Acknowledgments

I am very grateful to my supervisor, Dr Jane Stanley for her continuous support and advice in what has proven to be a demanding undertaking. Without her patience, motivation, good humour and encouragement the process of writing this portfolio would not only have been significantly more difficult but also far less enjoyable.

I would also like to record my thanks to Professor John Butt and my fellow students of the "Introduction to Musicology" seminar series for what was a truly rewarding and satisfying experience.

Finally, this portfolio would not have been possible without the financial and emotional support of my family, in particular that of my Mother and Father who have continuously strove to offer my brothers and I the opportunities in life they themselves did not receive.

Chapter one, Introduction

The initial issue which led to this portfolio of compositions was of a concern regarding artistic identity. While I had broad questions concerning the role and purpose of a composer in contemporary society my primary concern was with resolving the conflict of aesthetics to which I was simultaneously drawn. The works of my honour's year undergraduate portfolio exhibit contrasting styles and techniques ranging from dodecaphony to a neo-romantic tonal minimalism as well as sound worlds inspired by Messiaen and Stravinsky's Russian period. The most successful of the pieces in my undergraduate portfolio, in regards to marking, was the *Meditation* from *Three Pieces for Violin and Piano*. This work was written with a tonal harmonic language and housed in a "double-arch" form, where the music reaches two climatic points instead of only one as would be the case in conventional arch form.

The image shows a musical score for the opening of 'Meditation' for Violin and Piano. It is marked '46 Adagio (♩=c.40)'. The score is in 3/4 time. The violin part (top staff) features a melodic line with a long slur over the first four measures, followed by two eighth-note slurs. The piano part (bottom two staves) consists of chords in the right hand (r.h.) and single notes in the left hand (l.h.). Dynamics include *p* (piano), *mp* (mezzo-piano), and *espress.* (espressivo). The piano part also includes markings for *Lh.* (left hand) and *sim.* (sostenuto).

Figure 1. Opening of *Meditation* for Violin and Piano.

The works of the current portfolio demonstrate a developing compositional practice predicated on a progressive move from received forms of writing towards the development of a more personal compositional language characterised by a greater formal, rhythmic and harmonic freedom. This development is neither consistent nor universal throughout the portfolio but is more easily discernable when considered in the context of changes of approach in individual compositional parameters, such as harmony, rhythm and form.

Compositional Values

When embarking upon this portfolio I had felt it important that I regularly reflect upon the values motivating my compositional practice. In doing so I was also keen, through reflection, to learn something of the genealogy of those values. Upon engaging in this process I very quickly became aware of a predilection I possessed towards the sensual and emotive capacity of music to affect one's physical being. The potential for feelings ranging from excited exaltation to lachrymose melancholia was, in many ways, the fundamental source of my engagement with music. This proclivity manifested itself in a strong attachment to the music of Rachmaninoff as well as Liszt and to some of the symphonies of Mahler and Bruckner. The key attractions to this music were often the chromatic twists of harmony and the climatic passages leading to emphatic and majestic restatements of earlier material. Consequently I sought in much of my composing to create similar effects. Techniques employed in pursuit of this goal included the repetition of material with progressively greater forces; a clear distinction between melody and accompaniment; sequential phrasing as a means of developing melody; arch like structures; a quasi-tonal harmonic language; and a general concern with clarity and ease of discernibility for a listener familiar with the popular, classical and romantic repertoire. *Music for Flute and Marimba* demonstrates many of these concerns.

Writing music in an attempt to recreate the superficial effects I enjoyed in other music quickly led to discontent. Using such techniques unweaved the rainbow and led to disenchantment.¹ I began to seek a new motivating ideal to guide the tenor of my compositional practice. A concern with order and structure soon became predominant in my thoughts and I began to seek a means of generating music of the utmost unity. Such values lay behind the composition of *Elegy* from *Music for Flute*. While I was satisfied with the result I did not feel entirely comfortable with the values which motivated my writing of the piece. In a process of self-reflection as an attempt to excavate further

¹ This idea has been discussed by eminent scientists such Richard Dawkins and Richard Feynman. They argue that greater pleasure is to be obtained from a scientific understanding of nature as opposed to one based on superstition and folklore. See Dawkins (1998).

into my prejudices I became aware of the prominent and regulative role played by the organic metaphor at the preconscious level.² My almost unconscious fetishisation of this regulative metaphor had been received uncritically. I decided that I would no longer seek any absolutist value system to regulate my compositional practice but would instead embrace contingency with all its attendant dangers and opportunities.

My first attempt at a freer approach in my compositional practice was *Prelude-Impromptu* from *Music for Flute*. In *Fantasy for Piano* this style found its largest expression but it was not until the final compositions of this portfolio, *Fragments for Cello*, that I attained a fuller realisation of the liberated style I had been pursuing. Therefore the following works, presented in chronological order, can be seen as documenting a process of compositional and aesthetic development.

² By “Organic Metaphor” I refer to the idea that music should exhibit organic traits i.e. that a composition should be the unfolding and development of a limited number of ideas and that there should be a relation between all ideas. See Ruth A. Solie: ‘The Living Work: Organicism and Musical Analysis’, *19th-Century Music* 4 (Fall 1980), pp. 147-56.

Chapter two, The Pieces

2.1 Music for Marimba and Flute

2010

Originally performed by Duo X on 9th September 2010 in a workshop at the University of Glasgow.

This piece is based upon the style developed in my undergraduate portfolio and demonstrated most explicitly in *Meditation* from *Three Pieces for Violin and Piano*. There are four essential elements to this style. Firstly there is an opposition between the strict rhythmic control of the marimba and the rhythmically freer flute part. Secondly there is a concentrated melodic line that is predominantly restricted to stepwise motion. Thirdly there is a clear if slightly coloured sense of tonality and fourthly the music is housed in an arch form.

