of violence and general lawlessness.
explanation as to who the saint was in **Kilmadock**, Maedoc, and the nearness of his feast day, was sufficient for him to be commemorated in the parish.\textsuperscript{134} It should be noted that Watson states that Cadog was the saint behind St Madoes PER (Watson 1926, 327), but the stress, which is on the *Mae*, rather than the –*dock* of **Kilmadock**, makes it unlikely. There was a chapel at Lanrick, implied by the *Chapelland* mentioned in 1509 (*RMS* ii no. 3347). It was cited as a chapel of the ‘ancient monastery of St Madocus, now called Kilmadock’ (*OSA* xx, 89). MacKay believed that this was one of six chapels attached to the ‘ancient monastery’ (MacKay 2003, 39).\textsuperscript{135}

Another indication of the cult of Cadoc or D Mogwin or similar, is the surname Doig. Deriving from *Gille Dog* ‘Servant of St Cadoc’ (Black 1946, 212), the name is first mentioned as Dog in 1463, when Walter Dog is named as Keeper of Doune Castle (*ER* vii, 189). This seems to be the same Walter who became Chamberlain of Menteith in 1467 (*ER* vii, 572). Sir Thomas Dog was prior of **Inchmahome** from 1469 to 1477 (*Glas. Mun. vol. ii, 76; Stirling Protocol Bk* (*Scot. Antiquary* x, 117, 140); Watt and Shead 2001, 109). Alexander Dog, canon of **Inchmahome**, resigned the lands of **Achnabana** (possibly *achadh na beannachd* ‘field of the blessing’) KMA in 1491, while by that date Wat Dogg had given his name (along with Wat Smyth) to Watston KMA (NAS, PA2/6, 1st part, f.28v). The name Dog or Doig is found throughout KMA in the Middle Ages and Early Modern period (see Black 1946, 212 for a summary).

Another early Gaelic ecclesiastical name in KMA is **Annet**, from *annaid*, OI *andóit*, often having the sense of ‘mother church’, but also a place where the relics of the patron saint of the parish were kept. It is unknown for an *annaid* to contain a saint’s dedication (MacDonald 1975, 137). We need not think of a name containing *annaid* as an early church site, but the element is an important indicator towards there being one in the surrounding district (Taylor

\textsuperscript{134} My grateful thanks to Gilbert Márkus for his assistance here.

\textsuperscript{135} The supposed other chapels were Annet, Torrie, Walton, Bridge of Teith, St Fillans within the castle, and Newton [i.e. St Fillans outwith the castle], but there is no medieval evidence to corroborate this statement.
Annaid place-names are generally in remote places, although in the case of Annet in Menteith that may simply be because we have been blinded by the modern road network. The fact that there were a number of townships in the vicinity (see discussion of Eglysdissentyn below) suggests that the area was not so isolated. It may be that the unclassified road from Burn of Cambus (NN704031) to Dalvorich (NN651067) was the main road before the military road from Stirling to Callander was built in the 18th century. Annet is on the lower gradual slopes of the Braes of Doune, only 3km NW of the site of the old church of Kilmadock. Marked on the 1st edn OS map almost half-way between Annet and the old church of Kilmadock is the Kirkton Knowe, a small rise containing a ‘chapel and graveyard’ (RCAHMS Canmore NMRS no. NN60SE 5). There may be a proprietorial quality concerning Annet (Clancy 1995, 102), in that it could be the lands that supported a nearby church, possibly Kilmadock, i.e. the old church. Although evidence for this site only dates to the early 16th C, it seems that annaid dates in other parts of Scotland from the 9th to 11th C (Clancy 1995, 111). Archaeological excavation of a long cist cemetery at Balnahalanait (baile na h-annaid ‘settlement of the annat’) on the northern side of Loch Tay has produced radiocarbon evidence dating to AD 640–780 (Lelong 2003, 7). However, it may be that the andóit in KMA was the old church at Kilmadock, and the Annet Burn, which flows past the church, was originally called *Allt na h-Annaide or some such (Watson 1926, 251). The name of the burn may then have been transferred to a settlement that appeared on the banks of the burn sometime later, although Watson maintains that the burn was named after the settlement (Watson 1927, 9).

The whole question of early church sites in KMA is complicated by the fact that there is another early church name nearby: Aiglestinston (Eglysdissentyn 1267). This place-name is now lost, but Roy appears to show it on the banks of the Annat Burn, north of the township of Annet (Roy 75). Barrow (1983, 12) tentatively places it in grid square NN6706, which appears to be around 2km too far west. But the place-names on Roy’s map show that Barrow
is indeed correct. What appears to be the Annet Burn on Roy is actually the Coillechat Burn, unless the townships have been placed alongside the wrong burn on the map. If we take the townships as reliable indicators of the whereabouts of Aiglesteinston, it was between Craigtoun\(^\text{136}\) and Ballachraggan KMA.\(^\text{137}\) Two other names appear on the course of the burn shown on Roy; Balkorist\(^\text{138}\) and Balcanich.\(^\text{139}\) Aiglesteinston would seem to be at approximately NN679058, or, perhaps it has been replaced by the name Drumloist\(^\text{140}\) or incorporated into the lands of that township. A confirmation charter of Alexander III in 1267 states that Broculy (Brackland CLD) had a border with Eglysdissentyn (Fraser, Mentieth ii, 217); this suggests that Aiglesteinston was a major estate, bigger than later mentions in the Exchequer Rolls, RMS and Retours imply. Between Brackland and Aiglesteinston are Balvorist and Ballachraggan. It may be that the lands of Aiglesteinston went up to the Sruth Geal 'white stream', the burn that now defines part of the western border between KMA and CLD.

\*Eccles, a 'Celtic coinage' meaning 'church' (Hough 2009), derives from the Latin ecclesia, 'church', and was borrowed into British (either the Cumbric or Pictish dialect of this probable border region; see p.49 above). The second part of the name perhaps contains the saint's name last or Iestyn, possibly a 4\(^\text{th}\) or 6\(^\text{th}\) C Welsh saint; Iestyn son of Geraint seemingly founded churches at Llaniestyn in Anglesay and Caernarvonshire (Smith and Wace 1877-87, vol. iii, 209). What possible connection he could have with Kilmadock is not known. In the place-name we may also have the possessive pronoun do, 'thy' (Barrow 1983, 7). The possessives mo and do are often interchangeable as can be seen in Mobhi and Dabhi, saints names based on the name Berchán (Butter 2007, 104, 114). Another possibility is that the

\(^\text{136}\) Now lost, but was at NN680054 (RCAHMS Canmore NN60 NE 42).
\(^\text{137}\) See e.g. ER ix, pp. 564, 597, 625, where Eglysdissentyn is mentioned with Balnegregane, i.e. Eglisdisdane et Banegregane.
\(^\text{138}\) Balvorist KMA.
\(^\text{139}\) Balmacansh KMA.
\(^\text{140}\) NN682061.
specific element is not last or Iestyn, but Brit. seintyn ‘little saint’ (see Woolf (2007b, 8) for discussion of this element in the name Constantín).

The early forms for Aiglesteinston are remarkable. The differences in these early forms led Geoffrey Barrow think to there were two *eccles names in the area (see Barrow 2003, 52, and survey for KMA), but from 1456 to c.1750, this place is intimately connected with Ballachraggan in the source material. Barrow only has one *eccles-name in this area in his 1983 article; he had obviously come to the conclusion, correctly in my view, that despite the myriad of differing early forms, these related to the same place. From 1267 to 1502 they follow a recognisable pattern similar to its earliest form, Eglysdissentyn, with a few minor deviations. However, once we reach 1528 the name changes and the specific becomes not -dissentyn, or similar, but -chechynauche. It continues much like this until 1677, and in c.1750 it is last mentioned as Aiglesteinston, having become more like its earlier forms once again. Quite what is happening here is not at all clear. It may be that another saint’s name, possibly Coinneach(?), had replaced Iestyn or seintyn, assuming of course the people of the area knew they were dealing with a ‘church’ element. There may be a tenuous naming connection here between Kilmadock and Aggischechynauche (the 1528 form), since in the Middle Ages it was believed, whether it was true or not, that Cadoc taught the Irish saint, Cainnech of Achadh Bó, at Llancarvan.

But why three early church terms in the one parish, and why so close to one another? It cannot be assumed that all three names were coined within reasonable concurrency. As well as being a ‘mother church’, annaid can also be a place in which a saint’s relics were kept (see DIL under andóit). This was thought to be the meaning of annaid in the late-nineteenth century: Duncan Campbell, author of The Book of Garth and Fortingall, writes of the ‘annait or relic chapel’ in Glenorchy (Campbell 1888, 48-9). The case for Annet KMA being a ‘place where a saint’s relics were kept’, might be strengthened if we take into account Watson’s comment that he received information about Severie KMA from a ‘Miss Margaret Dewar, of

150
the old family of Dewars of Severie and Annat (sic)' (Watson 1926, 261, note 1). It has been
noted above in the discussion of Gartenjore that a ‘dewar’, from ScG dèoradh, was a relic-
keeper. According to Mrs Anne Nicholson of Roxburghshire (pers. comm.), there have been
Dewars in KMA since at least 1402, although she has so far only managed to track down a
James Dewar who was born in Kilmadock in 1633. However, Mrs Nicholson is of the
opinion that the Dewars of Kilmadock originated from Glen Dochart, and only arrived in
KMA in the early 15th C. But Watson suggests they may be much older than that (Watson
1927, 9). If the Dewars had been long established in KMA, then it may be that Annet was
either a place where the relics, presumably thought to have been those of Cadog, were kept or
perhaps it was the original dwelling place of the keeper of his relics. Near Annet is Severie,
Suidhe a’ Bhritheimh ‘seat of the judge’ where oaths were taken on the relics (Watson 1927,
9). We already have noted that an important part of the dewar’s duty was ceremonial, such as
ringing a bell in a burial procession in the case of the parish of Kilmahog. Relics were used in
other ceremonies such as the granting of land and swearing of oaths, as was the case in
Carolingian France and early medieval Wales and Ireland (Ganshof 1964, 30, 77; Márkus
2009, 118-24). We have no evidence of such use in Menteith, but it must rank as another task
of the dewar.

Aiglesteinston remains an enigma. If it is not lands of an early British church, as is argued
by Alan James for the element *eccles in England (James 2009a), then Aiglesteinston may
have been an early church which had been supplanted by or transferred to the site of the old
kirk of Kilmadock. Ultimately, however, we may simply have to take Geoffrey Barrow’s
advice and admit that we may never know why some chapels and churches never made it to
parochial status, but instead are among the ‘very large number of ecclesiastical place-names
in cill, *eccles, cladh etc. which have survived in the record, tradition and current use, far in excess of the total known parishes' (Barrow 1989, 10).

As we have seen, many of the places mentioned above contain saints’ names, but other churches and chapels were also dedicated to saints. We have seen a probable Brigid of Kildare dedication at Kilbryde DLE. North of Callander there are also the remains of St Bride’s Chapel at the southern end of Loch Lubnaig (NN585098), which must be the ‘capellania et Hermetage de Lupnow’ mentioned in 1503 (RMS ii, no. 2751).\footnote{See parish survey of CLD under Lubnaig, for my argument that this is not Lipney LOI, STL.} St Bride’s Chapel is undoubtedly old for two stone cross slabs were found in work carried out at the site in 1934 and 1971. They have been dated to between 11th and 13th C. (RCAHMS Canmore NMRS no. NN50NE 3). There are two place-names associated with the chapel; Creag a’ chaibeil and Àth a’ chaibeil ‘rock’ and ‘ford of the chapel’ respectively. The former is opposite the chapel on the Anie side of the A84 road, while the latter is a ford across the Garbh Uisge to Coireachrombie.

In KMA there are two chapels to St Fillan: one within Doune Castle and the other 1 km SE of the castle at NN734004. Both these chapels are mentioned in a charter of 1581 to Sir James Stewart, lord of Doune, later earl of Moray, in 1581 ‘the advocatioun, donatioun and rycht of patronage of the cheplanrie of Sanct Phillane, situatit within the said castell of Doun, and [the chepell of] the cheplanrie of Sanct-Phillane, situatit without the samyn’ (NAS, PA2/12, ff.79v-80r.). When these chapels were built is unknown, but the one inside the castle must post-date the building of the castle c.1380, making it probable that Robert duke of Albany was responsible for the dedication (Taylor 2001, 191). The chapel outside the castle was extant in 1518 (NAS GD224/906/1) and local tradition states it was ‘one of six erected by Robert the Bruce to commemorate the victory of Bannockburn’ (RCAHMS Canmore NMRS No. NN70SW 13, quoting OS Name Book 1863). MacKay states it was in ruins in 1568 (2003, 76).
Just over 1 km SE from the chapel of St Fillan outside Doune Castle was ‘Priest’s Croft’ (RCAHMS Canmore NS79NW 11).

The cult of Fillan was also evident in Leny; in an account of the families of Leny of Leny, and Buchanan of Leny written c.1560, Robert Buchanan wrote that ‘the Lanyis of that Ilk hes bruikit that leving without any infeftment, except ane litill auld sourd, gauin to Gilesicmvir be the King, and ane auld relict callit Sant Fillanis tuithe, quhilke servit thaim for thar chartour quhyle Alexander his dayis’ (Fraser, Stirling, 414). This is a reference to a time when lands were held prior to the introduction of charters. The church of Lanyn was appropriated to Inchmahome in the agreement between the earl of Menteith and the bishop of Dunblane of 1238 (Inchaffray Liber, xxxi). Leny was still a separate parish in 1576 when Duncan M’Kynnair is named as ‘vicarii de Lanye’ (RMS iv, no. 2524). Leny was divided between the three parishes of Callander, Kincardine, and Port-of-Menteith around 1615 (RMS vii, no 1222). Like Kilbryde and Kilmahog, the territorial extent of Leny is difficult to determine, only more so. Clues are hard to come by. There is an intriguing and yet confusing passage in the OSA for Callander:

Callander was formerly divided into two parishes, the one called Leney, and the other a chapel dependent on Inchmahomo, where the NORIES of that ilk had their family burying place. The remains of both are visible, and people bury at both places. (OSA xi, 575).

It is not entirely clear what is going on here, but it appears that this is not Norrieston, near Thornhill KRD. A clue may come from RCAHMS Canmore NMRS No. NN60NW 14, where it would appear that there has been a division of the mound (or perhaps church) at the junction of the Eas Gobhain and Garbh Uisge. This mound seems to have been the site of the original church, now often called Little Leny, part of which seems to have become the Buchanan burial

143 The Canmore reference given states: ‘Mrs Row-Fogo, Row House, in whose family the Row estate has been for the past 500 years... states that the field centred on NN 7435 9960 is known as ‘Priest’s Croft’.”
ground, now a mausoleum, while the remains of another building nearby was the burial
ground of the Nories. It should be stressed that this second chapel cannot be the church at
Callander, since the churches of Leny and Callander were in existence by 1238 (Inchaffray
Liber, xxxi), long before the splitting of the parish of Leny in 1615. Nevertheless, while Leny
was indeed divided between three parishes (see below), it may be that this division between
the church of Leny into the chapels of the Buchanans and Nories has confused earlier writers
into believing that this was the division of the parish of Leny. Just to complicate matters,
there is a graveyard marked on the 1st edn 6 inch OS map near Leny House (NN613089),
although there is no notice of it in RCAHMS Canmore, which may mean it is modern.

The parish of Port-of-Menteith ‘was considerably enlarged by the addition to it of lands
taken from the parish of Leny’ (Fasti vi, 359). It seems reasonable to think that Leny, apart
from consisting of the lands on the north bank of the Garbh Uisge, just west of Callander, also
comprised lands along the southern shore of Loch Venachar in what is now PMH, including
West Dullater. It is notable that ScG crìoch ‘boundary’ is found in two burn names, both called
Allt na Criche ‘burn of the boundary’, one between KMA and DLE and the other in CLD.
The latter is certainly the boundary between the estate of Leny and the barony of Callander, as is
shown on an estate plan of 1843 (NAS RHP1442/1-2), and may have been the boundary
between the medieval parishes of Leny and Callander. In the uplands of PMH at NN567044
is Meall na Criche ‘lump of the boundary’, and it may be that this hill is a remnant of the old
parochial boundary. It is also possible that Leny also included part of the detached portion of
KRD, and it was this that was then transferred to KRD in 1615. If so, then we could be looking
at what was obviously a fragmented parish of Leny.

John Leslie, in his survey of CLD for the Commissioners of the Annexed Estates in 1775,
wrote ‘At this place where the Old Kirk [of Callander] stood is a pretty little Mount called

---

144 Allt Crìoch is a boundary between Drymen and Buchan nan parishes.
145 As far as I can tell Lennieston PMH has nothing to do with this situation and seems to be a personal name plus Sc toun.
Tamakessok retaining its name from St McKessock Bishop and confessor here anno 520 whose Anniversary is kept the 10th day of March by a market held that day’ (NAS E777/313/3). This fair was called Latha Fhéill Mo-Cheasaig (Black 2000, 19). Kessog, like Bláán discussed above, is one of a number of saints’ cults that were imported from Cowal to the Stirling-Strathearn-Lennox area (Clancy 2004, 140). He is especially associated with Luss DNB, where he is supposed to have been martyred and buried (Watson 1926, 278), and is also associated with Auchterarder and Comrie PER (Watson 1926, 278). In the Glenfinglas area CLD, is Gleann Casaig (Glenkassik 1451 ER v, 476), which probably commemorates Kessog. Nearby, at NN523104, is Cladh nan Casan (or ‘Ceasanach’ as Watson has it), which seems to mean ‘graveyard of Kessog’s people’ (Watson 1926, 278). Kessog’s name also appears in personal names in Menteith: Murtho Kesso kissone and Kessok Murthauson are both mentioned as tenants in the lands of Cessintullie KMA in 1486 (ER ix, 627).

The church at Kincardine was dedicated to St Lolanus, described in the 16th C Martyrology of Aberdeen as Sancti Lolani episcopo et confessori de Kyncardin prope Stirling ‘bishop and confessor of Kincardine near Stirling’ (Laing 1854-7, 268). The Martyrology has his day as ‘x Kl. Octobris’, while Watson and MacKinlay have it as 22nd September (Watson 1926, 324; MacKinlay 1914, 331), in other words the same date as the Martyrology of Aberdeen. The story of how Lolanus came to Scotland is marvellously absurd, not only in its telling of how the saint cut off his arm to give back a key that would open a door back in Rome only if his hand was attached to it, but also in the fact that he is meant to have been a nephew of Serf and died in 1054. He would have been long lived indeed. In a charter dated to 1189 x 1195 KRD was granted to Cambus kenneth. The abbey was to have ‘thirteen acres of arable, a brewer’s toft with a garden, a toft for St Lolan’s Bell with a garden, and a toft for St

146 This was originally printed in Forbes, Kalendars, 134.
Lolan's Crosier with a garden' (RRS ii, no. 372). Richard Oram proposed that the tofts mentioned above were for the keepers of Lolan's bell and crosier, and he suggested that these keepers may have been dèoraidhean 'hereditary keepers' (Oram and Fawcett 2008, KRD).

While there is no evidence for this type of what Oram called 'quasi-religious officer' in KRD, they existed elsewhere in Menteith, as we have seen in Kilmahog and the discussion of Dewars in KMA, and we also know that dèoraidhean looked after the relics of St Fillan in the medieval parish of Killin (Taylor 2001, 186). Amazingly, after being lost for 250 years, what is thought to be the bell of St Lolan was discovered by a fisherman in the River Forth in 1929 (Applebey 1961, 133-8).

In a recent study Rachel Butter argued that the saints dedications of AFE and KPN, which although seemingly containing different names, probably represent the same saint. The extraordinarily complicated nature of these dedications are detailed in Butter (2007, 100-115), and it is not the intention to repeat that material at length here. The saint in question is Berach, but as we will see, his name took various forms in Menteith.

AFE was dedicated to St Berach or Berchán, an Irish saint (Watson 1926, 194, 225). In an Irish Life of that saint, Aedán mac Gabráin, king of Dál Riata, was so amazed by Berach's miracles that he gave a fortress at Aberfoyle (Eperpuill) for Berach to use as a monastery (Plummer 1922, vol. i, 35; Watson 1926, 225; Anderson 1980, 146; Duncan 1975, 43; Butter 2007, 102). In Aberfoyle there was a fair in mid October called Féill Bercháin (Watson 1926, 194, 225; Butter 2007, 104). Berchán is simply Berach with an additional suffix –an, and

---

147 '...ecclesiam de Kincardin cum capellis et decimis et oblationibus omnimodis et tresdecim acras terre arabilis et unum toftum brasiatoris cum uno orto, et unum toftum ad campanam Sancti Lolani cum uno orto, et unum toftum ad baculum Sancti Lolani cum uno orto...'  
148 See also Márkus (2009, 138) who mentions this passage regarding crofts pertaining to St Lolan's bell and crosier in the context of dewars receiving lands elsewhere in Scotland.  
149 The bell is 25 cm x 14 cm. The bell is also described in TGAS, New Series viii (1933), 144-6, and can be seen at the Museum of Religious Life, Glasgow.  
150 I have not come across any primary source for this statement. It seems to be based on a communication between Charles Plummer, editor of the Life of Berach, and Rev. Moncrieff-Taylor of Aberfoyle. Plummer has a note in his edition of the Irish Life which quotes from a letter from Moncrieff-Taylor who claims there were fairs in April and October held in a field called Feil-barachain (Plummer 1922 vol 2, 327-8; Butter 2007, 104, n.311).
syncope (Butter 2007, 103). There are no place-names associated with Berach/Berchán in AFE.

Near the site sometimes said to be the original site of the church of Kippen, Keir Hill of Dasher, is a well called St Mauvais Well. In the 1880s an ‘80-year-old native’ of KPN remembered that there was a fair called Semvie’s Fair held in the parish on the 2\textsuperscript{nd} Wednesday of October Old Style (Black 1999, 42), while MacKinlay states it was held on 26\textsuperscript{th} October (MacKinlay 1914, 79). Forbes states that the church of Kippen was dedicated to Movean (Forbes, Kalendars, 320), while in the 1440s, Walter Bower wrote of Ernefrear ubi capella Sancti Beani ‘Arnprior where there is a chapel of St Bean’ (Bower Scotichron. Bk. 2, ch. 10 (vol. 2, p. 190). Movean is clearly for Mo Bhean, while Semvie is a contraction of St Mo Bhí. Bean is probably Beóán whose main church was in Co. Down in Ulster, although it seems he may have been a British saint – there is a Kirkbean in Kirkcudbrightshire – or it could be that Beóán is another form of Berach (Butter pers. comm.)\textsuperscript{151} Berach was also culted as Bean by the 13\textsuperscript{th} C in Kinkell PER and Fowlis Wester PER (Inchaffray Chrs nos 9 and 28); he is Mobí in a calendar produced at Fowlis Wester. There was a Sanct Mavane’s Mill at Buchanty PER on record in 1542 (RMS iii no. 2832).

While it may indeed be the case as Butter suggests that Berach/Berchán and Bean/Mobhi were the same saint, in medieval AFE and KPN the parishioners and clergy would surely have believed that they were praying to different saints and would not necessarily have made connections regarding the different forms of the name Berach. As Butter states in her talk regarding Bean, there would have been the ‘impression of the separate identity of a saint as not only does he or she have a different church, a different family and a different feast day, but he or she also has a different name’ (Butter pers. comm.).

\textsuperscript{151} I am grateful to Dr Butter for allowing me to view and cite from her talk on St Bean to the Pictish Arts Conference on 9\textsuperscript{th} October 2009.
In the north of KMA is **Loch Mahaick** (**Lochmaquhayak** 1532). Watson thought the name commemorated a saint called Tua, ‘the silent one’ (1926, 298); and the name of the loch was an anglicised version of **Mo-Thataig**. However, it may be that he was mistaken, for the early forms point strongly to a lenited *c* making a medial /x/ as opposed to a lenited *t* or /h/ (Márkus 2008, 70). The saint here may be Machutus (see discussion of Kilmahog, above p.144).

The Church in Menteith could not function if it did not have people to administer it and the sacraments. There are a small number of place-names in Menteith that recall what we term officers of the Church. We have already mentioned the dewar above. The highest ranking official is the bishop, found in **Achadh an Easbuig** CLD, but formerly in LXY and just over 2km NW of the site of the church of Leny. The earliest reference is from 1862, but the field may date from 1237-8. In 1237, Pope Gregory assigned to the bishop of Dunblane ‘if it can be done without grave scandal, a quarter of the [teinds] of all the parish churches of the Diocese of Dunblane’ (Cockburn 1959, 48-9). Other churches certainly had to give a quarter of their teinds to Dunblane: at the Reformation the quarter of the teinds of the kirks of Tulliallan, Glendevon, and Fossoway were assessed, as was ‘the bischoppis parte’ of the vicarage of Muthill (Kirk 1995, 349). As has been noted, Leny was appropriated to Inchmahome Priory in 1238, the year after the quarter of the teinds were assigned to the bishop, and so there may have been a need to distinguish which area of the parish paid the dues to the bishop of Dunblane and which area paid dues to the priory, hence **Achadh an Easbuig**. Whether or not the quarter of the teinds of Leny were collected throughout the Middle Ages is unclear.

**Deanston** comes on record in 1585. This may have been a *toun* belonging to the dean of Dunblane Cathedral, although none are on record in this area. It is notable that it is called ‘villam et terras capellanias de *Sauchinthome* alias *Denstoun*’ (the toun and chapel-lands of Sauchinthome alias Deanston) (**RMS** v no. 842). Across the River Teith form **Deanston** is **Clarkton**, which may be ‘settlement or farmstead of the cleric’. This may relate to the
cathedral of Dunblane, but is appears very late (1783), and so there is also the possibility that
the name relates to someone with the surname Clark, but its proximity to Deanston is
striking.

In AFE are two place-names denoting 'priest': Mulan an t-Sagairt 'knoll of the priest'
(NN419034), and Creag Bhual an t-Sagairt 'crag of the cattle-fold of the priest' (NN481018),
while in CLD on the W side of Loch Lubnaig, is Maol an t-Sagairt 'promontory of the priest'
(NN583123). These three names are only first on record on the 1st edn 6 inch OS map in
1862, and although I can find no traditions associated with them, they must pre-date the
Protestant Reformation of 1560.

It may be that in the vast parish of CLD, where, as we have seen, all the parish churches
were congregated at the eastern end of the parish, the priest had to travel to preach. There
appear to be no ecclesiastical place-names between modern Brig o' Turk and Glengyle.
There are burial grounds at the western end of Loch Katrine shown on the 1:25, 000 OS
Explorer map at NN385135 and NN406119. The latter was the burial ground of the
MacGregors. Hutchison writes that this was called Dal Naomh 'Holy Field' (Hutchison 1879,
61). There was also, apparently, a Kil-ma-challaig place-name at the 'foot of Ben Dochty' (Ben
Ducteach NN348154), the derivation cautiously offered is 'the cell of nuns' (Wilson 1908, 80-
1), but might instead be coille na cailleach 'wood of the women'. In Glenfinglas, before it was
flooded to make a reservoir, were, apparently, a Tom Naomh 'Holy Knoll' and a Dal Naomh
'holy meadow' (Hutchison 1879, 60) There is also the burial ground at Cladh nan Casan, mentioned above. Nearby is Linne a' Chluig 'pool of the bell', although it is not known if it
refers to the sound of the water falling into the pool or to a place where a bell was rung
summoning people to worship (Hutchison 1879, 60).

152 Details can be found at RCAHMS Canmore NMRS No. NN41SW 2.
153 Not to be confused with the Dal Noamh mentioned above at the W end of Loch Katrine.
154 see RCAHMS Canmore NMRS No. NN51SW 1 for details.
Many lands were given to the Church by kings and the nobility to provide for its upkeep. While in theory any lands could be given to the Church, in Menteith there are place-names with elements that suggest that these lands specifically belonged to the Church, at least when they were coined. We have seen above (p.115-6) that many places containing the ScG element earrann, Scotticised as arn- in Menteith, could be lands belonging to Inchmahome. This is strengthened by the fact that there are the place-names Arnprior KPN and Arnvicar and Arnclerich PMH, while in Arnbeg KPN in 1459 it was stated that the Chapel of St Mary of Garwalde in the Muir of Dundaff, near Denny STL was to have the ‘two merklands of Arnbeg, in which is situated the Cross (crux) of Kippen’, (RMS ii no. 672), which might mean a stone or wooden roadside cross.

At the Reformation the ‘tak of the paroch kirk and townis’ for the thirds of benefices of CLD was collected from lands concentrated in the eastern portion of that parish: Callander (Easter, Middle and Wester), Kirktown, Auchinlaich, Brackland (Easter, Middle and Wester) Gart, Claish, Greenock, Gartchonzie (Easter and Wester), and ‘the tua Iberts’ (Kirk 1995, 348). Of particular interest here are the ‘tua Iberts’. Deriving from Ol idbart or idpart, and so ScG iobairt; ‘offering, sacrifice’, their whereabouts are now unknown, but there is a house on the southern side of Callander called the Old Manse, and next to it is Churchfields (NN629075). The Iberts of Callander are additions to a remarkable group detailed in Watson (1926, 254), situated in the parishes of Balfron STL, Drymen STL, Killearn STL, and Kilmaronock DNB, while in Monzie parish in 1640, Ibert is presented as ‘terrís ecclesiasticís seu gleba vocat The Ibert ecclesiae de Monzie’ (Retours PER no. 494). Ibert in Drymen is described in 1621 as ‘terrís ecclesiasticís de Ibert’ (Retours STL no. 108), and in Balfron there is mention in 1698 of ‘terrís ecclesiasticís vocatis Ibert’ (Retours STL no. 338). There may have been another in Menteith; it is now Lochan Eabarach (small, muddy loch?) in AFE at NN519001, but Stobie shows it as Lochaneibart ‘small loch of the Ibert?’’. It is not far from where the old parish church of Aberfoyle stood at NN518005. It would seem that iobairtean
were lands for the upkeep of the local parish church. It is probable, as the above reference for Monzie states, that they became the glebe, i.e. lands that specifically supported a priest.

There is another place-name element in Mentieth has a similar meaning, if not etymology, to *iobairt*; Watson held that the place-name Offers or Offerance is derived from Latin *offerendum* ‘an offering, oblation’ (Watson 1926, 254; see Map 16). It was borrowed into OG as *oifrend* ‘sacrifice or office of the Mass’, and is now ScG *aifreann* or *aifrionn* ‘Mass’. The element is most notably found in the abbey of Inchaffrey, *Innis Aifreann*, in Strathearn, where it was often written in its Latin form *Insula Missarum* ‘Isle of Masses’. While it is possible that the Menteith *Offers or Offrance* names were originally Gaelic terms, most have since taken on a Scots form with a plural ending (or, indeed, are Scots place-names), although ‘le *Offryn*’ in Strathgartney has the singular, presumably Gaelic form in 1451 (*ER v, 476*), although it is called *Afrans* in 1636-52 (NLS Adv.MS.70.2.10 (Gordon 51)). This is *Offerans* shown on the 1st edn 6 inch OS map at the western end of Loch Venachar (NN542059), while at the western end of Loch Achray are a meadow called *An t-Oirrinn* and a crag called *Creag an Oirrinn*, now *Creag Noran* (Watson 1926, 255). Another group of Offers names follow the course of the River Forth from *The Offers* KRD, just across the river from Gargunnock, to Offerance DRY, 2 km E of Dalmary DRY. There were two in KRD; *The Offers*, first mentioned in 1536 (*Offeris RMS* iii no.1560), and what is now *Chalmerston*, originally the Offers of Ochtertyre (terras de *Ouchtertire*, cum lie *Offeris earundem alias Chalmeristoun nuncupatis* (*RMS* iii, no. 1560; Watson 1926, 255)). There were three in PMH; one called Offrins of *Gartur*, and the other two now lost, but one is shown on Stobie at what seems to be Carse of Shannochnell, while the other is mentioned as *Offerone of Gartladernick* (see *Gartledeny* PMH), near what is now *Hilton* PMH (NAS GD15/183). There then is a cluster of five in DRY, all hugging close to the River Forth between the parish border with KPN and the A81 Glasgow-Aberfoyle road. There was an *Offerandis de Caschelie* in DRY (*RMS* iii, no. 3172; *RMS* vii, no. 354), which might be the now split town of Wester Offerance, Over Easter Offerance, and Nether Easter Offerance; in
this area shown in Blaeu was Airncaishlie. Further west was Offerance of Garchell, and there is still Offerance, near Dalmary. There was at least two others in KPN, but this is not certain, since one may have had different names: Offrendscheregart (1451 ER v, 475), alternates with Offrenys de Kippan (1461 ER vii, 52), which then seems to become Offeris de Lekky nuncupat. Schiregartane (1584 RMS iv no. 230). This is obviously Shirgarten at the western end of the village of Kippen, but there was also Nethir Dischoure vocat. Offeris...jacent<ibus> prope ecclesiam de Kippane 'Nether Dasher called Offeris...lying near the church of Kippen' (1508 RMS ii no. 3226), which Watson thought was ‘probably the old glebe of Kippen’ (Watson 1926, 255).

Watson seemed to think there was a great deal of similarity between the terms aifreann, iobairt, and earrann; indeed, he stated that the ‘Offerances and Offers of Menteith are to be compared with the names Arnclerich, Arnvicar, Arnprior in the same district...and all were doubtless connected with the priory of Inchmahome’ (Watson 1926, 256). However, Gilbert Márkus thinks there is ‘more of a difference’ between the two terms iobairt and aifreann (Márkus pers. comm.). He thinks iobairt ‘refers to offerings made by lairds etc. to the church, for the support of priests’; in other words people are offering land to the church. Aifrionn and offers, on the other hand, seem to refer specifically to the Mass itself; i.e. it is ‘an offering made by the church to God’ (Márkus pers. comm.). But how might this translate to the place-names on the ground, as it were? It may be that we are not dealing with ScG aifrionn at all, but instead Sc offerand; DOST has the definition of offerand as ‘to present (a donation of any kind, prayers, etc.) as a religious offering or sacrifice’. It may be that the lairds gave land to the Church or Inchmahome, not to support a priest, as in the case with iobairt, but perhaps for the celebration of Masses in honour of their dead relatives and ancestors in the period following the Black Death, which arrived in Scotland in 1349. As Dairmaid MacCulloch recently wrote, Augustinians, as well as providing pastoral care for the local laity, ‘supplied spiritual services at what seemed like cut-price rates [compared to Cistercians and
Benedictines]: the gift of a field from a modestly prosperous knight […] a few pence from a poor man’s family at his death bed’ (MacCulloch 2009, 392). However, it may be not be necessary to look for a different meaning for Ibert and Offeris; they may in fact be equivalent terms, but using different languages. This would certainly be the case in places where Scots was well established by the time these offers-names come on stream, such as Kippen.

Conclusion

There are a remarkable range of place-names showing the variety and vitality of religious life in Menteith in the medieval period. These include early churches and saints’ cults, lands of officials in the church, and the kinds of places that went to support the church economically and helped sustain the parishioners spiritually. By teasing out information in documents and by looking at place-names outside the area with parallel terms we can begin to gain some understanding of the activity of the church ‘on the ground’, as it were, in Menteith. While place-names are often unlikely to give us the names of individuals at specific points in time, it has been demonstrated in this chapter that they have the potential to tell us a great deal about how the Church was supported by the land and the people.
Conclusion

The aim of this thesis has been to show that, when used as a historical resource, place-names have a major role to play in enhancing our understanding of medieval rural society. By historical resource it is meant that place-names are a source for studying the social history of a given area, in terms of subjects such as agriculture, lordship, land use, Christian religious life, and language. Place-names have other uses too, of course, particularly in subjects such as historical linguistics, environmental history, and in understanding past perceptions of landscape.

Menteith

Divided into two distinct parts by the Highland Boundary Fault (HBF), the geography of Menteith is characterised by two contrasting geological landforms – the Highlands to the north and west and the Lowlands to the south and east. Menteith is defined as the six parishes of AFE, CLD, KMA, KRD, KPN, and PMH, although there are indications that Menteith may have included Logie STL in the early 13th C. Ecclesiastically, Menteith was part of the diocese of Dunblane, and although Dunblane itself was part of the earldom of Strathearn, it was part of the Deanery of Menteith. It is probably this that has led many previous commentators to believe that Dunblane was in the earldom of Menteith. Traditionally it has been thought that the area to the north of the HBF was Gaelic-speaking, while to the south it was Scots-speaking. However, this is only true from the later Middle Ages; even in the Lowlands of Menteith the vast majority of the place-names are Gaelic. There were speakers of Scots in Menteith prior to the 13th C, such as the Muschets of Kincardine, but their influence on the place-names of Menteith was restricted to the area adjacent to Stirling, including Drip KRD. It is only in the late 15th C that the documentary record and place-name evidence
indicates Scots-speakers on the ground coining Scots place-names in the Lowlands, e.g. McOrriston and Watston KMA.

Sources

When studying the place-names of a particular area, the researcher has to be familiar with a large range of historical sources. It is important to know not only what the documents are, but who they were produced for and why. In Menteith, most documents were produced for the crown and major landlords. A few others were produced for the Church, both medieval and post-Reformation. In the course of the study it was found there were biases towards those areas that were in the hands of the crown in the 15th and 16th Cs. This meant that the parish of Callander, for example, had a greater density of documents, and therefore more early forms of place-names, than the parish of Aberfoyle, which was in the hands of the Graham earls of Menteith. Particularly instructive were the Exchequer Rolls for KMA which were able to give us what were probably the eponyms for many of the Sc toun-names and a ScG baile-name which combine with personal-names in the parish, including MacKeanston, Watston and Balmacansh. All these people are on record in the 15th C. This contrasts with KPN where there are also a couple of toun-names containing personal-names. However, their late appearance in the historical record – and KPN is not so well recorded as KMA – means we have less information on how old Jennywoodston KPN, for example, actually is. Furthermore, we have no idea who Jenny Wood was, whereas we can trace the family behind McOrriston KMA in the records for several generations.

Toponymists also need to be aware of the limitations of their documents. One document, a charter from the register of Cambuskenneth Abbey, showed how important it was that we do not take documents at face value, and, like any historical source, they have to be subjected to close scrutiny. The document purports to date to 1193 x 1195. However, the text as we have it exists in a 16th-century transcription, and the place-name evidence indicates that it has
been considerably updated (for discussion, see p. 38-9 and also Boreland KRD for more details).

Language

There were three languages spoken in Menteith in the Middle Ages: a P-Celtic language, Gaelic, and Scots. There was probably a great deal of overlap in the period when British and Gaelic were spoken, and later between Gaelic and Scots. A preliminary study of the P-Celtic place-names and the political geography of the surrounding area in the early Middle Ages suggested that the P-Celtic language was more likely to be British than Pictish. However, on the basis of the P-Celtic place-names in Menteith and in neighbouring Clackmannanshire, it may be that we need to rethink our definitions and perceptions regarding British versus Pictish. The fact that many of the P-Celtic place-names have elements – such as *aber, *lanerc, and *mónið – that can be found in Scotland south of the Forth (and indeed in Wales) as well as in historical Pictland, may mean that we should term the language of Northern Britain ‘British’, although it is appreciated that there was a distinctive material culture and political situation in many areas north of the Forth that is peculiar to the Picts, and it is likely that for many scholars a Pictish/British division will remain if only for convenience.

Gaelic was the language of Menteith for the bulk of the population for most of the medieval period; the vast majority of the place-names in the earldom are Gaelic. The Highland Boundary Fault is often a convenient shorthand for the divide between Gaelic and Scots in the Middle Ages, but this is not borne out by the evidence for Menteith. As this study and others by Charles Withers (1980, 1982a, 1982b, 1983) have shown, Gaelic survived south of the HBF well into the 18th C. Moreover, it was still vibrant enough in the late 15th and early 16th Cs to be the naming language in the northern part of KMA as seen in the place-name Balmacansh. What is striking is that the person most likely to be behind this place-name, Donald McCawis, is on record in the Rentalia Domini Regis at the same time, i.e. the 1480s, as many of the men
who were the eponymous tenants of the cluster of *toun*-names in the barony of Cessintully KMA, including MacKeanston and McOrriston. This continued use of *baile* into the 16th C to coin place-names in Menteith contrasts with Fife where *baile* seems to have stopped being used as a place-naming element by the early 13th C at the latest.

Scots most likely started to make inroads in Menteith with the arrival of the first immigrants lords who arrived in the reign of William I, in particular Richard de Montfichet, progenitor of the Mushets of Menteith, who was given the lands of Kincardine in the late 12th C. However, Scots had difficulty establishing itself in Menteith due to the lack of burghs, and despite the presence of a large monastic institution – Inchmahome. This contrasts with Fife where burghs and monasteries were among the catalysts for the rise of Scots north of the Forth. In the 15th C Scots probably gained a boost when the earldom of Menteith was forfeited to the Crown in 1427, two years after the return of James I from captivity in England. James probably sent in his Scots-speaking officials, such as Robert Nory, who was the king’s mair in Menteith in 1451. Many of the Scots place-names only come on record from the 16th C, but from at least the 1480s in the barony of Cessintully KMA there are a number of tenants, such as Forsyth MacCorran and Donald MacCane, whose surnames give rise to a group of Sc *toun*-names, including McOrriston and Mackeanston.

*Earls of Menteith and other major lords*

It has often been thought that once the last of the line of indigenous earls died out in the 13th C, they were replaced by Anglo-Norman earls. However, a brief survey of the history of the earls of Menteith and other major landlords demonstrates that the Gaelic/Norman dichotomy is too simplistic where these lords are concerned. Although Walter Comyn and Walter Stewart, the first two earls that replaced the indigenous earls were descended from 12th C immigrant Anglo-Norman families, it is likely that they actually spoke Gaelic and had fully integrated themselves into Gaelic culture. Walter Stewart’s by-name Ballach ‘spotted,
freckled' shows he moved in a Gaelic-speaking milieu, while his predecessor, Walter Comyn, grew up in the Gàidhealtachd, where his father was the earl of Buchan from c.1212. Prior to becoming earl of Menteith, Comyn was Lord of Badenoch, an area, by the 13th C, at the heart of the Gàidhealtachd. It is likely, then, that Comyn and Stewart were valuable Scots-speaking lords (and probably French-speaking lords in the 12th and early 13th Cs) in the service of their king along with their Lowland peers, but could be equally effective Gaelic-speaking lords in their own lands.

Many of the other lords in Menteith can also be shown to be familiar with Gaelic culture. The Grahams, who gained a truncated earldom of Menteith in 1427, came from Strathearn; they were also descended from Robert II, a king with a great affiliation for the Gàidhealtachd. It is unlikely that the Grahams did not have some Gaelic, otherwise they could not have ruled Aberfoyle, a Gaelic speaking area until at least the late 18th C. The Drummonds, who eventually became lords of Kincardine, and were based at Drummond Castle near Crieff PER, an area which was still largely Gaelic-speaking in the 1790s, left a carved graved slab at Inchmahome. This grave slab, carved by a West Highland craftsman, is indicative of deep links with the Gaelic West.

Place-names as a historical resource

Researchers into medieval rural society in Scotland have long stated that place-names have the potential to inform us of aspects of rural society that cannot be uncovered by documentary research or archaeology. It has been found that it is often difficult for these researchers to match up the documentary and archaeological evidence. While a place might often be found in the historical record in the medieval period, it is usually only the last phase before abandonment that is uncovered archaeologically, perhaps as late as the 19th C in many cases. As such many researchers cite place-names as one potential answer to how we might discover more about medieval rural society. In Scotland place-name research into rural
society is hampered by the lack of quality surveys both at a county and national level. However, this thesis along with the recent AHRC funded survey of Fife by Simon Taylor and Gilbert Márkus should help meet the needs of historians and archaeologists hoping to understand more about how place-names can help them uncover various aspects of medieval rural Scotland.

Five main topics were examined in the thesis in a bid to show the ability of place-names to inform the debates and questions arising from using place-names as a historical resource: (1) routeways; (2) hunting and deer management; (3) authority and justice; (4) people and professions; and (5) livestock and animal husbandry. A group of six common elements - ScG achadh, blàr, dail, earrann, gart, and Sc keir- were also analysed to see what their distribution could tell us of how the Gaels organised the landscape to suit their particular needs. Also examined in the context of language change were ScG baile and Sc toun, where it was discovered that baile was used later than and in different way from Fife.

(1) The most common element indicating a routeway in Menteith is ScG bealach 'pass'. However, these are mainly associated with the high mountain passes, and there may be doubts as to how old some of these names actually are, although in many cases the actual passes themselves will be very old. Important exceptions to the mountain pass ‘rule’ are three lowland passes – Ballachallan CLD, Ballochneck KMA, and Ballochraggan PMH, all having the anglicised balloch/ballach for bealach, and the early forms of which suggest were routes in the Middle Ages. Many of these bealach-names were named in relation to particular destinations, such as sheiling grounds (Bealach na h-Imriche) or burial grounds (Bealach nan Corp). Àth ‘ford’ was not found to be numerous in an area crossed by two large river systems. However, another ford was signified by Frew, deriving perhaps from the Brit. equivalents of W frwd ‘current’ or Brit. equivalents of W ffrau ‘stream, flow, flood’ or W ffraw ‘swift, lively, brisk’. The element spittal can mean a routeway in other parts of Scotland, e.g. Spittal of Glenshee PER, perhaps indicating an inn or hostel, may in Menteith be lands belonging to the
Knights Hospitaller or Templar, the military orders set up to protect the crusade routes. Nearby in Balfron and Kilmaronock parishes are place-names containing *spittal* that can be shown to have belonged to these orders in the Middle Ages.

(2) An important facet of aristocratic life in the medieval period was hunting. Hunting was a highly organised activity and there were areas set aside for this purpose. Menteith has a number of place-names that show which parts of the landscape were used to hunt deer. Some names include the possible prey – Creag Dhamh ‘stag rock’ AFE – while other names show where traps were laid – Glac nan Sealg AFE ‘defile of the hunts’; and Ellrick AFE from OG *elerc*, later ScG *eileirig* ‘deer trap’.

(3) However, one of the most important aspects of aristocratic life was the administration of authority and justice. In place-names this often took the form of court-hills or mounds. There were at least two places called Tom a’ Mhòid ‘hill of the court, meeting’, two places with ScG *comhdhail* meaning ‘(place of) assembly, meeting’ including Cuthil Brae KRD and Coille-don PMH. The latter, despite the modern form of its name, was almost certainly a *comhdhail*, probably for *comhdhail-dhùn* ‘court hill’ and it was here that the earls of Menteith received sasine of their earldom in the Middle Ages.

(4) Place-names can tell us about industrial and agricultural activity. ScG *ceàrdach* ‘smithy, forge’ and *gobhann* ‘smith’ can be found in a number of places in Menteith, indicating the importance of the skilled metal worker in a pre-industrialised society. The smith would have made an array of items ranging from horse-shoes to agricultural tools and weapons, such as swords. The smith would have been a highly respected and prized member of rural society.

(5) Medieval society was predominantly agricultural and Menteith contains many place-names that deal with livestock and animal husbandry. These indicate, at least in the uplands, that pastoral agriculture was the major farming activity. Examples of place-names specifying arable land are few. Coilentogle CLD may have ScG *seagal* ‘rye’ as the specific, and Cassafuir
KMA contains ScG *pòr*, which in this case probably means ‘cropland’. Menteith abounds in animal-names, including ScG *capall* ‘horse, mare’, *muc* ‘pig’, *bò* ‘cattle’, *searrach* ‘foal’, *gobhar* ‘goat’, and *caora* ‘sheep’ to name a few, indicating the wide range of animals used in the medieval economy of Menteith. The lack of such names in the Lowlands and in Scots does not, of course, indicate a dearth of such activity south of the HBF; it simply means that, for whatever reason, Scots-speakers, or perhaps more precisely, modern Scot-speakers, saw no need to define the landscape in the way Gaelic-speakers did, and this may be why such minor names were not recorded by the Ordnance Survey.

The thesis made major new contributions towards our understanding of a variety of important generics, including:

**Achadh:** As in many parts of Scotland, *achadh* was originally a ‘field’, but in many cases became a permanent settlement as people settled areas previously given over to agricultural use. *Achadh* occurs fifteen time in Menteith, mainly in PMH and CLD, with a couple in KMA. The definition given by Simon Taylor regarding the use of *achadh* in the Gaelic Notes in the Book of Deer, ‘land enclosed for both arable and pastoral purposes’, seems to be most appropriate for Menteith. *Achadh* in the low-lying areas, such as Auchleshie and Auchenlaich, may have been enclosed arable areas that became permanent settlement. Conversely, in the upland areas, such as in the hills above Leny, *achadh* – e.g. Tom an Achaird Bhig – may have been an enclosed pastoral field that did not become a settlement.

**Blàr:** this element is confined to western Menteith. Only four of the eighteen *blàr*-names are situated in the lowlands, suggesting a mainly pastoral context, with some of the specifics in the place-names signifying compact grazing land in predominantly upland districts.

**Earrann:** Anglicised as *Arn*- in Menteith, *earrann* does not suggest an area of assarted land, as *gart* does; most *earrann*-names are on well drained land on rises above the carselands and areas of former moss. There are nineteen *earrann*-names in Menteith, with another three just outside the study area in DRY, and the element has a distribution suggesting a close
association with Inchmahome Priory. Indeed, three earrann-names contain specifics of church officers – Arnprior, Arnvicar, and Arnclerich. Arnmac was part of the property of Inchmahome at the Reformation, while Arnachly, with a burial ground nearby, is said to have been a chapel of the priory. Arns DRY is next to Chapelarroch ‘ruined chapel’ and Dalmary, containing the name of the Blessed Virgin Mary, one of the patron saints of Inchmahome. It is unclear whether the other sixteen earrann-names were originally property associated with Inchmahome since there are no records that shed light on the theory. However, another large cluster in Galloway also suggests an ecclesiastical dimension to earrann, with names such as Arnmannoch and Ernespie.

Gart: The gart-names of Menteith are part of a wider cluster of gart-names in central Scotland, found in a rough triangle ranging from Clackmannanshire in the east to the SE tip of Loch Lomond in the west to northern Lanarkshire in the south. There are 26 gart-names in Menteith. Unfortunately, the lack of early documentation for Menteith precluded the sort of conclusions that could be given for the gart-names of Clackmannanshire, where there was evidence to suggest that they were the settlements of the medieval foresters of Clackmannan.

However, there is a different distribution within Menteith of gart compared with baile, with the latter tending to be on higher, probably better drained land. Gart, on the other hand, predominated on the lower lying lands on the edge of the mosses of Menteith, suggesting different economic and social circumstances behind the coining or function of these elements.

Place-names and the medieval Church in Menteith

Given the centrality of the Augustinian priory of Inchmahome, it is perhaps not surprising that the medieval Church and Christian religion looms large in the place-names of Menteith. A case study in Chapter 6 into place-names and the medieval Church demonstrates the vitality of religious life in Menteith. These place-names form an important resource for studying religion in Menteith because despite there being a major priory in the earldom, it is poorly
documented before 1529. By looking at two groups of place-name generics – ScG earrann and Sc offers/offrance – we can gain some idea of what lands may have supported the priory.

While there is room for debate as to whether all places containing earrann indicate lands belonging to Inchmahome, as indicated above (p. 172), the element offers/offrance does seem to indicate lands that were given to Inchmahome, perhaps by local lairds, in exchange for masses for the dead.

As well as lands belonging to or perhaps associated with a religious order, we can catch a glimpse, albeit a brief one, into diocesan administration. Achadh an Easbuig LXY must be lands linked to the bishop of Dunblane: it is argued above that these are lands that fulfilled the obligation to pay the quarter of the teinds of the parishes of the diocese of Dunblane that were assigned to the bishop for the purposes of funding a dean of the cathedral and its canons in 1237. Other officers found in the place-names include priest (sagart) and the keeper of relics (dèoradh or dewar).

Saints' cults can often be among the most challenging subjects in place-name studies, and those of Menteith were no exception. They are challenging because they are rarely transparent in terms of the identity of the saint behind the name, and dating these place-names can be extremely problematic. Many assumptions as to the identity of some of the saints have been challenged. Among the saints who seem to be found in Menteith are Columba, Kessog, Fillan, Machutus, Berach, and Lolanus. There are three cill-names in Menteith – Kilmadock, Kilmahog, and Kilbryde – and all have insular saints embedded within them, suggesting that these are relatively early foundations. It is possible that these cill-names date to at least as early as those in Fife or Atholl which may date to the 8th C. Kilmadock appears to be dedicated to a British saint, possibly called Docus, Cadoc, or Docgwin. The precise mechanism for the transference of his cult to central Scotland is unknown, but the cult may be broadly contemporaneous with some of the P-Celtic place-names of Menteith discussed in Chapter 3.
Kilmadock is distinct in Scotland for having three early church-names – *cill, *eccles, and *annaid – in close proximity to each other, however, no firm conclusions could be reached as to why. It was speculated, albeit very tentatively, that it may have much to with an early church – *Aiglesteinston – being replaced by a more conveniently placed church –Kilmadock – at a later date, and, based on the longevity of the Dewar surname, from ScG deòradh ‘relic keeper’, in KMA, Annet may have been the place where the relics were kept.

Place-names have a great deal to tell the historical researcher. In a poorly and erratically documented area, such as Menteith, we have seen how place-names can enhance our understanding of life in medieval Menteith. If we are to know more about the people of Scotland below the level of the nobility and landholding sections of society, and be better informed of topics such as land use and agricultural practices, lordship and justice, hunting, routeways, settlement patterns, language and language change, and how the medieval Church impacted on the people of Menteith and Scotland, then we need to realise the asset that place-names constitute in Scottish historical studies. Place-names, then, are an essential historical resource.

Part 2

Parish Surveys

The sheer number of early forms available for this study has led to a reliance on the printed material in publications such as *RMS, Retours, ER*, and the cartularies of various monasteries printed by the Bannatyne Club. Since there was sufficient material in the aforementioned books, most of the documents that were consulted in NAS were of plans and maps, although some documents, especially for those areas not so well covered by the printed material, were also looked at. It was found that many of the early forms from those documents did not differ greatly from the printed material.\footnote{Although there were exceptions, notably NAS GD220/1/C3/1/2 (1427), printed imperfectly in Fraser, *Menteith* and *Scots Peerage*.} These documents and maps were especially useful for clarification of the whereabouts of certain places. To save space, I have streamlined the presentation of early forms and represented the most necessary citations. However, all early forms have been checked and retained on a fuller version.\footnote{All of these forms have been retained on a memory stick to be held by the Department of Celtic and Gaelic at the University of Glasgow.}

The layout of the parish surveys generally follow the pattern as seen in Taylor and Márkus's *Place-Names of Fife* series (see Taylor, *PNF* i, 11-14 for details). It is intended here only to give a summary of that information. In the first line of each entry is the headname, followed by a three-letter parish abbreviation. There then is a single letter, usually 'S' for settlement (see abbreviations list for other letters), then pre-1975 county abbreviation for Perthshire, PER. This is followed by the NGR. The single digit used for accuracy of locations is a simplified version of that used in *PNF*: 1 for absolute accuracy; 2 assumed on the basis of contextual evidence, such as old maps; 3 places the location within any adjacent kilometre square; 4 shows that it is or was within the given parish. The first line is concluded by the altitude of the settlement or feature.
An example is:

ARNBEG KPN S STL, PER NS629949 1 56m.

This conveys information for Arnbeg, which is in the parish of Kippen. It is a settlement, and is now in Stirlingshire, but was in Perthshire prior to the 1892 boundary changes (note, however, only in the survey of Kippen will the county abbreviations be placed in the first line; all the other parishes in Menteith are in Perthshire). It is at the NGR indicated, which is accurate, and sits at a height of 56 m OD. Where appropriate, a hash symbol (#) is used to indicate that the name, as far as can be ascertained, is now obsolete.

After the early forms, in the first line of the analysis, an attempt has been made to provide the modern Gaelic form for many of the place-names coined or mediated by Gaelic-speakers. These forms are based on the principals formulated by Ainmean Àite na h-Alba. Where possible, an alternative form has also been given for when the name was in use by Gaelic speakers in the Middle Ages. Note, however, this is an area of Scotland where there is often no evidence for an initial nominative article, and for the sake of simplicity these are not included here; e.g. Dasher AFE may be rendered in modern ScG as An Deisear, but since no evidence for this exists in the early forms, here it is simply Deisear. Where there is evidence in the early forms for internal genitival article, they will be included in the modern forms, but if there is no evidence then the internal genitival article will not be included.

Since the current language of Menteith is Scots (or SSE), all the pronunciations shown for the place-names in Part 2 are based on the IPA system as found in the Concise Scots Dictionary, xxii-xxiii. However, not every place-name has a pronunciation; assume where there is no pronunciation for place-names coined or mediated by Gaelic-speakers that these places are either now lost or that I was unable to gain access in order to obtain a pronunciation. Pronunciations for names coined in Scots are not included. Please note, however, that I am hard of hearing, so any pronunciation will be approximate only, but are

157 See http://www.ainmean-aite.org/
nevertheless given here as a guide. I am grateful to Revel McKeand, Balleich AFE, Dianne Loultit, Kippen, Alan Higginson, Balvalachlan CLD, Robert Grant, Drumloist KMA, and Campbell Millar, Ballachraggan KMA, as well as the owners/occupiers of many places for the pronunciations they provided.