Like *Meditation*, *Music for Flute and Marimba* makes specific use of a “double-arch” form. The first of the five sections of the piece runs from mm.1-14; the second from mm.15-19; the third from mm.20-24; the fourth from mm.25-33; and the fifth and final section from mm.34-41. Throughout all of the component sections of the piece continuity is maintained throughout the rhythmic and melodic writing, which attempts to generate a subtle tension between the two instruments. While the simple contrast between the two instruments is an obvious factor, the rhythmic writing for marimba attempts to generate tension through a subtle irregularity via a simple expansion of the basic rhythmic idea. The marimba part is developed rhythmically through decoration and ornamentation of the fundamental pattern established at the outset. This elaboration begins in section two at m.15 and continues throughout the following sections until the beginning of section five where the simple pattern of the opening returns.

Figure 2. Rhythmic elaboration in mm.21-22 from *Music for Flute and Marimba*.

The general regularity of the marimba part allows the flute to float freely overhead reflecting the influence of jazz and jazz-inspired singers on my melodic writing, such as Billie Holiday and Frank Sinatra, who would frequently sing just ahead or behind the steady beat of the accompanying ensemble.

Figure 3. The flute playing “behind the beat” in *Music for Flute and Marimba*.

Harmonically the first section employs simple “white-note” harmony that generates a strong suggestion of C major tonality. The second section begins by suggesting a move to the mediant but this is simply a “passing harmony” that leads to the use of an octatonic collection beginning in the second half of m.16. In mm.17-19 the flute, through the means of an ascending scale passage, unfolds the octatonic collection as the marimba continues in a similar vein to section one though now refracted through an octatonic harmony. The third section is an ecstatic recapitulation of ideas expressed in the first. The fourth section is a development of the ideas expressed in the second section. Harmonically this is achieved through employing a diminished 7th chord for harmonic staging posts. Mm.25-26 are centred on Bb; mm.27-28 on Db; mm.29-30 on E; and mm.31-32 on G. There are two reasons for using the diminished 7th chord. Firstly, the structural use of the diminished 7th

chord references the octatonic collection employed in section two. Secondly, by ending on G and immediately preceding a return of the “white note” C major harmonic world of section one, a veiled perfect cadence is created and offers resolution to the harmonic ambiguity of the preceding music. Like *Meditation*, *Music for Flute and Marimba* concludes as it began and completes the arch.

Figure 4. Use of octatonic collection in *Music for Flute and Marimba*.

Meditation was regarded, by the examiners, as the most effective and successful piece in my undergraduate portfolio. I also found *Meditation* to be the most satisfying work I had until that point composed. In writing *Music for Flute and Marimba* I took the decision, predicated on a practical desire to develop my craft, to intentionally imitate, and consequently understand, the intuitive processes that had motivated the composition of *Meditation*. As it was written at short notice, for a workshop, I was also concerned with practical considerations. I wished to hear how the techniques and aesthetic that I had employed would sound in performance; hence I felt it important that piece be short, transparent and technically undemanding. The resultant work is in many respects a précis of *Meditation*.

2.2 Two Pieces for Flute

2010

Two Pieces for Flute represents a significant development in my compositional language. Written after a month's study of aspects of post-tonal theory, both pieces demonstrate a move away from the tonal language evinced in *Music for Flute and Marimba*. There are also developments in the formal and rhythmic aspects of my compositional practice and the emergence of a concern with gesture that adumbrates a significant concern in later works of this portfolio.

For a significant amount of time I had been averse to relying on highly formalised and abstract methods of composition, seeking instead to write intuitively and capture a particular mood or emotion in music. I eventually reached an impasse where I began to feel constrained by the limitations of tonal language but was struggling to write intuitively outside of a tonal medium. This left me eager to learn ways of creating a coherent and consistent non-tonal harmonic world in which I would be free to compose in a relatively intuitive manner. It was from those circumstances that I was motivated to engage tentatively with set-theory and in August of 2010 I made an introductory study of it with through the use of Joseph Straus's *Introduction to Post-Tonal Theory*, 3rd edn. (New Jersey: Pearson Prentice Hall, 2005). The *Elegy* for flute was the first fruit of those studies.

2.2.1 Elegy for Flute

The *Elegy for Flute* was written shortly after I had familiarised myself with some basic aspects of set-theory. It was also my first composition following *Music for Flute and Marimba*. My primary concern was with the creation of a consistent harmonic world that did not rely on explicit references to common practice tonality.

The primary materials of the piece are an (014) set class and an (0157) set class.

Figure 5. An (014) and (0157) set-class.

All of the material in mm.1-11 and mm.28-44 is derived from (014) while the central section, mm.13-25, is derived from (0157). The exceptions are m.12 and mm.26-27. These measures play a transitional role and hence are of a hybrid nature, being the result of an intuitive mixture of both sets.

One of the techniques heavily employed in the generation of material is the imbrication of a set-class with one of its variations. The first example of this is in mm.5-7. Here there are three collections: G-Bb-F#, F#-G-Eb and Eb-D-F#. This technique allows for a seamless connection and creates a sense of development while maintaining the particular sound world of (014).

Figure 6. Imbrication of set-class variants. From mm.5-7 of *Elegy for Flute*.