Notes on the ecclesiastical nature of the parishes can be found in Chapter 6 of Part 1 of this thesis.

Note that the surveys in Part 2 of this thesis deal mainly with settlement-names found on the 1:50,000 OS map. The exceptions are places, mainly from the 1:25,000 OS map, that can shed light on important aspects of medieval society in Menteith, such as Coille-don PMH.

There are a great number of early forms for the name Menteith, the above is only a representative sample showing the development since the 12th C. See short discussion on page 51 for analysis of this name.

/mɛnˈtiθ/
**Parish of Aberfoyle**

*Introduction*

The parish of Aberfoyle (see Map 17) is almost wholly to the north of the Highland Boundary Fault. Although smaller than CLD, AFE is comparable in size to PMH, KMA and DLE, but contains far fewer settlements than any of those other parishes. This reflects the upland nature of the parish where the hills rise to 727m in the case of Ben Venue. Most of the settlement is restricted to a strip of land in one valley, an arm of the River Forth, which contains Loch Chon and Loch Ard, and a small area of flat land between the latter body of water and the present day village of Aberfoyle. A further line of settlements can be traced along the north of the parish on the southern shore of Loch Katrine, which then extends to Loch Achray and the Black Water to its meeting with Loch Venachar.

In 1427, AFE formed part of the area which was re-designated the earldom of Menteith by James I. This post-1427 territory was much smaller than the ancient earldom had been. James took the earldom of Strathearn from his cousin, Malise Graham. James compensated Malise with what may justifiably termed the poorer quarter of the old earldom, and a long period of captivity in England (see p. 80 for details). This quarter of the old earldom consisted of all of the parish of Aberfoyle, with the places listed and detailed below in the gazetteer, and lands in PMH lying mostly to the west of the Lake of Menteith. Despite being a core part of the post-1427 Earldom of Menteith, Aberfoyle is pretty poor in terms of documentation. This documentation, mainly charters, is, however, relatively rich in place-names and many of the earliest forms for AFE come from these few documents. Stobie also shows a more densely populated parish with more settlements on the cusp of the 'Improvement' era. It seems the present village of Aberfoyle grew around the settlement of Craiguchty, on the slopes above the northern end of the present bridge (see Stobie 1783 and 1st edn OS 6 inch map). The
medieval church lying near the mouth of the Pow Burn gave the parish, and subsequent village, its name.

Brit. *aber + poll

*aber phuill, ScG Obar Phuill ‘(place at the) mouth of the burn’. Dwelly (1902-12, 1003) gives Obair phuill. The Pow Burn enters the River Forth 0.5km NE of the old Kirk of Aberfoyle. Aberfoyle is named in Bethada Náem nÉrren as Eperfuill, meaning ‘confluence of the poll or pow’ according to Watson (1926, 225), who also states that the word pow (or rather poll) is Welsh rather than Gaelic (Watson 1926, 204). Poll as Brit. word meaning ‘stream, burn’ was loaned into ScG as poll, and thence into Scots as pow (Barrow 1998, 59-61; Clancy 2008a, 99).

The DOST definition of ‘poll; pow’ is ‘a slow moving, ditch-like stream, flowing though carse-land’, which agrees with Barrow (1988, 212), who states that a pow is a burn ‘flowing sluggishly through carseland, often having deep, peaty pools with crumbling overhanging banks’. The Pow Burn has been canalised along its lower, flat reaches before it meets the River Forth, perhaps in the ‘Improvement’ era of the late 18th C; Roy shows the Pow Burn as a meandering stream throughout its lower course. For other early forms of Aberfoyle see Kirkton and Milton below.

The early form of Aberfoyle in Bethada Náem nÉrren, Eperpuill, could suggest that the first element is ScG eabar ‘swamp, marsh’, and that the name as a whole is ScG, since the second element shows puill the gen. sg. of ScG poll, which the early forms in charters down to 1622 consistently show as -ur (-war-).

Achray 1863 1st edn OS 6 inch sheet CXXII

ScG àth + crathaidh

Àth Chrathaidh ‘ford of shaking’ is the derivation according to Watson (1926, 81, 477). It is not known where the ford in question is, but it could be near the site of the bridge carrying the A821 Aberfoyle-Callander road. The site is now occupied by the Loch Achray Hotel.

/əˈxre/ 

ALINAN FORD AFE WO NN526004 2 23m

Alinen 1784 Stobie

Alinan Ford 1862 1st edn OS 6 inch sheet CXXX

ScG ? àth + ? linne

Àth Linneain ‘ford of the little pool’ may be possible, but the forms are too late to be certain. The final –en/–an may be a locational suffix or a diminutive. This ford may indicate that this was an important routeway and may have been a key crossing of the River Forth before the bridge was built at Aberfoyle.

ALLTAN NAM BREA  AFE W NN532056 2 101m
Alanaprick 1643 RMS ix no. 1502

Auldanabreik, a trout burn 17th C Geog. Coll. ii, 567

Auldnbreck 1783 Stobie

Alltan nam Breac 1863 1st edn OS 6 inch sheet CXXIII

ScG alltan + an + breac

Alltan nam Breac ‘little stream of the trout (pl.). The editor of RMS ix has ‘vel Alcraneprick’ after Alanaprick, which may be a transcription error for *Altaneprick. Alltan nam Breac is the name of a burn, but the 1st edn OS 6 inch map shows an un-named settlement at this NGR, while Stobie shows Auldnbreck here. The p spelling in the earliest form probably represents nasalisation of b following the m in genitive plural article nam.

ALTSKEITH AFE S NN469021 175m

Aldskea c.1750 Roy 70

Auldskea 1783 Stobie

Lochard Lodge 1863 1st edn OS 6 inch sheet CXXII

Altskeith 1924-5 1 inch popular edn OS map, sheet 66

ScG allt + sgeith

Allt Sgeith ‘burn of spurting or gushing’. 1st edn OS 6 inch map has the burn named as Allt na Sgeith, although this would make sgeith fem. and Dwelly has it as masc. However, in OI it was fem. (see DIL under sceith). Dwelly variously has sgeith as ‘spawn; avoid; overflow, as a river; and spread, as water’, obviously relating to flow of the water. It is worth noting that ScG sgiath (gen. sg. sgeith) ‘wing, portion of land jutting out into sea’ is fem. Between 1783 and 1863 there was a name change to Lochard Lodge, which might be related to the tourist trade
that sprung up after the publication of Sir Walter Scott’s work, such as *Lady of the Lake* in 1810.

/altˈskiθ/

ARNDRUM AFE R NS501987 1 138m

*Arndrum 1862 1st edn OS 6 inch sheet CXXIX*

ScG earrann + druim

*Earrann Droma* ‘ridge portion’. Arndrum only appears from the 1st edn of the Ordnance Survey, however, it is one of a large number of *earrann* names in Menteith, some of which were lands belonging to the priory of Inchmahome, and Arndrum may have been one. The ScG form *Earrann Droma* contains the irregular declension in the genitive sg. of *druim*; this can also be found in Tyndrum PER, which is rendered in ScG as *Taigh an Droma* ‘house of the ridge’ (http://www.ainmean-aite.org). See also Drummanuster # below.

Blaruskan-more 1783 Stobie
Blaruskinbeg 1863 1st edn OS 6 inch sheet CXXII
Blaruskinmore 1863 1st edn OS 6 inch sheet CXXII

ScG blàr + tulach + -ean
Blàr Thulaichean 'hillocks plain'. Although the derivation postulated here is ScGtulaichean, pl. of tulach, this place-name may contain a diminutive of tulach, i.e. tulachan, so blàr thulaichain [gen. sg. of tulachan] – or thulachan [gen. pl.] 'small hillock(s) plain'; cf. Ol tulchán in DIL. Indeed, the earliest form might represent tulchan, perhaps with epenthesis. The forms form 1530 reflect lenition of t, showing an underlying blàr thulaichean. It is one of a number of blàr-names in the earldom (see p. 110-114 for discussion of blàr).
ScG blàr + uisgean

Although the specific looks like ScG masc. noun *uisgean* ‘waters’, we should be cautious in seeing plural forms in –*an*, as this may imply later coinage; the only secure attestations are in the 16th C Book of the Dean of Lismore (however, see Lanrick KMA for the possibility of ScG plural –*an* in the 14th C). Another possibility, is a diminutive, c.f. *DIL uisceán*. The earliest form points to there being subdivision by 1427 as is shown by the Scots plural –*ys* ending. Blairuskinmore (q.v. below) is near the meeting point of a number of small burns flowing into the Water of Chon. The main or primary holding must have been Blairuskinmore, and this seems to be borne out by the Roy form. (See p. 110-114 for discussion of *blàr*).

Blàr an Rois ‘plain or field of An Ros’. For An Ros, see Ros AFE, below. An Ros appears along with Craigmuck (q.v. below) in NAS GD220/1/C/3/1 (terras de Rose cum le Cragmuk), and must relate to the promontory jutting into the south side of Loch Ard at its eastern end where Blaranrois is shown on the 1st edn OS. The 1643 form shows there are two separate, but connected places. The form given by Stobie is an error. See p. 110-114 for discussion of blàr.

BLAREGAL # AFE S NN417067 2 147m

Blairgoll 1643 RMS ix no. 1502
Blairgald c.1750 Roy 71
Blaregal 1783 Stobie

ScG blàr + gall
Blàr Gall ‘field or plain of foreigners?’ ScG gall can also mean ‘standing stone’, but there is no indication of a standing stone near Blaregal #. The burn flowing past the site is un-named, but there is a Leac a’ Ghoill ‘slab-stone or declivity of the foreigner?’ at NN426073 sitting at 341m or 194m above the former site of Blaregal. Who the foreigners were, if that is the specific, is unknown, but it could simply mean Lowlander. There is a Blair-na-Gaul in Kirkhill parish INV and also a Leac nan Gall in Kilchalmonell ARG and a Leac a’ Ghoill in Inverchaolain ARG. See p. 110-114 for discussion of blàr.

BLAIRVOUCH AFE S NN455025 1 73m

Blaireboyane 1427 NAS GD220/1/C/3/1
Blairviok 1643 RMS ix no. 1502
Blairvoich c.1750 Roy 70
Blairevoich 1783 Stobie
Blairvouach 2001 1:25,000 OS Explorer Sheet 365
‘Field or plain of ?’ The early forms regarding the specific are too erratic to be able to give a derivation. The earliest form almost certainly refers to this place, as the 1427 charter to Malise Graham states ‘terras de Drumlaen, terras de Ladarde, terras de Blareboyane, terras de Gartnerthynach’ (NAS GD220/1/C/3/1): Blairvouach lies between Ledard and Gartnerichnich. See p. 110-114 for discussion of blàr.

Both Phreaslaidh ‘hut of the copse place’. The name survives in the Bofrishlie Burn. Watson is of the view that preas is a Gaelic borrowing from British pres ‘thicket’ (Watson 1926, 419-21). This may account for the British –le ‘place (of)’ suffix (Watson 1926, 350, 372, 420). However, it is likely that if Bofrishlie does have the British *-le-suffix, then either the whole name is British, with the generic being bod ‘dwelling’, or it is ScG both + en *Frishlie, the en being British. See also Nicolaisen (1996, 29). However, it could be ScG preaslach, gen. sg. preaslaich, –aigh ‘undergrowth’ (Dwelly). Another possibility is OG freslige ‘lying beside or with, contiguity’ (DIL). See p. 51 for discussion of this name in a p-Celtic context.

¹⁵⁸ The writing crosses a fold in the map here, making it difficult to read, it could be Blairfrisly.
Both Neanntag or Neanntaig ‘nettle sheiling or sheiling of nettles?’. Marked as ‘Ruins’ on the 1st edn OS map. The name survives in the Boninty Burn. The specific could be ScG neanntag (now deanntag) ‘nettle’, OG nentóc (fem.) ‘nettle’. Another suggestion might be nent, cf. W. nant, pl. neint ‘stream, valley of a stream’, which seems to appear in Scottish names mostly as nent, c.f. Tranent ELO in Watson (1926, 360); the second element could then be nent + -in.
ScG bràigh + baile

Bràigh a’ Bhaile ‘upland of the township’. The forms appear late in the record, but if the derivation is correct, the baile in question could be Aberfoyle or Balanton.

/breˈval/

COBLELAND AFE S NS531987 1 27m

*Cobleland* 1863 1st edn OS 6 inch sheet CXXX

Sc coble + land

‘Land belonging to someone who operates a ferry-boat’. A coble is defined by *DOST* as a short flat-bottomed rowing-boat, chiefly used in salmon-fishing or as a ferry-boat (see p. 91 for discussion of coble).

CRAHAVIE AFE S NN542055 1 82m

Creag Uchdaidh? ‘rounded or breast-shaped rock?’ or Creag Uchda, containing the gen. sing. of G uchd (masc.). Shown as a sprawling settlement on the 1st edn OS, this was the medieval
heart of what is now the village of Aberfoyle, and it is notable that Stobie does not show a
settlement called Aberfoyle: that is reserved for the name of the parish; Craiguchty is the
name of the settlement. The name survives in Craiguchty Cottage at the NGR shown. The
element is found in Outh, near Dunfermline (Taylor, *PNF* i, 342). The final syllable could be
the ScG –in ending, possibly a locative ending or diminutive suffix (Ó Maolalaigh 1998, 30-8;
see Leny CLD below for the rarity of this ending in Menteith).

Krantullich 1630-50 Sibbald TNS 131v

Crantullich 1863 1st edn OS 6 inch sheet CXIII

ScG craobh + an + tulach

*Craobh an Tulaich* ‘tree of the hillock’. The earliest form appears to show *craobh* plus the
definite article; it may be that the ‘n’ in the later forms is a mistake for ‘v’. It is tempting to see
the *tulach* as a ‘place of assembly’, but given its remoteness, this may be wishful thinking.
However, it could be an assembly place related to the hunting forest of the earl of Menteith.

CRANYS  #  AFE S NN52014

Cranys estir 1427 NAS GD220/1/C3/1/2

Cranys westir 1427 NAS GD220/1/C3/1/2

Cranysbeg 1495 RMS ii no. 2230
Crannce 1512 Fraser, Colquhoun ii, 321 [de duabus Crannce]
Over Cryance 1643 RMS ix no. 1502

ScG crann?

‘Tree?’. Cranys estir and westir are the first mentioned settlements in the charter of James I to Malise Graham (NAS GD220/1/C3/1/2) regarding the founding of the new and truncated Earldom of Menteith in 1427. Exactly where they were is unknown, but judging by their position in the charter and by the sequence of the other lands from Craiguchty to Loch Chon, it may be that Cranys, or something like it, was the original name of part of the present day village of Aberfoyle. There had clearly been subdivision of the lands of Cranys by 1427 as is shown by the Scots plural ending –ys.

ScG cùl or cùil + an + en *Gartan

Cùl or Cùil a’ Ghartain ‘back or corner of the *Gartan’, where *Gartan may be an existing name meaning ‘the small enclosed field or settlement’. 600 m south of this settlement is Barr a’ Ghartain ‘summit or hill of the gartan’.
ScG caladh + gart

Caladh Gairt ‘shore or ferry of the enclosed field or settlement’. The consistent cal- in the early forms probably means it is not ScG cùl ‘back’ or cùil ‘corner’, but has perhaps been influenced latterly by Coulligartan AFE (q.v. above). Watson considers it to be ‘harbour-field’ (Watson 2002 [1913], 130), which would suit its location on the southern shore of Loch Katrine. Roy shows two distinct settlements, but only names Cullgartmor. See p. 119-122 for discussion of gart.
ScG deisear

Deisear 'place having a southerly exposure'. See also Dwelly under deisear where he says 'The north side of the country around Loch Tay is called Deisear, and the south side, Tuather'.

Daisher sat on a south facing slope. It was already ruins by the time the OS visited it in 1863.

There is a Dasher in KPN which has the same derivation.

Dalvy c.1750 Roy 70

Dalevie 1783 Stobie

Dalavie 1863 1st edn OS 6 inch sheet CXXIX

ScG dail + an ? + beith

Dail a’ Bheithe ‘birch-haugh’ is a possibility, but this interpretation depends on whether the medial vowel is a definite article or not. If it is, then beith is behaving more like a masc. noun rather than fem., so Dail a’ Bheithe rather than Dail na Beithe. Local pronunciation would have been crucial here, but sadly the place is now lost. If the stress was on second element, then ScG leamhan ‘elm’ is plausible. Leamh/leamhán ‘elm’ exists in Irish places such as Lavagh, Donegal and Sligo and Lavey, Derry and Cavan (Flanagan and Flanagan 1994, 107-8). See p. 114-116 for discussion of dail.

DALCHON # AFE S NN449021 2 40m

Dalthone 1643 RMS ix no. 1502

Dalchon 1783 Stobie

ScG dail + en Chon
Dail Chon ‘water-meadow of or beside the Water of Chon’. The element chon may represent a primary river-name rather than a genitive of ScG cù ‘dog’. Water meadows are low-lying land around a river, creating a flood plain. During the summer when the land around the river was dry, the grass was cut to produce hay. This was used as winter feed for the animals. The act of the river flooding also fertilised the land with silt from the river. It is now called Lochard Cottages. See p. 114-116 for discussion of dail.

ScG druim + buide

Druim Buidhe ‘yellow ridge’. The settlement has now disappeared and the name survives as Druim Buidhe, a 218 m high ridge 1km to the SSW and it is from this ridge that the settlement is most probably named.
ScG druim + leana?

Druim Lèana ‘meadowland ridge’? As well as ScG lèana (Dwelly), from OG lénæ (DIL), ‘meadowland’, lethan ‘broad’ might be possible, but if the latter, it would involve the dental fricative disappearing before earliest form. This has happened in Menteith in Ballamnoch KPN and Balmeanoch CLD, where the specific is ScG meadhanach ‘middle’. Black (1946, 420) states that Lean is a ‘shortened form of (Mac) Lean, q.v.’. In his entry of MacLean he writes that MacLean derives from ScG ‘Mac Gille Eoin, earlier Mac Ghill’ Eathain’. He also asserts that ‘the l is all that remains of gille (Black 1946, 536). However, this must remain unlikely, for whoever the mysterious Gille Eoin might have been, we might have expected more of the name to appear in the earliest form, especially at least the g of Gille.

Gartlonnin c.1750 Roy 70

E & W Gartloning 1783 Stobie

Gartloaning 1862 1st edn OS 6 inch sheet CXXIX

ScG gart + lònainn

Gart Lònainn ‘enclosed field or settlement of cattle lane or pass’. This settlement had been sub-divided by at least 1427, and there was another settlement nearby called Garquhat, presumably *Gartchait (or similar) ‘enclosed field or settlement of the wild cat’ (see p.119-122 for more discussion of the element gart). Lònainn is a loan-word into ScG from Sc loan ‘cattle lane or pass’. Garquhat is never mentioned again, and Gartloaning might be the result of a combination of two names, one deriving from ScG, the other from Sc.

In 1489 there was a battle near Gartalunan (Gartloaning AFE). Here the forces of James IV defeated a group of rebels led by the earl of Lennox bent on avenging the death of James III after the Battle of Sauchieburn in 1488. Afterwards James IV gave a thanks offering at the kirk of Kippen (TA i, 122; Nicholson 1974, 537; Dawson 2007, 38).

Lochaneibart 1783 Stobie

Lochan Eabarach 1862 1st edn OS 6 inch sheet CXXX

ScG lochan + iobairt or eabarach

‘Small loch of the sacrifice/offering or small muddy loch’. It is unfortunate that we do not have earlier forms. The lochan is only about 400m SE of the old kirk of Aberfoyle. If it is an Ibert name, as the Stobie form suggests, then it is one of a small group in this part of central Scotland (see p.160-163 for details). Historically this would have been ScG Lochan Ìobairte. On the basis of late evidence it could be ScG eabarach, the adjectival form of eabar ‘mud, puddle’, which would suit its location on the flat land connecting the Pow Burn to the River Forth. As it is so near the old kirk of Aberfoyle, it is possible that the form with Eabarach has been affected by the first element of the parish-name Aberfoyle (see Aberfoyle, above); this may have happened as late as the first half of the 19th century.

*Inoch 1643 RMS ix no. 1502*

*Rudha Saonach 1863 1st edn OS 6 inch sheet CXII*
ScG *rubha + en *Samhnach?

Dwelly has *samhnach meaning 'deer park', in which case Rubha Saonach could be 'deer park point or promontory'. We know that the area was a hunting forest, as Alexander Graham states in 1724: 'In this paroch was a forest of red deer called the forest of Monteath. But after the death of the late earl of Monteath [the 8th earl died in 1684] and that it fell into the family of Montrose the forest was neglected and ther are noe deer in it now' (Geog. Coll., i, 343). However, it is not clear where Dwelly got *samhnach from; is not in other Gaelic dictionaries, including Armstrong, a frequent source of Perthshire Gaelic for Dwelly.

The last form of 1643, if my assumption that this is meant to be Saonach is correct, seems to be a transcription error.
Parish of Callander

Introduction

The area that came to be known as the parish of Callander (see Maps 18 and 19) was a complex patchwork in the Middle Ages; it contained three parishes – Callander, Kilmahog, and Leny. It also consisted of the baronies of Callander, Doune, Keir, Leny and Strathgartney. The lands in the barony of Doune\(^{160}\) which lay in the medieval parish of Callander included Brackland CLD. The barony of Strathgartney made up most of the parish and included Achnahard, Ardcleanochrochan, Ardmachmuin, Blairgarry, Brenachoile, Chaoruinnach # Coiltogole, Coireachrombie, Coischambie #, Dreppan #, Duart, Duncraggan, Edra, Glengyle, Gleann nam Meann, Groddich #, Hidderbrigend # (now part of Brig o Turk) Larg #, Lendrick, Letter, Milton of Callander, Offerens #, and Stank. Also part of the barony and probably part of the forest of Glenfinglas, were the now lost Westirbrigend # (now part of Brig o Turk), and Dountehagarty, Dousse, Lagane, and Strononich, whose whereabouts are unknown. These lands are situated in the area stretching from the southern end of Loch Lubnaig to the western end of Loch Katrine. Included in the barony of Strathgartney was the medieval parish of Kilmahog (KXM), which included Kilmahog, Lendrick, Coischambie #, Offers #, Gartinjore #. It is possible that Duncraggan, Drippan #, Bochastle, and Potnellan, were also in KXM. The barony of Leny seems to have been a small barony consisting of the lands around Leny House, and formed part of the medieval parish of Leny (LXY). The barony of Callander made up the eastern most part of the medieval parish of CLD, and included Callender, Kirktown #, Auchenlaich, Garth, Claish, Greenock, Gartchonzie, and ‘the tua Iberts’ (Kirk 1995, 349). The present town of Callander was built on land ‘which was formerly the farms of Kirkton,

\(^{160}\) For the baronies of Doune and Strathgartney I’m using here the Rentalia Domini Regis to show which lands are in respective baronies. The King’s Rentals date from 1480 and are first found in ER ix. The details of these names can be found in the surveys.
Murdiestoun, *Ballantoun*, Balgibbon & *East Mains* (NAS E777/313/105). The barony of Callander also included those upland areas to the north of the present town of Callander rarely mentioned in the records, but shown on a plan drawn for the Commissioners of the Annexed Estates in 1775 (NAS E777/313/2), namely *Arivouricherich, Beglarig, Coryardrish, Corychroin, Lurgavouie, Stroanetrykin, Tomscridan*, and *Tombae*. This plan also shows that the Stirlings of Keir had lands to the north-west of Callander barony; these must be part of the barony of *Keir*, including *Lubnoch* (q.v. below under Loch Lubnaig). This is further confirmed by remarks made by a surveyor of the road from Stirling to Fort William sometime between 1724 and 1736, who wrote that the lands on the east side of Loch Lubnaig, 'belongs to Stirling of *Kire*, is called *Lochlubnigside...one side is Stirling of *Keer*, Other side is Lord Perth' (NLS Acc. 10497.58 (m))\(^\text{162}\); and by the Rev James Robertson, minister for CLD who wrote 'opposite [Creag na Comh-sheilig 'crag of joint-hunting' NN580125] lies the hunting seat of Mr Bruce of Kinnaird, a part of the estate of *Keir*' (*OSA* xi, 583).

Anie 1863 1st edn. 6 inch OS map, sheet CXIV

ScG àth + an + fiadh

Áth an Fhèidh 'ford of the deer'. Fèidh is the genitive sg. form of fiadh 'deer'. Angus Watson suggests that Anie may derive from annaid '(old) church, mother church' (Watson 2002a, 47). While the site of St Brides Chapel could be seen to lend support for that view, the place-name Tom Àth an Fhèidh 700m north (NN588109) makes it more likely that we are looking at ‘ford of the deer’ rather than ‘mother church’, and this interpretation is corroborated by the modern pronunciation of the name, with stress on the final syllable. Tom Àth an Fhèidh seems to mark the boundary of the lands of Anie. Upr Anie is marked on Stobie, presumably this is the site of the present Anie; Lower Anie is marked nearer to St Bride's Chapel. The ford crossed the Anie Burn at NN588100, just to the SW of the present farm, and was on the Old Military Road marked on the 1:25,000 Explorer map.

ScG àirde + ceann + an + cnocan

Àrd-cheann a’ Chnocain 'big summit or promontory at/of the head or end of the small hill'. Àrd-cheann a’ chnocain explains both the evident lenition and the lack of genitival form of ceann 'head, end'. The best interpretation of this name as it stands is something like ‘upper-head, big summit of *a’ Chnochain’, but the whereabouts of this place is unknown. The name survives in the burn name Allt Ardcheanacrochan. The name of the settlement was changed in the 20th C, first to Trossachs Hotel and then to Tigh Mor 'big house', and may have been simply to make it easier for potential guests to pronounce. There was a change in pronunciation which is reflected in the early forms from cn- to cr, which seems to have taken place in the early modern period (after 1775). This reflects modern ScG pronunciation, and is a good indication for evidence that this sound-change had taken place in the Gaelic of Menteith by the 18th C. The change from /n/ to /r/ in Gaelic words beginning cn or gn is ‘comparatively late’ according to O’Rahilly; he suggests the change took place in Scotland by the mid-16th C or later (O’Rahilly 1932, 22-3).

Aldchulery c.1750 Roy

E. Ardchullarie 1783 Stobie

Ardchullarie More 1863 1st edn. 6 inch OS map, sheet CXIV

ScG àird + cùil + odhar

Àird Chùil Odhair ‘promontory of the dun-coloured nook’. Angus Watson (2002, 30) has ‘G àird ‘point, promontory’ as the first element; the contours form a modest promontory at the site of the present dwelling. The two earliest forms suggest chùil odhair ‘(of) dun-coloured nook’ for the remainder, perhaps as an e.n.’ (see also his discussion on cùil, 453-4, where he has ‘cùil G f ‘corner, nook’). The lands of Ardchullarie were split in two at some point, but this may have been a reflection of the natural situation in any case, for the Ardchullarie Burn runs through the middle of the territory leaving Ardchullarie More on the southern side of the burn Archchullarie Beg was on the northern side. More than that however, Ardchullarie More was in Menteith, while Ardchullarie Beg was in Strathearn because the Ardchullarie Burn was the boundary between CLD and BQR. The form found in Roy refers presumably to *allt chùil odhair ‘stream of the dun-coloured nook’ or *allt chùil àraigh ‘stream of the back shelling’, although the latter may be a later reinterpretation. The Roy form could suggest we are dealing with an existing name *Cullarie: so we may have ‘promontory of *Cullarie’ and ‘burn of *Cullarie’.