Also of significance to the compositional process in the *Elegy* is the regulative power of the “organic metaphor”. One way of achieving this is through the use of the imbrication technique previously discussed which helps to create a sense of natural growth. Another is to present simple gestures which are unpacked and developed later in the piece. Measure eight, for example, opens with what is superficially a decorative flourish. This simple flourish is in fact a summary of the entire piece. It consists of Bb-D-Eb-F#-G which are all of the pitch classes so far employed. It also outlines the Bb-G relationship which prefigures the climax of the piece in mm29-32. Measure eleven, which comes at the close of the first section, contains the first instance of a major 7th interval in the piece, here in the form of C-B. These pitch classes and intervals are again taken up towards the close of the third section in m.27. While all of these simple techniques are employed in an attempt to create a

consistent harmonic world that does not rely on common practice tonality, an ambiguity is intentionally maintained to subtly suggest G minor. This is achieved through the harmonic minor implication of G-F#-Eb and the suggestion of a dominant in the D-F# dyad in m.7 and at the piece's conclusion.

Like *Music for Marimba and Flute*, the *Elegy* is structured in a "double-arch" form, with section one being covered in mm.1-12; section two in mm.13-25; section three in mm.26-28; section four in mm.29-39; and section five in mm.40-44. There are also clear rhythmic similarities in the melodic writing between sections one and five of the *Elegy* and the flute part of *Music for Marimba and Flute*. This is demonstrative of the fact that while the *Elegy* represents an important development in my harmonic language, rhythmically and formally it is still indebted to the world of *Meditation* and *Music for Marimba and Flute*.

As *Elegy* was my first attempt at composing using the basic manipulation of sets, I decided that I would only seek to create a relatively simple emotional world. The work therefore follows a fairly conventional pattern, consisting of sombre music with a lighter central section to provide relief and contrast. As well as reflecting the general mood of the music, *Elegy* was also the title given to several earlier works I had written in my teenage years.

2.2.2 Prelude-Impromptu

Following the completion of *Elegy*, the opportunity arose to submit a work for consideration for performance at *Sound Thought 2011*. This motivated the decision to write a companion piece for the *Elegy* that would serve as an introductory movement. In writing this piece my primary concern was to move beyond my conservative treatment of rhythmic and formal parameters while continuing to build on the harmonic and melodic elements of the *Elegy*.

As *Prelude-Impromptu* was to be written for the *Sound Thought* music and arts festival, I wanted the piece to acknowledge this in some way. I had long been aware of musical ciphers employed by past

composers such as Bach, Schumann and Liszt, as a means of personalising a particular work, but it was when reading an article by Julian Anderson on the works of Oliver Knussen that I decided to use such a tactic in writing *Prelude-Impromptu*. In his paper, *Harmonic Practices in Oliver Knussen's Music since 1988: Part 1*, Anderson discusses Knussen's use of a cipher in the writing of his *Flourish with Fireworks* (1988). The work was composed for Michael Tilson Thomas's first concert as Chief Conductor of the London Symphony Orchestra and "...from this Knussen chose a musical cipher using the letters LSO-MTT – translated into musical notes as a five-note cell A-E flat G-E natural-B".³ Consequently I made the decision to derive notes from the letters S-O-U-N-D-T-H-O-U-G-H-T. I translated this into musical notes as: **S-SOL-UT-NI-D-TI-H-SOL-UT-G-H-TI** = Eb-G-C-B-D-Bb-G-C-G-Bb-B. Further, given that the cipher consists of a five letter word followed by a seven letter word, the metric structure of the piece consistently moves between five and seven quaver beats per measure. This pre-established metric schema presented me with a canvas upon which to write.

Figure 7. "SOUND THOUGHT" musical cipher from opening two measures of *Prelude-Impromptu*.

From a technical perspective the primary attraction in using the cipher was that it would, by arbitrarily presenting me with pitch material, challenge me to develop other compositional parameters such as rhythm and form and not merely employ them instrumentally for the sustainment of a particular harmonic world that I found intuitively satisfying.

The cipher is presented in the opening two measures. The first three notes of m.2, while part of the cipher, present the opportunity for special treatment as an (014) set class. They receive such treatment in m.6, m.12 and m.16. A key factor in the decision to highlight this feature of the cipher

³ Julian Anderson: 'Harmonic Practices in Oliver Knussen's Music since 1988: Part I', *Tempo*, New Series, No. 221 (Jul., 2002), p.2.

was to anticipate the prominent use of (014) in *Elegy* and therefore to provide a subtle continuity between the contrasting movements.

Much of the music of *Prelude-Impromptu* is derived from the repetition of material in retrograde and inverted forms. This can be observed clearly if one compares mm.3-4 with mm.13-14 and mm.8-11 with mm.28-31. Other material can be seen to be derived from more basic procedures such as sequence (cf.m.9 with m.8).

The form of the music is looser and less defined than my earlier compositions but the regulative power of the arch has not yet been overcome. The climatic point here is the high Eb in mm.20-22. The decision to have this sustained high note was motivated by a need for contrast and relief from the surrounding frenetic activity.

Rhythmically the piece is inspired by a general impression formed from listening to the hyper-active flourishes and gestures of Be-Bop, evinced in the recordings of such figures as Charlie Parker and Dizzy Gillespie. There has been no attempt to recreate specific patterns or transcribe rhythms from the solos of particular performers. Instead what is presented is my personal reaction to the rhythmic qualities of such music.

Figure 8. Be-bop inspired flourishes from mm.13-15 of *Prelude-Impromptu*.