_Ballgibbon_ 1775 NAS E777/313/105

_Balgibbon_ 1863 1st edn. 6 inch OS map, sheet CXXIV

ScG _baile + pn Gibbon_
'Tounship or farmstead of Gibbon' Barony of Callander. The –*gibbon* element is probably the same as that in Arngibbon KPN. This was one of the farms that came to make up the present town of Callander in the 18th C. Black (1946, 297) has Gibbon as a 'diminutive for Gibb...+ French diminutive suffix –*on*'; while he has Gibb as 'a pet or diminutive form of Gilbert'. According to Black, Gibbon was 'an especial favourite in Perthshire at an early date...' (ibid). The name was not unknown in Perthshire; a Gibun de Munfichet\(^{165}\) witnessed a charter of Robert, earl of Strathearn in 1233 x 1235\(^{166}\) (*Lind. Cart.*, no. XXVII), while Gibun de Haya witnessed a charter of Alexander, abbot of Coupar Angus in 1220 (*Coupar Angus Chrs*, no. XXVI). These two names may be based on the Old French name Giboin\(^{167}\). It is tempting to see Arngibbon as the 'portion of Gilbert (de Camera)', who was prior of Inchmahome between 1450 and 1468x69 (Watt and Shead 2001, 109), but this is mere conjecture, as is wondering whether Balgibbon CLD belonged to him also. Another possibility is Gilbert of Glenkerny, i.e. the lordship of Glencarnie, Duthil parish MOR (Ross 2003, 161), who was given half the lands of *Broculy* or Bracklinn in 1267 (Fraser, *Menteith ii*, 217; see Bracklinn below); Bracklinn is 2.5km NE of Balgibbon. See p. 123-129 for discussion of *baile*.

Another possible meaning for the specific is ScG *gibean*, gen. *gibein* 'hunch on the back [shaped rise]'. W.J. Watson has Balgibbon in Dwelly as *Bail’ a’ ghibein* (Dwelly 1902-12, 1006).

ScG *baile* + MacLauchlan

*Baile Mhic Lachlainn* ‘farmstead of a person called MacLauchlan’\(^{168}\) Barony of Callander.

Fourteen new farms or lots were proposed in the area to the south of Callander by the surveyors of the Annexed Estates, the body set up to improve the estates of those who has their lands forfeited after the ‘45 and to discourage further rebellion. The 1775 form comes from John Leslie's plan and covers the proposed enclosure of Lot 9, a 90 acre farm occupied by John Ferguson and John MacLauchlan. The Boglot entries are a bit puzzling, but may have been a name change perhaps after the last mentioned John or his heirs had died; the nearby lands of *Greenock* were marked on the Annexed Estate plan as *Greenock Moss* (NAS E777/313/2). With regard to the earliest forms, it is interesting that Black (1946, 533) shows spellings from the 17th C showing *M'Clachlane* or *McClauchlan*. The forms for 1765 and 1775 show the genitive singular *mhic*, which comes through in the current spelling of the name as ‘v’. See p. 123-129 for discussion of *baile*.

\[^{168}\] Or a variant spelling of that name. See Black (1946, 533), under *MacLachlan*.

ScG blàr + garbh or garadh? or ScG geàrr + -óc

‘Rough plain?’ or ‘enclosed plain?’ or ‘plain of the short place?’ Dwellly has ScG gàradh as meaning ‘garden, dyke, mound’, in which case, the derivation may be ‘plain or muir of the dyke’, i.e. ‘enclosed plain or muir’. However, Blairgarry may be thought unlikely to contain G gàradh as this is a loan-word from Old Norse garð(r) ‘enclosure, garden, yard’ etc. (Taylor, PNF i, 66). There is an Old Irish word gárad which also relates to enclosure; Kelly (1997, 377 footnote 118) states that it is one of three types of temporary fences, which he translates as ‘drought-fence’ (Kelly 1997, 632). Dwellly under garadh gives ‘den, cave’, seemingly referring to a fox’s hole or den. DIL under garad also gives ‘den, cave’. See p. 110-114 for discussion of blàr.
This is a modern name. It is marked as 'Manse' on the 1st edn. 6 inch OS map, sheet CXXII, and it is not marked as 'Blair Ho' until the One Inch to the Mile 7th Series, sheet 54 in 1957. It was still marked as 'Manse' in the One Inch popular edition OS in 1924-5.

ScG both? + caisteal

Both Chaisteil 'castle hut'. Watson (1926, 240) suggests that the forms with initial m are the result of nasalisation or eclipsis due to the OG preposition i or an, 'in'. An initial b in these
circumstances becomes m, while the lenited ‘c’ in most of the forms point to ScG caisteal, ‘castle’; the ‘castle’ in this case being the Roman fort 200m NE.

However, the first element could be ScG mòine ‘moss’ which would suit the location between the Garbh Uisge and Eas Gobhain rivers which would have been regularly flooded in the past. The medial t in some early forms could be a vestige of the old Gaelic gen. sg. definite article ind. Both appears very late, it could be either re-interpretation (so generic element substitution) or generic element variation between mòine and both.

Caisteal is a fairly common element for fortifications of varying dates, i.e. Iron Age, Roman, and early Medieval, that are not normally classed by archaeologists as hill-forts. Drumquhassle druim chaisteil near Drymen, is named after the remains of a nearby Roman fort, and there are a number of broch-like structures in Glenlyon PER and near Pitlochry PER that have caisteal in their names. The more usual element for a hill-fort in many parts of Scotland is ScG dùn, and 1km W of Bochastle is Dunmore, a hill-fort of possible Iron-Age or early Medieval date (see also Dunmore below).

Bracklands 1783 Stobie [E. and W. Bracklands shown]

Brackland 18631st edn OS 6 inch sheet CXV [Wester, Middle and Easter Brackland shown]

The early forms make a derivation difficult. It is unlikely that it is ScG breac + linne 'speckled pool' or Sc brack + land 'land of the ground broken up for cultivation'. The earliest form from 1261 may have a 'c' rather than a 't'. The fairly consistant 'o' from 1267 to 1675 may mean the name contains ScG broc 'badger'. Dwelly has an obsolete meaning of broc as being 'grey, dark grey'. Broc may be functioning as an adjective, i.e. 'badger-coloured', it would regularly cause lenition if it comes before the noun it is qualifying, regardless of gender of that noun. OG brocc 'badger', is found in noun + noun compounds, including names, e.g. Brocros (Hogan 1910, 128). The second element, then, could be ScG tulach, so the early forms may be for broc thulaich 'badger-coloured, grey mound' or 'badger hillock'. Brackland is in the barony of Doune in ER, but is part of the 'tak of the paroch kirk of Callander' in the Books of Assumption.

It is notable that there are differences in how the OS spells the name: the famous Bracklinn Falls, which are nearby, are named Falls of Brackland in 1st edn OS 6 inch map in 1863, and they are crossed via the Bridge of Brackland and both are in the Brackland Glen. On the present 1:50,000 Landranger map the farms are all Brackland with their respective prefixes of Wester, etc, but the falls are Bracklinn Falls. On the present 1:25,000 Explorer the farms are all Bracklinn with their respective prefixes of Wester, etc, while the Bridge of Brackland crosses the Bracklinn Falls that flow through the Brackland Glen. The farmer has always known it as Bracklinn, which it was when his father farmed here in the 1950s.

/ˈbraklm/
ScG bràigh or Sc brae + en Leny

Bràigh Lànaidh 'upland of Leny'. See also Leny, below. On the face of it this looks like a new name, but Thompson (1985, 17) makes mention of a 'Duncan McNab of Braeleny' who joined the '45 Rebellion. On the 1st edn 6 inch OS map, sheet CXV what is now Braeleny is called Luirgeann (see below), and it is still called this on the 1 inch popular edn (sheet 62) dated to 1924-5. It is Braeleny on the One Inch 7th Series in 1957. In the Annexed Estate plan of 1775 (NAS E777/313/2), it seems to have been called Lurgavouie, but it was on the border of the estate of Leny, and this may have influenced its later name.

ScG *breun* + *coille*

*Breun-Choille* 'stinking, putrid wood'. While *Bràigh na Coille* ‘upland or upper part of the wood’ might seem the obvious meaning, we would not expect lenition of *coille*, a fem. noun after the definite article *na*. Instead the earliest forms suggest ScG *breun/brean* (adj.) ‘stinking, putrid’, and *breun* would cause lenition. The extra syllable that appears from 1480 on might be explained as result of epenthesis.

/brena'xɔːl/
The ScG name of this settlement is Ceann Drochaid 'Bridge End'. There has been a bridge here since at least 1451, when the touns of Estirbrigend and Westirbrigend are mentioned (ER v, 476). Estirbrigend became Hidderbrigend by 1461 (ER vii, 51). The Turk element refers to the River Turk which flows from Glen Finglas. This river is called Finglas Water until it reaches a gorge at roughly where the modern dam sits at NN529079. The gorge has been postulated as a reason for naming the river from here Turk; it may be a reminder of the Celtic neck ornament called a *torc*, genitive *tuirc*, which narrows, but does not meet at the front (Richard Cox pers. comm.). More likely may be the genitive of *torc* ‘boar’, *tuirc*, cognate to W. *twrch* ‘boar’, found as a hydronym in Wales. The element relates to the perceived burrowing or rooting nature of the river (Owen and Morgan 2007, 479; G. Rhys, pers. comm.). See also Hiddirbrigend and Westirbrigend, below.

170 The ‘tour’, or tower, of Callander lay on the south bank of the River Teith at approx NN629076 (see RCAHMS Canmore NMRS no. NN60NW 8).
Watson (Watson 2002 [1913], 130) has Calasraid ‘harbour-street’ ‘ferry-street’, which is almost what the minister for Callander has in OSA.\textsuperscript{171} By the time Watson wrote CPNS in 1926, he stated that ‘Callander on Teith…is a transferred name from Callander (sic)\textsuperscript{172} near Falkirk’ (Watson 1926, 106), and it is probably the case that from at least the 16th C the form of the Menteith name has been influenced by Callendar STL.

The earliest form dating to 1238 may be a transcription error. This comes from a charter concerning the foundation of Inchmahome Priory printed in the Inchaffray Liber, which in turn comes from Rev MacGregor Stirling’s Notes on the Priory of Inchmahome (MacGregor Stirling 1815); MacGregor Stirling had seen the original charter, now lost (see Hutchison 1889, 136, note 1 for details of this charter). Given that he was responsible for the ‘Isle of (my) Rest’ derivation for Inchmahome, perhaps we should not be too confident in his transcription of Callander in his book, although he has given us an early form for Leny as Lanyn, which is reasonably consistent with other early forms, (q.v. below).

\textsuperscript{171} ‘…Calla-straid, which is the Gaelic name given to it by the common people: Callia, signifying the landing place at the Ferry, where the village is built; and Straid, the street or avenue leading from the castle of Callander to the same ferry.’

\textsuperscript{172} Now normally spelled Callendar.
The early *Calen/Caling* forms may relate to the original name of the estate, which may have straddled the River Teith. *Calendrate* etc may have been a subdivision of this estate, and the *sraid* element, also found in *Straid KMA*, perhaps relating to a potential Roman road between the Roman forts at Doune and Bochastle. Some of the early forms contain *–drate*, which might be for *drochaid* ‘bridge’ (c.f. *Poldrait* Poll (na) *Drochaid*, Glasgow (Taylor 2007a, 3) and Ballindrate, Co. Donegal (Flanagan and Flanagan 1994, 74)). The *Calen*- element, although obscure, seems to be found in nearby *Coilhallan Wood* to the W of the modern town, probably ScG *coille chailin* or *chalan* or some such.\(^{173}\)

/ˈkæləndər/

**CALLANDRADE**  CLD NN622074 1 82m

There are two places, within 200m of each other, called Callandrade and Callandrade Cottage on the current OS 1:25,000 Explorer map. On the 1st Edition OS 6 inch map, sheet CXXIV, they are *Callander Cottage* and *West Mains* respectively. *West Mains* is shown on the Annexed Estate plan NAS E777/313/2, and this may be *Westir Callander* mentioned under Callander above in the *Books of Assumption of the Thrids of Benefices* from the 1560s. *East Mains*, presumably *Eister Callander* in the 1560s, is shown on NAS E777/313/14 just along from *West Mains* and is shown on the other side of what is now the A81 road from *West Mains* on the 1st Ed OS 6 inch map. John Leslie wrote in 1775 that ‘At *East Mains* was the original seat of the earls of Callander where the Old Castle stood til within these last three years bypass’ (NAS E777/313/3). Stobie has a ‘Big Hoose’ symbol called *E. Mains* there. The modern names may be antiquarian re-namings. See discussion of Callander, above.

Coshambie 1783 Stobie

ScG cas + cam + ?

Cois Chambaidh '[place at the] foot of the bend?' The place-name Coischambie (Stobie seems to be the last time it appears on record) refers to a settlement that may have been where Loch Venachar Cottage now sits (see 1:25,000 OS Explorer map at NN551061). The coise (gen. of cas 'foot') refers to the foot shaped territory of Coischambie, which is bound to the north by Lendrick and Dreppen or Cathdreppan, and to the south by Duncraggan and Offrans. It is clearly defined on the Annexed Estate plan dating from 1775. The earliest form with final
-is etc is Coschambeis 1508 which could be a Scots plural. The cas part of the name survives today in Bad a’ Chois (q.v.), while the cam ‘bend’ element might refer to bend in the un-named burn (*Cambie?) that flowed past the settlement of Coischambie.

CREAG NORAN  CLD S NN505066 1 110m

Creag Noran 1863 1st edn OS

ScG creag + an + aifreann, aifrionn; OG oifrend
‘Sacrifice; offering; Mass’.

Creag an Oirrinn ‘crag of the offering, Mass’. Watson mentions that ‘Oirrinn is a dative form of ScG oifreann ‘sacrafice, Mass’ (Watson 1926, 255), but it must also have been a genitive form too. Watson further states that ‘[a]t the west end of Loch Achray the meadow at the bridge on the road to Aberfoyle is called an t-Oirrinn, and the rock west of it (part of the Trossachs) is Creag an Oirrinn: this is probably Offroune in Strogartnay’ [see RMS iii, no. 2969] (Watson 1926, 255). Creag Noran is at NN505066. See Offerans # CLD, below and discussion on p. 161-163

*Dunmore* 1863 1st edn OS 6 inch sheet no CXXIII

*Dunmhor* 1898 Walker (1898, 4)

ScG *dùn + mòr*

*Dùn Mòr* ‘great or big fort’. Stobie (1783) shows *Old Castle* at this point. The 1837 form suggests a probable antiquarian connection with said Roman fort at Bochastle CLD (see above). This form comes from the minister of Callander, whose Gaelic is suspect, ‘A mile west of Callander, there are the remains of a fortification on top of a hill, called *Dun bo chasitil*, the hill of the castle’ (*NSA* x, 354). The correct form, had the fort been called it, would be *Dùn both chasiteil* ‘hill-fort of the hut of the castle’. Details of the fort can be found at RCAHMS Canmore website, NMRS no. NN60NW 7. No indication of a date for the fort is given is given there, although the National Park notice board near the Kilmahog church site states it dates to c.700BC. It was doubtless a very important fort, and perhaps the reason why the Romans built their fort nearby.

ScG *grianag*.

*Grianag* ‘sunny knoll’. The early forms could suggest O.G. or M.G. *grianóc*, however, it is also possible that it represents an adjectival form *grianach* ‘sunny (place)’. The name probably alludes to the settlement being on a south-facing slope, see Watson (1926, 201) for a short discussion of this name.

Lennie 1783 Stobie

Leny House 1862 1st edn OS 6 inch sheet CXIV

ScG lèan or lèana

Lánaidh ‘damp meadow; swampy plain’. The area around the old church of Leny is frequently flooded in winter. Watson gives it as Lànaigh (1926, 145), which he holds to be different in derivation from Lennie, Corstorphine MLO, but fails to give any meaning. Leny House sits 1.5 km NW of the site of the old kirk, but was the secular centre of the estate of Leny. In the grounds, next to the main A84 road are said to be the remains of the castle of Leny, which are marked on the 1st edn OS 6 inch map as Caisteal Briste ‘broken castle’. The site of the old Kirk was later called Little Leny (Thomson 1985, 9). The 1238 form seems to contain the ScG –in suffix, meaning ‘place of’ or ‘place at’, which would be the only certain occurrence of it in Menteith; however, see Callander CLD, above, for reservations regarding the source. This is unlike Fife and elsewhere in eastern Scotland (there are seventeen place-names with this ending attested in Taylor, PNF i alone; see, for example Logie, Dunfermline parish), although it occurs on the borders of Menteith in Cashley DRY STL and Menstrie LOI CLA, where they were Cacelyn and Mestryn in 1213 x 1261 (RRS ii no. 519). The general absence of this locative ending in Menteith is probably much to do with the lateness of the evidence, where there are so few place-name forms from before c.1300, by which time it has been reduced to –ie/-y in places like Fife. See Ó Maolalaigh (1998, 30–8) and Taylor, PNF v, (Elements Glossary, forthcoming) for discussion of the –in suffix.

/'lêni/'
ScG leitir

Leitir ‘slope, side of a hill’. There is another Letter in PMH, where there are also West and Easter Dulatter. Watson states that ‘a leitir always slopes towards water, stream or loch’ (Watson 2002, 185). Ian Fraser agrees, having this element as a ‘site of a steep slope overlooking an inland loch’ (Fraser 2008, 186), in this case Loch Katrine.

Lochlubnigside 1724-36 NLS Acc. 10497.58 (m) [Lochlubnigside...one side is Stirling of Keer, other side is Lord Perth]

Loch Lubnaig 1863 1st edn. 6 inch OS map, sheet CXIV

ScG loch + lùbnach

Loch Lubnaig ‘loch of place of curves or bends’. Cf. ScG lùb, OI lúb ‘bend, twist’. See Watson (1995, 95), who has a short entry on Lipney, now Dumyat Farm LOI STL, which has many of the same early forms as are shown here and this has confused him and others, including John Harrison and RCAHMS (2001, 16, fn 16), into thinking these deal with Lipney. However, Lipney is almost always shown in conjunction with Fossakie, Ashinrule (or Lossinrule), Logie,
and Blairlogie,\textsuperscript{179} all of which are lands and settlements surrounding Dumyat LOI STL. What clinches it, aside from references such as the charter granting Stirling of Keir the lands of Lubnoch in the barony of Strathgartney (\textit{Lipney} is in the barony of Logyblair), are the references to fishings at Lupno; there are no fish worth eating that warrant a mention in any charter of the Kings of Scots to be had in the Menstrie Burn, the nearest stretch of water of any consequence to Lipney.

The name is now found in Loch Lubnaig, but there are indications from Pont and Gordon that Lubnaig was not the only name for this loch. In a map drawn in 1636-56, Gordon shows \textit{Loch Heuure} (NLS Adv.MS.70.2.10 (Gordon 51)), while Pont, copied by Gordon c,1630-50 writes of ‘\textit{Stratheuure} ...at Loch-heuure head’ (Sibbald TNS, 144r).

LOTS OF CALLANDER    CLD S NN633063 1 70m

\textit{Lots of Callander} 1863 1\textsuperscript{st} edn. 6 inch OS map, sheet CXXIV

This is one of the fourteen divisions or lots of land to the south of Callander created by the Commission for the Annexed Estates after the failed Jacobite Rebellion of 1745-6, and shown on the Annexed Estate plan, NAS E777/313/2. It was an attempt at Improvement, but of the 14 lots only four seem to have survived to the present day. This place-name refers either to Lot 7, given to Duncan McNee or, Lot 8 which was given James McNee. See also Balvalachlan

\textsuperscript{179} See, for example, villam de \textit{Logy, Blairlogy}, de les \textit{Pullis, de Lubnach, de Fassachy, Lossyntrule} (1451 RMS ii no. 462); \textit{Logy...Blair de Logy...Le Pullis...Fossoquhy...Lupnoucht et Lessintruel} (1502 ER xii, 638); terrarum et baroniae de \textit{Logyblair, continentis terras de Lipnoche, Aishinrule, Fassoquhyemane, Logye et Blair} (1635 Retours STL no. 156); the lands and barony of \textit{Logie Blair}, containing the lands of Lipnoch, Aishinrule, Fassochie maner, Logie and Blair (1685 NAS PA2/32, F187-188v). None of these examples, and they are typical, mention fishings of \textit{Lipney} (or its earlier variants), for the simple reason that there are none.
CLD, Boglot CLD, and Mollans CLD. It is not clear why the plural in Lots has survived, unless the whole of this area came to be known as 'The Lots' or some such, and the name has persisted even although only one remains.

LUIRGEANN  CLD S NN636111 1 230m

Luirgeann 1863 1st edn. 6 inch OS map, sheet CXV

Luirgeann 1924-51 inch popular edn (sheet 62)

ScG lurgann or luirgeann

Luirgeann 'shank/ridge'. This is now Braeleny (q.v.), but must be the area named Lurgavouie (lurgadh bhuide?) 'yellow ridge') marked on John Leslie's plan of 1775 (NAS E777/313/2). Dwelly gives ScG luirgeann (f.) as a variant of lurgann (f.) 'shaft, shin, leg; hind leg of a horse' and ScG lurg 'ridge of a hill extending gradually into a plain'. In Ireland, lorga(n) 'shank; ridge' is found in Lurgan, Co. Armagh (Flanagan and Flanagan 1994, 117); cf. DIL lurga 'shin-bone; shank; stalk; stem'.

chapel of St Bridget 1791-99 OSA xi, 581 ('two [rude figures...cut out of stone] have lately been discovered, on the farm of Aney, at the chapel of St Bridget')

St Bride's Chapel 1863 1st edn OS 6 inch sheet CXIV

The chapel of St Bride is described at RCAHMS Canmore NMRS no. NN50NE 3. There are two place-names associated with the chapel; Creag a’ chaibeil and Àth a’ chaibeil, or ‘rock’ and ‘ford of the chapel’ respectively. The former is opposite the chapel on the Anie side of the A84 road, while the latter is a ford across the Garbh Uisge ‘rough water’, to Coireachrombie. See Loch Lubnaig CLD above.

St Bride's Chapel is undoubtedly old and two stone cross slabs were found in work carried out at the site in 1934 and 1971. They have been dated to between 11th and 13th C. (see Canmore ref. above), but there is no indication here as to how early the dedication to Bride is. St Bride was Briget of Kildare, who died in Ireland in the first half of the sixth century.

STANK  CLD S NN582105 1 132m

Stankkerynagh 1451 ER v, 476

Stank 1461 ER vii, 52

Stank 1530 RMS iii no. 933

Stank 1535 RMS iii no. 1497

Staink 1630-50 Sibbald TNS 144r
Sc stank

_*DO*ST*_* defines stank as ‘A pond; freq[uently] one specially built or used for keeping fish and, as such, one of the appurtenances of an estate; a pool or other piece of standing water smaller than a loch’. The ‘stank’ could be the bay at the south-western end of Loch Lubnaig, just 200m E of the settlement of Stank. The existence of this name seems to show that the Scots language had taken root in this part of the Highlands in the mid 15th C. However, it is notable that there is also a ScG word _stang_ meaning ‘pool, standing water’, which MacLennan (1925) states as deriving from Latin _stagnum_ ‘standing water, pool, marsh’, but the origin of the ScG word is probably Scots _stank_. This word may have been borrowed reasonably early into Scots Gaelic, and so Stank CLD may still be a ScG name. In IrG, however, _stang_ was borrowed from Old Norse or English and means a small unit of land perhaps between ¼ of an acre and an acre (Ó Mainínn 1993, 94).

Angus Watson (2002, 47) has written that ‘At Loch Lubnaig [are] indicators of a power centre are at the southern end. [One is]: Stank NN5 10, the main holding of the barony of Strathyre...’. However, Stank was clearly marked in _Rentalia Domini Regis_ and other documents such as _RMS_ as being in the barony of Strathgartney. See (Coire) Carnach CLD.

**STRATHGARTNEY CLD R NN4511**

_ Strogarthnaa 1494 RMS ii no. 220_
Sruth Gartnaidh ‘wide valley of Gartnait’. The early forms point to ScG sron ‘nose, headland’, which may relate to the promontory that projects midway into the northern side of Loch Katrine, the highest point of which is Cruinn Bheinn. See p. 102-103 for discussion of the -gartney element possibly being Garnait.

ScG srath + p.n. Gartnait

180 This name is difficult to read on Roy, partly due to the fact it is placed over a burn; neither the NLS or SCeAN website editions make it any clearer.
Sròn Garbh-Allt ‘promontory or nose-shaped hill of Garvald’. Garvald represents ScG *garbh allt* ‘rough burn’; this was probably the earlier name for the Strone Burn. The *sròn* may have been the hill marked *Meall Mòr* ‘Big Lump or Hill’ immediately west of the settlement.

ScG *tom + an + sgriodan*

*Tom an Sgriodain* ‘hillock of the scree or stoney ravine’. Part of the grazing lands of the barony of Callander. See Angus Watson (2002, 88) for his discussion of Leaccan Sgridain BQR. The two late Corychrone forms may relate to the area around nearby Stùc a’ Chroin, where there is also a Lochan a’ Chroin and a Gleann a’ Chroin.

/ˌtɔməsˈgrɪn/

**TOM NA BOIDE # CLD OR NN523088 1 160m**

*Tom na Boide* 1862 1st edn OS 6 inch sheet CXIV

ScG *tom + an + bòid*

*Tom na Bòide* ‘hill of the oath’. Prof. Nicolaisen, in a note to the OS wrote, ‘*Tom na Boide* is a perfectly good name form and should be retained until a less suspect authority than Hutchison can be found to support any alternative spelling’ (RCAHMS Canmore NMRS no. NN50NW 3). This refers to Hutchison (1879, 61) who called it ‘Tom a’ Moidh’ and may have confused *bòid* with *mòd* ‘court, assembly’ (see *Tom a’ Mhòid* CLD and Tomavoid PMH). Also marked nearby on the 1st edn OS map are *Tom na Caillich* ‘hill of the old women’ and *Tom na Feileidh* ‘hill of the market/banquet [or kilt]?’, suggesting this was the main meeting place for either the community of Glen Finglas or the royal hunting parties who frequented this glen in the Middle Ages.

**TOM A’ MHÒID # CLD OR NN588129 1 234m**

*Tom a’ Mhòid* 1862 1st edn OS 6 inch sheet CXIV
ScG tom + an + mod

Tom a’ Mhòid ‘court or assembly hill’. This is on the eastern shore of Loch Lubnaig in the barony of Keir. There are no traditions associated with this place so far as I am aware.

TREAN FARM CLD, LXY S NN619083 1 80m

Trien 1783 Stobie

Trean 1843 RHP1442/1

Trean 1862 1st edn OS 6 inch sheet CXV

ScG trian

Trian ‘third part’. Another ‘third part’ can be found near Leny LXY, CLD: Trean Farm, Trien on Stobie in 1783. Watson says that Trian was rare (1926, 236) and yet we seem to have it twice in Menteith. It also occurs in KPN in Treinterane (1451 ER v, 475), probably ScG trian + an + siorram, part of the estate of Glentirranmuir (q.v. in KPN survey). However, since ‘thirdpart’ is common all over Scotland, this may be a Gaelicisation of a Scots term. See Thirds KPN.

Parish of Kilmadock

Introduction

See Chapter 6 for the medieval Church in KMA (See Map 20). The secular lordship was based on the castle at Doune. The castle sits on a narrow isthmus between the River Teith and the Ardoch Burn. The castle was built for Robert duke of Albany in the latter half of the 14th C, and may have been 'partly habitable' by 1381 (Fawcett 1994, 8; Fraser 1879, 237-8; Fraser, Menteith i, 478). However, the name almost certainly derives from ScG dùn 'fort' and the site may have originally been a prehistoric fort or an 'early Norman castle' (Simpson 1937, 73). Any such structure must now lie under the 14th C castle, but the Romans had 'recognised the strategic advantages' of the site in the early 1st C, when they built a fort and annex on the western side of the Ardoch Burn (Fawcett 1998, 8; RCAHMS Canmore Ref. no. NN70SW 36). Among these 'strategic advantages' in the medieval period was the fact that it was an important stronghold guarding one of the main routes to the Highlands (Pringle 1987, 6). In 1541 the lands that were given for the upkeep of the castle were detailed in Rentalia Domini Regis: 'James Stewart clamis thir landis fallingow assignit to him be the quenis grace for keiping of the castell of Down...'; these lands included Carse of Cambus, Wester Argaty, Drumcampsy #, Balkerach, Frew, and Park of Doune (ER xvii, 714-15).

Kilmadock is notable for a cluster of place-names ending in Sc toun 'farmstead, settlement'. These are concentrated in the southern part of the parish, between the River Teith and the Goodie Water, in the medieval barony of Cessintully. These are Whirrieston, Munniestoun, Mackreiston, Mackeanston, Spittalton, McErriston, Murdieston, Netherton, Norrieston, and possibly Ballinton. On the northern bank of the River Teith there is mention of Donald McCawis. This man or his sons continue to be mentioned in records to at least 1508. Donald
seems to have been the originator of the place now called Balmacansh, called Ballacauich in Stobie (see p. 123-129 for details of the baile- and toun-names in Menteith). See Chapter 6 for details of the medieval church in KMA, including the remarkable occurrence within the parish of three early church-elements – annat, cill, and *eccles.

There were significant changes in the parish boundaries of KMA and KRD in 1891. The reason was to join the two parts of KRD; land was taken from the southern part of KMA and added to KRD, while land was taken from the northern section of the detached part of KRD and added to KMA.

ACHNABANA # KMA S NN725031 2 70m

Auchounbannow 1491 RMS ii no. 2059 ['which (lands) sir Alexander Doig, canon of Inchmahome, brother of the said James, has personally resigned' (quas D. Alex. Dog, canonicus de Inchmaquhomo, frater dicti Jac., personaliter resignavit.)]

Auchnabanach c.1750 Roy 75

Achnabana 1955 MacKay 2003, 12

ScG achadh + an + beannachd

Achadh na Beannachd ‘field of the blessing’. Mackay (2003, 12) has ‘white field’, but the medial syllable is almost certainly the definite article, so the specific is unlikely to be the adjective ‘white’. Mackay (2003, 12) gives the information that Achnabana is Wardhead Cottage, which can be seen on the 1st edn OS map. W.J. Watson suggested that it derived from Achadh nam Bannaomh ‘field of the female saints’ (Watson 1927, 10). A further, albeit tenuous, religious connection, is shown in 1491 when Alexander Doig, a canon of
Inchmahome Priory, held the lands, but it is hard to see how a canon could have resiged
church lands, if that is what they were, to his brother. It may be that Alexander was holding
direct from the king. If the specific is _beannachd_, then it may be compared with Cairnbanno,
New Deer ABD (Taylor 2008, 402). Another possibility for the specific is ScG _banbh_ 'pig', so
_Achadh nam Banbh_ 'field of the pigs'. Achnabana lay 4 km SE of Loch Mahaick, and Roy shows
it in the vicinity of Argaty. See p. 107-110 for discussion of _achadh_.

Argaty 1783 Stobie

Argaty 1862 1st edn 6 inch OS map, sheet CXXV
The derivation ‘windy height’ has been suggested by MacKay (2003), presumably from \textit{àird gaothach}. This is not supported by the early forms, however; \textit{Ard-} is only found in three of the early forms above, in 1532, 1602, and 1653, so it is almost certain that these are anomalies. What we may have is rather the preposition \textit{ar} ‘at, on’ (see Anderson and Anderson 1961, 157 for their discussion of Urquhart, where \textit{ar} ‘at, on’ is borne out also by the stress-pattern in the modern place-name.). The second element may be ScG \textit{gad} ‘withy, osier’ plus a locational affix, and so meaning ‘on or beside the osier-place or osier plantation’. However, it may be that the Argaty Burn which flows through the lands of Argaty was originally named *Gady (c.f. Gadie Burn, also containing ScG \textit{gad} north of Bennachie, ABD; Watson 1926, 442).

The forms \textit{Argadycorntoun} and \textit{Argadymasoun} in 1451 are indicative of sub-division of the Argaty estate by this date. The \textit{Masoun} element is a surname or a trade name; its precise whereabouts are now unknown, but Johanni Masone appears as a tenant of \textit{Uvirargady} and \textit{Lundylug} in \textit{Retalia Domini Regis} in \textit{ER} in 1480 (\textit{ER} ix, 565), which may mean that *Argaty-Mason was another name for *Over Argaty. The \textit{Cornton} element is most likely the place where the corn was grown for the estate. The estate of Argaty was a reasonably definable entity and its old divisions can be seen in the place-names remaining today. As well as Argaty, there is Mill of Argaty (NN747016), Cornton (NN739024), Westerton (NN735025), and Easterton (NN742021). See also Lundie below.

ScG baile + an + creagean
Baile nan Creagan ‘township of the crags’. The modern farm sits between two out-crops in a largely peat/heath landscape. Some of the earliest forms contain the definite article, and the specific-initial ‘g’ could represent nasalisation of c following genitive plural article. It is not clear, however, whether we can rule out bealach as the generic in some of these forms, perhaps as a generic substitution. There may also be variation with Baile a’ Chreagain ‘township of the little rock’. See p. 123-129 for discussion of baile.

Ballandornick 1783 Stobie

ScG baile + an + dornach

Baile an Dornaich ‘township of the pebbly place’. Another possibility is ScG doirneag (fem.) gen. sg. doirneige meaning little stone, or similar, so Baile na Doirneige ‘township of the little stone’ or Baile nan Doirneag ‘township of the pebbles’. Watson (1926, 488) has Baldornoch near Clunie PER as meaning ‘pebbly stead’. This seems to be the old name for Hillhead KMA. It is notable that the forms for 1517, 1527, 1541, and possibly 1562 all contain medial ma. It is not clear what this represents, but a personal name beginning with mac or mo may be possible; however, Black (1946) contains no similar names. Another possibility is that ma represents minim confusion and rather than ma, in a is meant. See p. 123-129 for discussion of baile.

BALLICHRAW #  KMA NN659055 3

Ballichraw 1783 Stobie

ScG baile or bealach + crodh or crò?

Baile or Bealach a’ Chruidh ‘cattle farm or pass’. ScG crodh and crò are alternative spellings of the same word. The second element might be ScG crò ‘fold, pen for sheep or cattle’. This only appears on Stobie. See p. 123-129 for discussion of baile, and p. 88-90 for bealach.
ScG baile + an + craobh

Baile nan Craobh ‘tounship or farmstead of the trees’. The specific shows signs of nasalisation, which suggests MG gen. plural na gcraobh, where there is regular nasalisation in MG after gen. plural. See p. 123-129 for discussion of baile.

ScG baile + an + tôn or pn Ballone + Sc toun

Baile na Tòine ‘township of the backside, arse?’ There is also a Balanton in AFE. ScG tôn (fem.) is found in place-names to refer to arse or buttock-shaped hills, but there is no significant hill nearby. Ballinton is situated on the edge of the carse, and it may be the rise up from the carse-floor that is being referred to here. The pronunciation of the specific (/tən/ rather than /tɔːn/ as in Balinton AFE) may reflect the fact that the settlement is in the midst of a dense cluster of toun-names. However, it may be that this is actually a Sc toun name; see NAS GD430/61 (dating to 1532) which is a ‘charter by Robert, Commendator of Inchmahome and the convent thereof in favour of Master Francis Ballone, priest of St Andrews diocese, of an annual pension of £20 Scots from teind sheaves of lands of Broich, Deanston and Cambuswallace, in parish of Kilmadock’. A ‘Dene Andrew Ballone’ was the ‘superior’ of Inchmahome prior to the Erskines becoming commendators in 1529 (Dilworth 1986, 64).  

There appears to have been another Ballinton in KMA, perhaps between Daldorn KMA and Auchinsalt PMH (see, for example, Retours PER nos 936 and 953, and Laing Chrs no. 2272 where it is Balindune in the latter). See p. 123-129 for discussion of baile and toun.

Ballochnock 1687 Retours PER no. 968 [50 solidatis terris terrarum de Brae de Boquhapell nuncupatis Ballochnock]

Ballichroik 1783 Stobie
ScG bealach + cnoc

Bealach Cnuic or Cnoic 'small hill pass'. If this is the derivation, Stobie appears to show an approximation of the modern Scottish Gaelic pronunciation, which might suggest either Gaelic speakers in the area at that time or a lingering knowledge of the pronunciation. The current spelling as shown from 1862, might represent a vowel change or mistake made by the compiler of the OS name book. There is another Ballochneck in Drymen parish (NS555931), 2km WSW of Buchlyvie; early spellings for this latter name include Ballochneck (GD22/3/483/5, dating to 1701) which might have the meaning 'pass [or township, if baile] of the horse'. See p. 88-90 for bealach.

ScG baile + ?

Two of the earliest forms (1471 and 1478) have Bellik- as the generic, which could suggest bealach ‘pass’ (the 1461 form has Bellit-; the t could be a scribal error for c). The specific could be the personal-name Maurice or Muiredhach, which occurs often in Menteith (see Chapter 4 for instances of nobles with this name). The early forms show an –ych/-ik/-ich ending, while later we have an –ist ending, which also occurs in an another Balvorist shown on Stobie southeast of Lake of Menteith between Cardross and Arnclerich PMH. See p. 123-129 for discussion of baile.

/bɒlˈvʊrɪʃ/ (information on pronunciation from Mr Campbell Millar [age 50+?] of Ballachraggan, whose father always pronounced that way. Mr Millar's family have farmed at Ballachraggan for several generations).

*Broich* 1783 Stobie [Upper, Middle and Nether Broich shown]

*Wester Broich* 1862 1st edn OS 6 inch map sheet CXXIV

ScG *bruach*

*Bruaich* ‘[river] bank; conspicuous slope’. It might be thought that Broich is too far away from the River Teith to merit being Gaelic for a river bank, but Stobie shows that there was originally a settlement closer to the river called *Nether Broich*, with *Middle Broich* and *Upper Broich* running in almost a straight line south-westwards up the hill away from the river. The present Broich would seem to be the *Upper Broich* shown in Stobie, but it is shown as *Wester Broich* in the 1st edn OS 6 inch map. There is also a Broich in KPN. (See also Taylor *PNF* iv, 386-7, for his discussion of Ballenbreich, Flisk FIF).

The development of the name may indicate a dative form; see A. Watson (2002, 208) where he states Bruchmore, Monzievaird and Strowan parish PER, is ScG ‘*bruaich* dat.-loc. of *bruach*’ *(place at) bank* (of a watercourse, loch &c) plus *mòr* ‘big’. It stands beside the Earn’. He also states that ‘Broich (Glendevon), earlier *Bruach* and *Bruich*, and Broich (Crieff), both of which show evidence of dat.-loc. forms and appear to take their names from their position beside a watercourse’ (A. Watson 2002, 208).
MacKay proposed both + an + ni ‘hut of the cattle’ (2003, 28), but this has to be rejected on the grounds that ni is not found in place-names. Watson seems to suggest that the district name Buchan might be Pictish, perhaps similar to 'W. buwch, a cow' (Watson 1926, 119), but given the lateness of recorded forms for Buchany it is not clear if that applies here.

Watson (1926, 119) has Buchany in KMA as Buchny in 1511. However, the RMS reference he quotes (RMS ii no.3694) clearly has Buchny ‘in dominio de Stratherne, vic. Perth’. This instead refers to Buchanty in Fowlis parish PER on the banks of the River Almond, 9km NE of Crieff. Note also that Prof. Watson's Buchondy, is not Buchanty in Glen Almond, as he states: this must be Balquhandy PER, 3 km SE of Dunning PER; it is notable that there are charters in RMS ii [nos 115, 1703, 3840] which mention Buchondy along side the lands of Corb PER which is c.4 km SW of Balquhandy. Angus Watson states that Buchanty 'has a potentially Pictish name, implying a long-standing settlement important enough for its name to be preserved throughout a period of language change' (A. Watson 2002, 572). Whether this same reasoning can apply to Buchany KMA is unclear considering the paucity of the early forms, and the initial 'p' of the earliest form may indicate a different derivation altogether.
The burn referred to is now the Burnbank Burn, which flows from north of Gartincaber to the River Forth at Arnieve. Burnbank was originally in KRD before the parochial reorganisation of the late 19th C, and Burnbank Wood is still in that parish, while Burnbank Lane lies c.500m south of Kincardine parish church.

There are the remains of a towerhouse at NN709988 (RCAHMS Canmore NMRS no. NS79NW 6). This was a residence of the Muschet family, others included Tolgarth # KRD, Torr # KRD, Mill of Goodie KRD and Cuthil KRD (NSA x, 1258-9). Nearby is a gravestone to the memory of Margaret Drummond, wife of George Muschet of Burnbank, and her three children, who died of plague in 1647.

Calye Buchquhalye 1488 ER x, 636
Calye Buchquhalye 1494 ER x, 723
ScG coille + buachaille

Coille Buachaille 'cowherd’s or shepherd’s wood'. Cowherd is the original meaning, but it can also mean shepherd. The z (originally a yogh) is being used to signify the palatalisation or slenderisation of the preceding l. It is relatively common in Scots spellings of Gaelic-derived words and names. According to Mackay (2003, 31), Calziebohalzie was pronounced in the 1950s as ‘kalya-bo-halya with the a [presumably all of them] as in far’. However, the farmer
of Ballachraggan, Mr Campbell Millar, gave the information that the current pronunciation equates phonetically with the spelling.

/ˈkalzi boˈhalzi/

CAMBUS (1)  KMA S NN651063 1 75m

For early forms see Cambusmore, Cambusbeg, Cambusbarclay, Cammuslittill.

ScG *camas*

Camas; Dwelly has *camas* meaning ‘crooked rivulet’. DIL has *camm* as ‘crooked, bent, curved, twisted’. The word is common in simplex forms, and in these it is usually a bay, curved beach, or curved inlet (see Hogan 1910, 154; c.f. Cambus CLA). The *camas* generic in KMA may relate to the large semi-circular bend in the River Teith between Callander and Cambusbeg or a large bend in the Kelty Water near where Cambusmore sits. This is one of two areas on the north bank of the River Teith that derives from ScG *camas*. Another area c.6km SE of Cambusmore also contains a number of ‘Cambus’ names, which are dealt with under the head-name ‘Cambus (2)’ in this survey. This is a sub-division of what was presumably a place called *Cambus* or *Camas*. NGR is that of Cambusmore.

CAMBUS (2)  KMA S NN707031 1 52m

For early forms see Burn of Cambus, Cambuswallace, Cambusedward, and Milton of Cambus.

ScG *camas*
Camas (See Cambus (1), above for definition). The camas generic here may relate to the large bend in the Annet Burn between its confluence with the River Teith and the settlement called Burn of Cambus. The Annet Burn was also called the Burn of Cambus (q.v. above).

Camusbeg 1783 Stobie

Camusbeg 1862 1st edn OS 6 inch map sheet CXXIV

ScG en *Cambus (1)+ ScG beag

Camas Beag ‘small Cambus’. The _camas_ generic may relate to the large semi-circular bend in the River Teith between Callander and Camusbeg or a large bend in the Kelty Water near where Cambusmore (see below) sits. This is a sub-divison of what was presumably a place called *Cambus or *Camas analogous with the Scots affixes Easter, Wester, Upper, Nether, etc., found in place-names. Note that in 1565 _Cammis-Eistir_ was Camusbeg, while in 1608 _Camusbeg-Westir_ was Ballachallan. This is one of two areas on the north bank of the River Teith that that derives from G _camas_. Another area c.4km SE of Camusbeg contains a number of ‘Cambus’ names.

En Cambus (2) + pn Wallace

184 This name is printed in a comment by Barrow regarding an inspeximus charter by Henry III of England of a charter by William I regarding the agreement by the two Maurices of Menteith regarding who should succeed to the earldom in 1213. Fraser (Menteith ii, 227) has Cambuswalhe, while CDS (i, 447) has Cambuswathe.
'Cambus belonging to or associated with Wallace'. There is a tradition that the second element is William Wallace, the hero of the Scottish Wars of Independence (MacKay 2003, 32), and while this is not to be dismissed lightly given Wallace's exploits in the Stirling area in 1297, it can't originally refer to him, given the Cambuswethe form. It has perhaps become associated with him through re-interpretation. The 1491 and 1513 forms may relate to the Vallance or de Valognes family who were related to the Comyns by marriage when Walter Comyn was earl of Menteith in the 13th C (see CDS i under Valognes for more details). If the specific is a personal name, such as Wallace, I have found no direct evidence regarding the identity of the person involved. However, it is only around 1km SE from where Cambusedward (q.v. above) stood, and there may be some kind of allusion to the hero and anti-hero of the 1297-1307 phase of the Scottish Wars of Independence.

Cambuswallace Wood is marked on the current 1:25,000 OS Pathfinder map at NN706038, but is not marked on the 1st edn OS six inch map. MacKay (2003, 32) says this is the old name for Doune Lodge which is at the NGR given in the head form.

In ER Cammis Litill is alway placed with Estir Cammis, i.e. Estir Cammis et Cammis Litill and on the basis of the 1565 form Cammis-Eistir (note word order here) alias Cammisbeg it has been placed in Cambus (1). However, there is no guarantee that this need be so, and it might be placed among Cambus (2).

CARDONA  KMA S NN689008 1 79m

Cardona 1862 1st edn OS 6 inch map sheet CXXXI

I have been unable to find this place-name in any document or map before 1862, which probably means it is a modern name. It may be the place marked Plouthall on Stobie in 1783. There is a town called Cardona in Catalonia with an important medieval castle, but what, if any, connections there might be with Cardona KMA, is unknown, although a nobleman, Fernando Ramon Floch, 2nd duke of Cardona, died in the same year as Willam Graham, 3rd earl of Menteith in 1543. The castle of Cardona was besieged during the Peninsuar War of 1807-1814, but it is not known if any British or Scottish units took part, giving rise to the place-name in KMA.

CARSE OF CAMBUS   KMA S NS716029 1 46m

Carse of Cambus 1783 Stobie

Carse of Cambus 1862 1st edn OS 6 inch map sheet CXXV

185 Information from Wikipedia.
A carse is usually low-lying land next to a river. See DSL under carse (and DOST under cars) which states ‘Origin doubtful’. The word is ‘First found in a [Gaelicised] form c.1143 Charter Dav. I: ‘apud Strevelyn, una salina in Carsach [Carse of Forth]’. O.Sc. cars, carse, kers, a stretch of land along the bank of a river, from 1292, chiefly in place-names’. The carse element refers to the flat land between Doune and the Annet Burn running down to the Teith. Carse is being used here in the same sense as the carselands lying next to the River Forth.

CARSE OF MCORRISTON   KMA S NS674980 1 13m

Mill of Cessintully 1783 Stobie

Mill of Cessintully 1862 1st edn OS 6 inch map sheet CXXXI

ScG seisgeann ? + tulach

Seisgeann Tulaich? ‘bog of (the) hillock?’. The earliest form might suggest OG seiscenn ‘unproductive ground, marsh, swamp, bog’ (DIL), ScG seisgeann ‘extended marsh; fenny country’ which would suit the location next to Flanders Moss. Watson (1926, 415) thought Sessintully might contain ScG seas, meaning ‘seat, bench’, or in this case a terrace or plateau. Dwelly has seas as a Perthshire Gaelic masculine noun meaning ‘bench made on a hay-rick by cutting off part of the hay’, while DIL has sess as being ‘the bench of a boat’.

There is no settlement now called Cessintully, but there must have been such a place, for in 1509 there is mention of the ‘ville de Cessintuly’ (ER xiii, 636). However, the name survives in Brae of Cessintully (see above) and Cessintully Mill. From 1528 we hear of the ‘baronia de Cessintullie’ (RMS iii no. 626), and this barony contained the largest cluster of Sc –toun names
in Menteith (see 123-129 for details) The Cessintully Burn was the march between Cessintully and Boquhapple.

These lands were often divided up between different landholders. In 1528 Bertholomew Balfoure was in possession of ‘6 marcatas terrarum de Makcorrestoun, 2 marcatas in Murdowstoun, 3 marcatas de Munnowstoun et Makcreistoun, 4 marcat. de Boghall, in baronia de Cessintulie’ (RMS iii no. 626). While in 1565 James Stewart of Doune, ancestor of the earls of Moray held the lands of ‘Baxtartoun alias Boghall, 20 solidatarum de M’Creistoun, 20 solidatarum de M’Moristoun, 5 marcatarum de M’Coreinstoun, 2 marcatarum de Murdostoun, molendini de Cessintulie’ (RMS iv no. 1622).

*ScG coille* + *an* + ?

The specific may be *na tuatha* 'of the tenantry, of the local population'. See Angus Watson's discussion of Sleugnacoy [read *Sleugnatoy*] Comrie Parsh PER, where he suggests the specific may be a reference to a common muir (Watson 2002a, 186). In the case of Coilentowie, it may be a common wood. Angus Watson also explains the vowel change by stating WJ Watson's account of *Dail Mo-Thuae > Dalmahoy* and *Monadh Ruadh > Monthroy* (A. Watson 2002 186; Watson 1926, 152, 403). The vowel change is likely to be due to different orthographies in different languages. Another possibility might be ScG *toll* 'hollow' as in Pittowie, Crail parish, Fife (Taylor 1997, 13; *PNFiii*, 223-4).

Callachatt c.1750 Roy 75
Calichat 1783 Stobie

Coillechat 1862 1st edn OS 6 inch map sheet CXXIV [Wester Coillechat also shown]
ScG coille + cat

Coille Chait or Chat ‘wildcat wood’ or ‘wildcats’ wood’ or Coille a’ Chait ‘wood of the wildcat’.

The z (originally a yogh) is being used to signify the palatalisation or slenderisation of the preceding l. It is relatively common in Scots spellings of Gaelic-derived words and names.

Mackay states Coillechat is pronounced as ‘killyhat’ (2003, 48). This is one of several properties which belonged to the Muschets of Kincardine or Burnbank. It was not part of the Stewartry of Menteith and therefore does not appear in earlier volumes of the Exchequer Rolls, despite the fact that Ballachraggan and Calziebohalzie, the lands on either side of Coillechat, often do.

ScG *dail* + *dòbhran*

---

188 Note that this is not to be confused with the Spittalton 0.5km to the WSW, which was presumably part of the same estate at one point.
Dail Dòbhran ‘haugh of otters’ or Dail Dòbhrais ‘otter’s haugh’. Another possibility is ScG 

*dobhran* ‘water(s)’. Just 500m NE of the settlement are two small lochs called Easter and Wester Loch of Daldorn. The haugh probably refers to the water-meadow surrounding these lochs. Either *dòbhran* or *dobhran* is to be prefered to the ScG word *dorn* ‘fist’, referring in some place-names to fist-sized pebbles (Watson 1926, 488), since the final syllable ‘-auran/-oran’ (for /ɔrǝn/) clearly has some longevity in the earliest forms. The settlement of Daldorn is named *Kames* on the 1st edn OS six inch map in 1862. It remains that name through all subsequent 1 inch maps to the popular edn of 1924. By 1954-7 it is Daldorn Farm on the 1 inch OS map of that date. The name Kames may relate to that of the proprietor. See p. 114-116 for discussion of *dail*.

**DRUMBANE** KMA S NN664065 1 124m

*Drumbane* 1783 Stobie

*Drumbane* 1862 1st edn OS 6 inch map sheet CXXIV [Upper and Nether Drumbane shown]

ScG druim + bànn

*Druim Bànn*. The conventional rendering might be ‘white or fair ridge’, and it could have been coined as a toponymic name in Gaelic, which only later became a settlement-name, but not necessarily in the Gaelic-speaking period. Ansell (2008, 4) states the element –*ban* in the now lost *Keresban* AYR is ‘most likely G *bàn* ‘white’’. However, a number of dictionaries have alternative meanings that might be relevant here. Dwelly has *bàn* meaning ‘waste’, while Mark (2004) has ‘fallow’ or ‘empty, unoccupied’, and *DIL* has ‘untilled land’.

ScG druim + *Campsy?

Druim Camsaidh ‘ridge of *Campsy’, suggested by the 1528 form. *Campsy itself may mean ‘place on or at a (river-)bend’. C.f. Campsey/Campsie, Co. Derry, and Campsie, Co. Tyrone, which are on bends of the River Faughan and Camowen River respectively (MacKay 2007, 32-33). According to MacKay (2003, 63), ‘Drum Campsie [sic] lay a little east of north of ‘Doun’ and was as distinct from it as was Balkerach which lay to the north-west’, although see NAS GD1/406/19, dated 1752, which is a ‘disposition by Robert Mitchell, late merchant in Doune and John Christy, tenant in Ochtertyre, in favour of James Baine, late tenant in Mansfield and now resident in Doune, of part of the lands of Doune Campsie lying at the west end of the town of Doune in parish of Kilmadock, shire of Perth’. This is repeated in 1787 in an instrument of sasine (NAS GD1/406/20). On the 1:2,500 scale OS map there is marked the ‘Mains of Doune’ in what is now the south-east corner of the Moray Public Park about 0.5 km N of Doune Castle at NN729016. There was a change of name between 1581 and 1587, probably due to a re-interpretation of Drumcampsie, with regard to its proximity to and close association with Doune (for the substitution of Drum- for Dun- elsewhere in Menteith see Duncraggan CLD). The original druim may be the ridge immediately to the north of the town running NE from the Ardoch Burn and running parallel with the A84 road.

DRUMLOIST KMA S NN682061 1 142m

My thanks to Mícheál Ó Mainíinn and Paul Tempan for these references. Campsey, Co. Derry has the early form Camsan dating to 1613. In IrG Campsey and Campsie are Camsán ‘river bends’.

189 My thanks to Micheal Ó Mainíinn and Paul Tempan for these references. Campsey, Co. Derry has the early form Camsan dating to 1613. In IrG Campsey and Campsie are Camsán ‘river bends’.
Drumloist 1782 RHP14317

Drumloist 1783 Stobie

Drumloist 1862 1st edn OS 6 inch map sheet CXXIV

ScG druim + loisgte

Druim Loisgte ‘burnt ridge’. This name may be indicative of settlement expansion. It seems to be on the lands of or near to Eglisdisdane, and may have replaced that settlement at some point after c.1750 when Agglesteinston is named on Roy.

While not common in Menteith, the loisgte element is present in at least one other place-name: Blàr Loisgte ‘burnt plain’ on the south side of Loch Achray in AFE at NN511060.

/draɪmˈloɪst/

DRUMMORE   KMA S NN693001 1 60m

Drummore 1862 1st edn OS 6 inch map sheet CXXXI

ScG druim + mòr

Druim Mòr ‘big ridge’. This may not be a genuine ScG name, but may be a modern Sc name, since I have found no earlier reference that the 1st edn OS for this name. However, druim-names are not unknown in this area: almost 1km due east, marked on Stobie, was Drumshogle.

DRUMMOND   KMA S NN668043 1 148m

Drummond 1783 Stobie

Drummond 1862 1st edn OS 6 inch map sheet CXXIV [North and South Drummond]
It is not known who the eponymous Drummond was, but if the settlement dates from the medieval period then a relation of the Drummonds who were the major landowners of Kincardine parish must rank high on the list. However, it may not be a personal-name, and may be the topographical name ScG *druimean* ‘little ridge’, but perhaps influenced by the presence of Drummonds.

**DRUMVAICH**  KMA S NN675043 1 58m

*Drumvaich* 1862 1st edn OS 6 inch map sheet CXXIV

ScG *druim + bàtheach*

*Druim Bhàthaich* ‘ridge of the byre, cow-house’. Cox in Brigh nam Fàcal has *bàthach*, gen. sg. *bàthaich* as fem., while Dwelly has *bàthaich* (nom. and gen. sg.) as masc. This appears to be the *Drumbuck* shown on Stobie.

/drʌmˈvaɪx/

**EARLAND**  KMA S NS679978 1 12m

*Ireland* 1783 Stobie

*Earland* 1862 1st edn OS 6 inch map sheet CXXXI

Sc *? + land*
There is a Sc verb *Ere* (*eir, ear*) meaning ‘to engage in ploughing; to draw the plough’. The derivation may be ‘plough-land’. *DOST* shows *ere* being used by Andrew Wynton, writer of the *Orygynal Cronykil of Scotland* in the early 15th C.

Pictish or British *lanerc
‘Clearing in a wood’. The early forms (tribus Lanarkynnis) imply strongly that the lands of Landrick were divided into three parts and we can see this at least as early as 1317 x 1322. The early forms also show a –ynn affix, perhaps a locative or a diminutive ending, or possibly a Gaelic plural ending –ean, along with the Scots plural –is. If it is a ScG plural, then it may be one of the earliest attestations of it being used in Scotland; this plural ending is only securely dated in the early 16th C The Book of the Dean of Lismore (Ó Maolalaigh pers. comm.). It seems significant that in the early forms Lanarkynn (and variants) is only mentioned when the three ‘Lanarks’ are concerned; in other words in 1509 the place is called Lanark, not Lanarkynn. If it does represent a ScG plural, then this shows that division of Lanrick took place when Gaelic was the everyday language of the area. The mill of Lanark was the mill of the estate of Lanrick.

This is one of two lanercs in Menteith; there is also Lendrick CLD, while just over the border in DLE is Landrick (see p. 48 for this element as an indicator of p-Celtic in Menteith).

There was a chapel at Lanrick, indicated by the Chapelland mentioned in 1509, and at least later this was a private chapel of the owners of Lanrick. It is also cited as a chapel of the ‘ancient monastery of St Madocus, now called Kilmadock’ (see p. 147 above).

LERROCKS KMA S NN738038 1 102m

Lerocho 1783 Stobie

Lerrocks 1862 1st edn OS 6 inch map sheet CXXV

Sc larach from ScG làrach
DOST has Sc larach as meaning ‘the site or the foundation of a building, or of a stack; the traces of an old building’, much the same as ScG làrach. It is not known what type of foundation or building is alluded to here, but a ‘peat larach’, an ‘artificial mound on which peat was stacked to dry after cutting’ has been suggested (MacKay 2003, 81). However, to have left its mark on the local nomenclature, we may be looking at something more significant in terms of remains. The earliest mention of larach in DSL relates to a croft called Tailzourcroft in Strathearn in 1508 (see also RMS ii no. 3238).