The title of *Prelude-Impromptu* was chosen for two reasons. Firstly, the piece functions as an ironic prelude to *Elegy*. In its fast paced activity, designed to sound as if the music is almost falling over itself, the piece attempts to establish an almost breathless and capricious mood which will allow the *Elegy* to stand in marked contrast to it. The “Impromptu” part of the title is designed to remind the performer and listener of the word “prelude” in its capacity as a verb. The tradition of

“preluding” a work in a recital with a short improvisation by the performer may have past, but it is important in *Prelude-Impromptu* that a feeling of spontaneity is maintained.⁴

⁴ For an account of the preluding tradition, see chapter four of Kenneth Hamilton’s, *After The Golden Age: Romantic Pianism and Modern Performance* (New York: Oxford University Press, 2008)

2.3 Music for Wind Quintet

2010-11

Towards the end of 2010 I began to take an interest in the music of John Adams (1947). His highly personal use of harmony and textures, suggestive of the late romantic repertoire, combined with minimalist procedures, particularly evident in his *Harmonielehre* (1985), prompted me to revisit the impasse I had come to following the writing of *Music for Flute and Marimba*. With the writing of *Two Pieces for Flute* I had begun to explore the development of a “post-tonal” modernist inflected idiolect as a means of progressing as a composer. I now decided to make an attempt at the development of a compositional language that would be an expansion of the tonal language of my earlier works but with the employment of techniques used by Adams. The result of this was *Music for Wind Quintet*.

The piece is housed in a highly conventional binary form with the return of the opening material being too curtailed to constitute anything more than a brief coda. The first section encompasses mm.1-86; the second mm.87-178; and the third mm.179-209. The first section can be broken down further into subsections. From mm.1-24 an arresting rhythmic gesture frames the music that forms the first subsection of section one. Subsection two (mm.25-64) picks up some of the previous ideas and develops them for the most part in the more metrically stable quadruple time as means of contrast. A modified return of subsection one makes up the final subsection of the piece’s first section (mm.65-86).

Section two follows a similar structure to section one but with much greater concision of material. The first subsection takes in mm.87-110; the second mm.111-130; and the third mm.131-174. A short linking section in mm.175-178 facilitates a modified return of music from subsection one of section one (mm.179-209) that concludes the piece.

Harmonically the piece is ostensibly centred on a C major mode sonority with a contrasting central section centred on the “dominant” of G. The music is in fact loosely built out of an (02347) collection.

Figure 9. An (02347) set-class.

The attraction to this collection was primarily the ambiguity engendered by the presence of both a major and a minor third if considered in the context of tonality. While there is an ambiguity, conventional procedures such as symmetry are employed in the music’s harmonic development - such as the as a move to the flattened mediant in mm.17-19 contrasted with a move to the flattened sub-mediant in the analogous passage in mm.72-73 – in order to highlight the tonal centre of C. Similarly, the restatement of the piece’s opening material in mm.5-11 is presented a semitone higher in mm.65-71 and a semitone lower in mm.186-188 to enhance the fundamental significance of C.

The influence of Adams on *Music for Wind Quintet* is to be found primarily in the textures, such as the “out of phase” music of the flute and clarinet in mm.9-11 and their insistent pulsing of one interval in mm.12-13.

Figure 10. “Out of phase” figure in flute and clarinet part, mm. 53-54 from *Music for Wind Quintet*.

While not directly inspired by Adams, the central section of the piece (mm.87-178) is clearly influenced by minimalist procedures. The music is simply an elaboration of the (02347) collection

with the addition of lydian and mixolydian inflections achieved through considering the music in tonal terms as G major with the addition of a raised fourth (C#) and a lowered seventh (F natural).

To date, *Music for Wind Quintet* represents my last attempt at writing in a consistently (quasi) tonal style. The mechanistic nature of much of the writing in the work results in a rather cool if not clinical aesthetic that I do not find artistically or emotionally satisfying. The value of this work to me is that in composing it I was able learn that it was not the kind of music I wished to write. In doing this I was able to extricate myself from the conflict of stylistic directions in which I had been engaged previously.

2.4 *Fantasy for Piano.*

2011

Fantasy for Piano brings together many stylistic and technical elements of the previous works in this portfolio and attempts to forge a new compositional direction couched in a more collage-like and fragmented formal structure than I had previously used. Elements present include: improvisation, set-class techniques, repeated cells and quasi-tonal episodes. Also present is the influence of Harrison Birtwistle, some of whose music I had studied prior to writing *Fantasy for Piano*. This influence can be found in the juxtaposition of contrasting units of music as well as the control of pitch material through the use of collections of adjacent pitch-classes and the fact that much of the work's material is derived from an (016) collection (and the tritone interval it contains), a sound world that was resonating in my mind after engaging with Birtwistle.

Figure 11. An (016) set-class.

Formally the work can be divided into two broad sections. The first takes in mm.1-139 and the second mm. 140-216. Each of the two sections presents material and develops it but only section two contains material unique to itself. Both of these sections can be seen to contain subsections. Section one opens with an improvisatory gesture that grows and develops obsessively. In writing this I had in mind an anecdote I had heard at an RMA Research Colloquia given by Professor William Sweeney regarding the compositional practice of Janáček, which stated that he would repeatedly play a chord or collection of pitch-classes at the piano for prolonged periods of time in an attempt to hear the possibilities contained within the sounds. This is ultimately the process that occurs in mm.1-24, which constitute subsection one of section one.

The music of mm.25-124 forms subsection two of section one and is designed to offer contrast to the preceding music while consisting of the same fundamental intervallic material. Contrast is achieved through the use of register and rhythm in the context of repeating cells which differs markedly from the work's improvisatory opening.

Figure 12. Unfolding of an (016) collection from opening of *Fantasy for Piano*.

Evinced in subsection two is a looser approach to the use of repeating blocks of material that characterises some of the earlier works in this portfolio. Here the material is often interrupted, as in mm.49-60; mm.81-97 and mm.101-108. This process is used to develop new material while maintaining the overall sound world of the subsection and its formal role as a contrasting section to subsection one. The music which follows in subsection three synthesises some of the ideas present in the previous subsections. This achieved through a repetition of the work's opening with the addition of the most prominent rhythmic feature of subsection two.

Figure 13. Mm.130-131 from *Fantasy for Piano* showing return of opening combined with rhythmic feature.

The music of the second half of *Fantasy for Piano* is constructed in a collage-like fashion. Portions and fragments of ideas appear and disappear only to turn up later on in the music. Significant fragments include the grand statement in m.142 which is taken up again in the second half of mm.182 and leads to a climatic passage that pays homage to my romantic influences but which is diluted and enfeebled through the fragmented musical discourse. The tolling gesture of mm.142-146 is heard a further three times, acting as an abrupt punctuation mark to various episodes. The idea that eventually triumphs is the choral like passage of mm.161-162 which is taken up on a larger scale in mm.195-203 following the incongruous climatic passages of mm.186-193. The music concludes with a scurrying inversion of the work's opening which quickly finds itself enervated and unable to continue.

The *Fantasy for Piano* is in certain respects an attempt to convey some of the psychological dimensions of the compositional process as I experience it. Ideas are presented abruptly and contrasting material is starkly juxtaposed. The intention is to convey a fantastical character of rapidly changing scenes that are occasionally interrupted by half remembered fragments of earlier episodes and in doing so convey something of the desultory and capricious nature of mental flights of fancy. The hope is that the listener will experience a piece of music trying to find itself, much as the composer tries to find the piece himself in writing it.

2.5 Fragments for Cello

2011

Partly performed in workshop at Sound Thought 2011

The writing of *Fragments for Cello* arose from my participation in a composition workshop with cellist David O'Connell and composer Dr Drew Hammond at *Sound Thought 2011* and at a subsequent workshop at the University of Glasgow in June 2011. The opportunity arose at short notice to write short, technically speculative ideas for the workshop and it was these circumstances that inspired the writing of the first fragment in this collection. The remainder of the collection was composed subsequently and each is inspired by the aesthetic of the opening fragment.

(1)

The primary concern in the opening fragment is the presentation of several fragmentary ideas in a dislocated and non-developmental structure. This builds upon the formal consideration of *Fantasy for Piano* but the collage-like aesthetic is presented in a far more concise and condensed form. The secondary concern was the need for the conspicuous use of novel and challenging approaches to technique as required by the workshop. I made an early decision that this piece should explore some of the musical opportunities made possible through the use of an extended left-hand pizzicato technique. This decision was motivated by an interest in the polyphonic potentialities that the technique engendered. It was in the context of these formal and technical aims that the piece was composed.

The most significant of the regulative devices employed in the selection of pitch-class materials are those of chromatically adjacent pitch-classes and the tritone interval. The pitches C, G, D and A of the open strings on the cello are also important because of the prominent use of left-hand pizzicato. The presence of these devices can be observed throughout the entire piece, particularly in mm.1-34.

The music of mm.35-41, particularly of mm.38-39, is the most adventurous in terms of instrumental technique. The passage begins with a left-hand pizzicato solo following which the right-hand, using the same physical technique as left-hand pizzicato, takes over. The two hands are then combined. This dual-pizzicato technique is used for the generation of a chromatic and heterophonic texture that attempts to exhibit and develop the polyphonic material hinted at earlier in the piece.

Figure 14. “Dual-pizzicato” technique in mm.37-38 in piece I from *Fragments for Cello*.

I regard the first piece of *Fragments for Cello* as significant in my compositional development. It was written with a new found freedom and aesthetic. While I do not view the work as the epitome of a style I would necessarily like to pursue indefinitely, I value the liberating experience of having written the work.

(2)

The second fragment is an exercise in pizzicato playing generated from an (014) and an (016) set class. The piece freely presents gestures and motivic fragments in a manner characterised by the juxtaposition of moments of calm and near stasis with those of frenetic activity. The aim of this type of writing is to generate a sense of spontaneity and unpredictability, reflecting a significant aspect of how we experience the world in our mental life. The music is not trying to offer a literal representation but is instead concerned with the fragmented, unmotivated and sporadic manner in which life can often appear.

Figure 15. Juxtaposition of contrasts in mm.54-55 in piece II from *Fragments for Cello*.

The coda, which references the pizzicato techniques of the first fragment, attempts to impose some sort of regularity on proceedings but ultimately fails, bringing the piece to its conclusion with a final utterance of an (014) collection.

(3)

The third piece of this collection takes on a role analogous to a minor mode slow movement in a major mode sonata. An attempt is made to generate an almost Bartókian pathos through the use of an octatonic collection. The aesthetic intention here is to provide a lyrical contrast with the other pieces of this collection and to even seem incongruous. This is to undermine any aesthetic unity that the collection may seem to be developing after the first two pieces and therefore extrapolate the aesthetic of contrasting juxtapositions to a higher level.

(4)

The final piece of the collection is built almost entirely from fragments of the preceding pieces and so acts as a sort of summation or collages of collages. The fragmentary aesthetic employed in this collection is therefore most in evidence in the final piece as the listener will be able to clearly discern the various fragments of music already heard.

Figure 16. Collage of fragments in mm.94-96 in piece IV from *Fragments for Cello*.