The final ‘o’ in the Stobie form is very likely to be an engraving error mistaking o for s.

Lundie 1862 1st edn OS 6 inch map sheet CXXV [Wester, Mid, and Easter Lundie shown]

ScG lunndan
Lundaidh ‘green meadow, marshy ground’. From a postulated Pictish Lunndan, see Taylor (2008, 338) where he gives reasons for thinking that lunndan may be of Pictish origin. The form Lundy in Sc or SSE may be due to loss of the final nasal in the language contact situation.

The –skeach/skeauch element in many of the forms is probably ScG sgitetheach ‘bush; whitehorn, hawthorn; thicket of hawthorn’, while the -lug element is likely to be ScG luig, genitive of lag ‘hollow’.
The Arthur and McCane elements in some of the early forms are obviously personal names and could relate to tenants. Quite who the eponymous Arthur and McCane were is not known; the names do not appear among the tenants or landholders in the *Rentalia Domini Regis* in *ER*, but note that there was a Donald McCane on record as a tenant in the lands of *Sessintuly* from 1480. It would appear that he is the eponym of Mackeanston KMA (*ER* ix, 566). It is not known if he had any connection to Lundy McCane, but he did have lands elsewhere in Menteith, including half the lands of Lendrick and Dreppan # in CLD (*ER* ix, 561, 594).

There had been sub-division of this estate by 1451 and later forms show the Scots plural. Lundie seems to have been a distinct estate but was perhaps combined with Argaty for taxation purposes in the sixteenth century.

/ˈlʌndə/
A certain Donald McCane is on record from 1480 as a tenant in the lands of Sessintuly. It would appear that he is the originator of Mackeanston (ER ix, 566; see also Cessintully, above, for those lands that comprised the barony of Cessintully). In 1484 Donald’s son Andrew is also mentioned as a tenant in the lands of Cessintully (ER ix, 599), and both men are still mentioned as tenants until at least 1502 (ER xii, 599). Both men held thirty shillings of land each, but in 1509 Andrew is mentioned as a tenant in three pounds or ‘tribus libratis’ (i.e. sixty shillings) of land (ER xiii, 636), which suggests that either Donald had died or had resigned his portion in favour of his son, a practice frequent in early modern Scotland (Sanderson 2007, 173). The first mention of a place called Makanestoun in 1541 tells us it was:

‘Clamit be Donald McCaane in auld few, payand yeirlie vii li x s few maill and vii s iii d mart siver, and producit his faderis charter thairupon’ (ER xvii, 715).

This is presumably the original Donald’s grandson, who was given sasine of ‘trium libratarum terrarum de Cessintuly’ in 1537 (ER xvii, 742).

Black (1946, 522) states that the name derives from Maclan and notes that ‘half the lands of Lanerky and Caschdrapane’ in CLD were ‘leased to Donald McCane or M’Kane in 1480’ (Black 1946, 522 quoting ER ix, 561, 594). It is not known whether this is the same Donald McCane in Cessintully. It is also notable that a McCane is behind a division of Lundie KMA from 1451 to 1506 (see Lundie above). See p. 123-129 for discussion of toun.

Pn MacCrae + Sc toun

Black has this surname as a form of MacCrae (1946, 479). What we seem to have is Makcre with the Scots –is ending. What is odd here is that, unlike the other toun names in the barony of Cessintully, there is no mention of anyone called MacCrae, or any of its variants, in the Exchequer Rolls for the period when all the other toun-names in Cessintullie are coined, or indeed in any other source, and yet it is on record far more times than Mackeanston. There seems to have been a Macray at Cammuslittle # KMA in 1613 (RMS vii no. 797 [Caummuslittill alias Cammus-Macray]). See p. 123-129 for discussion of toun.

Thomas and Forsyth McCorane are tenants in the lands of Cessintully in 1480 (ER ix, 566). Black (1946, 558) has this name as a form of Macquarrie and in 1499 Thomas and Forsyth are designated McQuhorane and McQuarrane respectively (ER xi, 414). Both men cease to be tenants in 1502 when Thomas McQuhorrane exchanges his portion with Alexander Balfour ‘Thome McQuhorrane in excambium cum Alexandro Balfour’ (ER xii, 632). In the same year Maurice McCorrane pays twenty shillings for entry into the lands of Cessintully (ER xii, 632). There are no more mentions of any of these men after this, and the lands are usually divided between the earls of Moray or the Balfour family. See p. 123-129 for discussion of toun.

This is perhaps a surname based on the Gaelic word for monk, *manach*, which according to Black was a personal name in PER written as *Monach* or *Munnoch* (Black 1946, 606, 619). This may have been a settlement of a tenant of the priory of Inchmahome. See p. 123-129 for discussion of *toun*.

ScG surname + Sc *toun*
Who the eponymous Murdoch was is unclear. Murdoch Smyth was a tenant of Cessintullie from at least 1480 (ER ix, 566) to 1488 (ER x, 635). In 1484 John Murthoson becomes a tenant (ER ix, 599), while in 1486 Murdoch Kessikisson and Kessok Murthauson are both mentioned as tenants, and in 1494 John Smyth Murdoson is a tenant (ER x, 722). There are no Murdoson or Murdos mentioned in ER after this date, which might suggest that the name Murdieston (or its earlier variants) was recognised locally before the name was noted by
clerks of the Exchequer and other branches of the king’s government. See p. 123-129 for discussion of *toun*.

Rubha ‘point, promontory’. Watson (1926, 246) has Row (now Rhu) DNB as an Rubha ‘the point’. Row in Menteith seems to refer to the steep ground sharply rising from the carse of the Forth on the north side of the Teith between Blair Drummond and Ochtertyre, and when viewed from the east, e.g. Stirling University campus, has the appearance of a promontory. It is unusual, however, to find rubha so far inland, although there are several other instances of rubha in Menteith, esp in AFE. See also Easter Row KMA and Wester Row KMA for early forms. Note that Dwelly spells rubha as rudha.

Sc sauchen

‘(Place of) willows’. This may be the ‘sauchin’ of Sauchinthome, see below for details. The owner of Sauchens informed me that a new cottage built on the grounds of the farm is called ‘The Willows’.
Sc sauchen + en Thom

The first element is likely to be the Scots adjective sauchen, ‘sallow or willow’. It is a reasonably comment element in place-names and can be found locally in Sauchie CLA, and Old Sauchie STL, as well as further afield in Sauchen ABD and Sauchiehall Street, Glasgow, the latter named after a settlement called Saughyhall in Richardson’s map of Glasgow of 1795.

See also Coulattis KMA, above, and Thom KMA and Watston KMA, below.
ScG suidhe + an + breitheamh

Suidhe a’ Bhreitheimh ‘seat of the judge’. According to Watson a ‘large stone on a knoll in front of the farm-house’ was the seat of the Judge of Menteith (Watson 1926, 517; see p. 96 above). Watson further reports that tradition states that this stone is where people were judged and punished. 4 km SE in DLE is the Judge’s Cairn.

Note that the original Severie is now called Severie Cottage (see below); the Severie mentioned in the headform above was called Coldhome from at least the 1st edn OS map in 1862 until the one inch popular edition of 1924. This appears to be the Sheals shown on Stobie in 1783 (although, confusingly, Stobie shows Coldhame on his plan for the earl of Moray in 1782 [RHP14317]). See also Severie Cottage and Waterside below.

Straid 1783 Stobie

Staait 1862 1st edn OS 6 inch map sheet CXXIV

ScG sràid

Sràid 'street, road'. Road must be the preferred meaning here in such a rural location. Bain has 'Early Irish sráit', c.f. DIL which defines sráit as 'street, road, path, way'. Straid, c.5km from the Roman fort at Bochastle and 8km from the Roman fort at Doune, may indicate a Roman road or other paved road (c.f. Barrow (1992, 210) where he writes of Old English streaet as being a possible indicator of Roman roads). The modern A84, the main road between Callander and Doune, follows the likely course of the Roman road connecting the two forts, or close to it.

Torrie 1862 1st edn OS 6 inch map sheet CXXIV [Wester, Middle and Easter Torrie shown]

ScG tòrr + -in

Tòrraidh 'conical) hill place'. The -in ending could be a diminutive or a locative ending. There is a small hill 650 m to the north of Mid Torrie (which supplies the NGR), marked ‘Dun’ on the 1:50,000 OS Landranger map. This must the tòrr in question, although another fort was discovered in 1956-8 some 950 m to the SE of the Dun. Further details can be found at RCAHMS Canmore NMRS nos. NN60SE 1 and NN60SE 3.

Torrie-Spens must be named after John de Spensa, designated ‘burgensi de Perth’ in 1426 (RMS ii no. 45; see p. 67 above). Torrie is now split into West, Mid, and East Torrie. This is one of small number of tòrr -names in Menteith: there is also Tarandoun CLD, Upper, Lower, and Easter Tarr surround Tamnafalloch KMA, and in KRD there is Mill of Torr. See also Easter Torrie and Wester Torrie KMA for early forms.
Taigh an Spioraid ‘house of the spirit’. ScG spiorad (masc.) ‘spirit; spirituous liquors’ (Dwelly).

It is presumably the latter here, and may have been a place where whisky was distilled.

See Watston below.
This place is almost certainly named after either Walter Dog (modern Doig) or Walter Smyth, or perhaps both, who were tenants in Coldoch Westir (see comments on Coulattis above) in 1488 (ER x, 635). Although Wat Doggistoun and Wat Smy[t]toun were undoubtedly separate settlements, it is not known which of the two was the foundation of Watston. The two men or their families are tenants of other places in this area, holding of the king. Patrick Dog is a tenant of Collach (Coulattis) in 1484 (ER ix, 596). Indeed the Dogs were still tenants in the area until at least 1541 (ER xvii, 715-6), while the Smyths are last seen in 1502 (ER xii, 632, 636). Walter Dog was ‘camerarii de Menteth, Strogartnay, Buchquhidder, Drummond, et Duchray’ in 1471 (ER viii, 66). The lands of Watston were formerly known as Thom (q.v. above). See p. 123-129 for discussion of toun.

WHIRRIESTON  KMA, KRD S NN662012 78m

Quarriestown 1783 Stobie

Whirrieston 1862 1st edn OS 6 inch map sheet CXXXI

Pn Quarrie + Sc toun

According to Black (1946, 677), Quarrie is the same name as Quarrel and Quarrier, the later meaning someone who works in a quarry. The surname Quarrel derives from Quarrel, Falkirk
parish STL. While a surname is likely, I have found no one with this name in the documentary record.
Parish of Kincardine

Introduction

Kincardine underwent a drastic change in the 1891 parochial reorganisation in Scotland (Shennan 1892, 245-7; see Map 21). Prior to this date KRD was split into two distinct parts separated by KMA, which extended to the River Forth. The eastern part was designated the barony of Kincardine, and contained Kincardine, Ochertyre Chalmerston, Drip, Bad, Westwood, Cambusdrenny, Bordland #, Cowstry, Dargraw #, Tolgarth #, Ross The Offers, Lochfield, Coldoch, Arnieve, and Mukersyde # (RMS iii no. 1560). The western part of the parish, with modern Thornhill at its centre, may have had at its heart the lands of Boquhapple, perhaps originally *bothchapail* 'horse bothy or sheiling', perhaps indicating an important horse rearing area. In 1891, KRD was given those parts of KMA south of the Goodie Water and the modern B8031 road to connect the two parts, while KMA was given land on the eastern fringes of its border with KRD and most of the northern half of the detached portion, i.e. north of the modern A873 road, as compensation.

The majority of KRD is almost completely flat with only the northern part of the parish showing any signs of height; Boreland Hill is the highest point at 55m. In fact thirty-nine of the fifty-four place-names on the 1;50,000 OS map are under 20m, with the vast majority of those being 9 to 13m in height. Much of the parish was covered in a peat bog (variously called Kincardine Moss, Blairdrummond Moss, Drip Moss, or the Great Moss) until the late 18th C. Of the 5000 acre Blair Drummond estate, 2000 acres were peat bog (Mackay 2005, 113). Much of the moss was 3m thick and Lord Kames of Blair Drummond is usually credited with beginning the process of clearing it (ibid.). Stobie shows the settlements of people, called the Moss Lairds, who were charged with clearing the moss. However, as John Harrison (2003, 28) has argued persuasively, clearance on the edges of the moss must have begun much earlier,
for how else are we to explain the Gaelic names of places here, such as Arnieve, Baad, Cambusdrennie, Offers, and Ross in KRD, sitting as they do like freiceadain on the front line between Gàidheal and Gall. Baad and Cambusdrennie are on record by 1423. Harrison thinks ‘[the Gaelic names] are likely to have originated by the 12th century’, although he does concede that ‘specialised survey would be needed to confirm their origin so early as that’ (ibid.). Harrison may be correct in his assumption, but there is no evidence for these place-names before the 15th C. However, the Scots place-name Drip is not on record before 1423, a similar situation to Cambusdrenney and Baad, but we know Drip exists in Lanarkshire as a place-name in the 12th C.

ScG àird + an + neimhidh?
Áird an Neimhidh ‘height of the nemeton; church-land’. The earliest forms indicate a generic of G àird ‘height’ along with the genitive definite article an. It had become Arneif by 1582, and through the loss of d before n this has come to look like an Arn-name, ScG earrann ‘portion, division’. The specific could be a word related to Gaulish nemeton ‘sacred grove, sanctuary’,

367
and so it may be ‘the height or portion of the nemeton’. This element is behind such names as Rosneath, across the water from Helensburgh, and Navitie in Fife. Watson and Barrow think a nemeton is ultimately a pagan term (Watson1926, 244; Barrow1998, 56, 58-9), but at some point developed into Gaelic as neimhidh, ‘churchlands; chapel’ from OIr nemed ‘sacred; noble or sacred place’ (Taylor, PNF i, 151). It may be, therefore, that Arneive was part of the lands of Inchmahome or even Kincardine parish church. It is part of ‘terras et baronium de Kingcardin’ in 1536, and is still described as such in 1675.

There may be some objection in seeing àird in a landscape which is seemingly completely flat, but may originally have been a rise in the peat that was here before the Improvements of the 18-19th Centuries. The impression of height seems to be confirmed by looking at the aerial views on Google Earth where the Burnbank Burn makes a fairly deep indent into the soil as it meanders to meet the River Forth 300m NW of Arnieve. Compare Hill of Drip near the meeting of the Rivers Teith and Forth; it stands at 14m, just 6m in height above the old Bridge of Drip 250m to the east. In any case, we need not think of àird as meaning a great or significant height in this particular landscape: àird (or its m. equivalent àrd) can mean promontory or headland, and the raised ground may have given the perception of such a feature in the flat landscape. A recent survey of the moss has highlighted the occurrence of ‘raised mosses’, which can have ‘surprisingly steep slopes’ and ‘are raised into mounds through retaining water delivered by rainfall’ (Harrison and Tipping 2007, 465). This may be what had happened at Arnieve. See p. 116-119 for discussion of earrann.

ScG bad or Sc bad

Am Bad ‘spot, cluster, thicket’. Loaned into ScG from Pictish. MacBain states that it is ‘probably a Pictish word’. Watson thought it was ‘simply British bod ‘residence’ retained in the specialized sense of ‘place,’ ‘spot’ (Watson 1926, 424). Taylor disagrees with Watson’s suggestion that it is cognate with W bod ‘residence’, but agrees that it meant ‘spot, cluster, tuft’ (see Taylor, PNF i, 229, where he discusses Bads, Culross FIF, and also Taylor, forthcoming, where he discusses Bad under P-Celtic loan-words attested as common nouns in Scottish Gaelic).

Bad was also borrowed from ScG into Scots (DSL). The possibility that this could be a Scots coinage here this may be supported by use of the definite article in the second oldest form,
although that is not necessarily evidence for the original language of coining. A second point against Baad KRD being Scots is that Sc bad seems to appear very late; the earliest attestation in DSL is 1754, 331 years after Baad KRD appears on record. See also Baad Spring PMH.

*Blairdrummond 1783* Stobie

*Blair Drummond* 1863 1st edn OS 6 inch map sheet CXXXII

Transferred name *Blair + pn Drummond*

This a transferred name. The Drummonds’ main seat was at Drummond Castle near Muthill, and they held the barony of Kincardine until 1683 when it was sold by the earl of Perth to a kinsman, George Drummond of Blair in Blairgowrie. He may have called it Blair Drummond to distinguish it from Drummond Castle 22km to the north. The name Drummond derives ultimately from Drymen STL, from where the Drummonds appear to have had their original base. They first come on record in 1225 when Malcolm Beg appears as a steward to the Earl of Lennox (*Scots Peerage* vii, 28), and gain the barony of Kincardine in 1364 through the marriage of John de Drummond to Marie de Montefixo. The surname does not appear until 1271 when Malcolm Drummond appears as a witness at an inquest of Walter Stewart, Earl of Menteith (*Fraser, Menteith* ii, 218, *SP* vii, 30). The Drummonds had close connections with Menteith and a Drummond, probably John Drummond who obtained a papal dispensation to marry Margaret, Countess of Menteith in 1360, is commemorated on a grave slab found at Inchmabome Priory (*Steer and Bannerman* 1977, 161).

Bowhapple 1783 Stobie

Boquhapple 1863 1st edn OS 6 inch map sheet CXXXI

ScG both + capall (earlier capull)

Both Chapaill 'horse/mare sheiling'. The grapheme quh in the early forms indicates lenition of the initial c of capall. Boquhapple may have been an important horse-rearing area in the earlier Middle Ages. It is notable that Wards of Goodie, c.1 km SW, was used as waste for the king's horses during hunting trips (ER viii, 70; Gilbert 1979, 125), so we may be looking at a similar situation here. On the OS 1:25,000 Explorer map there are marked Mains of Boquhapple (NN661000), Boquhapple House (NN658001), Middleton of Boquhapple (NN655002), Chapel of Boquhapple (NN655005), Brae of Boquhapple KMA (NN657018), and Moss-side of Boquhapple (NS658986). The latter two places are 3km apart, suggesting Boquhapple was a reasonably extensive estate. On the 1st edn OS map a settlement called Boquhapple (i.e. without any qualifiers) is shown, but this is now Mollan (NN651004). The –
**quhapple** element has been interpreted as ‘chapel’, perhaps of Inchmahome (Hutchison 1899, 141 – where he has ‘House of the Chapel’), but this seems unlikely and ScG *capall* is to be preferred, (although, note in CLD there are two places associated with St Bride’s Chaple: *Creag a’ chaibeil* and *Âth a’ chaibeil*, or ‘rock’ and ‘ford of the chapel’ respectively). This is not to deny that there may have been a chapel at Boquhapple, as indicated by the modern name Chapel of Boquhapple (NN655005 on the 1:25,000 OS Explorer), but the name does not appear on the rental of Inchmahome in 1646 (Fraser, *Menteith* ii, 368), and there is no other medieval text that mentions a chapel here.

The entry for 1330 has the place-name *Busby*: this is an error; the 1431 entry, which is basically a duplicate of the 1330 charter shows the correct form, *Rusky*, which makes more sense since Rusky PMH is only 3km west of Boquhapple. As can be seen from the above, there is a complex tenurial situation regarding the lands of Boquhapple. Regarding the entry for 1550, *Balfouris-Bochquhoppill alias Rattounraw* (Sc *rotten row* ‘rat-infested row [of houses]’), Stobie appears to show *Rottenrow* at what is now Mains of Boquhapple. The *Exchequer Rolls* show Andrew de Balfour and Michael de Balfoure having rights to the rents of some properties in the immediate vicinity in 1451 and 1453 respectively (*ERv*, 477, 596).

‘Lands of the thorny wild plant’. Stobie shows an adjectival form.

BURNSIDE  KRD S NS730978 1 12m

I have not been able to find this place-name on any map before the 1:50,000, and even then it is not on the first edition of this series published in 1976. There is an un-named building shown in the 1st edn OS 6 inch map sheet CXXXII.
The eponymous burn seems to be called the Ross Burn, judging by the lane called Rossburn Lane marked on 1st edn OS 6 inch map. This may be the burn that flows from Loch Watston KMA, called Burn of Muck on RHP24481 in 1754.

ScG camas + draighneach

_Camas Draighnigh_ 'bend of the blackthorn thicket' Stobie shows E, M, and _W. Cambusdrennie_; while West and East Cambusdrennie survive today on the 1:25,000 OS Explorer. Note that the name is Cambusdrenny on the 1:50,000 OS Landranger, suggesting inconsistency within the Ordnance Survey (c.f. Brackland CLD above). On the 1754 estate plan the surveyor, William Winter, shows a sheiling (sheil) on the very edge of the unclaimed moss c.300m north of the modern settlement of East Cambusdrennie, near the modern unclassified road called Chalmerston Road. See Cambus (1) KMA for camas element.

Watson has Drynie in the Black Isle as _Draighnigh_, a locative of _draighneach_, and Bardrainney, Renfrewshire, as _barr draighnigh_ 'top of blackthorn thicket' (Watson 1926, 200).

An alternative analysis may be ScG camas + en *Drenny. The final –y may be a reduction of ScG locational ending –in, although this is rare in Menteith (see Leny CLD for discussion of this ending).

Chalmerston 1863 1st edn OS 6 inch map sheet CXXXII

Pn Chambers/Chalmers + Sc toun

Chalmers ultimately derives from Old French de la chamber, of the chamber, i.e. a chamber attendant, possibly of a noble or the treasury. The medial b of chamber was lost in Scots through elision; the medial l of chalmer was used to indicate the length of the preceding vowel (Black 1946, 145). Who the original Chalmers/Chambers was is not known, but a possibility is James Chauymers, clerk at the king's chapel (clerico capelle domini Regis) mentioned in 1454 regarding the Exchequer Rolls for Menteith (ER v, 674). Chalmerston was originally called the 'Offers of Ochtertyre'; see p. 161-163 for more details of the element offers/offrance.

Coldoch 1863 1st edn OS 6 inch map sheet CXXXI

Coldoch was originally a large estate containing not just Coldoch as it is today, but also the modern East Coldoch and South Coldoch. Note, however, East Coldoch is not the same place as Coldoch-Eister mentioned above; the latter place is now Spittalton KMA. Similarly, Coldoch-Wester is now Craighead. Furthermore, there is a place which was called variously Conulathe, Cowlauch, Collocht, etc., from c.1317 to 1617 (see Coulattis KMA above), and is now Sauchans
The Exchequer Roll forms change from Codlaugh to Colloch and Collach and then back to Codloch and Coldoch between 1451 and 1488. What is important here are the names of the people who stayed in or owned these places. In ER ix – xii we see the same people turning up. In 1480 there resides in Collach Alexander Muschet, Walter Smyth, Andrew Smyth, James Redheuch, Patrick Dog, and Elizabeth Nory, among others. In 1486 it becomes Codloch and only Alexander Muschet is not mentioned. The others are mentioned up to at least 1502.

What may have happened is that the estate of Cowlauch/Codloch has been split and the southern portion became Coldoch to differentiate it from its northern neighbour, perhaps similar to the situation regarding Alva/Alloa in Clackmannanshire (see also comments to Collessie FIF (Taylor, PNF iv, forthcoming)). See Watson (1926, 378, 420, 482) for collach ‘hazel wood’, but it may be likely that forms beginning cod(e)- are closer to the namers’ original intention than forms beginning cold-, and so the –doch element is unlikely to be ScG dabhach, which is often anglicised as doch or do. There are a number of names for different parts of Coldoch, all of which can be seen in the list above, but they include Spittalton, Craighead, Ashentree, and Dunrobene. Only the last of these is no longer extant. See also Coulattis and Galdcollochyes KMA.

There is a broch at NS696981, which sits on the top edge of the slope that rises above the carse. See RCAHMS Canmore NMRS no. NS69NE 6 and Graham (1951, 12-14).

Brit. ? + *trev

'? settlement, farm'. The first element could be a word similar to W. caws 'cheese'. According to John Lesley in his Historie of Scotland, published in 1578, Menteith was famous for its cheese: 'westwarde [of Stirling] lyes monetheith, nobilitat and mekle commendat through the name of sik cheise as nane fyner' [westward lies Menteith, renowned and much commended through the name of such cheese as none finer] (Cody 1888, vol. 1 28-9). However, if the cous-element is W. caws, then this is the only 'cheese' name to be found in Menteith. Country has survived in South Hill of Coustry and in Valley of Cousty (sic), the latter being a disused gravel pit and was called Valley of Coustry on the 2nd edn OS six inch map. The township of Coustry, shown as Cowstrie on Roy, had disappeared by the time Stobie surveyed the area in 1783. A large part of the area from Blair Drummond to the bridge at Doune, and bounded by the River Teith and the modern A84 road, was given over to policies for the Blair Drummond estate, so it is possible this area was 'cleared' soon after Roy surveyed the area c.1750.
Lack of earlier forms means we cannot be sure in which language this place-name was originally coined. Taylor (2006, 302) offers three possibilities: ‘one is that it is from G calltainn ‘hazel’; another from Sc coo + Sc den ‘cow den(s) or steep valley(s)’; a third from Sc cow ‘shrub, bush, especially of heather, broom or whin (gorse)’ (SND) + Sc den, in the sense ‘heathery, broomy or whinny den’, the first and third possibilities would be consistent with the other shrub- or tree-like names such as Baad and Brierlands.

Sc craig + heid

Sc craig + heid
It is difficult to be certain what the 'craig' in question here is. It could be the cairn shown at NS691982 or perhaps the broch at Coldoch c.600 to the east. However, Crawford (1949, 21), when writing of the route north from Frew, notes the 'cliff at Coldoch', which must be the significant and sudden rise of the ground from the carse. This part of the lands of Coldoch was called Coldoch-Wester, Coldoch-Easter (not the same as East Coldoch) became Spittalton by at least 1575 (RMS iv no. 2426). See discussion under Coldoch KRD.

Sc threip from OE þréapian

'Debateable land; disputed land'. This settlement is on the edge of the earldom of Menteith as it meets several territorial boundaries: the shire or soke of Stirling and earldom of Menteith; the parishes of Kincardine and St Ninians; the dioceses of Dunblane and St Andrews. See p. 64-65 for a short discussion of this name as an indicator of Scots penetrating in Menteith at

194 This is from part of a chronicle in metre by John Hardyng, an English chronicler, a contemporary of Henry V and Henry VI. He seems to have visited Scotland in the reign of James I (1406-37) (http://en.wikipedia.org/wiki/John_Hardyng). The relevant part of his chronicle has: 'From Sterlyng then over the river of Foorth/ Pass alongest the bridge to Camskinelle,/ and if it be broken toward the North,/ Unto the Foorde of Tirps under the fell/ Then spede you westward, thre miles as men tell/ Wher ye may passe to the down of Menteth/ Which passeth from yre Foorth thre miles unneth' (Brown 1891).
an early date. See also Barrow (1998, 68, 71) and (2003, 317-8) for a short discussions of Dripp LAN and *threep*.

This was one of the main routes from Stirling to the north and west. Watson (1926, 349) states that Frew was the first place where the Forth was fordable, but as can be seen from the Hardyg reference, there seems to have been a ford at Drip in the early 15th C. By 1724 a ‘ferry boat’ had replaced the ford (*Geog. Coll. i*, 339). The bridge of Drip was built between 1745 and 1770.

Frew c. 1685 Adair

Frew 1745/6 Edgar

Ford of Frew c. 1750 Roy 70
According to Watson, the Gaelic for Frews is *Na Friùthachan* and seems to be related to *Wfrwd* ‘current’ (Watson 1926, 348-9). Frew has the Sc plural –*is* ending by at least 1532, and the *Eister* and *Middill Frew* of 1528 implies there was a Wester Frew by this date. The fords of Frew are situated near where the Boquhan Burn meets the River Forth and so would presumably be a place where the alluvium or silt from the burn would build up, hence a place where we would expect to find a current and a ford. This is confirmed by the aerial view on Google Earth, which shows the Forth has narrowed here due to the build up of silt.

However, the lack of a dental stop has placed doubts as to whether *Wffrwd* is the word behind this place. Alternatives might include *Wffrau* ‘stream, flow, flood’ attested in the 12th C, or *Wffraw* ‘swift, lively, brisk’ also attested in the 12th C (*GPC*; Guto Rhys pers. comm.). Frew might not relate to the actual ford itself, but may instead be an earlier name for the Boquhan Burn, the largest burn to flow down from the Gargunnock Hills, which meets the River Forth at or very near the old ford of Frew, and just 100 m downstream from the Bridge of Frew.