The surface aesthetic of this collection was that of fragmentation but upon reflection I have realised that my underlying interest was of a concern with meaning and music. In writing *Fragments for Cello* I was consciously trying to avoid any sort of teleological aesthetic and instead sought to produce music where there would be no correct way in which to listen it. By presenting an almost chaotic auditory world I wanted to challenge the listener to generate his or her own meaning from the music. For me this reflects a philosophy of existential nihilism in which there are no absolute values. I see this as a great opportunity for humanity individually and collectively to generate our own meaning and not be shackled to tradition and ancient superstitions. This philosophy underpins *Fragments of Cello* and, as such, represents the outcome of this portfolio. I choose to employ certain received traditions such as musical notation and the Cello as an instrument but I also took the decision to present musical fragments and gestures in an impulsive and unordered fashion. This work is therefore a loose collection of ideas shorn of all motivating principles other than that the listener is sovereign.

Prelude-Impromptu

for solo flute

Quick, but with some freedom, like an improvisation (c. ♩ = 127)

Thomas Arthur
(2010)

The musical score is written in treble clef with a key signature of one flat (B-flat). The tempo is marked 'Quick, but with some freedom, like an improvisation' with a common time signature and a tempo of approximately 127 beats per minute. The score consists of 30 measures, divided into systems of four measures each. The dynamics range from *pp* (pianissimo) to *fff* (fortississimo). The piece features various rhythmic patterns, including sixteenth and thirty-second notes, and includes several fingerings (6, 3, 5, 9) and articulations (accents, slurs). The score is marked with *p*, *pp*, *f*, *mp*, *mf*, *p*, *f*, *pp*, *mf*, *pp*, *p*, *leggiero*, *cresc.*, *f*, *p*, *p*, *mf*, *3*, *mp*, *f*, *mf*, *p*, *f*, *p*, *mf*, *p cresc. leggiero*, *fff*, *p leggiero*, *mf*, *pp*, *p leggiero*, *f*, *sp*, *f*.

30

The musical score consists of five measures. Measure 30 begins with a treble clef, a key signature of one flat (B-flat), and a 7/8 time signature. The first two measures contain eighth-note triplets, each marked with a '3' and a bracket. The third measure continues with a triplet of eighth notes. The fourth measure features a triplet of eighth notes followed by a quarter note. The fifth measure contains a quarter note, a quarter rest, and a quarter note. The piece concludes with a double bar line. Dynamic markings are placed below the staff: *sp* under the first triplet, *ff* under the second triplet, *pp* under the quarter note in measure 4, and *mf* under the quarter note in measure 5.

Wind Quintet

Thomas Arthur
(2011)

Fast ♩ = 132

This musical score is for a Wind Quintet, featuring five instruments: Flute, Oboe, Clarinet in Bb, Horn in F, and Bassoon. The tempo is marked 'Fast' with a quarter note equal to 132 beats per minute. The score is divided into three systems of staves.

- System 1 (Measures 1-7):** Shows the initial entries for the instruments. The Flute, Oboe, and Bassoon play a rhythmic pattern of eighth notes with accents. The Clarinet in Bb and Horn in F play a similar pattern, with the Horn in F marked *p* (piano).
- System 2 (Measures 8-12):** The Flute and Oboe enter with a melodic line marked *p*. The Clarinet in Bb continues its eighth-note pattern. The Horn in F and Bassoon play sustained notes, with the Bassoon marked *p*.
- System 3 (Measures 13-16):** The Flute and Oboe continue their melodic lines. The Clarinet in Bb has a dynamic change to *f* (forte) in measure 15. The Horn in F and Bassoon maintain their sustained notes, with the Bassoon marked *f* in measure 15.

Musical score for measures 17-19. Measure 17 is in 3/4 time with a piano (*p*) dynamic, featuring a fifth finger (5) on the first eighth note and a triplet of eighth notes (F#4, G#4, A4). Measure 18 is in 4/4 time with a mezzo-forte (*mf*) dynamic, featuring a triplet of eighth notes (Bb4, C5, D5) and a fifth finger (5) on the next eighth note. Measure 19 is in 4/4 time with a mezzo-forte (*mf*) dynamic, featuring a triplet of eighth notes (E5, F5, G5) and a fifth finger (5) on the next eighth note.

20

Musical score for measures 20-23. Measure 20 is in 3/4 time with a mezzo-forte (*mf*) dynamic, featuring a fifth finger (5) on the first eighth note and a triplet of eighth notes (F#4, G#4, A4). Measure 21 is in 3/4 time with a mezzo-forte (*mf*) dynamic, featuring a triplet of eighth notes (Bb4, C5, D5) and a triplet of eighth notes (E5, F5, G5). Measure 22 is in 3/4 time with a mezzo-forte (*mf*) dynamic, featuring a triplet of eighth notes (F#4, G#4, A4) and a triplet of eighth notes (Bb4, C5, D5). Measure 23 is in 3/4 time with a mezzo-forte (*mf*) dynamic, featuring a triplet of eighth notes (E5, F5, G5) and a triplet of eighth notes (F#4, G#4, A4).

24

Musical score for measures 24-32. Measure 24 is in 2/4 time with a pianissimo (*pp*) dynamic, featuring a triplet of eighth notes (F#4, G#4, A4) and a triplet of eighth notes (Bb4, C5, D5). Measures 25-32 continue with a pianissimo (*pp*) dynamic, featuring a triplet of eighth notes (E5, F5, G5) and a triplet of eighth notes (F#4, G#4, A4).