The Fords of Frew were one of the main crossing points from north to south across this part of Menteith. The strategic crossing point was the best known west of Stirling. Indeed, it has been said that they were known in early Medieval times as one of the ‘seven wonders of Scotland’ (Watson 1926, 350; Crawford 1949, 20); which may refer to the construction built by Cinaed mac Alpín noted in the *Chronicle of the Kings of Alba* ‘And Kenneth walled the banks of the fords of Forthin’ (*ES* i, 512). *Forthin* could be an early form for Frew; *Ol foirthiu* can mean ‘fords’ (DIL). However, it may be that *Forthin* is an early form for the River Forth (Taylor *PNFi*, 39, 41-2).

Harrison and Tipping (2007, 464) are of the opinion that the ‘Auchmore’ (*Àth mhòr* or ‘great ford’) mentioned in Bower’s *Scottichronichon* (Book II, chapter 10) signifies Frew, whereas Barrow believes it to be the ford at Cardross (Barrow 1992, 213). It is likely that Barrow is correct, for the ford at Frew would have been famous in Menteith, and Bower’s
informant, probably a monk from Inchmahome, would presumably have mentioned Frew had it been that ford he meant.

ScG gart + -ach?

Gartach ‘enclosed settlement or field place?’ This is one of a large number of gart-names stretching from the east borders of Clackmannanshire to the River Leven and River Clyde in the west, and is one of a small cluster in this part of Menteith, the others being Gartincaber KMA and *Gartocharn KMA. (See p. 119-122 for discussion of gart).

GOODIEBANK KRD, KMA S NS668979 1 12m

Goodiebank 1863 1st edn OS 6 inch map sheet CXXXI

En Goodie + Sc bank

‘Settlement on the banks of Goodie Water’. See Wards of Goodie PMH for early forms of Goodie. The Goodie Water flows eastwards out of Lake of Menteith and meets the River Forth at NS702970, c.0.5 km NW of Arnieve KRD. The river has been canalised for much of its upper course, and is shown as such on Stobie’s map of 1783. However, Roy (c.1750) shows it as a meandering river over the whole of its course. Although now merely a burn, it seems to have
been more substantial with a body of standing water along its length; in 1507 there is
mention of 'stagn<um> de Gudy (RMS ii no 566), and in 1685 this body of water was known
as the 'Laik de Guddie' (Retours PER no. 940). The 'laik' seems to have been near Calziemuck
PMH; a charter of 1509 states 'tertiam partem de Keilzemuk, cum piscaria earundem in
stagno de Gudy [the third part of Calziemuck, with the fishings of the same in the lake of
Goodie]' (RMS ii, no. 3347). In 1583, the Master of Works at Stirling Castle could state that
Stirling Castle has 'the maist plesand sitwatione off ony of his hienes palayes be ressonet it will
have the maist plesand sycht of all the four airthis, in speciall perk and gairdin, deir thairin,
up the rawerais of Forthe, Teyth, Allone, and Gwddy to Lochlomwund' (AMW i, 310).

The name Goodie may derive from ScG gaoth (f. and m.) 'inlet, tidal stream; bog'.
Kingoodie, Longfororgan PER (Chingothe 1153x56 RRS i no.123), is possibly from ScG ceann +
Sc G gaoth 'head or end of the inlet'. The element is found as gaoth (m.) in modern Irish, OG.
gáeth (m. & f.) 'sea, stream, estuary; shallow stream into which tide flows and which is
fordable at low water' (DIL). However, note that W.J. Watson said Goodie in Menteith derived
from W. gwd 'a twist, turn', gwden 'coil, noose', which relates to the 'many small bends' in the
river (1926, 444).

Kincardine 1783 Stobie

Kincardine [parish] 1863 1st edn OS 6 inch map sheet CXXXII

ScG ceann + ? Brit. or ScG *carden

Ceann Chàrdainn. The first element is Gaelic ceann ‘head, end’; the second is the Pictish or Gaelic loan-word from Pictish *carden (Watson 1926, 353, Jackson 1955, 150, Nicolaisen 2001, 204). Accepted by all these scholars as meaning ‘woodland’, it has recently been argued by Andrew Breeze that it may mean ‘enclosure, encampment’ (1999, 39-41). Given the very ‘Pictish’ distribution of place-names with this element, it is perhaps best to see the Gaelic first element ceann as an adaptation or translation of the cognate Pictish *pen ‘head, end’ (Taylor, PNF i, 570; see p. 48-49 above for the element *carden). This is one of three places out of six called Kincardine that become a parish centre, the others are in Aberdeenshire, Inverness-shire and Ross-shire; while one became the centre of a sheriffdom, later a county, Kincardineshire. See KRD introduction for more details regarding the baronial situation, and p. 140 for the church of Kincardine. Regarding the modern ScG form, Ceann Chàrdainn, this is the form used by Ainmean Aite na h-Alba (Jake King pers. comm.); Watson (1904, 1) has Cinn-chàrdain, while Dwelly (1902-12, 1018) has Cinn Chardainn.

/kɪnˈkardən/
According to DOST, ward can mean ‘a (? usually) enclosed) piece of ground, a field, paddock, freq[uently], put to or reserved for a particular use’. It is not known what the ‘particular use’ was here, but see Wards of Goodie PMH, which was used as grazing for the king’s horses in 1471 (ER viii, 70). There is probably some relationship to Wards of Goodie PMH, marked as Ward in Stobie.

A building is shown here on the 1st edn OS 6 inch map but is not named.

The lateness of this name strongly suggests that it is a personal name or surname, or perhaps a transferred name from Aberdeenshire. No settlement is shown here on Stobie.
MILL OF MUCK # KRD S NS717992 2 30m

*Mill of Muck* 1754 RHP24481

**Sc mill + of+ en Muck**

Stobie shows only ‘Mill’ at this point. The Muck element, relating to a burn, presumably derives from ScG *muc* ‘pig’. The burn in question is that which flows from Loch Watston, it is unmarked on any map of the area, but Mackay shows this as ‘Burn of Muck’ on a map based on RHP24481 (Mackay 2006, 113). A building is shown at the NGR but no name is attached on any current map. See Muckersyde # KRD, below.

*Mill of Torr* 1783 Stobie

*Mill of Torr* 1863 1st edn OS 6 inch map sheet CXXXII

**Sc mill + of+ en Torr**

Torr was a separate settlement nearby and probably derives from ScG *tòrr* ‘(Conical) hill’. This may relate to the tumulus shown on the 1st edn OS 6 inch map at NS739986. It is mentioned in *NSA* for KRD as being surrounded by a ‘circular foss…vulgarly called Wallace’s Trench. It is 63 yards [14m] in circumference…’ (*NSA* x 1262-3). The tumulus was
approximately a metre in height when viewed by the OS in 1968 (RCAHMS Canmore NMRS No. NS79NW 20), but was presumably a good deal higher in the past. See Torr # KRD below.

MOLLAN    KRD S NS651004 1 24m

It would appear that this is a relatively new name, but may be based on ScG *muileann* 'mill'. The place is called *Boquhapple*, i.e. without any qualifiers, on the 1st edn OS 6 inch map of 1863. Next to it is a place called *Little Mill*, which is marked on Stobie.

MOSS-SIDE OF BOQUHAPPLE KRD S NS658986 1 13m

*Moss-side of Boquhapple* 1863 1st edn OS 6 inch map sheet CXXXI

*S moss + side + en Boquhapple*

This seems to show the southerly extent of the ancient territory of Boquhapple. It is called *King’s Boquhapple* on estate plan RHP3965. Netherton (q.v. below) was also part of *King’s Boquhapple* (Harrison 2003, 125). Nearby Wards of Goodie was used as waste for the king’s horses during hunting trips (*ER* viii, 70; Gilbert 1979, 125), a similar situation may have occurred here.

Norrieston 1863 1st edn OS 6 inch map sheet CXXXI

Pn Nory/Norrie + Sc toun

‘Settlement of someone called Nory/Norrie’. It has not been possible to find earlier references to Norrieston than 1649, but the Norrys have been associated with Menteith since at least 1451, when Robert Nory collected the rents of Terrintirran # KPN (ER v 479). This branch of the Norry family seems to originated in ‘Tarbart’, although which one is uncertain. In 1485 James Nory of Tarbart (Jac. Nory de Tarbart) witnesses the charters of Malise Graham granting the lands of the post-1427 earldom to his sons John and Walter (RMS ii no. 1861, 1862). James Nory pays £4 for the rents of Boquhapple in 1478, and there is confirmation that Boquhapple is in the hands of James Nory two years later (ER viii, 563 – Bochople...
manibus Jacobi Nory). A female relative, Elizabeth Nory, widow of Walter Dog, lived at Brae of Boquhapple (ibid.). In 1497 James IV confirmed a charter of Robert Nory for the lands of Wester Boquhapple and Brae of Boquhapple (RMS ii no. 2374) This is one of a small number of names around the eastern end of Thornhill ending in Sc–ton.

Norrieston is mentioned twice in Retours as a parish, possibly because there was a concerted campaign from 1652 to have the detached part of KRD made into a separate parish in its own right. The campaign finally succeeded in 1878 (Dixon 1995, 76).

---

197 My thanks to John Harrison for this reference.
ScG uachdar + tir

Uachdar Tire ‘upper part of (the) land’. Given that Ochtertyre is the second lowest place in the study area at 8.6m OD, it might seem strange that Ochtertyre is the only place in Kincardine Parish with the sense of ‘upland; upper part’. However, it may be that tir ‘land’ refers to land with high agricultural potential, so within that semantic range it does not have to be elevated. Of course height can be relative, and it may be the height of the adjoining moss – which could reach a depth of 4m in places (i.e. the ground was 4m higher than it is now) – had a bearing on the coining of the name. Ochtertyre is directly across the River Teith from the steeply rising ground of the Keir estate in neighbouring Dunblane and Lecropt parish. However, since the River Teith, which forms the parish boundary and had been an important boundary here for a long time, it may be that the coiners of the name will have had flat Kincardine rather than the more hilly Dunblane and Lecropt in mind.

There are other places in Scotland with this name, including Auchtertyre near Tyndrum PER, Auctertyre near Coupar Angus ANG, and Ochtertyre near Crieff PER.

Parish of Kippen

Introduction

Kippen (see Map 22) is relatively poorly documented in medieval sources, which may have much to with the loss of surviving materials such as a cartulary or rentals from Inchmahome Priory. Kippen is the only Menteith parish south of the River Forth. It was divided into four parts between the counties of Perth and Stirling, each having two portions. The rationale behind this division is not clear. The largest PER portion may have been lands of Inchmahome Priory granted by the earls of Menteith sometime around the foundation of the priory in 1238. This is supported by the fact that of the seven place-names in the parish containing earrann ‘portion, division’, six are in the largest PER segment, including Arnprior ‘portion of the prior’. Also, the road from Arnprior to Port-of-Menteith, the landing place on the east side of the Lake of Menteith, ran through the main PER part, and crossed the major ford at Cardross, which seems to have been the ‘Auchmore’ (àth mòr ‘big ford’) mentioned by Walter Bower in the 1440s (Bower Scotichron Bk 2 ch. 10 (vol. 1, p. 190); Barrow 1992, 213). Crucially, there is a mention in a charter of 1451 of ‘terras de Treenterene ac terras de Inherne vocatas vulgariter le Third Parte de Shereffis lande de Kippane (the lands of Terrintirren and the lands of Inherne commonly called the Third Part of the Sherriff-lands of Kippen)’ (RMS ii no. 508). Inherne may be a distorted form of An Errann ‘the Portion’, which could account for the largest PER portion, if this was indeed the lands given to Inchmahome by an earl of Menteith, perhaps Walter Comyn in 1238. The reasoning behind the smaller PER portion is still puzzling, but it may be a much later division, and originally the two STL portions were divided only by the largest PER portion, which itself was later divided into Arnprior, Arnigibbon, Arnmore, Arnbeg, Arnfinlay, and Arnmanuel.

The author of a local history of Kippen relates that ‘a portion of the Manse, e.g. the kitchen part, is in Perthshire, the remainder being in Stirlingshire, thus enabling the dinner to be cooked in Perthshire and partaken of in Stirlingshire’ (Chrystal 1903, 18).
However, we need not necessarily see the division of the parish as dating to 1238. Kippen's position on the border of three medieval territories may also help partly explain its peculiar split. To the west and south lay the parishes of Drymen and Balfron, which were in the earldom of Lennox and the diocese of Glasgow, while to the east lay the parish of Gargunnock, a later division of the parochia of St Ninians, itself co-extensive with the soke or shire of Stirling, or castrensis provincia (Duncan 1975, 161), and diocese of St Andrews. To the north were the parishes of PMH and KRD, the earldom of Menteith proper, as it were, and the diocese of Dunblane. By the end of the medieval period there were eleven baronies in the parish – Arnbeg, Arnfinlay, Arnmanual, Arnmore, Arnprior, Broich, Buchlyvie, Dasher, Garden, Glentirren, and Shigarton (Chrystal 1903, 19). It is noteworthy that five of the seven earrann-names became baronies. Also of note in KPN is the amount of small hills given the name keir (see p. 122-123 for details).

ScG earrann + beag

Earrann Beag ‘small or lesser portion’. Regarding the modern ScG form, I have lenited beag ‘small’ here on the basis that a fem. noun lenites a following adjective. However, there are few clear instances of lenition after earrann, which is fem.; it may be that in Mentieth earrann was
largely treated as a masc. noun, and so lenition has been left out in *earrann*-names unless there is evidence for it (see Arnfinlay and Arnprior below for evidence of lenition). One of seven *earrann*-names in KPN, and of around 16 in Menteith plus three others just over the border in DRY, in Lennox. There is an Arnmore 'big or greater portion' nearby suggesting there has been a subdivision of a larger *earrann* at some point before 1459. Note that there seems to have been a cross situated here in 1459. We have no way of knowing now whether it was made of stone or wood. Also mentioned is the chapel of St Mary in *Garwalde* in the muir of Dundaff. This muir is on the southern edge of St Ninians parish STL, marked now by Dundaff Hill. There is a Garvald in nearby Denny parish at NS783834, but John Reid, author of the *Place names of Falkirk and East Stirlingshire*, is convinced that this is not the *Garwalde* mentioned in 1459, since Garvald, Denny parish, was part of the barony of Dunipace, whereas Dundaff was part of Strathcarron. Reid thinks the chapel in question may have been Kirk o’ Muir, on the northern shore of the Carron Valley Reservoir (Reid, pers. comm.).

The reference to the *Spittell of Arnbeg* in 1686 may be Spittal, c.300 m N of the centre of Buchlyvie; alternatively this could be the Spittal of Arngibbon (see Arngibon below). See p. 116-119 for discussion of the element *earrann*, and p. 92-93 for a discussion of the element *spittal*.

ScG earrann + pn Fionnlagh  

Earrann Fhionnlaigh 'portion of Finlay'. The lenited f of Fionnlagh is rarely recorded in earliest forms, but then becomes the standard form from 1530s onwards. Who the eponymous Finlay was is not known. However, in view of the fact that Kippen was a prebend of Dunblane Cathedral, there is the intriguing possibility that 'Finlay's Portion' belonged to Finlay Colini, who was an archdeacon at the cathedral in 1400 x 1403 before being elected bishop of Dunblane in 1403. He remained in that role until 1419 (Watt and Murray 2003, 102, 117). As can be seen from the Retours entries for 1655, there was quite a complicated tenurial situation. It is unclear where the places of these tenants were, although Stobie shows a Clayfold just south of Arnfinlay. Regarding the forms dating to 1655 to 1693 which mention
Callum Fairliesland, a charter of 1633 granted to Issobelle Fairlie 10 merks of land of old extent of *Arnmanuell* (*RMS* viii, no. 2245), so we could be looking at a son or other male relative called Callum. In any event the Fairlies had been in Kippen since at least before 1586 when Duncan Fairlie is mentioned as an elder at the Visitation of Kippen after the Reformation (*Kirk* 1984, 9). The entry for 1693 is noteworthy for it may provide a *terminus post quem* for the establishment of Hardiston (NS692941), just south of where *Arnfinlay* was situated. An estate plan of 1756 shows *Arnfinlay* having a western border with the lands of Arnprior. By the time of the Statistical Account of 1791-9, the minister, John Campbell, could write of ‘the castle of *Arnfindlay*, of which no vestiges now remain…’ (*OSA* 18, 329). See p. 116-119 for disussion of the element *earrann*.

Arngomery 1860 1st edn OS 6 inch STL sheet IX

ScG earrann + ? comrach

Earrann Comaraidh ‘portion of the confluence place’. See Watson (1926, 476) where he states ScG comrach means ‘place of confluence’, from ScG comar ‘a confluence’. Arngomery is just 200m SW of the confluence of the Broich and Arngomery Burns. See Taylor (2006, 239) for discussion of the comar element in Comrie FIF. Arngomery had an alternative name of Broich, which may explain the absence of Arngomery between 1627 and 1817. The Broich is still the name of a building on the property of Arngomery today (see 1:10,000 OS sheets NS 69 NW and NS 69 SW). Blaeu and Roy show Broich on their maps. Grassom, however, shows Arngomery at a distance to the SE on the eastern side of the smaller PER portion (at approx. NS649942) rather than on the western side of this part. The –gometry element may have been modelled on the well-known personal-name and place-name Montgomery. See p. 116-119 for discussion of the element earrann.

/ərˈnɡʌməri/
ScG earrann + pn Manuel

Earrann Manueil ‘portion of Manuel’. Black (1946, 581) states this example of a surname derives from the priory of Manuel in Muiravon parish, STL, which was a religious establishment for nuns. Two of his examples are monks – a monk of Holyrood in 1299 and an abbot of Newbattle in 1413 x 1419. His earliest reference to it being used as a surname is from the Ragman Rolls in 1296. The priory at Manuel might be considered a likely source for the specific in Arnmanuel, for the Livingstones of Callendar, near Falkirk, who had the lands of Terrintirran KPN (q.v.), gained possession of the demesne lands (terras dominicales) of Manuel Priory in 1545 (RMS iii, no. 3308). This may explain Arnmanuel’s late arrival in the historical record, but it also means that here arn- has probably been borrowed into Scots (see p. 67). See p. 116-119 for disussion of the element earrann.

The 1815 estate plan shows Arnmanuel as a march on the western edge of Broich, now Arngomery.

*Arrinpriour* 1586 Kirk 1984, 10

421
ScG earrann + ScG prior

Earrann Phrioir ‘prior’s portion’. The earliest form seems to show lenition. Prior is attested in Irish Gaelic regarding a Scottish context in 1203, when there is mention in Annals of Ulster of Domnall h-Ua Brolchan, prioir Ia ‘Domnall Ua Brolchain prior of Iona’. While Arnprior comes on record at a fairly late date it may date back to the foundation of Inchmahome Priory; it can hardly date to earlier than that, for whatever kind of institution existed on the island of Inchmahome previous to 1238, it was not a priory. Dwelly gives ScG luamh and seachn-ab as alternative words for ‘prior’. See p. 156-157 for discussion of St Bean.

The lands of Arnprior were, as might be expected, lands of Inchmahome and are shown as such in a rental of 1646. However, the lands of Inchmahome came into the possession of the Erskine Family in 1556 before the Reformation and Arnprior was one of the estates they gained. An estate plan of 1756 clearly delineates the lands of Arnprior, which extends from

201 http://www.ucc.ie/celt/published/T100001B/index.html
the current village up to the muir beyond the modern farm of Jennywoodston. See p. 116-119 for discussion of the element *earrann*.

Sc**G** baile or bealach + meadhanach

*Baile* or *Bealach Meadhanach* ‘middle farmstead or settlement or pass’. The early forms point strongly to the generic being Sc**G** baile ‘farmstead, settlement’, perhaps being the *middle toun* of Buchlyvie. However, the local interpretation given to me by the owner of Ballamenochn suggests that the generic may be Sc**G** bealach ‘pass’. If it is bealach meadhainach, then it could be the ‘middle pass’ to the grazing lands of Buchlyvie Muir (see also p. 124 for discussion of this name elsewhere in Menteith).

ScG blàr + faichean?

Blàr Faichean? 'plain or muir of the fields'? Dwelly has faiche, -an as 'field; plain, meadow, green; field where soldiers are reviewed'. Faichean seems to be the plural form,202 and by the late 17th C it had acquired the Scots plural indicating sub-division, or it may be translating the ScG plural. In Ireland, faithche is described as a 'green or lawn in front of a fort or residence or church; an open space in or before a city; a green meadow, or playingfield; sometimes referred to as a place for cattle', and in Cormac’s Glossary it is 'a levelled space' (see DIL under faithche). See p. 110-114 for the element blàr.

202 The ScG plural –an ending is certainly attested in the early 16th C Book of the Dean of Lismore (Ó Maolalaigh pers. comm.), but in Menteith it may date to the early 14th C if the early forms for Lanrick KMA (q.v.) contain, as they seem to, the plural –an ending.
ScG blàr + gart or grod

Blàr Ghairt or Blàr Grod. There is an ambiguity in this name. If the specific is ScG gart, then the meaning could be ‘plain of the enclosed settlement or field [or enclosed settlement or field of the plain]’. It could also be the plain or muir of a place called Gart, or perhaps Garden. But if, as the earliest form suggests, the specific is actually ScG grod ‘putrid, stinking’, then the meaning may be ‘putrid plain or muir’, perhaps relating to marshy grazing land frequently flooded by the nearby un-named burn. See p. 110-114 for the element blàr.

Bruicch 1654 Bleau Lennox
Broich 1724 Geog. Coll. i, 351
Broich 1745/6 Edgar
Broich 1817 Grassom

ScG bruach

Bruaich ‘bank [of the Arngomery Burn]’. This seems to have been an alternative name for Arngomery (q.v., above). The development of the name may indicate a dative form; see A. Watson (2002, 208) where he states Bruchmore, Monzievaird and Strowan parish PER, is ScG ‘bruach dat.-loc. of bruach# (place at) bank’ (of a watercourse, loch &c) plus mòr ‘big’. It stands beside the Earn’. He also states that ‘Broich (Glendevon), earlier Bruach and Bruich, and Broich (Crieff), both of which show evidence of dat.-loc. forms and appear to take their names from their position beside a watercourse’ (A. Watson 2002, 208). See discussion of Broich KMA.

/brɔːix/

BUCHLYVIE KPN S STL NS574937 1 NS575937 46m
Both Sliabhach or Slèibhidh/Sliabhàigh? ‘place of) hut, shieling, both of (upland) moorland’?
See Taylor (2006, 61-3) for his interpretation of Bucklyvie ABO FIF. Like its Fife counterpart, Buchlyvie STL has an upland situation, rising as it does out of the carselands of the River Forth. The modern village sits on the lower slopes at a height of about 48m, but 3km to the south at a height of 175m is a plateau called the Muir of Buchlyvie (NS580914). The specific may be sliabhach (adj.) ‘pertaining to a sliabh ‘mountain, moorland’.

Garden 1783 Stobie

Garden 1817 Grassom

ScG gart + diminutive ending –in or Brit *carden

Gartan or Càrdainn ‘small enclosed field or settlement’, or ‘fort, enclosure’. The fact that some of the early forms begin with ‘c’ instead of ‘g’ may mean that we are looking at the Brit. or ScG loan-word from Pictish of *carden, meaning ‘woodland’ or ‘enclosure, encampment’ (Taylor, PNF i, 100, n.16; Breeze 1999, 39-41). See p. 48-49 for short discussion of *carden and 119-122 for discussion of the element gart.

Marked on the 1st edn OS 6 inch map is a rectangle marked ‘site of Tower of Garden’ at NS953948. RCAHMS Canmore states the tower, which may date to 1496, may have been demolished in 1749 when the current mansion was first built, but the ruins were apparently still ‘pretty entire... within a rampart and ditch’ in 1878, but, according to RCAHMS Canmore, nothing now remains (NMRS no. NS59SE 4). Within the estate of Garden, shown on the 1st edn OS 6 inch map are Gardenmill and Gallows Hill.
There is mention of a *Keir-brae of Garden* in *OSA* where the minister, Rev. John Campbell, states ‘On the summit of each of [the kiers of Kippen] there is a plain of an oval figure, surrounded with a rampart, which in most of them still remains entire’ (*OSA* 18, 329). And Chrystal would have Garden as *cathair-dun*, a sort of Gaelic equivalent of ‘Castlehill’ (*Chrystal* 1903, 23). However, later visits by the RCAHMS and the Ordnance Survey place doubts as to whether there was ever a *cair/caer* or keir at this site RCAHMS Canmore (NMRS no. NS59SE 5).

*Glentirren* 1681 *Retours* STL no. 284

*Glentirran* 1724 *Geog. Coll.* i, 351

*Glonuron* 1745/6 Edgar
This was originally part of the lands of Terrintirran (q.v. below), however, given the late date of the name it is probable that we have the Scots borrowing of gleann 'glen' here. Near here is Keir Hill of Glentirran which may have been the site of an early settlement. Next to it is a burial ground marked on the current 1:10,000 OS map. RCAHMS Canmore reports that the old house of Glentirran stood '200 yards from the old bridge of Boquhan' and gives an NGR of NS668994 for the site (NMRS No. NS69SE 3). Note that Blaeu shows a Duntyren to the north of Arngibbon on his map. A Gabriell Levinstoun of Dunturan is mentioned in the Visitation of Kippen in 1586 (Kirk 1984, 9).205

Griveloch 1745/6 Edgar

Griblochs c.1750 Roy 26

Gribloch 1817 Grassom

Gribloch 1861 1st edn OS 6 inch STL sheet XVI

ScG gniomh? + loch

205 He is of of Duntyran later in the same piece (Kirk 1984, 10) and of Duntirran in 1588 (Kirk 1984 75).
The earliest form might suggest *gniomh*, which Dwelly gives as ‘parcel of land’, taken from *Armstrong’s Gaelic Dictionary*, which has a Perthshire bias (Watson 2002, 9). *DIL* and Kelly (1997, 573, n.119) have *gnim/gnimh* meaning ‘a division of land, equivalent to the twelfth part of a ploughland’. The initial *gn* of *gniomh* is pronounced like the *gr* of green, but with ‘strong nasalisation of the neighbouring vowel’ (Black 2006, 7). However, this word is very rare in Scotland, and it is not at all clear if this is the word in this place-name. The unreliable Chrystal derives Gribloch from ‘a corruption of Garbhach, the rough place’ (Chrystal 1903, 20). See Ardcheanochrochan CLD for the change from */n/* to */r/* in Gaelic words beginning *cn* or *gn*.

An alternative might be the *gryfe*-element – c.f. Irish *griobh* – in Strathgryfe RNF, which Watson speculates might be ‘claw’ (Watson 1926, 470). *Griobh* can also mean ‘fierce’ (*DIL*).

---
Kippen 1817 Grassom

ScG ceap + -an

Ceapan ‘small lump of a hill’? Two historians of Kippen have offered derivations which are unsatisfactory or erroneous. Chrystal (1903, 18), following the OSA for Kippen (OSA xviii, 317), contends that Kippen derives from ScG ceap, which is related, he says, to English cape ‘promontory’. This supposedly perfectly describes Kippen’s situation in that it juts out from the Gargunnock Hills to the carselands of the River Forth below, and this is certainly how it appears from the east, especially when viewed from somewhere such as Row KMA. However, Eng. ‘cape’ derives ultimately from Latin caput ‘head’, while ScG ceap derives from Latin cippus ‘post, pillar, stake’, and became the ScG word for a shoe-maker’s block or last. Chrystal also proposes a derivation from ScG ciopan ‘stumps or roots of trees’ (Chrystal 1903, 18). This apparently relates to the remains of an old forest that is sometimes found under the carsel (c.f. Loch Goosey AYR, where the goosey-element may be ScG giuthasach ‘abounding in pine’207). Begg has erroneously put forward the possibility that the –pen of Kippen could be Brit. pen ‘end, head’. Kippen, according to Begg, is made from two words; ScG ceap and Brit. pen and thus ‘convey[s] the ‘headland’ meaning’ (Begg 2000, 17), but this is not possible.

What, then, can be the meaning behind Kippen? Angus Watson has Kippen, near Auchterarder, and Kippendavie and Kippenrait DLE, as deriving from ScG ceap, plural ceapan ‘turf, tussock, or when a hill name, ‘lump of a hill’ (Watson 1995, 89). In Kippen KPN, however, it may be more likely that it is ScG ceap with the diminutive ending –an, producing ceapan, and that it refers to one of the kiers found in the parish, perhaps the one nearest the old kirk, i.e Keir Knowe of Dasher (see p. 122-123 for discussion of the element keir).

Shergarton 1783 Stobie
Shirgarton 1860 1st edn OS 6 inch STL sheet IX

ScG siar + gart + -an

Siar Ghartan ‘west little enclosed field or settlement’. For more early forms of Shirgarton see Offers # KPN, above. See p. 119-122 for discussion of the element gart. Watson renders it in conventional Gaelic as siar-ghartan, but says it is now represented by ‘Garden near Cardross’ (1926, 203.), by which he means Garden KPN. It is difficult to be sure why he thought this since Shirgarton is 5km east of Garden, and in any case it is clearly marked on the 6 inch OS map, which Watson must surely have had access to. Instead Shirgarton must have been named in relation to the village of Kippen.

The forms for 1584 and 1617 mention the *Offers of Leckie; it is not clear why, unless there was some tenurial link with the settlement of Leckie (now marked as Old Leckie) in neighbouring Gargunnock parish, some 4 km E of Shirgarton.

‘Western settlement or farmstead’. It is not entirely clear what this is meant to be the western settlement of, but it could be Glentirran. The 1st edn OS shows a Glentirranmill at NS664954, c.700m NE of Westerton. Grassom, however, seems to show Westerton as being Fauldfoots in 1817.

WHITELEYS    KPN S STL NS579923 1 140m
There is no indication from the source material who the eponymous Whitely was.

Johne Wricht is mentioned as an elder of the Kirk in Kippen in 1586 (Kirk 1984, 9).
**The Parish of Port-of-Menteith**

**Introduction**

The parish of PMH is in the centre of Menteith (see Map 23), surrounded by CLD to the north, AFE to the west, KPN to the south and KMA and KRD to the east. The parish was originally slightly smaller on its northern side, as in 1615 it gained part of the parish of Leny \((RMS\, vii\, no.\, 1222)\). The lands of Dullater were usually said to be in ‘dominio de Strogartney’ or the lordship of Strathgartney (e.g. \(RMS\, ii,\, no.\, 567\)). The barony of Strathgartney was wholly in what is now CLD, i.e. the southern boundary of the parish comprised the northern shores of Lochs Katrine, Achray, and Venachar, and yet the lands of Dullater (now Easter and West Dullater) are found on the southern shore of Loch Venachar. What may be significant is the boundary name in the NW corner of the parish near Invertrossachs of \(Meall\, na\, Crìche\) ‘round hill or lump of the boundary’. There are two other \(croich\) place-names in Menteith, both called \(Allt\, na\, Crìche\) ‘burn of the boundary’, in CLD and KMA, and both are burns marking parish boundaries. The CLD \(Allt\, na\, Crìche\) marked the boundary between Callander and Leny, while the KMA \(Allt\, na\, Crìche\) marks the boundary between KMA and DLE.

Other than for mentions of Inchmahome\(^{209}\) and of some lands belonging to the earldom of Menteith after it fell to the Crown by forfeiture in 1425, the sources for PMH are almost devoid of place-name evidence prior to the two decades or so before the Protestant Reformation of 1560. In \(RMS\) there is a list of lands dating to 1643 which show the lands of the post-1427 earls of Menteith in PMH: Inchie, Port, Inchtalla, Portend, Arnetamie, Malling, Ballochraggan, Monyvreckie, Gartmoulin #, Gartrenich, Arnachley #, Shannochill, islands and gardens of the priory of Inchmahome, in the parish of Port \((RMS\, ix\, no.\, 1502)\).\(^{210}\) Another charter dating from around the same time shows the lands of Ruskie which remained in the

\(^{209}\) See Chapter 6 for discussion of this name.

\(^{210}\) Also in the charter are the now lost \(Inchiemoy\), lie \(Mylnetoun\), and \(Auchmore\).
hands of the descendants of the Stewarts of Menteith: Auchinsalt, Earn, *Sheriffristoun*, Lennieston, Calziemuck, Dunverig, Tarr, *Balebeg*, and Borland (*Laing Chrs*, no. 2272). The lands of Cardross in PMH, which came down to the Erskines of Mar, can be deduced from a charter dating to 1605: Poldar, Gartledenye # and Hilton, Arnprior, Arnvicar, Gartur, Lochend, the mill of Cardross, Arnclerich, Blaircessnock, Ballingrew, Hornyhaick #, Wards of Goodie, Bordland # called the Mains of Cardross, loch and isles of Inchmahome, Arnmach, the kirk lands of Port (NAS PA2/16, f.86v-89r).

Stobie shows a greater density of settlement in the area around Invertrossachs, much of which must have been cleared, possibly for sheep or aesthetic reasons in the 18th or 19th century.

ScG *earrann* + ?

See p. 116-119 for discussion of the element *earrann*. Lack of modern pronunciation makes it difficult to state what the specific might be, but the obsolete ScG masc. word *claidhe* ‘burial’ is a possibility (see *Dwelly* s.v. *claidhe*). This supposed to have been one of four chapels belonging to Inchmahome Priory (*NSA* x, 1105; *Hutchison* 1899, 141; *Carver* 2003, 19). There is an old graveyard at NS554996, although remains of gravestones are few, if any. (see RCAHMS Canmore NMRS No. NS59NE 4). See also Shannochill PMH, below.

**Arnhclerich** 1783 *Stobie*

**Arnhclerich** 1862 1st edn OS 6 inch map, sheet CXXX

ScG *earrann* + clèireach or àird + an + clèireach

*Earrann a’ Chléirich or Áird a’ Chléirich* ‘portion of the cleric or height of the cleric’. Although the genitive singular of clèireach is given in the analysis, the absence of lenition before the 1783 form, indicates the place-name might contain gen. plural *nan clèireach* ‘of the clerics’. The earliest forms point towards àird ‘height’ and this is perfectly plausible given that Arnclerich sits on a ridge of terminal moraine about 30m above the carse floor (Milton of Cardross at NS598996 sits at 17m OD). However, the fact that there are a fairly large number of other *earrann*-names in the area (around 21), including Arnvicar and Arnprior, and that the settlement was a property of Inchmahome, means it could be just as likely that the generic is *earrann* ‘portion, division, share’. We could also be looking at generic element variation or substitution here.

In a Scottish context clèireach is also found as achad na glérec in the 12th C Gaelic Notes in the Book of Deer (Taylor 2008, 289; Jackson 1972, 19, 49). Clèireach is a loan word from Latin clericus. See also DIL cléirech. See p. 116-119 for discussion of the element *earrann.*

\textit{Arnmaack} 1899 Hutchison 1899, 52 [Hutchison also has the spellings \textit{Arnmack} (p.52) and \textit{Arnmawk} (p.73)]

\textbf{ScG} \textit{earrann} + \textit{magh} + diminutive ending?

‘Portion of the small plain?’. The earliest forms might represent *\textit{maghag} or *\textit{maghog}, although there are no such lexical items and the evidence suggest a final plosive for the most part rather than a fricative. However, \textbf{ScG} \textit{maghach} ‘abounding in fields’ exists as an adjective.

See also \textit{DIL} where OG \textit{macha} or \textit{machad} means ‘an enclosure for milking cows, a milking yard’. Hutchison (1899, 52) thinks it could be ‘portion or field of the swine’, the specific containing \textbf{ScG} \textit{muc}, but there is no sign of the vowel /\textit{u}/ in any of the early forms.

Blaeu shows an \textit{Arnmaack} between Cardross and the River Forth at approx NS608974. It is unclear if this is an error and should be placed nearer to Lake of Menteith or if it is indeed another \textit{earrann}-name. No \textit{earrann}-name is shown on Robert Gordon's map of area dating to c.1636-52 (NLS Adv.MS.70.2.10 (Gordon 51)) or on Roy or Stobie here. See p. 116-119 for discussion of the element \textit{earrann}.

ScG achadh + an + sult?

Achadh an t-Sult? ‘field of the fatness?’ Although the first form on the list falls between 1630-50, it looks earlier than the 1640 and 1646 forms, having traces of ScG achadh, rather than the Sc form auchin-. The second element looks as if it has been assimilated to SSE salt reasonably early. Dwelly has sult and a variant salt, gen sg sailt, as ‘fat, plumpness, fatness’, while DIL has sult ‘fatness, prosperous’. If this is indeed the second element, then it may relate to the productiveness of the land here. See p. 107-110 for discussion of the element achadh.

212 My thanks to Dr Sheila Kidd for this information.
ScG blàr + seasgannach

Blàr Seasgannach ‘marshy grazing, plain, or muir’. The specific must be the same as that of Cessnock on the south-side of Glasgow and of Cessnock Castle and Cessnock Water in Ayrshire. It may be the adjective of ScG seisgeann ‘fenny country; extended marsh’ (OG seiscenn ‘unproductive ground, marsh, swamp, bog’) which would suit the location of Blaircessnock, sitting at the edge of Flanders Moss. See p. 110-114 for discussion of blàr.
Blàr Choille 'wood plain'. According to Hutchison (1899, 65), Blairhoyle was granted by James V to John Leech or Leitch in 1517 in recognition of his father's service at Flodden four years previously. Prior to that, it was part of the Stewartry belonging to the crown. At some point Blairhoyle was re-named Leitchtown, and is marked as such in Stobie. It remained Leitchtown until at least 1853 (NAS CS228/G/15/22) or, according to Hutchison (1899, 65), the 1870's, when it was changed back to Blairhoyle. However, it was clearly already that name when the OS surveyed the area in 1862. The 1758 form may point to the fact that the place had an alternative name, perhaps something like Leitchtown alias Blairhoyle. The formula is found elsewhere in Menteith, (see, for example, Watston KMA). See p. 110-114 for discussion of blàr.

Bordland 1646 Inchmahome Rental (Fraser, Menteith ii, 368)

Borland 1654 Blaeu Lennox
Sc bordland

‘Mensal land, table land’. The demesne lands, or lands which directly supplies the household of the feudal superior (Taylor, PNF i, 374). Winchester (1986) discusses this element in a British context, and points out that mains and bordland are the same thing (1986, 132). His earliest form for this Bordland is that for 1637. See p. 39 and 100 for discussion of this name in Menteith.

CASTLE OF REDNOCK  PMH S NN600023 1 47m

*Rednock Castle* 1783 Stobie

*Castle of Rednock* 1862 1st edn OS 6 inch map, sheet CXXIII

Sc *castle* + of + *en* Rednock

‘Fortified dwelling of Rednock’. This site is traditionally said to been founded by Sir John Menteith, the *imannis proditor* or ‘greatest traitor’ in the national history, according to Hutchison (1899, 60, 262). However, while there may have been some kind of castle at Rednock in the 13th and 14th centuries, the current remains – ‘a circular rubble stair tower rising approximately three storeys’ (Gifford and Walker 2002, 640) – date from the 16th C (RCAHMS Canmore NMRS No. NN60SW 6). Hutchison states the castle may have been built by George Graham, first of the Grahams of Rednock (1899, 59 note 2).

Crinegart 1783 Stobie

Crinigart 1862 1st edn OS 6 inch map, sheet CXXX

ScG crion + gart

Crion-ghart ‘little enclosed field or settlement’. This seems to be the local interpretation, and Dwelly has crion meaning ‘little, mean, diminutive’. It only sits 1 km N of Gartmore House.
CULNAGREINE  PMH S NN561046 1 102m

Kowilrigreen 1630-50 Sibbald TNS 131v

Culrigrean 1783 Stobie

Culnagreine 1862 1st edn OS 6 inch map, sheet CXXIII

ScG cúl + ri + grian

Cùl na Grèine ‘back towards the sun’. The OG dative of grian is gréin, and it may be that the OG name is cúl ri gréin, and this has possibly been reinterpreted as cúl na grèine, with gen. sg. of grian. The two early forms show this contains preposition ri ‘towards’. The name probably refers to the fact that the place is at the foot of a NW facing slope. The amount of direct sunshine it receives, especially in the winter, must be minimal. Names with ri are found elsewhere in Scotland; Sharpe (1995, 15) writes that there is Carn Cúil ri Érenn or ‘the cairn of the Back towards Ireland’ on Iona. Ó Maolalaigh discusses place-names with re which occur in Scotland and Ireland (1998, 17-18).

DOG ISLE  PMH R NN568003 1 18m

Dog Isle 1862 1st edn OS 6 inch map, sheet CXXX

Hutchison writes that ‘not far from the western shore of the lake lies the third and smallest of the islands. It is called Inchcuan [ScG innis chon] or ‘Dog Island,’ because it is supposed to have been used for the kennels of the earls’ hunting dogs’ (1899, 96). However, there may have been re-interpretation in this case: in Ireland, IrG cuan can mean ‘harbour’ (Hughes and
Hannan 1992, 6); cf. *DIL* cuán ‘haven, harbour, bay’. Dwelly, following Armstrong, has ScG cuan meaning ‘harbour, haven, bay’. There is certainly a pronounced bay on the western side of Lake of Menteith opposite Dog Isle.

*Flanders Moss* 1783 Stobie

*Moss-Flanders* 1840’s NSA x, 1097

*Flanders Moss* 1862 1st edn OS 6 inch map, sheet CXXXI

Sc? *Flanders* + Sc *moss*

‘Low-lying or flooded marsh land’. In the Flemish speaking Low Countries *Vlaanderen* literally means ’Flooded Land’ or ‘Lowland’, but it is not clear if the name Flanders in Menteith originates from this, even although the meaning seems noticeably similar. It is remarkable that none of the sources prior to the late 17th C seem to mention the name Flanders Moss. Robert Gordon mentions the ‘Moss’ in the mid 17th C, but calls it ‘the great moss cald the kings moss’ (Sibbald TNS 156r). Its ScG name is A’ Mhòine Fhlànrasach (Watson 1926, 255). There is the possibility that men from Flanders in the Low Countries were used to clear the moss or that their methods were. Trade and military adventures in Flanders from the Middle Ages until the 17th C may have influenced the name. There is no evidence to indicate that it was named Flanders Moss due to Flemish settlement in the 12th or 13th centuries as there had been in other parts of Scotland, such as Moray.

213 *Encyclopaedia Brittanica* 15th edn 1981 Macropaedia vol. iv, 172: ‘French Flandre, Flemish Vlaanderen. The name appeared as early as the 8th C and is believed to mean Flooded Land’.

ScG gart + an + sàil or sail

Gart na Sàile or Saile ‘enclosed field or settlement of the heel or willow’. This may refer to a heel-shaped relief feature, but Dwelly also has the sense of ‘foot’, i.e. sàil beinne ‘the foot of a hill’. Another possibility is ScG sail, gen. saile ‘willow’. Stobie shows this settlement just to the south of the now lost Drunkie Mill that sat next to the burn that exits from Loch Drunkie, and at the bottom of the north-western slopes of the Menteith Hills. The earliest form of Gartnasail shows signs of palatalisation, with the ‘z’ representing the Sc yogh.
Blairholich only appears in this charter, so far as I am aware; the specific appears to be tulach, which might mean the mound called Tom an Righ, shown next to the house of Invertrossachs at NN559051. The alternative is that it represents Blairhullichan AFE, but this seems unlikely. See p. 119-122 for discussion of gart.

Gartrenich 1862 1st edn OS 6 inch map, sheet CXXX

ScG gart + reithneach or raineach

Gart Rainich ‘bracken enclosed field or settlement’. The suggestion reithneach ‘bracken’ comes from John Bannerman’s unpublished list of gart-names following on from Watson (1926, 240), although there is no mention of the word in Dwelly, who uses raineach, gen. rainich. The 1st edn OS 6 inch map shows a remarkable clearance in the moss, which could confirm the suggestion that garts are an expansion of settlements into wasteland such as forests or bogs (McNiven 2007, 62). See p. 119-122 for discussion of gart.

Innis Mo-Choluim 'island of my Columba'. See p. 133-137 for discussion of this place-name.

/ˌɪntʃməˈhoʊm/
ScG innis + tulach? or talla? or tallach?

While the early forms suggest tulach as the specific, there has been a re-interpretation in modern times as innis talla, containing ScG talla, gen. sg. talla ‘hall’, a loan-word from Scots or SSE hall. Another possibility is ScG tallach ‘of, or belonging to, halls or courts’. Inch Talla was the seat of the earls of Menteith for many centuries. On the island are the remains of a ‘castle’ built mainly in the 17th C (RCAHMS Canmore NMRS no. NN50SE 5.00). However, the fact that two charters were place-dated here in 1485 suggests that a lordly dwelling of some sort existed here at that date. There seems to be generic variation in 1643 with ScG eilean ‘island’ replacing ScG innis or Sc inch, while it has been translated into SSE in Stobie.

INVERTROSSACHS  PMH S NN561051 1 139m

Drunkie 1783 Stobie

Inner-Trosachs 1845 NSA x, 1108

Invertrosachs 1862 1st edn OS 6 inch map, sheet CXXIII

Invertrossachs was a name coined in the 19th C, as the minister for PMH wrote in NSA: ‘Mrs Eastmont is at present erecting a mansion on her property of Drunkie (see Drunkie PMH, above), in the northern part of the parish, which will command a fine view, including Loch Venachar...The name of the property has lately been changed to Inner-Trosachs’ (NSA x, 1108). Roy shows a Balrioch here c.1750 (Roy 70); there is no other mention of this place, so far as I am aware, but see 123-129 for discussion of baile. Stobie shows a greater density of settlement in this area in 1783.

*Lake of Inchmahome* 1840s NSA x, 1099

*Lake of Monteith* 1862 1st edn OS 6 inch map, sheet CXXX

**SSE lake + of + en Menteith**

During the 19th C the ‘country people of the surrounding district were in the habit of speaking of it as the Loch o’ Port, and by that name it is still known to the older among them’ (Hutchison 1899, 68). The modern name for this body of water is recent and seems to reflect literary tourism following in the wake of Sir Walter Scott’s *Lady of the Lake* (although the ‘lake’ in the title of Scott’s poem refers to Loch Katrine), first published in 1810. However, several factors may have influenced the lake’s name change, particularly that Menteith was the general setting for Scott’s *Lady of the Lake*; and the fact that it was called *Loch of Menteith* only from the late 17th C. The popularly held notion that it is a ‘lake’ because in geographical terms it is different from Scotland’s other stretches of inland fresh water must be rejected; there are many other examples of Lowland bodies of water that are called lochs, e.g. Linlithgow Loch WLO, Bishop Loch near Glasgow, and Loch Leven KNR.
Another theory is that ‘lake’ derives from of Sc laich ‘stretch of low-lying ground’ (DOST), meaning, in effect, the land surrounding the lake, and a cartographer mistook this Sc word for lake.\footnote{This is the explanation given on the National Park notice board next to the pier for the boat to Inchmahome.} However, there is no evidence for the area around the lake being called laich, and perhaps this theory should be rejected.

Milling 1783 Stobie

Malling 1862 1st edn OS 6 inch map, sheet CXXX

ScG muileann

Muileann ‘mill’. To have been mentioned so early and on its own, this seems to have been an important mill, perhaps the earl of Menteith’s or Inchmahome Priory’s chief mill. It sits at the eastern edge of the Lake of Menteith, and Stobie shows a mill symbol here, and there are the remains of an old dam shown on the 1:10,000 OS map. Malling sits in an area where there is some judicial and lordly symbolism. Nearby are Gallows Hill, the mound called the Coille-don, where the earls of Menteith were invested with their earldom, and there was a fair of St Michael was held near Malling (Hutchison 1899, 46). Nearby were Gartmulane and Ernomul ‘enclosed field or settlement of the mill’ and ‘portion of the mill’ respectively, both date from at least 1427 (NAS GD220/1/C/3/1). The final –ing ending since the mid-17th C was probably originally an allograph with –in. However, increasing Anglicisation of many Scots since the 18th C meant that as -ing the was standard in the English of England, it gave the allograph -ing more status than -in, and this then led to a change in pronunciation, at least in places like Stirling (Nicolaisen 1989, 313-4).

DSL has *over* as meaning the upper or higher of (especially) two places.

**POLDAR**  PMH S NS647973 1 112m

See Easter Poldar PMH, above, for early forms.

ScG *poll + dobhar*

*Poll Dobhair* ‘dark water’. Harrison writes ‘any confusion with the Dutch *polder* should be resisted. Both *Poldar* and *Polder* are found, the earliest being *Polder* in 1533; *Poldure* in 1637 (Retours, Perth, 466) seems anomalous especially as the corresponding charters had Polder. The assumption that it is from Gaelic *poll dhu* – black pow –is reasonable but unconfirmed’ (Harrison 2003, 113). In fact, the early and modern forms rule the element *dhu* or *dubh* out. However, although the second element could be ScG *dobhar* ‘water’, Dwelly quotes Armstrong who has *dobhar* as a Perthshire Gaelic word meaning ‘dark, obscure’, and *DIL* has OG *dobur* as ‘dark, unclean’. The first element is ScG *poll* ‘pond, bog, mire, mud’, but perhaps came from a similar Brit. word meaning ‘stream, flowing water’ (Barrow 1998, 59). Poldar, then, could be ‘bog or dark water’. Wester Poldar was at NS629961. The settlement of South Flanders was originally the *Pendicles of Wester Poldar* (1st edn OS 6 inch map). Shown on 1st edn OS 6 inch map entering the River Forth is the stream, The Pow, which may earlier have been called *Poll.*

Just 4 km NW of Easter Poldar, flowing out of the northern end of Flanders Moss, is another small burn called The Pow; at its confluence with the Goodie Water was a settlement called *Pollabay*, marked on the 1st edn OS 6 inch map, which was the original name for that burn or pow.

ScG ruighe +an + clach

Ruighe nan Clach ‘sheiling of the rocks’. If this is the derivation, then it is one of only a handful of ruighe-names in Menteith. Bil (1992, 391) shows three, all on the border with Strathearn, but does not name them. Shelling-names are not numerous in Menteith, and those that do exist are in ScG airigh (see p. 106 for details). Another possibility for the generic is ScG rinn
‘point’. The whereabouts of the *clach or clachan*, presumably a standing stone or stones, is not known.

/Rʊski/
There are two possibilities for the meaning of the name of this place: one is that it is a loan word from Brit. *rusgenn* into Gaelic as *rúsc/rúscach* 'fleece, skin, bark' (MacBain 1911, 298; DIL), perhaps relating to a place where the animal skins were processed. The other possibility is ScG *rùsgach* 'a marshy place'. Watson has Ruskich in Glenlyon as dative-locative of *rùsgach* (Watson 2002, 203). The latter may be the better option, as it could refer to Loch Rusky, a marshy loch, or it could refer to the settlement of Ruskie, which is on the edge of Flanders Moss.

The original place of Rusky was NN614034 on a small island in Loch Rusky, the level of which was raised in the mid-1960s. This is traditionally said to be the castle of Sir John Menteith, betrayer of Wallace and signatory to the Declaration of Arbroath of 1320.

Rusky is reasonably well recorded in the sources for the mid to late 15th C as it was the cause of yet another Menteith inheritance dispute caused by the extinction in the male line of the family descended from Sir John Menteith (see Napier 1835; Riddell 1835). In the 'college
of Glasgow' there is supposed to be a deed of Isabel, duchess of Albany dating to 1451, where she is styled 'domini de Rusky' (Riddell 1835, 107), however, I have not found the document in the Special Collections catalogue of the university library so far.

/'rʊskɪ/ (settlement) /ˈrʌskɪ/ (loch)

SHANNOCHILL  PMH S NS543993 1 63m

Schanhil 1427 NAS GD220/1/C/3/1
Schenochylis 1643 RMS ix no. 1502 [Over et Nethir Schenochylis]
Schenna [and] Chaill 1654 Blaeu Lennox
Shennachal c.1750 Roy 70
Shanachoil 1783 Stobie
Shannochill 1862 1st edn OS 6 inch map, sheet CXXX [Over and Nether Shannochill]

ScG seann + cill

Seann Chill 'old church'. The early forms show too much much variation to be sure, and the specific could be coille 'a wood'. However, the remains of a chapel and graveyard 1 km to the NE at Arnchly # PMH, may indicate that the derivation is seanchill 'old church', with an epenthetic vowel represented by the medial 'o'. The name-form seanchill for 'old church' is known in Ireland, where it is Anglicised as Shankill in County Antrim and Dublin (Flanagan and Flanagan 1994, 141). Blaeu shows Shannochill as two separate places Schenna and Chaill.

/'ʃənə ʃɪl/
SOUTH FLANDERS  PMH S 625969 1 13m

Appears on 1st Edition OS 6 inch map as 'Pendicles of Wester Polder'. But seems to have also been known as South Flanders since at least 1858 (Harrison 2003, 135).

STONEFIELD  PMH S NN549005 1 75m

*Stonefield* 1862 1st edn OS 6 inch map, sheet CXXX

SSE stone + field

Stobie seems to show this as *Moneverich* (see Monievreckie PMH).

*Tamavoid* 1862 1st edn OS 6 inch map, sheet CXXX

*Tom-a-mhoid* 1899 Hutchison 1899, 57 [Tom-a-mhoid, or ‘moot-hill’]

ScG *tom + an + mòd*
Tom a’ Mhòid ‘hill of the court, assembly place’. See Chapter 5 for discussion of court sites.

/Tamaˈvɔːd/

TAMNAFALLOCH PMH R NS629008 1 50m

Tomnafalloch c.1750 Roy 70

Tomna-falloch 1783 Stobie

Tamnafalloch 1862 1st edn OS 6 inch map, sheet CXXXI

ScG tom + an + falach?

Tom an falach ‘hill of hiding, concealment’? If the word falach ‘hiding, concealment’ is indeed present here, we should expect Tom an Fhalaich (as it is masc.). If there had been variation in gender (especially if was an OG neuter noun), Tom na Falaich could be a possibility, but the lateness of the forms prevent a definitive derivation. Watson (2002 [1928], 175) states that Glen Falloch at the head of Loch Lomond is ‘sometimes supposed to mean ‘hidden glen’ or ‘glen of hiding’’, although he thought the -faloch element was based on IrG fail ‘a ring’. See RCAHMS Canmore NMRS no. NN60SW 3 which states Tamnafalloch means ‘hill of strife’, and for details of a fort on this site, which is ‘similar in all respects’ to the forts at Easter Torrie KMA and Auchenlaich CLD.

There is a local tradition that this was a place where a battle took place between the Menteiths and their neighbours, possibly the Drummonds (see Chapter 4 for details). Several gravestones and a sword and coat of mail were found here in the 19th C.²²³

/tamnəˈfalɔx/

TARR  PMH S NN626007 1 14m

Tor of Rusky 1557 NAS GD430/129 [the Fifty shillingland of Tor of Rusky]

Quas quidem terras cum pertinenciis in liberum comitatum de Menteth constituimus ordi / [nam]us266 et de nouo erigimus ceteras autem terras que dicto comitatu ante hanc nostram concessionem ab antiquo fuerant et que in p<rese>nti carta nostra non continentur p<er> expressum nobis et successoribus nostris / [<inperp>tuu tenore presencium

241 Whereabouts unknown.
242 Bofrishlie AFE. Fraser has ‘Bobfresle’, but the second ‘b’ is actually a ‘v’. Compare ‘Savnach’ in line 5 of the original charter.
243 Boninty AFE. SP and Fraser have ‘Bouento’, but the final ‘o’ is almost certainly an ‘e’, but it is difficult to be so sure about the first ‘n’ in my interpretation; it could indeed be a ‘u’, but the modern and early spellings suggest in it more likely to be an ‘n’.
244 Dounans AFE.
245 Balleich AFE.
246 Whereabouts unknown.
247 Druim Buidhe PMH.
248 Crahavie AFE.
249 Achray AFE.
250 Glasahoile AFE.
251 Crantullich AFE. Text in charter may perhaps read Crawaneculy or Crawanetuly.
252 Rubha Saonach AFE.
253 Bridgend AFE.
254 See Gartloaning AFE for these two places.
255 There is clearly an abbreviation mark above the ‘um’, but Fraser and SP don’t state what is missing. SP has ‘Drumanust’. A résumé of the charter given to me by NAS staff shows ‘Drummanister’; there is a hill called ‘The Ministrie’ at NS517989 shown on the current 1:25,000 OS Explorer Map. There is also a mark on the charter above.
256 There is a mark on the charter above the ‘de’ here, which may be a mark indicating a note in the margin. However, any such note, had one existed, must have been in the missing section of the parchment on the right.
257 Shannochill PMH.
258 Arnachly PMH.
259 Monievackie PMH.
260 Gartmoulin PMH.
261 Whereabouts unknown, but presumably in the vicininty of Malling PMH.
262 Arntamie PMH.
263 Achmore PMH.
264 Port of Menteith PMH.
265 Inchalla PMH.
266 Charter torn here; Fraser Menteith, 294, has ‘ordinamus’.
reservamus]. 267 Tenendas et habendas omnes et singulas prenominatas terras cum