33

Musical score for measures 33-40. Measure 33 is in 2/4 time with a mezzo-forte (*mf*) dynamic, featuring a triplet of eighth notes (F#4, G#4, A4) and a triplet of eighth notes (Bb4, C5, D5). Measures 34-40 continue with a mezzo-forte (*mf*) dynamic, featuring a triplet of eighth notes (E5, F5, G5) and a triplet of eighth notes (F#4, G#4, A4).

41

Musical score for measures 41-48. Measure 41 is in 2/4 time with a mezzo-forte (*mf*) dynamic, featuring a triplet of eighth notes (F#4, G#4, A4) and a triplet of eighth notes (Bb4, C5, D5). Measures 42-48 continue with a mezzo-forte (*mf*) dynamic, featuring a triplet of eighth notes (E5, F5, G5) and a triplet of eighth notes (F#4, G#4, A4).

49

Musical notation for measures 49-56. The system consists of two staves. The upper staff features a melodic line with eighth and sixteenth notes, including accidentals such as flats and sharps. The lower staff provides a harmonic accompaniment with chords and moving bass lines.

57

Musical notation for measures 57-63. The upper staff continues the melodic development with some slurs and ties. The lower staff shows a more active bass line with frequent chord changes.

64

Musical notation for measures 64-71. The upper staff has a more rhythmic and melodic character with slurs. The lower staff features a steady accompaniment with some rests.

72

Musical notation for measures 72-77. The upper staff shows a consistent melodic pattern with slurs. The lower staff continues the harmonic support with various chordal textures.

78

Musical notation for measures 78-83. The upper staff features a melodic line with some chromaticism. The lower staff has a more complex accompaniment with moving bass lines and chords.

84

Musical notation for measures 84-90. The upper staff continues the melodic theme with slurs. The lower staff provides a rich harmonic accompaniment with various chordal structures.

90

Musical score for measures 90-96. The system consists of two staves. The upper staff features a melodic line with eighth and sixteenth notes, including accidentals (sharps and flats). The lower staff provides a harmonic accompaniment with chords and moving lines. A fermata is placed over the final measure of this system.

97

Musical score for measures 97-103. The system consists of two staves. The upper staff continues the melodic line with eighth notes and slurs. The lower staff has a more active accompaniment with eighth notes and chords. A fermata is placed over the final measure of this system.

104

Musical score for measures 104-110. The system consists of two staves. The upper staff has a melodic line with eighth notes and slurs. The lower staff features a complex accompaniment with chords and moving lines. A fermata is placed over the final measure of this system.

110

Musical score for measures 110-118. The system consists of two staves. The upper staff has a melodic line with eighth notes and slurs. The lower staff features a complex accompaniment with chords and moving lines. A fermata is placed over the final measure of this system.

119

Musical score for measures 119-125. The system consists of two staves. The upper staff has a melodic line with eighth notes and slurs. The lower staff features a complex accompaniment with chords and moving lines. A fermata is placed over the final measure of this system.

126

Musical score for measures 126-132. The system consists of two staves. The upper staff has a melodic line with eighth notes and slurs. The lower staff features a complex accompaniment with chords and moving lines. A fermata is placed over the final measure of this system.

130

Musical score for measures 130-132. Measure 130: Treble clef has eighth-note triplets of G4, A4, Bb4. Bass clef has a whole note chord of G2, Bb2, D3. Measure 131: Treble clef has eighth-note triplets of G4, A4, Bb4. Bass clef has a whole note chord of G2, Bb2, D3. Measure 132: Treble clef has eighth-note triplets of G4, A4, Bb4. Bass clef has a whole note chord of G2, Bb2, D3.

133

Musical score for measures 133-135. Measure 133: Treble clef has eighth-note triplets of G4, A4, Bb4. Bass clef has a whole note chord of G2, Bb2, D3. Measure 134: Treble clef has eighth-note triplets of G4, A4, Bb4. Bass clef has a whole note chord of G2, Bb2, D3. Measure 135: Treble clef has eighth-note triplets of G4, A4, Bb4. Bass clef has a whole note chord of G2, Bb2, D3.

136

Musical score for measures 136-137. Measure 136: Treble clef has eighth-note chords with fingering 7 and 6. Bass clef has a whole note chord of G2, Bb2, D3. Measure 137: Treble clef has eighth-note chords with fingering 5, 7, 5. Bass clef has a whole note chord of G2, Bb2, D3.

138

Musical score for measures 138-140. Measure 138: Treble clef has eighth-note chords with fingering 7, 5, 7. Bass clef has a whole note chord of G2, Bb2, D3. Measure 139: Treble clef has eighth-note chords with fingering 5. Bass clef has a whole note chord of G2, Bb2, D3. Measure 140: Treble clef has eighth-note chords with fingering 7. Bass clef has a whole note chord of G2, Bb2, D3.

167

Musical notation for measures 167-170. The treble clef contains chords with trills, and the bass clef contains a five-fingered scale. The number '3' is written below the treble clef and '5' below the bass clef for each measure.

168

Musical notation for measures 168-171. The treble clef contains chords with accents, and the bass clef contains a five-fingered scale. The number '5' is written below both clefs for each measure.

169

Musical notation for measures 169-172. The treble clef contains chords with accents, and the bass clef contains a five-fingered scale and triplets. The number '5' is written below the treble clef and '3' below the bass clef for each measure.

170

Musical notation for measures 170-171. The treble clef contains a five-fingered scale, and the bass clef contains a five-fingered scale and triplets. The number '5' is written below both clefs for each measure.

172

Musical notation for measures 172-175. The treble clef contains chords with accents, and the bass clef contains a five-fingered scale and triplets. The number '5' is written below the treble clef and '3' below the bass clef for each measure.

174

Musical score for measures 174-175. The system consists of two staves: a treble clef staff and a bass clef staff. Measure 174 features a treble staff with a melodic line of eighth notes and a bass staff with a rhythmic accompaniment of eighth notes. A slur covers measures 174 and 175. Fingerings are indicated by numbers 5, 7, and 5 in the treble staff, and 5, 5, 5, and 5 in the bass staff.

175

Musical score for measures 175-176. The system consists of two staves: a treble clef staff and a bass clef staff. Measure 175 features a treble staff with a melodic line of eighth notes and a bass staff with a rhythmic accompaniment of eighth notes. A slur covers measures 175 and 176. Fingerings are indicated by numbers 7, 5, and 7 in the treble staff, and 5, 5, 3, and 3 in the bass staff.

176

Musical score for measures 176-179. The system consists of two staves: a treble clef staff and a bass clef staff. Measure 176 features a treble staff with a melodic line of eighth notes and a bass staff with a rhythmic accompaniment of eighth notes. A slur covers measures 176 and 177. Fingerings are indicated by numbers 5, 7, and 5 in the treble staff, and 3, 7, and 5 in the bass staff. Measures 178 and 179 are marked *pp* and feature a piano accompaniment with a triplet of eighth notes in the treble staff and a single eighth note in the bass staff. A *Ped.* marking is present at the end of measure 179.

180

Musical score for measures 180-182. The system consists of two staves: a treble clef staff and a bass clef staff. Measure 180 features a treble staff with a melodic line of eighth notes and a bass staff with a rhythmic accompaniment of eighth notes. A slur covers measures 180 and 181. Fingerings are indicated by the number 3 in both staves. Measure 182 is marked *pp* and features a piano accompaniment with a triplet of eighth notes in the bass staff.

183

Musical score for measures 183-186. The system consists of two staves: a treble clef staff and a bass clef staff. Measure 183 features a treble staff with a melodic line of eighth notes and a bass staff with a rhythmic accompaniment of eighth notes. A slur covers measures 183 and 184. Fingerings are indicated by the number 5 in both staves. Measure 185 is marked *accel.* and features a treble staff with a melodic line of eighth notes and a bass staff with a rhythmic accompaniment of eighth notes. Measure 186 is marked *cresc.* and features a treble staff with a melodic line of eighth notes and a bass staff with a rhythmic accompaniment of eighth notes. A slur covers measures 185 and 186. Fingerings are indicated by the number 7 in the treble staff and 3 in the bass staff.

185

Musical score for measures 185-186. The system consists of two staves. The upper staff (treble clef) contains a melodic line with a 5-measure phrase, a 6-measure phrase, and a 7-measure phrase. The lower staff (bass clef) contains a bass line with a 3-measure phrase and a 5-measure phrase. The key signature has one flat.

186 $\text{♩} = 72$

f cresc.

Musical score for measures 186-187. The system consists of two staves. The upper staff (treble clef) features a long, sweeping melodic line with a crescendo marking. The lower staff (bass clef) contains a bass line with a 6-measure phrase, a 5-measure phrase, and two 3-measure phrases. A 'Ped.' marking is present below the bass staff. The key signature has two sharps.

187

Musical score for measures 187-188. The system consists of two staves. The upper staff (treble clef) contains a melodic line with a 3-measure phrase. The lower staff (bass clef) contains a bass line with a 3-measure phrase and another 3-measure phrase. The key signature has two sharps.

188

fff

Musical score for measures 188-189. The system consists of two staves. The upper staff (treble clef) contains a melodic line with a 3-measure phrase. The lower staff (bass clef) contains a bass line with a 3-measure phrase. A 'fff' marking is present below the bass staff. The key signature has two sharps.

189

Musical score for measures 189-190. The system consists of four staves: two for the right hand and two for the left hand. The right hand has a treble clef and a key signature of two sharps (F# and C#). The left hand has a bass clef and a key signature of two sharps. Measure 189 features a melodic line in the right hand with notes G#4, A4, B4, C#5, and D5. The left hand has a complex accompaniment with triplets and slurs. Measure 190 continues the melodic line in the right hand with notes E5, F#5, G#5, A5, and B5. The left hand accompaniment remains consistent with triplets and slurs.

190

Musical score for measures 191-192. The system consists of four staves: two for the right hand and two for the left hand. The right hand has a treble clef and a key signature of two sharps. The left hand has a bass clef and a key signature of two sharps. Measure 191 features a melodic line in the right hand with notes C#5, D5, E5, F#5, and G#5. The left hand accompaniment includes triplets and slurs. Measure 192 continues the melodic line in the right hand with notes A5, B5, C#6, and D6. The left hand accompaniment remains consistent with triplets and slurs.

191

Musical score for measures 193-194. The system consists of four staves: two for the right hand and two for the left hand. The right hand has a treble clef and a key signature of two sharps. The left hand has a bass clef and a key signature of two sharps. Measure 193 features a melodic line in the right hand with notes E5, F#5, G#5, A5, and B5. The left hand accompaniment includes triplets and slurs. Measure 194 continues the melodic line in the right hand with notes C#6, D6, E6, and F#6. The left hand accompaniment remains consistent with triplets and slurs.

192

Musical score for measures 195-196. The system consists of four staves: two for the right hand and two for the left hand. The right hand has a treble clef and a key signature of two sharps. The left hand has a bass clef and a key signature of two sharps. Measure 195 features a melodic line in the right hand with notes G#5, A5, B5, and C#6. The left hand accompaniment includes triplets and slurs. Measure 196 continues the melodic line in the right hand with notes D6, E6, F#6, and G#6. The left hand accompaniment remains consistent with triplets and slurs.
